Ah, for the good old days of IBM Big Iron with 64K core main memory in the ers before ICs were available and the "disk drive" had 128K capacity, was 2 feet across, and took 20 KW to operate and cool (early 60s).

Some one had better know how to write in assembly language. You do need to
develop ever advancing compilers etc and that may take some assembly
language programming even today.

Ah, yes. But those of you who advocate "self-policing" are the very ones who
take it upon yourselves to sometimes play "net cop" while you titter and
tatter about the poor operating procedures of others. This is, in itself, a
form of elitism in that a minority of ops willingly choose to castigate
others for operating procedures with which they do not agree. Beware of
"self-policing" and the resultant criticism of other ops...this, in the eyes
of many, has not the appearance of being friendly.
So far it would appear that "self-policing" is but a nice feel-good idea
with little merit and zero results.

Machine code, and the textual representation of machine code: assembly language
are the lowest normal level of programming (ignore microcode, etc.) The
ultimate output of compilers and assemblers is the machine code. There are other
ways of making computers do what you want also, including 'interpreters' and/or
'emulators'.

One first creates a bunch of 'source files' that contain the program instructions
(in high level language or in assembly code), and then apply the source files to
a compile/linkage process, or directly execute the program using an 'interpreter'.
Interpreter programs can either 'execute' the code directly upon parsing (reading)
the program statements, or can create an internal version (or somewhere in
between.) In the case of compile/link-type systems, they produce a program that
can be run directly on the computer under specific operating systems that support
I/O and other functions. The simplest forms of Java are a hybrid, where you
compile the source files, but you run a program that interprets the psuedo-machine
code as if it is a real processor (well, sort of...)

There are more than I list, but off the top, I can think of at least these four methods
of 'making computers do what you want':

1) Compiler/Assembler/Linker:
These take a higher level language (assembler is slightly higher level than
machine code from a representational standpoint) than machine code, and
produce runnable machine code. This is like using Microsoft-C or MASM,
linking the output with libraries, and produce an EXE file for NT/2000. A
similar thing is normally done on Unix.

2) Traditional interpreter:
The MS Basic interpreter that Billy and friend wrote would directly execute
the text of a program, but reparsing and executing the code statement by statement.

3) Less traditional interpreter:
AFAIR, Perl creates a compiled copy of at least a part of the program, but the
'compiled' output is an internal representation that is used as a set of instructions
for software.

4) P-Code compiler/interpreter
Java and the old UCSD P-System on a PDP11 uses an explicit compiler to
produce a file that is similar to machine instructions. The difference is that the
'machine instructions' are actually created for a formally defined software

interpreter for those instructions. In some cases, Java performance has been improved so that during the 'interpretation' of those virtual instructions, native (real) machine code is made available for future execution in a given running of a program. Even further, it is possible to 'compile' those Java virtual machine instructions into an EXE-type file that would be normally directly created by a Microsoft-C or Unix-C compiler and linkage process.

So, I hope this helps to clarify, but probably is 'too much' from the standpoint starting from scratch.

John

I agree that there is at least one 'Barney Fife' in every organization. However, it is
better that Ham radio be self-policed than to have the FCC crack down only against
things that they politically don't like. If ham radio is allowed to be a cesspool of
people who violate conventions, but technically obey the law enough to stay under
the FCCs radar, then that would diminish the hobby. I am not familiar anymore with
the ARRL guidelines, but there should certainly be some guidelines so that the 'net-police'
or the
'ham-police' people who have a little too much zeal can be helped back to
more reasonable attitudes. The various conventions and rules of etiquette need to
be taken seriously, and I seem to remember that even when I got my license a long
time ago that there were such 'conventions.'

It is much better that reasonable guidelines be instituted, and strong suggestions
be made in the guidelines that the spectrum is to be shared amongst HROs
according to the law and conventions. If there aren't reasonable guidelines, and/or
intolerant people who seem to emotionally need to be snobs, then the self
policing will sometimes fail. Frankly, from what I have heard, the current scheme
seems to work okay, but there'll always be those people with too much zeal!!! :-(.

People do tend to be cliquish, and I have made various such mistakes in
previous situations. It is important that the 'elders' avoid become
condescending or turn into control freaks.

I don't mean to compare hams with other community radio service participants, but I remember my Dad talking about various groups believing that they 'own' certain CB channels (this was back in the 'Convoy' days). It is sadly odd, if not almost funny to think that someone is so diluded into thinking that they can have dominion over a resource like that. Again, times have probably changed a little on CB, and I am not making that complaint about amateur radio (I am just seriously thinking about ham again), but even good people can become petit and cliquish in situations that lend themselves to that kind of behavior.

I really believe in ham radio as a great hobby for kids of all ages (including those who are retired :-)). Computers are great (and I am a very serious computer person), but I'd like to see ham radio compete for alot of the mindshare directed towards the CREATIVE parts of the computer hobby... (I am NOT confusing the computer WWW addict with the real computer hobby of developing tools and applications that do interesting things.)

Hopefully, I'll have collected enough info in the next week or so to be able to embark on a new hobby...

John

You've found the key word...HOBBY. Its not a job or political position
and and if its a PITA you can (and should) just walk away and do
something else. No need to hang out on a repeater/club/band/newsgroup
if the general attitude there is such that aggravates you and takes away
from the enjoyment. No rocket science and no Morse code unless you want
it that way.
Good luck,
Bill WX4A

I do agree with that. It would be good if the unecessary cost of entry to HF
'Morse code' could be removed (limited by treaty) however.

My interest in technical competence for HROs is based upon being able to
responsibly deal with and understand problems dealing with more than low
power transmitters. With high power comes more responsibility for local
interference and occupation of spectrum space.

I don't see a problem with Ham radio having a pure communicator class
license, where there is little or no technical or code qualification. However,
that class of operators should be limited to purchased gear at low power on
VHF/UHF.

VHF/UHF seems to be the experimenter's playground these days and the intl treaty doesn't prevent >30MHz licensing without code. HF will be sticky forever. You can work around the world with a watt on HF, and so can the garbage spouting out of an improperly operated rig, so the potential remains for interference to commercial services and thats why the Treaty is such as it is. Its not an argument that I'm going to try to hold my own on, however. I recall that Japan went to a 'communicator' license scheme back in the 70s-80s and no-coders were given privileges up to 20 watts on HF or something like that. The bands didn't turn into a zoo-like cacophony of echoes and roger-beeps. Maybe in Japan it did...I wouldn't know.

>
> I don't see a problem with Ham radio having a pure communicator class

> VHF/UHF.

Well, with any drastic change like doing this on HF, there has to be some enforcement mechanism or else the existing rowdy ranks from 26-28 MHz have a real potential to screw things up for everybody on all bands. The FCC got out of the ham bizness many years ago when they turned over 'licensing' to the ARRL. The only time they even bother with enforcement of the Amateur Radio Service is when some nut goes berserk on 75 meters or a repeater and generates a ton of specific complaints. I don't think they want to go back to the patrolling mode like in the old days where if you said s**t on the air you'd automatically get an FCC notice (and a dozen ARRL OO notices)...and I don't think anybody wants to see that. But opening up HF would require such vigilence and we would all pay the price.

Bottom line is that- 1) 5 wpm ain't all that tough and 2) outsiders looking in to the amateur radio service don't necessarily have the same perspective of those already inside. Pity that it translates into a we vs. them scenario but thats human nature.

I've taught code classes with a hometown club and its very clear that some people simply can't master it but would be 'good' hams nonetheless. I'm not going to speculate about mental blocks and all that but I can

vouch for the ones that would jump up in the middle of a code-practice session and yell out "I ain't puttin' up with this s**t" and storm out of the room, yet 9-year-old kids were able to pass muster. I don't think they'd behave that way at the Driver's License office, so yeah, there's some level of committment that makes getting into the hobby something to work at, even if it may seem archaic. These same 'examples' are the same ones that will also piss and moan about putting their real name and address on a FCC License Application form.

There's a framework in place that allows most anybody whose knuckles don't drag the ground to get a ham radio license. The people who can't accomplish this...well, go figure.
/end rant

(hand up)

You mean like a '360'?
Work all day typing punch cards, submitt them (hundreds) to the guy in the computer room, come back later and find the program crashed, back to the dorm for a debugging session, back to the computer room for more key punching, ad infinitum....

Those were the days. NOT! I'm surprised it didn't turn off an entire generation to computers. :-)

> > that I am likely to never use.
>
> Actually learning all about DSP is useless as it's built into the radio and
> I don't have to do anything.

Wrong.
If you knew about DSP, you could easily hook up the radio to your laptop
and program, for instance, a scan mode that stops only on the "voice"
channels, and not simply where the signal is strong.
You could build your own noise-reducing filters.
You could get a programmable radio (Ten Tec?), and modify the firmware.

What you are saying is a bit like saying: Hey, I don't need to
know how to solder, my radio comes already soldered.

The fact is that more and more of the radio receiver functions in the
future will be done digitally. There are two main reasons:
it's more flexible, and it is easier and more repeatable
to manufacture digital ICs than analog ones.
In cell phones, in cordless phones, everywhere that radio
technology matters, digital is more and more used.
If you refuse to learn digital signal processing, pretty soon you will
understand about 5% of how a receiver works; the rest will be digital.
Of course, you will still be able to use code on archaic equipment,
but amateur radio should look forward, not backward.

Peter

Amateur Radio Newsline™ Report 1318 – November 15, 2002

Amateur Radio Newsline report number 1318 with a release date of Friday, November 15, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is a lifeline after tornadoes hit on Sunday November 10th. Find out the details on Amateur Radio Newsline report number 1318 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND THE NOVEMBER 10th TORNADOES

Ham radio is called out after a series of tornadoes hit in several states east of the Continental divide. Thirty-five are confirmed dead. Damage is in the tens of millions. And ham radio becomes a life-line when all other communications fail. We start our coverage with Amateur Radio Newsline's David Black, KB4KCH, in our South-East bureau not far from one of the areas hardest hit:
--

For Alabama, the night of November 10th is one for the record books. The small town of Carbon Hill was devastated. Ten people were killed there, and damage was extensive following two tornadoes--one of them, an F3 that cut a path of destruction measuring 46 miles. In all, 12 people died in Alabama.

Two counties away from Carbon Hill, amateur radio operators were on duty at the Weather Service's Birmingham Forecast Office, where forecasters were issuing a total of 46 Tornado Warnings. The ham radio group that works with the Weather Service is called the Alabama Emergency Response Team, or ALERT. Chuck Arthur, KF4SSX, is ALERT's President:

--
Arthur: "It was very busy. We had four of our members down there from 4 p.m. until after 2 a.m. and we were busy the entire time we were down there"
--

At one point, more than half a dozen Alabama counties--stretching from eastern Tennessee to eastern Mississippi--were all under Tornado Warnings at the same time.

--
Arthur: "We are able to talk to all of the different storm-spotter nets across North Alabama and of coarse the National Weather Service coverage area and receive reports of damage, tornado touch-downs, hail and all of the important pertinent things that the Weather Service is interested in"

--

Arthur says emergency communications were conducted on VHF and UHF frequencies:

--
Arthur: “The storms came in from the South-West and moved all the way up through the North-East corner of the state three or four times in a row. We had multiple counties under tornado warnings at the same time so it makes it very busy”
--

To the north, Tennessee was slammed hard by killer twisters, too. 17 deaths were reported statewide, making the outbreak one of Tennessee's deadliest. President Bush declared 16 Tennessee counties disaster areas. From Louisiana to Pennsylvania, 88 tornadoes were reported.

Another community hit hard was Van Wert, a town in western Ohio. Fred Vobbe, W8HDU, of the DX Audio Service is in nearby Lima Ohio has that part of the story.

--
NOTE: DAVE BLACK TOSSES TO FRED VOBBE IN OHIO
--

Sunday was cool and quiet, but when storms racing across Indiana quickly it heated up the amateur community in Van Wert, Ohio. The call for amateur assistance came as Van Wert Ohio E.M.A. Director Rick McCoy, operating the Van Wert Amateur Radio Club's W8FY, alerted hams to an approaching storm.

The storm spawned one tornado in the community of Berne, Indiana, but by the time the storm arrived in Van Wert there were reports of as many as four separate funnels.

Listening to ham traffic on the 146.850 repeater and public service channels was like listening to an attack from enemy. Call after call relayed the fact that there were tornadoes on the ground. Homes, businesses, and even a large power feeder tower buckled and fell to the ground as the winds from the F4 tornadoes tore up the once pristine countryside.

The initial storm spotters tracked the storm system as it entered Van Wert county, and then exited into Putnam County where it then hit Continental, Ohio. Later the storm touched down again in Huron and Sandusky Counties on the south shore of Lake Erie.

At one point a ham radio operator solemnly reported assistance as he came across a fatal. Hams assisted in pulling people out of homes that were flattened. Four people died, two in Putnam, and two in Van Wert County. The death toll in west central Ohio could have been higher had spotters, and the Van Wert County E.M.A., not worked cooperatively together. Hams reported to the Van Wert E.M.A. and an alert system used by the county which warned a group of school kids who escaped from a theater just seconds before it was reduced to rubble, leaving a small Toyota in row one. Citizens had as much as 28 minutes to prepare for the storm due to the efforts of hams

Ham involvement did not stop with spotting. Again, working with the Van Wert County E.M.A., hams assisted in damage assessment, helped in local shelters, located downed power lines, kept traffic and the curious out of devastated areas, and assisted police, fire, and EMTS operators with communications. Some hams stayed through the night manning communication centers, which helped authorities concentrate on the task of finding the missing, and assessing the damage.

The storm was compared to the April 3rd, 1974, tornado in Xenia, Ohio, where 33 lost their lives. Had it not been for ham radio operators working closely with authorities the death toll in Van Wert and Putnam would have been much higher.

In west central Ohio, I'm Fred Vobbe, W8HDU, reporting for Newsline
--

You can see some of the damage from the storm at Fred's web site, www.vobbe.net/weather.

And one last thought: The tornadoes of November 11th are another reminder of the way a disaster can occur at any place and at any time. And when there is no other way to communicate ham radio is always ready to step in. (ARNewsline™)

**

RADIO HORROR: AMATEUR OPERATOR MURDERED IN GAMBIA

A United Kingdom ham has been killed while on vacation. And as Jeramy Boot, G4NJH, tells us, it appears as if he was the victim of a rather violent crime.

--
Ron Ford, G3NKO, has been murdered while visiting the Gambia. Ron, from Waterlooville in Hampshire, had built his own holiday accommodation in the Gambia, from where he operated as C56RF.

His body was found at the end of October and has been brought home for burial. It is thought that Ron was the victim of a robbery and the circumstances of the murder are now being investigated by officers of the Metropolitan Police.

Ron was an active member of the Royal Signals Amateur Radio Society, and was a regular check-in on the RSARS international net on 20-meters SSB from the Gambia. He had also held a number of other DX calls, including MP4BFH in Bahrain, MP4TBV from theTrucial States, VS2FN in Malaya and VS9AFR from Aden.

Jeramy Boot, G4NJH.
--

As we go to air there has been no word from Gambian officials on where its investigation of this crime is leading. (GB2RS)

**

RADIO SECURITY: BE CAREFUL WHAT YOU SAY ON THE AIR

Use discretion an the air and help defeat the terrorists. That’s the sub title of Bill Sexton’s MARS column appearing in the December issue of

Worldradio Magazine. And in it, Sexton, who holds the call N1IN says that American’s now face a new concern over the indiscreet transmission of material that my seem harmless but which could be used against us by a terrorist enemy.

By way of example, Sexton cites the well published airline schedules that were used by al-Queda terrorists to coordinate their September 11th attacks on New York and Washington. This is material still available on every airlines website.

Sexton says that we all must all be concerned with what the military calls Operational Security or OPSEC. And he indicates that it is very important for hams to consider what they are saying on the air because you can never tell who listening in. And he says that even the most seemingly innocuous tidbits of information, monitored by hostile ears are probably being handed on to the enemy’s intelligence analysts in the hope it will reveal some weakness or secret that can be used against us.

Sexton covers quite a bit about domestic security and how you can do your part. You will find it beginning on page 50 of the December issue of Worldradio Magazine. More information is on the web at www.wr6wr.com. (Worldradio)

**

SPECTRUM POLICY: FCC CHAIRMAN WANTS TO REVAMP THE NATIONS RF AIRWAVES

The government's top communications regulator wants to revamp the nation's current policy on use of the public the airwaves. Bill Pasternak, WA6ITF, has the details:

--
Federal Communications Commission Chairman Michael Powell says that he rejects the notion that there is not enough spectrum to go around for those who want it. And the FCC leader is proposing an almost total overhaul of the nations telecommunications policy involving radio frequencies used for everything from television broadcasts to wireless Internet devices and everything in-between.

Powell says he hopes technology and new FCC policies will take advantage of all empty and underused spectrum, possibly by using time sharing techniques. He says that recent tests conducted by his agency in five major U-S cities show that there are many under utilized spectral parcels available for sharing. This is especially true when some frequencies are used only at certain times of the day and are otherwise left empty.

What is evident is that the FCC is looking at ways to better utilize every hertz from D-C to light and beyond. And if a mandatory sharing of most spectrum is put in place there’s a good chance that all hobby and personal radio -- including ham radio -- will be sharing in some future yet to be established all-digital domain.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

The frequency bands referred to by Chairman Powell were not detailed in the news release. (Various FCC and other news releases)

**

SPECTRUM POLICY: AUSTRALIA ISSUES PAPER ON SPECTRUM USE

The United States is not the only place where spectrum use and bandspace is an issue. It’s also under study in Australia where Q-News Trevor Tague, VK4BAT, tells us what the Australian Communications Agency is doing:

--
The ACA has prepared a Discussion Paper outlining a range of issues relating to the operation of spectrum licensing and posing some questions for discussion.

The paper does not attempt to present the ACA's assessment of these issues but rather aims to provide a starting point for industry debate about the effectiveness of the spectrum licensing concept in the light of experience since its implementation in Australia some five years ago.

Trevor Tague, VK4BAT, reporting for Q-News.
--

The Australian Communications Agency is soliciting input on this matter from the citizens of V-K. (Q-News)

**

HAM RADIO EDUCATION: THE BIG PROJECT KEEPS GETTING BIGGER

Back here in the United States, the December issue of QST will feature an article on the American Radio Relay League’s Education and Technology program better known as “The Big Project”. And, according to an Internet posting to QRZed dot com by League President Jim Haynie, W5JBP, the program which got off the ground late last year grew to 26 schools in 2002.

When President Haynie proposed this project to the League’s Board of Directors, he said that it should be funded by donations, not dues. That’s exactly what has happened and he now says that he is gratified at the results to date.

W5JBP says that the Amateur Radio community has sent a loud and strong message that this is something that they want. He adds -- and we quote: “I, and the entire ARRL organization want to thank you for that support.”

At least 14 more schools are lined up to join the Big Project in 2003. The full text of Jim Hayne’s posting is at www.qrz.com. (Adapted from QRZ.COM)

**

ENFORCEMENT: WASHINGTON LAW NAILS SPAMMER

An Oregon man was ordered to pay nearly $100,000 in the first case brought under Washington state’s tough law against "spam" e-mails. Attorney General Christine Gregoire's office estimates that 28 year old Jason Heckel of Salem, sent as many as 20,000 unsolicited e-mails to Washington residents in 1998, trying to sell a $39.95 booklet called "How to Profit from the Internet."

The case was the first brought after the Legislature banned commercial e-mail with misleading information in the subject line, invalid reply addresses or disguised paths of transmission. Judge Douglass North ordered Heckel to pay a $2,000 fine and more than $94,000 in legal fees.

Heckel didn't appear in court. His lawyer Dale Crandall said he plans to appeal, Crandall says that state anti-spam laws violate the U.S. Constitution's protection of interstate commerce. (Published news reports)

**

ENFORCEMENT: OHIO HAM AGREES TO VOLUNTARY SUSPENSION

An Ohio ham has agreed to a voluntary one year suspension of his operating privileges. This after the FCC accused him of interfering with a Cincinnati area repeater system. The FCC’s Daryl Duckworth, NN0W, explains:

--
Duckworth: “The Enfocement Bureau, by agreement, imposed a one year suspension on Gary R. Weiler, KI8DI, for interference to the K8CLA repeater system in Cincinnatti. The interference occurred in March.”
--

Back in September the FCC sent Weiler a Warning Notice that alleged on several occasions he had deliberately interfered with the K8CLA repeater. That system is operated by the Cincinnati Amateur Radio Club which the FCC says assisted in tracing the interference to Weiler. By agreeing to the one year suspension Weiler avoided harsher enforcement action that could have included a hefty fine and the possible revocation of his amateur license. (FCC)

**

REPEATER COORDINATION: METROCOR SAYS COORDINATION IS BACK IN NNJ-NYC-LI

Repeater coordination appears to have returned in and around the New York City area appears. This with word that MetroCor has issued its first coordination documents on October 24th to repeater systems that have had no changes from their prior coordination.

This marks the first time for any organization to issue any coordination documents within the area since the collapse of the Tri-State Amateur Repeater Council several years ago. All repeaters in the New York City, Northern New Jersey and Long Island New York areas are being asked to file with MetroCor by

December 1st so that it can meet the submission date deadlines of the various repeater directories.

More information and necessary documents are in cyberspace at www.qsl.net/metrocor. (MetroCor)

**

RADIO LAW: COURT STRIKES DOWN DESCRIPTIVE VIDEO FOR THE BLIND

Bad news for the visually impaired. A Federal appeals court says that the FCC overstepped its authority in ordering broadcaster to provide descriptive video to accommodate the blind. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--
On Friday, November 8th the U.S. Court of Appeals for the District of Columbia Circuit threw out Federal Communications Commission rules requiring television programs to include these oral descriptions of the action on the screen. In rendering its decision, the court said that Congress did not give the FCC the power to order the creation of this service.

The court maintained that Congress only authorized and ordered the commission to produce a report on how best to accommodate the needs of the visually impaired. Nothing more and nothing less. And that it definitely did not direct the agency to create a federal mandate that a descriptive audio service be made mandatory.

Under video description, a narrator describes the action during natural pauses between dialogue. The description is available on the secondary or SAP audio channel which is usually used for second language broadcasting.

The Motion Picture Association of America had challenged the rules in court. It claimed that the FCC was not authorized to issue them. Now, the U.S. Court of Appeals for the District of Columbia Circuit says that it agrees.

For the Amateur Radio Newsline, I'm, Bruce Tennant, K6PZW, in Los Angeles.
--

Blind advocacy groups are criticizing the court decision. They say its a setback for those who are visually impaired. (Published reports)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

HAM RADIO BUSINESS: KENWOOD TO RESTRUCTURE

Some big changes at a company considered one of ham radios “big three. Ken Butler, W1NNR, tells about the news coming from Kenwood:

--
Kenwood Corporation is merging five U.S. based subsidiaries. As part of the restructuring, Kenwood will combine home and car audio marketer Kenwood U-S-A, its repair company Kenwood Service, Kenwood Communications and Kenwood Systems with their parent Kenwood Americas. The merged entity will simply be called Kenwood.

As part of the merger, Kenwood will expand its U.S. based home and car audio engineering team. The communications business which includes Amateur Radio products will continue to maintain its own sales and marketing staff. The consolidation won't shut down any offices or warehouses and the company plans to add people in an engineering capacity.

Ken Butler, W1NNR.
--

The changes here in the United States are a are part of a total Kenwood corporate restructuring announced earlier this year. (ARNewsline™ from press release)

**

OUR HERITAGE: KFBK AT AGE 80

Former Amateur Radio Newsline reporter Ross Du Clair, WA6VWY, passes along word that Sacramento California radio station has made history. This, as KFBK-AM 1530 celebrates its 80th birthday this month.

Ross is the Chief Engineer for several stations including KFBK. He says that his station began as the broadcast arm of McClatchy Newspapers in February of 1922. McClatchy is best known as the publisher of the Sacramento Bee.

Today KFBK is owned by Clear Channel Communications, of Austin, Texas. Over the years, KFBK engineers contributed many innovations to the radio broadcast industry. This includes the creation of the Ampliphase Modulation system adopted by RCA.

The station officially celebrated its "birthday" Friday 8 November 2002 at the Sacramento Hyatt Regency. The legendary Rush Limbaugh was to be the guest of honor. Limbaugh began his meteoric rise in talk radio from the studios of KFBK. (WA6VWY)

**

HAM RADIO IN SPACE: ISS EXPEDITION 6 ARE ALL HAMS

The new ISS Expedition 6 crew are all of licensed radio amateurs. They are U-S Astronauts Ken Bowersox KD5JBP and Don Pettit KD5MDT. Leading the team is Russian Cosmonaut Nikolai Budarin R-V3FB.

The launch of Space Shuttle Endeavour was planned for November 11th. It was halted only minutes before liftoff when a small oxygen leak was detected. A new launch date is tentatively set for Monday November 18th.

The STS-113 flight of Space Shuttle Endeavour is scheduled as an 11-day mission. During the seven days the shuttle will be docked to the Station, three spacewalks will be performed in addition to delivering the new crew. (AMSAT)

**

HAM RADIO IN SPACE: THE LEONID METEORS ARE COMING

Sky & Telescope magazine reports the Leonid meteor shower is due to sweep across Earth during the early morning hours of Tuesday, November 19th. If the weather is clear, we could be in for a grand celestial show. And many meteor scatter enthusiasts are expected to be on the air attempting to make contact by bounding signals off the ionized meteor tails as they burn up in the planets atmosphere. (Various sources)

**

INTERNATIONAL - CANADA: RAC VP RESIGNS

Radio Amateurs of Canada has announced the resignation of is First Vice President Joe MacPherson. MacPherson cited irreconcilable interpersonal differences with some members of the Board of Directors as the reason for his reason to stand down from the RAC Executive. A replacement for MacPherson will be named within next few weeks. (RAC)

**

CONTESTS

Turning to the contest calendar, word that the Bulgarian L Z DX contest begins at 12:00 U-T-C on Saturday November 16th and runs for 24 hours. This is a C-W only event taking place on 80 through 10 meters. The approved contest exchange is an R-S-T report and your I-T-U Zone. (GB2RS)

**

DX

In D-X, word that OH0Z on Aland Island will be active during the November 23rd to the 24th CQ WW CW Contest. He will be operating in the single operator, all band category. QSLs via Ari Korhonen, OH5DX, at his callbook address. (GB2RS)

And KX7YT is active on 10, 15 and 20 meters SSB and PSK31 as S-21-Y-V from Bangladesh. He will be there through the 4th of December. Q-S-L this one as directed on the air. (Modern DX)

Higher in frequency, the GB3VHF 144 MHz propagation beacon was removed from service on November 2nd for maintenance and was expected to be for one week. (RSGB)

And the GB3BUX 50 MHz beacon has suffered antenna damage due to storms a couple of weekends ago. It is currently running at reduced capability as a result. Its sponsor says that repairs will be made as time and weather conditions permit. (RSGB)

**

THAT FINAL ITEM: FCC HONORS WORLD WAR II COMANCHE CODE TALKERS

About a year ago Amateur Radio Newsline told you about a very special group of Native Americans who’s linguistic ability made battlefield communications secure during World War II. Now, the Federal Communications Commission has taken the time to honor this group for id dedication to our nation. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the rest of the story:

--
The Comanche Code Talkers were members of a specialized communications unit of the U.S. Army 4th Signal Corps. And using their ancestral Comanche language they created an unbreakable code used by Allied Forces on the battlefields of Europe. Now, decades later our own Federal Communications Commission has paused to honor this group of Native Americans for their meritorious service to our nation.

Charles Chibitty of Tulsa, Oklahoma was the FCC's guest of honor at the recent ceremony. He told how he and 16 other young men, who had grown up together and were all members of the Comanche Tribe of Oklahoma, used the Comanche language and their Army communications skills to create a military intelligence code that was never broken by the enemy.

Even more interesting, Chibitty also shared anecdotes from their enlistment and training. He explained that they even had to create Comanche code words for "bomber" and "tank." These are words that did not exist in the Comanche language.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.
--

Chibitty is a decorated veteran and the last surviving member of the 16 Comanche Code Talkers. You can read more at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228074A1.doc (CGC Communicator, FCC)

**

NEWSCAST CLOSE

I agree that 5wpm isn't all that tough for many people, but learning technical
competency with a REAL technical exam would be a better allocation of time
for newbies. Exclusive clubs based upon anachronisms isn't helpful. Exclusive
clubs based upon competency, public service and even creating a larger
'technical' gene pool isn't a perfect thing, but much more socially justifiable than
'secret handshakes' like Morse code.

John

And that's like saying "I only want to learn what I want to learn for my license test, and that doesn't include Morse code, even though it is a requirement".

> The fact is that more and more of the radio receiver functions in the
> future will be done digitally.

Only *some* receivers. Generally built in factories by electronic professionals, not your average homebrewing ham. Yes, those receivers are marvelous. And demanding of advanced technical skills not found in the general amateur radio population, nor likely to be found there in the future where testing requirements don't demand such skill and knowledge. That's to be expected since only a small portion of hams are professionals who have that advanced training and skill. Far more are skilled at such "archaic" but very effective communications modes as radiotelegraphy. Many of those hams also are users of advanced digital modes, but few are trained in the development of those modes. Most are just happy to be users of them. That doesn't mean there are no technical skills among the general ham population. It DOES mean that technical skills among hams are far more likely to lie in other than the latest djgjtal technology. I don't see that changing as long as simple tests are all that are required for entry into ham radio.
While new hams who are serious about learning to engage in their newfound pursuits, few have the background to leap onto the digital design bandwagon. I believe fact that will forestall any great amount of digital design work by hams other than the smaller portion of the hobby who are already so engaged.

There are two main reasons:
> it's more flexible, and it is easier and more repeatable
> to manufacture digital ICs than analog ones.
> In cell phones, in cordless phones, everywhere that radio
> technology matters, digital is more and more used.

The operative term here is "used". Hams are more and more users of advanced technology and less and less designers. Most design by ordinary hams is at a level of technology below digital design using advanced ICs. I can't imagine why this should be surprising to anyone. Bu it always seems to bring forth dire predictions for the demise of the ARS

because of it. Won't happen. Our future is far more dependent on our emergency communications capabilities, and that demands little or no digital design skill.

> If you refuse to learn digital signal processing, pretty soon you will
> understand about 5% of how a receiver works; the rest will be digital.

Only the design of the newest receivers. Pure digital radio is still far in the future, save a niche element which is normal for advancement in the field. Analog radio is far from being ill, and very far from dying.

> Of course, you will still be able to use code on archaic equipment,
> but amateur radio should look forward, not backward.

That's your opinion, shared only by other similarly situated technical types. Most of us hams believe we should look both forward *and" backward. We have a great heritage and most of us won't forget where we came from and how we got here as we move into the future.

They are not and never have been our governing body. They are merely the
largest ORGNIZED group of amateurs. Thus we can have some clout in the
political arena and get heard by government policy makers.

Note that ARRL did not "take over" testing duties. There are many VECs
accepted by the FCC. All the VEC organizations have to meet with each other
on a regular basis and agree to each question pool, how often that pool is
changed, whether it is multiple choice, etc. If ARRL had "taken over,"
they would be in sole control of the testing. They are not. There is W%YI,
SANDARC, and a half a dozen or more other organizations.

I've been a ham for 50 years and an engineer for 43 years and
I still can't solder a PL-259 to RG-213.

I was being sarcastic and trying to point out that the same argument can be used for anything that a person doesn't want to learn. Personally I happen to think that there should be more basics included in testing. For example, I think every ham should have to demonstrate that they can solder a connector to a coax successfully. However they don't have become soldering experts.

Check Your Stats:

On a per capita basis, the ham radio community is shrinking and going nowhere. And on a per capita basis, Japan has twice as many ham radio operators as the United States.

The ham radio community is 50 years behind the times by holding on to this code thing.

The ham radio community has a very negative public image, so women and young people wouldn't take part in a hobby that's dominated by semingly bunch of old farts totally lacking in basic social skills.

Would you want to spend a Saturday evening having dinner with a ham radio operator?

I don't think so!

Hey guys, it is 2002, not 1952.

That description of the Code fits the outsider viewpoint exactly. I'd
guess that more than half of the new 5 word-per-minuters cannot copy 5
wpm so there's hardly a secret society mentality. Last I remember the
code test was a multiple choice thing that doesn't even require solid copy.
So in some regards the code test is simply a 'trial by fire' and in
reality has been degraded so much as to be moot.
In the meantime, if int'l law says it must be done that way then I guess
one has to comply until it changes if you want to get on HF.

There's NO WAY IN HECK that this bastard Anderson
could have hid out for so long, without the help
and assistance of the so-called "patriot" community.

Perhaps the FED's and FCC ought to pay more attention
to a certain ham radio "Patriot's Net" (3.860 8PM EST),
since numerous transmissions and topics (by licenced and
unlicenced stations) were heard while monitoring this net
over the course of the past 2 weeks - and these topics
seemed to be *very concerned* on "activity" the same area of
N.C. where Anderson was caught yesterday. Coincidence??

Good job America's Most wanted. Good job BATF.
Good job and help by the ADL and Mark Pitcavage.

One down - MORE to go....

http://www.courier-journal.com/localnews/2002/11/23/ke112302s318493.htm

A tip received by ''America's Most Wanted'' and forwarded to federal
officials
led to the arrest of Kentucky fugitive Steve Anderson in rural
Cherokee County, N.C., yesterday, authorities said.

Anderson, a white supremacist who operated an illegal radio station
from his Pulaski County home, had been at large since allegedly
shooting at a Bell County sheriff's deputy on Oct. 14, 2001.
He was arrested in the mountains of southwestern North Carolina
by the Bureau of Alcohol, Tobacco and Firearms and the North
Carolina State Bureau of Investigation.

''It's a relief he's been taken into custody, especially without
incident,'' said Don York of the ATF's Louisville office.
York said the ATF captured Anderson entering a
residence, but he declined to elaborate.
Anderson was being held last night in Asheville, N.C.,
pending his transfer to Kentucky, authorities said.

York said the television program received a tip about Anderson's
whereabouts after airing its second segment on him about a month
ago. The tip was forwarded to the ATF, which worked the case
with North Carolina authorities.

Anderson is accused of shooting an automatic weapon at
Officer Scott Elder, who had pulled Anderson's truck over north
of Middlesboro for a traffic violation. Elder was unharmed after

Anderson allegedly opened fire, although his cruiser was struck about 25 times.

Police said Anderson then drove into the mountains, and a search of his property turned up explosives and guns. Anderson had attracted attention in Pulaski County several years ago by playing host to a small Ku Klux Klan rally during which a cross was burned. He also operated a shortwave radio station out of his home, where his commentary against blacks, Jews, immigrants and the federal government drew the attention of the Federal Communications Commission.

The Anti-Defamation League complained to the FCC about Anderson's broadcasts, and the agency eventually rescinded his license. Anderson continued to broadcast despite the FCC action.
Anderson was a member of the Kentucky State Militia, a civilian paramilitary group, until April 2001. The militia said it dismissed Anderson because he refused to shut down his radio operation.

According to the Anti-Defamation League, Anderson also has ties to the Christian Identity Movement, a loosely defined group that claims Jews are the offspring of the devil. Anderson also allegedly threatened an Eastern Kentucky newspaper editor who included him in a series on hate.

The ADL's director of fact-finding, Mark Pitcavage of Columbus, Ohio, said he was glad that Anderson had been caught, ''because he was a dangerous man who had already shot at a police officer and threatened more violence in his radio show. For public safety, it's a good thing.'' Pitcavage said the capture also was gratifying because ''people in militia and extremist groups *admired he wasn't caught*.''

Bell County Sheriff Harold Harbin said: ''It's good news. I knew eventually we'd catch him. It sends a message you can't get away forever.''

Just for the record, Bill, the code test was changed to fill-in the blank.

As a new ham (licenses 13 months -- I sat for all 4 elements at once), my feelings re CW requirements are mixed. It is certainly a key part of the history of radio and our hobby. It is certainly a valid communications mode. My objection to the 5 wpm is that it is basically neither fish nor fowl. Studying to pass a 5 wpm receive only test is not the way to learn code. A valid agreement can be made, in fact, that it is exactly the wrong way to learn code. (At 5 wpm receive only, the best way to pass the test as quickly as possible for many people is to "see" the di dahs in one's mind and translate character by character. If there is a worse way to learn code in a way that building receive speed and learning to send, I can not think of it.

Purely theoretically (treaties and such aside), I would have little problem with a send/receive test at a reasonable minimum speed (10 or the mystical 13 wpm) or eliminating the CW test completely. As currently constituted, the U.S CW test results, I think, in REDUCING interest in learning CW.

Regarding the written tests...
It would help if the VEC group found an educator to review the tests. I haven't looked at the new Extra question pool, but the old one would never pass mustard as a beginning Ed. course Too many of the wrong answers are clearly wrong merely by reading them without any knowledge of radio theory or regulations. Too many of the right answers have an easily memorized pattern. Please note that this is comment in no way addresses WHAT subjects should be in the test nor to what depth - merely a comment on the quality of the questions. That said, I do recognize that writing "good" multiple guess questions is extremely difficult.

Finally (for anyone bored enough to read this far), by far the most difficult task I faced in becoming a ham was learning to solder 259s. One aspect of voice communications I have yet to learn (more accurately "have not been willing to learn") is referring to my self in the first person plural as in "We have been licensed since 19xx and we feed our XX with a YY."

In the early days this was true, but not very much anymore.

Once you have a "high level language" compiler, you can write the next
version in the compiler language; these days mostly C.

Simple example; the GNU C and C++ compilers have been written in C and
C++ for many years now as have most compilers and operating systems.

While assembly is still used somewhat, it is nowhere as pervasive as it
once was.

Rickie -- depends on several factors -- power, antenna gain, height of
respective sites, frequency, obstructions.

For a guide to your question see URL:
http://www.artscipub.com/simpleton/simp.range.html

At more or less ground level to ground level -- a couple of miles.

However I have talked simplex with 50 Watts into a 5/8 wave antenna from
2,000 ft hilltop to another station 20 miles away.
At 5600 feet, one might cover up to 90 miles -- we have done this here in
San Diego.

Exam answer is probably line of sight.

It depends on the elevation of the sending antenna, elevation of the receiving antenna, power level of the sending station and sensitivity of the receiving station. In addition, tropospheric ducting and sporadic E can dramatically add to the range one can talk.

So unfortunately there is no simple answer to your question.

Under "normal" conditions, 2m is "line of site". What this really means is that the signal travels in a straight line. It doesn't get bent back to earth by the ionosphere or bounced like shortwave signals. It does not mean that you have to see the other station's antenna.

Exactly. Why should I have to learn about UHF techniques to operate
HF? Why should I have to learn the VE rules if I'm not going to be a
VE?

> Personally I happen
> to think that there should be more basics included in testing.

Actually, all of the testing now is the basics!

> For example,
> I think every ham should have to demonstrate that they can solder a
> connector to a coax successfully. However they don't have become soldering
> experts.

We've been this route before, but here goes:

First off, you'd have to define "coax" and "connector". Think of all
the variations, from RG-174 to Heliax, from SMA connectors to type N.
Would soldering RG-58 to an RCA phono plug be sufficient?

Who judges the quality of the job?

What about those who are physically impaired to the extent that
soldering is impossible or very difficult?

You'd have to deal with those who would point to the wide availability
of crimp-on connectors and automated assembly. They'd say that manual
soldering is an anachronism. Heck, the UHF connector has been around
for more than 55 years!

It's possible to assemble an entire amateur radio station without coax
or soldered connectors, too.

Most of all: Our licenses are for operating, not building or
soldering.

Actually our licenses are supposed to mean that we are competent to run our stations within the requirements of the FCC and that we are responsible for the quality of our output signal.

Thanks.

Well, as a GENERAL rule, 2M is 'line of sight'. But you can generally
get a bit more 'over the horizon', but not much. Thing is, if you can
see it, you can work it. If you can see a 'single ridge' that is only a few
degress out of 'line of sight' then probably there too.

Height is your friend. Power (primary or 'developed' like a gain antenna)
is also your friend.

I've worked from Ft Worth (with a 1/4 wave on the roof to my Kenwood
TR-2400 at about 1W) to my friend in Alabama. He was on an old Yaesu
HT with a duck. But he was also at 5000 feet in his Cessna.

Mike

Luckily, I haven't have to do one of those since college. Even then, it was only as part of an assignment to examine memory contents, so I knew what I was looking for. I hope I never have to use assembly language again - but I keep my Kip Irvine textbook handy, just in case.

Most people do not know about Ham Radio, but the overall image is negative. I went to a Hamfest with a coworker who was a Ham. What would the average non-ham think about Hams, if you invited one to a Hamfest?

You eat Ham, not have dinner with one. Already had dinner with Ham Radio operators, at one of the conventions. Hams are not normal. They are not extremists, but they are part of some cult. And it is a boring cult.

Check YOUR ststs, Tom. On a per capita basis, amateur radio is doing nicely. It is growing. Surprise!

> The ham radio community is 50 years behind the times by holding

The negative public image stuff--where can we find confirmation of it? The basic social skills part--that can be confirmed where? What kind of socially skilled individuals insults an entire group of people by calling them all "old farts"?

> Would you want to spend a Saturday evening having dinner with a
> ham radio operator?

My wife doesn't seem to mind having Saturday evening dinner with a ham radio operator. The folks who invited us to their home last Saturday evening didn't seem to mind either. I'd think most would rather have dinner with radio amateurs than with rap singers or the Clintons.

> I don't think so!

You don't think what?

> Hey guys, it is 2002, not 1952.

Yeah, and in a couple of months it'll be 2003!

knowing assembly makes you a better HLL programmer. a few years ago there was an online "contest" among friends to see who could write the tightest yahoo chat client. i wrote four clients... using compiler BASIC (one allowing inline assembly), C, C++, and MASM. many of the "C-only" guys [you know, the ones who constantly quote the ANSI (or ISO) C standards like they're the constitution] who bragged about how efficient C compilers were and how obsolete assembler is... could not put out tight code. the guy who put out a really nice C client understood both the hardware and how his compiler (VC++) worked. you can learn a lot by using a disassembler on the compiler's output.

i've heard all the excuses of why not to learn assembly: "assembly is not portable"... well do you plan on porting your code? code is often intimately tied to the gui and OSes API (ok POSIX). "it doesn't matter because we have a 2 GHz CPU"... fine, then go use VB instead... and that is exactly what is happening. why? because 80% of boxes run windows and people want it done yesterday. IMO learning C is easy compared to grasping the win32 api.

i like procedural over OOP because it approximates the hardware better... i prefer Dennis to Bjarne and both to Anders. Gosling and Meyer... don't even ask lol. Kemeny and his contribution were brilliant... he wasn't Einstein's math assistant for nothing... i have one BASIC compiler that is quite good. Craig is right: all languages have their place (of course that place might be the trash can j/k). C is very popular (try to find a haskell compiler for a PIC MCU) but for me it's a love/hate thing because assembler was my first language. Java is always being pushed and while it makes sense for some stuff (Servlets/JSP) it's a dog for general apps.

He used to check into the Liberty Net until
they tossed him out of the Net onto his ass
persona non-grata, for being too much of a loose cannon.
Anderson was an advocate of overt offensive
actions via firearms and/or explosives against
groups like Jews, Blacks and anyone else he
didn't like. (he was also a past leader of the
KKK in Ky in the 70's & 80's - go figure)
Too hot to handle for the Liberty Net.
If he did make friends with anyone
else on on ham radio, you can be sure
that anyone who latched onto this complete
nutcase was just as much a cukoo-cukoo
bird as he was/is.

Everything depends on where you - and the other guy - are. If you are on a hilltop and so is he - with nothing in between - it can be quite a way on very low power. This is easy in some metro areas like Pittsburgh - due to lay of land.

Over a campfire the other night,
I found out another scouter was a ham -

We were talking about call plates,
and he said that he thought the original reqs
were that the vehicle had a "radio" installed -

This was one of those historical discussions....
We thought - in the old days - before 2way, cell, etc..
that the hams would provide emergency communications,
and the quick way to identify them was their call plates -
Now if you didn't have a working radio in the car,
well - kinda defeats the whole purpose of the call plate -

Phil -

It varies by state. Plates are state issued. When I lived in Texas
I had call plates. I had to present a notarized document that
stated I had HAM radio equipment installed in the car. Didn't
matter what equipment. I had just an antenna, as I used an
HT at the time.

I lived on Long Island before I became a HAM, and I remember
when I changed my license over, there was a question in the 'MUST
answer' area that asked if I was a HAM. Then there was a
follow-up question that asked if I wanted HAM plates for my vehicle,
but didn't list any qualifications on installation.

In Mass, HAM plates are more of a 'special vanity' plate. They cost
extra, so I don't bother, but I don't believe they have any requirement
here.

Mike

5029. Motorola M1225 Questions

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-24 17:42:04 UTC
From: CABBYE <cabbye@cox-internet.com>
Message-ID: <3DE10F6C.14C8F870@cox-internet.com>
Source record: 71772

Just got a previously loved Motorola M1225. However, no manual was included. What is
the key (marked with a "Z") just below the channel control for ? Even if someone has a
"quick" overview of the operation, that would be MOST APPRECIATED !!

Is the software available for the M1225 or do I have to go to a motorola dealer? (RIB and
cable are not a problem)

Thankfully, the radio is programmed with the channels that I want, but the YoYo that
programmed it did not give me ANY features such as Scan or High-Low power and no
DPL/PL. (Maybe he did and I just do not know which combination of buttons do what)
The only thing that I've discovered is > B button changes the back ground light from red to
green and the "Z" button makes a tone but seems to do little else. A and C do nothing that
I can detect other than button A turning squelch on/off . (power is 35W and will not change...I put it on a Bird watt meter) The rest of the controls seem to be the obvious stuff > on/off - volume and the channel changing
rocker.

One last indulgence of your time, can anyone suggest an affordable yet good performance
base station antenna for 450-470 Mhz ? I would like to keep it under $200.00

In advance, Thank You for your time!
Kindest and warmest Holiday Wishes to All !
CAB

In Indiana one must show his/her Ham license to the BMV clerk when applying.
The plates cost an extra ten dollars over the 'regular' fees and must be
reserved six months in advance.

5033. Happy Thanksgiving!

Just wanted to wish everybody a Happy Thanksgiving!

Leaving early in the morning to goto see family.

Got my Icom R-2 and DX-398 for SWL'ing!

Even taking my HT and checking out some MURS action too!

Have fun!

R75 Man -- I took my DX-398 and matching antenna on vacation last month to Northern California and picked up all the biggies on SW + lots more.

On the Ham bands - 10M SSB heard Greece, Italy, So Europe -- later Asia, Pacific including Easter Isle. Great Combo the DX-398 and its 23 foot external Antenna.

Happy Thanksgiving from San Diego

In California, one must submit a copy of the amateur license with the application (one time fee) and wait 6 months for processing. There is no requirement to have equipment in the car. These applications are actually processed only in Sacramento, and from what I have heard, they actually check the FCC database before issuing the plates.

The amount of the fee has been adjusted a few times since I got mine.

I don't think you have to have gear in your vehicle here in Michigan. Here, they're considered vanity plates so they cost extra, but if memory serves me correct, I think you have to show proof that you're a ham. I've had a transfer the plates to three different cars (damm accidents keep totally my rides!), but exceept for my first car, I've never had gear in them, nor have I had been required to provide rigs in my cars or explain what rigs would go in my cars if I was to put the in anyways.
Although I did have an intersting incident one night were my vanity plate saved me a trip to the clink. Late 1 night, I was goign to go visit a friend. She hadn't gotten out of work yet, so I sat in my car on the side of her street in front of her apartment. I plugged in my 2 meter HT and scanned around the repeaters to see what was happening. Some of the freqs in my memory were the police ones. A cop just happen to cruise by turns aroudn pulls behind me and flicks on his lights. He comes up to my car just as my HT stops on the police channel. So naturally he flips out about me having a scanner in my car. I try to explain it was a 2 meter HT and I'm a ham. If some shaggy 19 year old with belly length hair, tattered jeans, and a Dead Keenedy's t-shirt told you he was a ham radio operator, I'm willing to bet not many of you would believe him. This cop didn't. Luckily for me, I had my call sign vanity plates on my car, and some how that convicned him. I know some hams who won't get vanity plates because they're afraid that even if they daon't have gear in their cars, their cars will get broken into by scum looking to steal something for money.

Just wanted to wish everybody a Happy Thanksgiving!

Leaving early in the morning to goto see family.

Got my Icom R-2 and DX-398 for SWL'ing!

Even taking my HT and checking out some MURS action too!

Have fun!

Welcome to Ham Radio.....I find that simplex transmissions and repeater transmissions are usaully enchaced at the change of seasons ie. spring and fall. A great web site that I use to predict when there may be an opening is the Hepburn site http://www.iprimus.ca/~hepburnw/tropo.html

Give it a look and enjoy!!

Here in Tennessee, you have to fill out an application, send it to Nashville with a copy of your license. It comes in a few weeks to the county clerks office. No extra money for the plates. BTW, I don't remember if you need a copy of an ARES or RACES card at the same time or equipment in the car. I do have equipmet and an alarm system.

TRW Goodies for sale......

I have lots of items for sale please view them below. I will take them to TRW swapmeet on SATURDAY November 30, 2002. The TRW swapmeet is in the city of Redondo Beach, CA. Time 7:00 -11:00 AM. LOCATION is on the corner of Marine Blvd, and Aviation Blvd.

I have for sale some Handheld, and Mobile radios MOST of them have only been turned on once or twice.
EXCELLENT condition.................

Icom 207 H 144/440 MHz mobile transceiver with original box "LIKE NEW" $220.00
Icom 2000H 144 MHz mobile transceiver with original box "LIKE NEW" $100.00
Icom 281H 144 MHz mobile transceiver with original box "LIKE NEW"...$100.00
Icom V68 handheld transceiver with original box "LIKE NEW "....$100.00
Icom T7A 144/440 MHz handheld transceiver with original box "LIKE NEW"...$120.00
Icom W2 144/440 MHz handheld transceiver with the original box in good condition...$100.00

Radio Shack HTX-202 144 MHz handheld in the original box "LIKE NEW"...$90.00
Radio Shack HTX-204 144/440 MHz hanheld in original box "LIKE NEW" ...$150.00
Radio Shack HTX-212 144 MHz mobile radio in original box "LIKE NEW"...no mic $80.00
Yaesu FT-2500 144 MHz mobile radio in original box "LIKE NEW...$100.00

Kenwood TM-255A 144 MHz all mode transceiver in original box "LIKE NEW" $450.00
Kenwood TS-790A 144/440/1200 MHZ all mode transeiver very good condition $1100.00, and it does have the 1200 MHz module.........

Heathkit SB-221 amplifier is nice condition $485.00 with heavy duty box

Collins 312B-4 winged emblem station console great condition...$250.00

Bird 250H $50.00
Bird 100H $70.00
Bird 100C $50.00

Yaesu SP-102P Phone Patch/Speaker.....$89.00

Yaesu FC-707 Antenna Tuner...........$90.00

aesu "Brand New In The Box" MR-7 Rack for the FT-707....$30.00

Yaesu "Brand New In The Box" FRB-707 Amp/Relay.....$29.00

Yaesu FV-101Z FT-101ZD Matching External VFO.....$75.00

Yaesu FF-501 TVI Filter.....$20.00

(2) Yaesu Landliner Speaker/Phone Patch.....$50.00 each

Ten Tec # 4229 antenna tuner $99.00

PAL 120+ 12 Volt Tube Amplifier.....$70.00

PAL KW-1 SWR/Watt Meter.....$30.00

Heathkit SB-614 Scope.....$80.00

Mirage B-108 2 Meter Amplifier 10 watts in 80 watts out.....$75.00

Bencher Keyer BY-2.....$60.00
"It sell NEW for $125.00"

Ham Key $40.00

Heathkit SA-5010 u Matic Keyer...$4000

Nye Viking Straight Key....$40.00

AEA MorseMatic....$65.00

MFJ - 1278 TNC, Multi-Mode CW,SSTV,FAX,RTTY,AMTOR,ASCII, NAVTEX, CONTEST
MEMORY KEYER.....$89.00

(2) MFJ-1272B TNC/MIC Switch.....$10.00 each

Heil HM-10-5 Desk Microphone Wired For Yaesu.....$70.00

Rig Blaster.....$50.00

Trickery in the numbers.... I can make those numbers "say" one thing, as you can have them "say" another.... Accountants do that on a daily basis.... Overall, there are not enough new hams coming into the ranks that will be needed to replace/fill-in the spots that will invariable happen due to death of the larger percentage of current hams, that being the 45-75 age group. Within 10-20 years, we will lose a good chunk of that age group either to accidental or typical health related issues.

Whether or not someone wants to argue the incentive licensing issue, or not, the whole thing won't do a darned bit of good, unless there is the public's knowledge about ham radio.

We have a generation of kids that are used to the overwhelming sensory
experiences of video games, and even the WWW. In order to gain more
participants, it seems to me that the issue of 'attractiveness' is more
fundamental than the licensing qualifications.

In a way, it makes little sense to decrease the qualifications if they are
already so low, and even that slight impediment is stopping participation.

People today have so many opportunities for day-to-day communications,
that there is even a bit of a movement to hide from the on-demand
communications distractions. Ham radio already has alot of competition
from other communications systems. I am not claiming that current
communications systems are equivalent to Ham Radio, but because there
is a little bit of a 'dream' that is satisfied by Cellular or the WWW (for
example) that makes the results of Ham Radio superficially less exotic
and appear to be less of a challenge. (Of course, that isn't quite true,
but appearances are sometimes more important than reality.)

Ham radio will tend to draw more interest when it can provide a compelling
and glitzy 'features.' This is a difficult thing to decide, because some of the
'best' glitzy things to do might take LOTS of bandwidth and/or might not even be
applicable to ham radio.

I suspect that there are the 'ham radio' club marketing (e.g. ARRL) are
trying to figure out some killer applications for the hobby. Of course, it is
a different kind of killer application than 'Spreadsheet', 'Video games' or
somesuch, but I suspect that there is something out there.

Ham radio already has SOME applications (contests, emergency communications,
casual communications, electronics hobby), but additional *generationally relevent*
applications need to be found.

From what I see on the outside, Ham Radio isn't dying, but given the powerful
tools available, it seems odd that more appropriate high visibility hobby
applications havent been found (or publicized much.)

John

Secret handshake....I had a good laugh over that one. Good
grief...Nothing has ever been secret about morse code. And the funny
part is we hams had nothing to do with implementing a code test. Also,
the license exams are not "know everything or else" types of tests.
They are just meager entrance exams. The usual ham learns much more
AFTER he gets a ticket, not before. Also, it takes many years to learn
all that can be learned about radio, or whatever else related to the
hobby. If thats even possible. I've been farting with this crap for 31
years, and I've still got a long way to go in order to even think I
might know all I need to know. The reality is most will never catch
up. Same with computers, and coding. I've done quite a bit of software
work in regard to flight sims over the years. If I drop out and rest
just for a few months, I fall so far behind the "envelope" that it's
hard to catch up again. The technology progresses that fast. It
progresses almost weekly. When I took my ham test, code was a non
issue. It was part of the test, and you learned it if you wanted a
ticket. Pretty simple really. If they drop the code test totally in
the future, fine. But until then, a 5 wpm test is required, and
whining about it here is not going to make it go away. Sheesh...It
wasn't long ago that 13 and 20 wpm were required. The code whiners
should count their blessings...To me, 5 wpm is no-code for all
practical purposes. It's too slow to be of much use on the air. :/

Yep it has, Mark. W5DXP and W5FQC were the only individuals in
Madisonville High School in the early 50's who knew Morse Code.
We used it quite often to send secret messages that our teachers
couldn't understand and hardly noticed. It was particularly useful
during exams and double dates.

Here in Alabama, you only have to show your ham license. Only problem is YOU have to show you license, which means *I* have to go get tags every year, not my non-ham wife. Once you do that, they give you a temporary tag and in about two weeks (although they say it'll take 30 days) get your metal tag.

Also, you only get to have one set of tags per ham license. Since I have two cars one has regular plates, the other has my ham tag. Yeah, I know I couldn't have my callsign on both, but on the second my call with a -1 or something would have been nice. It's only an extra 3.50, which is quite reasonable, compared to 50 bucks for a vanity tag (ugh).

NEVER, NEVER AGAIN POST a link like this when I have been drinking. I
nearly choked and passed out from laughing and gasping for breath.

Lloyd,

Enjoy your family reunion and the chance to listen to HF
from a new location.
Be sure to tell us about any new catches.

Don't forget to say a prayer for/keep in mind those who are
less fortunate than yourself, as befits the Thanksgiving
season.

73,

Ross
-- who thinks Thanksgiving is the best holiday. Not only do
you get to pig out on great food without feeling embarassed,
but the commercializers haven't figured out a way to strip
it of all meaning to make a buck yet. :)

5062. FS: Diamond SRH-519 & SRH-805 HT Antennas SMA Mount. 144/440 Dual Band

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-26 10:31:44 UTC
From: frank@damato.com
Message-ID: <1276490d.0211260231.357e3eba@posting.google.com>
Source record: 71706

Selling each antenna for $20 (includes shipping price). Antenna's are brand new, still in original yellow plastic cases. I have no need for them. Received them in a swap. you can see a picture of them at www.frankdamato.com/diamond.jpg

I Accept Paypal as Payment

The Diamond SRH-519 is an HT antenna for 2 meters and 440 MHz. It is 8.5 inches (21 cm) tall. This flexible antenna is black. Gain is a 3 dBi and it can handle up to 10 watts. This antenna terminates to a 50 ohm SMA. It is also very effective as a receive antenna for these bands: 150, 300, 450 and 800 MHz.

SRH-805 Diamond 2m/70cm SMA Low Profile Helical * Tx: 144, 430 & 1200MHz * Rx: 150/300/450/800/900MHz * 10W Max power handling * 1.75 inches (4.5cm long) * SMA fitting
Extremely low profile, yet provides transmit (Tx) capability on three bands and offers useful wideband reception.

Apparently there is more than just the freeband that the FCC is ignoring.
Their interest is in big money (broadcast companies).

I have an Icom 47A 440 MHz mobil radio. This radio is about 15 to 17 years old and still working. I contact ICOM and they say it will take over tow weeks for them to research the info for me.

Does anyone here knows where the Discriminator output is? I need to know where the audio discriminator is located so I can add a sampling simplex autopatch into it.

If you know please email me directly... n7ym@n7ym.net

Thanks

William

When you work with slightly sub standard equipment
and antennas, you notice things that are not always
apparent to the normal operator.
There is things that become major factors that are hard
to quantify.

One of the most intriguing things is the affect that
you radio's name has on the propagation to your site.

I have seen it to many times to dismiss it.

I can listen to someone talk for an hour and i finally
decide to make a contact with him.
I usually always get him on the first try or the third try,
But never the second try.
I don't know why but the second try never works.
The radio waves go to some big dummy load in the sky.

When i make contact with him my signal is always strong.
My signal report stays the same when i tell him I'm running 25Watts.
The QSO will proceed along fine until we sign off.
But If i tell him the radio is an HTX 10 rat shack radio.
The next response i will get usually has the term QSB in it.
And in a few seconds, his signal will start fading too.

I also have A HW 101 which is my main HF rig.
The affects it has on propagation is also veery strange.
It seem that i can always walk on pileups with the
120 watts that it can push with the Mill spec 6146's in the
output stage, but i can never make contact with someone that
wants to talk for more than a few seconds.
It's just the RST, name, and location, then he goes to the next one.
Anyone that is having long conversations with other people
can never hear me.
And the only country that i can't walk on the pileup
and make the contact is Japan.
That one has really puzzled me.
I can work Europe and Russia with no prob.
Africa and south America comes in clear but Japan is no go.
I can hear them fine but something isn't coming together somewhere.

I haven't been able to quantize the factors causing it.
I have my old P133 pounding away at the variables as i type this
but I'm thinking about pulling time one a cray machine to
speed up the process.

My best guess to this point is the problem affecting the HTX 10
is the ether molecules don't like accepting RF from such a
cheap and pathetic CB knock off that only cost $89 new.
It doesn't have any history behind it and it doesn't meat top of the line specs
so they aren't going to waste their time helping it.
They don't act biased against it until they hear what it is, then
they go on strike and the quantum transfer function goes to hell.

I think the HW 101's problem is it's been used on pileups
and contest to much by the previous owner.
It's got into a pattern and it's sticking with it.
It won't even entertain the idea of a brick key conversation.

The problem with Japan is pretty obvious.
The 6146's have a bias against Japan so they aren't going
to help me talk to them under any condition.

The solutions are obvious.
I will have to refrain from telling what radio
I'm using when I'm using the HTX 10.
Or I'll say I'm using the old heathkit HW 8.
The ether will work double time to carry my signal then.
I'll be able to WAS in under a week.
All I'll have to do is make up a little cloth cover for my radio
to make it look like an old HW 8 if the radio gods come to check.

As for as the HW 101 goes, i will have to trick it into some long
conversations until it gets use to the idea.
And when i contact Japan I'll have to say that I'm talking to
japar or something, That way the finals won't get suspicious.
All thou the person on the other end may think I've lost it.
(Of course they already do, so no harm there.)

Or i could crank up my Hallicrafters HT 18 or SX 96 and run
a few days of brass pounding CW to appease the radio gods
so they will let my HTX 10 signal through un hindered.

Or i could crank up my HW 12A single bander heathkit radio
and run it a few days to earn some brownie points with the radio gods.

I'm currently trying to find out what the best type of radio would
be to get the ether stream to help me the most.
Once i find that, I'll start making radio covers to make any
radio look like that, then the band will always be open and
everyone will have a 599 signal report.

And some accessory things i will sell is little tape on things
to go on your coax.
It will look like the coax is spliced together
with bobby pins and duct tape.
That will be good for a few good S units from the radio gods.

The antenna i will sell will look like a peace of 1/2 inch cooper
pipe with plastic pipe couplers at the joints but it will have

a full matching network inside with modern high strength
nylon and fiberglass insulators inside the plastic PVC joints.
That will worth a good 8 S units from the radio gods.

This is N9WOS, And 73 to you and happy holidays to everyone.
^o^

5069. Have the Wise Ones annointed YOU?

Newsgroup: rec.radio.amateur.misc

Wise Ones live in the depths of the D, E, and F-Layers, and in the servers at
google.com. They are the descendants of the Gods. I personally subscribe to
the theory they are the children of Thor Heyerdahl, the Viking god of Thunder
and Balsawood Raft Dxpeditions. But that's another story.

The Wise Ones control everything that happens on the air and on the Usenet,
but they can't police every pileup or every newsgroup by themselves, so every
morning, just before daylight over Katmandu, the Wise Ones select the "Mostest
Intellegentest DXer" in their layer and convey upon him the title INFLICTOR OF
HIGHER MORAL HARANGUES. This title and its duties last until the following dawn
on Bouvet, if someone is there to observe the sunrise. Otherwise your duties end
when K2ASP gets tired of your crap and sends his lawyers with a gag order.

If you are ever chosen you will know because a representative of the Wise Ones
will anoint your temples with oil from a thirty-five year old bottle of Dr.
Guano, collected on Ocean Island by VR1L in 1966. For that day you will be known
as The Chosen. Your duties will be to seek out those that don't things the way
you do them (in other words, the right way.) When you find them, it will be your
duty to correct them.

Think about it...too wide, too weak, too slow, too fast, what's your call admit,
wrong VFO, rotten fist, poor pileup control, wrong band, wrong QSL route, you
timed out the repeater, wrong lingo, not enough green stamps, you're in the DX
window, no-coders not allowed, coders suck, ... They're all yours.

When you find these wayward ones, you will lumber onto their frequency, stand up
in your operating chair and shout, I AM SMARTER THAN YOU, SHUT UP AND LISTEN.
You will now have the wayward one's undivided attention. He will think about

this very briefly, then yield to your superior intellect. He will be very receptive to your thoughts and point of view.

Lecture him and proceed to the next wrong doer.

Now for the sad part of this tale. There are pretenders and charlatans out there
who try to usurp the rightful powers of The Chosen. To you villainous few, I say
beware. The Wise Ones also created BAWA (Baddest Ass Whats Around). No matter
how bad you are, BAWA has the ability to be badder. You will know when you start
your lecture and Bawa yells back, "You're a jerk, but I'm a bigger one. LET'S
ESCALATE".

And you will have no choice.

But soon BAWA will tire of you and sink your little balsa boat. As you slip under the surface you will yell, "BUT I WAS RIGHT, DAMMIT" and you will once again prove the ancient mariners axiom -- AN OPEN MOUTH TAKES ON WATER.

Do tech positions pay over 6 dollars an hour yet?
People make more money collecting garbage or working at McDonalds.
They get more benefits, too.
I'm surprised anyone becomes a repair tech anymore.

Go pedal your spam elsewhere bozo. Now all of a sudden people have to be rightwing kooks to have a hobby like SWL? I don't think so. Many liberals find the American Media far too conserveative now and days and turn to SWL for news from a different country than our own.

Some people just don't know how to think before they speak.

Yeah, it's what I wanted, but the hunger for it has passed by. I still
listen a lot, since I can do something else while doing it. If I have
the cash to buy an HF rig, I won't buy it, I will buy a new PC,or upgrade
one instead. Maybe that will change someday, who knows...

I agree. Some folk just got
shit-fer-brains. (mostly republicans of late)
The GOP constantly promotes
freedom of choice. (unless a unwed mom's
fetus is concerned of course...)

You can also get Kriegsmarine Georg":

http://www.actionfiguresspain.com/wwiileaders/georgcaps.htm

"Kamakazie Pilot Hiro Hosushi":

http://www.actionfiguresspain.com/wwiileaders/jap.htm

"Baron Von Richthoffen":

http://www.actionfiguresspain.com/wwi/baronrojo.htm

..or even BUFFY the Vampyre Slayer!! (I kid U not..)

http://www.actionfiguresspain.com/chicas/buffy.htm

I just wish that I'd thought of these
"Action-Figures" first - what a cash
cow this could be for the creators!

Finally, can't you really *just imagine* George W Bush
locked away in the Lincoln Bedroom at 2 AM, with the
whole Action Figures collection and some GI Joe's
spralled out on the floor...and GWB (in his Texas bunny pajamas)
playing war games like an 8-Year Old...????

Comedy Central Networks or Late Nite should get a set
of these dolls (along with a Saddam Hussen and Bin Laden figure)
and do a comedy bit/sketch along these lines......a real laugh-so-hard-
you'll-pee-in-yer-pants fer sure!

Happy Holidays!
I am totally unfamiliar with any type of radio knowledge BUT need help from someone who is!

My pops wants a radio that he can use to listen to sports broadcasts around the country (USA). He is sick of listening to the announcers for the major networks and would like a radio that would pull in signals from long distances.
My question for the group is: HELP! What do I get him? Are we talking shortwave, broadband, digital satelite? What kind would you like of someone were gifting one to you?

Your input is greatly appreciated. :-)

Peg

"If anyone knows, it'll be the amateur radio operators," I thought to myself, when trying to puzzle out this problem. You see, I want to adapt musician's in-ear monitors -- the kind that dampen something like 25 dB of sound -- for use in the private aviation context. I have come to learn that a small airplane panel expects something in the neighborhood of 150 - 600 ohms from the headsets plugged into it, while the standard musician monitor perhaps has an impedance of 16 - 25 ohms. So I need to match it up, and I'd like to do it as cleanly as possible.

Radio Shack has a device that'll take you from 8 ohms to 1000 ohms*, while Sporty's sells a bulky device** to match up things perfectly. Ideally, I'd like not to have an adaptor like Sporty's sitting between the panel and the headset, because it adds another place where the plugs can fall out, and I'm not sure the Radio Shack device fills the bill. Oh...one more thing, I'm going to have to rig up a microphone to boot -- a special one that mimics the carbon mikes of "yore" -- with all this stuff.

Anyone have any ideas of the best, slickest, cleanest way to put together such a headset?

Interesting, thanks. For clarification, it should be stated that the figures represent U.S. licenses, not world-wide. I wonder what those numbers look like.

Story in the gay steam baths is that Roger Wiseman finally passed away and
lifted off to the ultimate reward in the sky.
Does anybody know if this is true?
Or did he finally have somebody sign the papers to have him placed in a
mental health facility where he should have been so many years ago?
Either way I guess it doesn't make much difference.
He's gone, and for that we can be thankful.

Like that means anything. ARNewsline had a story on indian code-talkers almost two weeks ago, but they couldn't get that correct either. They said it was the Cherokees during WWII, while everyone else knows that it was the Navajo, a completely separate and distinct tribe. That's not the first time that ARN got things wrong. Don't forget that ITF pays himself a salary for writing these reports - how else could it cost $1,000.00/month, while the competing service in NY does it for $100.00/month?

>and the FCC itself seems to have remained silent on its own web pages.

However, the FCC would be the authoriative source. Once a week, they do zip up the entire amateur database for download. Why don't you download it (it's only about 58Mb compressed) and count the records yourself? Don't forget to exclude all the expired licenses within the grace period which are still in the database.

ftp://ftp.fcc.gov/pub/Bureaus/Wireless/Databases/uls

It may be in a subdirectory from there. The daily updates are in a subdirectory of the above URL called "./daily". Somewhere, there is also an HTTP interface to download the files too.

Was getting $7.50 USD / hr in 1980 when I read in a 2 way trade
magazine that if you're smart enough to fix 2 way radios, you're smart
enough to get a college degree. Believed them. Graduated from
University of Toledo's engineering college several years later.

Just no reason for _anyone_ to be repairing 2 way radios for the sort
of chicken feed that it customarily pays.

: it wont come back on! please help, did i burn out the mainboard? blow a
: fuse? -Frank

What frequency was it converting?

5117. Signal/One Milspec 1030ci info/service

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-28 21:37:34 UTC
From: Bill McClatchey <billmcc@speedfactory.net>
Message-ID: <rVvF9.12933$1g.6492@FE05>
Source record: 71660

I acquired a Signal/One Milspec 1030ci, s/n 0691588, over 5 years ago, and have been quite pleased with it. It has worked flaslessly for over five years, but recently I have had some difficulty.

I have been unable to locate the manufacturer, and can only assume he is out of business. There is scant information on the net concerning this radio. Does anyone know the location of the manufacturerer, a successor entity or someone or organization that has the ability to service the radio? I understand this model was adopted for use by the military at some point, but do not know the detailed history.

Any help would be greatly appreciated.

Bill, KK4C

I agree. I'm surprised this work hasn't been farmed out to
Mexico or some other such place. $6 an hour is good pay there,
and you'd be giving one Mexican family a reason to stay in Mexico.

Amateur Radio Newsline™ Report 1319 – November 22, 2002

Amateur Radio Newsline report number 1319 with a release date of Friday, November 22, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ohio's Governor praises hams for their November 10th tornado response and self enforcement really works. Find out what we mean on Amateur Radio Newsline report number 1319 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HIGH PRAISE FOR TORNADO HAMS

Some high praise for Amateur Radio from some high ranking Ohio state officials. This following last weeks deadly tornado that hit the town of Van Wert. Bill Pasternak, WA6ITF, tells us how the accolades came about:

--
Ron Moorefield, W8ILC, is the West Central Ohio ARES District Emergency Coordinator and well known throughout the area for his work in emergency communications. And on Wednesday November 13th Moorefield says that he spent time in the Ohio Emergency Management Situation Room with Govenor Bob Taft and Ohio State E-M-A Director Dale Shipley.

Moorefield tells Amateur Radio Newsline that both men stated without any reservation that it was the volunteer efforts of the regions ham radio operators that really saved the community of Van Wert on November 10th. This, through their efforts in the Skywarn program and providing early warnings. W8ILC adds that both men had a high praise for all aspects of the Amateur Radio service.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF
--

Hams across the Mid-West and into the South-Central and South East activated on November 10th. They were active in spotter and emergency nets before, during and after numerous killer tornadoes struck the region. As previously reported, this years SKYWARN recognition Day is Saturday, December 7th. (ARNewsline(tm))

**

INTERNATIONAL - SOLOMON ISLANDS: FIRST NATIVE HAMS GRADUATE

The remote Solomon Islands now has a native ham and C-B radio population of its own. This, as the first group of trainees graduate from a special licensing class. Jeramy Boot, G4NJH, has the rest of the story:

--
On the 25th of October, the Prime Minister of the Solomon Islands attended a special graduation ceremony at which he presented 21 students with certificates marking their successful completion of an amateur radio training course. The students were the first native-born Solomon Islanders to graduate from a unique school set up by Australian radio amateur Sam Voron to bring amateur radio to the people of the Solomons for the first time. All other Solomon Island licensees were ex-patriate amateurs.

At the ceremony, the deputy head of the Australian High Commission in the Solomons presented each student with a CB or amateur radio transceiver which had been donated by overseas amateurs and CB operators, while the Minister of Home Affairs gave each student an antenna.

School radio clubs might like foreign amateur radio operators visiting the Solomon Islands are welcome to stay at the school and help the students.

Jeramy Boot, G4NJH
--

Not mentioned in the story is that Sam Voron's call sign is VK2BVS. Also, school radio clubs worldwide might like to keep an eye on 28.490MHz. Thats where the Solomon Islands ham radio school has already many contacts. (GB2RS)
**
ADVANCED PROPAGATION: THE LEONID METEOR SHOWER REPORT

A possible new record for 222 MHz meteor scatter. Ron Marosco, K5LLL, in Mc Dade Texas reports over the VHF Reflector that Tom Haddon, K5VH, worked Peter Macgregor Shilton, VE3AX, during the Leonid meteor storm on Monday, November 18th. K5VH is located in Dipping Springs Texas while VE3AX is in Cayuga Ontario Canada. Ron estimates the distance between the two stations was in the order of 1300 miles.

As for himself, K5LLL says that he made only 16 QSO’s this year. He says that’s about a quarter the number made 12 months ago.

Out West, W6GYD says that he worked 14 stations on the rocks beginning at about 08:45 UTC and ending his operation at 12:01 UTC. Not bad when you consider that he was running only an Icom IC-756 bare foot to a 5 element Telrex beam at 13 meters elevation. (VHF Reflector)

**

SELF ENFORCEMENT: BEACON QRM'S SPACE – HAM TAKES IT OFF THE AIR

Now the story of a UHF beacon with a signal that was a bit to good. And as its owner explained on the VHF Reflector, a complaint came from an unexpected source. And. as Amateur Radio Newsline's Henry Feinberg, K2SSQ, tells us it had to do with the final frontier:

--
Within 48 hours of turning up his new 1296.300 Mhz beacon in Derry, New Hampshire, Ed Parsons K1TR, received a phone call and a signal report from the Chief Engineer at the Millstone Hill Observatory in Westford, MA. This would

turn out to be the first, last and only QSN report the beacon would receive.

The good news: the observatory hearing it loud and clear! The bad news: The observatory was hearing it loud and clear. So loud that the engineer told K1TR that the beacon's signal was impacting the observatory's capability to track satellites in certain directions. Also, that the recipient of the satellite tracking information, the US Air Force, would not be pleased.

It seem that the Air Force radar uses about 8 Mhz of spectrum centered at 1295 Mhz. They use an 80 foot dish for an antenna. The K1TR beacon was less than 30 miles line of sight from the observatory.

So the Ed's 23cm beacon is off the air while he finds a new home for it. Anyone with a good UHF site more than 50 miles from the town of Westford but still in New England, and who is willing to host the beacon, should contact K1TR by e-mail to esparsons@lucent.com

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ
--

K1TR says that a companion 33 cm beacon is still on the air. He says that signal reports are still appreciated for this one. (VHF Reflector)

ENFORCEMENT: FCC SAYS YES TO SCHOENBOHM

The FCC is granting the application of Herbert L. Schoenbohm for an Amateur Radio station license and a General class operators license.

According to the W5YI Report, the decision was adopted by Administrative Law Judge Arthur Steinberg on October 9th as a follow-on to a May 7th hearing to determine if the former ham possessed the requisite character qualifications to be a Commission licensee. If no objections were filed with the regulatory agency prior to November 9th, this initial decision becomes effective on November 29th.

Whether or not Schoenbohm will be granted his old KV4FZ call sign remains to be seen. It has not yet been reassigned and appears to be available callsign pool. (W5YI)

**

ENFORCEMENT: NEW MEXICO STATION FINED FOR EXCEEDING RADIATION EXPOSURE RADIATION

FCC enforcement reaches the “Land of Enchantment.” This as the agency proposes to fine A-O Broadcasting $28,000 for alleged violations of the radio frequency radiation exposure limits applicable to transmitters on towers and for other rules.

A-O Broadcasting is the licensee of FM radio station KTMN in Cloudcroft, New Mexico. Amateur Radio Newsline's Bruce Tennent, K6PZW, tells us why the fine is being levied:

--
The most serious charge by the FCC says that KTMN exceeded the radio frequency radiation exposure limits in publicly accessible areas. The FCC maintains that measurements taken by the agents showed that operation of KTMN’s transmitting antenna at only 40% of its authorized power created radio frequency radiation fields which exceeded the exposure limits for the general public by more than 300%. That engineering snafu will cost them $10,000.

Failure to install E-A-S equipment brings another $8,000 assessment while not having a main studio is another $7,000. Lastly, failure to have what the FCC calls an adequate transmission system control is a $3,000 fine.

It should be noted that this is the first case in which the Commission has proposed a monetary forfeiture for a violation of the radio frequency radiation exposure limits.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW.

--

As usual, A-O Broadcasting has the customary time period to respond. More is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228609A1.doc (FCC, CGC)

**

ENFORCEMENT: CALIFORNIA RACEWAY GETS FINE REDUCED

Still with enforcement news, the famed California Speedway in the city of Fontana, California, has been fined $8,000 for operating an unlicensed one-watt FM transmitter on 104.7 MHz. The fine was reduced from $10,000 originally proposed, because of Speedway's otherwise good compliance record with the Commission's rules in regard to other FCC permits that it holds. This one is in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-02-3105A (FCC, CGC)

WITH THE HANDI HAMS: MALIBU CAMP OPEN FOR ENROLLMENT

Enrollment is open for the Handi Hams Winter Radio Camp in the Malibu California. The session runs Sunday, March 2 through Sunday, March 9,2003, at Camp Joan Mier overlooking the mighty blue Pacific Ocean.

The Malibu California Camp is open to Handi Ham members with disabilities, and will offer numerous study opportunities to upgrade licenses and learn new communications technology . If you are interested in attending please e-mail Pat Tice at wa0tda@arrl.net. More information is on the web at www.handiham.orrg (HandiHams)

**

HAM RADIO BUSINESS: KOTT REPLACES MC CUSKER AS WORLDRADIO EDITOR

Worldradio Magazine has announced the appointment of Nancy Kott, WZ8C, as its new Editor. Kott replaces Rick McCusker, WF6O, who left the magazine on 13th November for a career in Law Enforcement with the Sacramento County Sheriff's Department.

Regular listeners will recognize Kott as a long time writer of the "Positively CW" column appearing in Worldradio. She also is the Editor of the FISTS Club magazine "Keynote." For those not aware, FISTS is the world-wide More code preservation society.

Nancy Kott is a resident of Metamora Michigan. As such she is part of a new breed of magazine Editor telecommuting to work. Worldradio Magazine is headquartered in Sacramento California. (Worldradio)

HAM RADIO POLITICS: MEETING TO UNDERSTAND EMC COMPATIBILITY

Ham radio will have a forum of its own at next springs IEEE International Symposium on Electromagnet Compatibility slated for Istanbul Turkey from May 11th to the 16th.

World Radio 2003 will take place in Geneva in June and July 2003. There are several important issues for radio amateurs on the agenda most of them impose a threat from various interest groups on the frequencies allocated to the Amateur Radio Services.

Realizing the significance of the threat to ham radio from radio frequency compatibility issues, the Organizing Committee of the 2003 IEEE International Symposium on EMC, has allocated a special session in this Symposium to deal with problems related to the Amateur Radio Services. This will be the last chance prior to the next World Radiocommunications Conference for ham radio to meet with key persons from the international EMC and Radio community, researchers, regulators and others, exchange views and influence the decisions.

And hams with knowledge in this area are also being invited to provide formal papers, informal papers or a presentation for the conference. More details are in cyberspace at www.ortra.com/emc2003. Just click on the hyperlink marked "Radio Amateurs". (IEEE, ANS)

**

INTERNATIONAL - CANADA: CANADIAN HAMS TO PARTICIPATE IN 5 MEGS EXPERIMENT

A Canadian Amateur Radio Club will be taking part in the 5 Megs Experiment. The Marconi Amateur Radio Club of Newfoundland, under the leadership of Joe Craig, VO1NA, will be conducting a three phase propagation experiment at approximately 5.3 Mhz from the 22nd to the 25th of November, the 20th to the 23rd of December and finally from June 20th the 23rd of 2003.

The call sign will be VO1MRC with operation planned on or near 5.260, 5.269, 5.280, 5.290, 5.319 and 5.329 Mhz. Also the possibility of some time on 5.400 and 5.405 MHz as well.

All operation will be on CW and upper sideband. For further details, contact Joe Craig, VO1NA ny e-mail to jcraig@morgan.ucs.mun.ca. (RAC)

DX

In D-X, Albania is on the air. A DXpedition team made up of OH2BH, OH2PM, OH5BM and OH8SR arrive in Tirana on Sunday, November 17th. They set up two stations for a one-week activation of ZA1B. Their operation includes the CQ World Wide C-W Contest, with the team's entry planned in the multi-two category. QSL via OH2BH. (OH2BH)

**

THAT FINAL ITEM: GUY WIRE RETENSIONING, LAKE TAHOE STYLE

And finally this week the sad story of KTHO radio in South Lake Tahoe, Nevada. The 590 kHz A-M station was off the air for over a day recently after its AC power and phone lines were destroyed by wind, fire, and falling trees. But it did luck out in a way because its transmission tower is still standing. Well, kind of.

According to Bob Gonsett's C-G-C Communicator, the story goes this way. High winds caused trees to fall onto the guy wires of the station's 305-foot tower. Near disaster yes, but not quite.

Thanks to the Forest Service the tower did not collapse. The crew carefully cut the fallen trees piece-by-piece, gradually reducing the stress on the guy wires rather than allowing them to loosen suddenly.

Thats the good news. The bad news is that the tower is now bent. You can see what it looks like in a photo sequence taken by Bill Kingman, the Chief Engineer of KTHO. It’s in cyberspace at www.steveblodgett.com/ktho.html (CGC)

**

NEWSCAST CLOSE

Ever hear wiiiiiiiiiide W4ASX on the air? Dickhead runs a cheap equalizer in hopes of making his audio sound like an AM radio station...broadcast quality is what he wants to achieve.
The Richard Cranium was on the air this evening running his cheapola equalizer and was splattering four Kc's each way. His dirty signal was wiiiiiiiiiide and he either didn't give a crap or was too stupid to cure it. This dude just does not get it. He is so self-absorbed in himself that his head is distorted.
ASX is convinced that there are but three Ham ops on the air...those who kiss his distorted butt, those who he condescendingly ignores, and the odd fellow who has the same shitty audio as he.
Next time you hear old Miami Bob and that dirty equalizer of his, tell him to buy a cheap Rad Shack mic and keep his signal narrow....tell him the CB'ers can help him on this....

Geesh...the Demoncraps have so long been blaming their idiocy on the
Repubicans that it will not change.
Perhaps old Fat Teddy can swap his martini glass for swimming lessons and
Clinton can petition the Arkansas BAR to reinstate his Attorney license.
Old Hillary still marches on...and she is looking older and more disoriented
than before....it must be a Right Wing Conspiracy....those wrinkles are not
her fault.

What I love most about it is that they continue to be clueless.
They lost the people by being far left,
lacking basic moral character traits- even convincing themselves
such traits are unimportant- and telling lies about darn near
everything in sight. And now that their behavior has cost them,
they insist they need to act this way even more.
Their choice of House minority leader is an excellent example
of their self-destructive madness.
You can always count on a Democrat to let his emotions
override what very little common sense he has.
Let them continue to whine and self-destruct.
It's the best thing to happen to this country since Reagan.

Amateur Radio Newsline Report 1320 - November 29, 2002

Amateur Radio Newsline report number 1320 with a release date of Friday, November 29, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International space station gets a new crew and all are ham radio operators. Newly licensed Solomon Island hams take on an emergency communications challenge and good news for a California ham. These stories and more are coming your way on Amateur Radio Newsline report number 1320 right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: NEW ALL HAM CREW ARRIVES AT ISS

The international Space Station has a new crew which plans to start operating the ARISS Amateur Radio station in about three weeks. They boarded the staton on Monday the 25th of November. They plan to be there for about 6 months. All three are licensed hams.

Look for Ken Bowersox KD5JBP, Nikolai Budarin RV3FB and Don Pettit, KD6MDT. They will use the Space Stations calls ... RS0ISS over Europe and NA1SS for the United States. Contacts can be heard on the downlink frequency of 145.80 MHz.

They replace Peggy Whitson, Valerie Korzun and Sergi Treschev. Valerie, RZ3FK, was very active, on the air almost every day, while Peggy conducted many memorable school contacts. (ARISS)

**

RESCUE RADIO: SOLOMON ISLAND NEWS HAMS PROVIDE DISASTER RELIEF

We reported their graduation last week. And while the signatures on their ham licenses may not yet be dry, a group of Solomon Island hams are already off on their first rescue radio adventure to Malaita Island:

--

Thats right Roy. Q-News reports that three graduates from the Amateur Radio Training School of the Solomon Islands have gone by ship to provide emergency communications for flood affected areas on Malaita Island, near Guadalcanal. With them are with 19 tons of rice along with officials of the National Disaster Council.

These new Hams will operate a ham radio station at the Red Cross clinic on South Malaita island. They will report on the distribution of supplies to the National Disaster Council HQ in the Capital of Solomon Islands.

This is the first humanitarian deployment of the school's initial graduates. It also provides the Solomon Island hams their first real experience in helping people with radio knowledge of Amateur Radio.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The three hams making the trip are identified as H44MKA, H44WSB and H44SF. As we go to air they should be operational from a Red Cross clinic set up on the south end of the island. More information is on the web at www.h44A.com (Q-News)

**

RADIO POLITICS: HAM CCR BILL DIES AS CONGRESS CONCLUDES SESSION

The 107th Congress has adjourned without taking any action on an ARRL sponsored legislative measure to free Amateur Radio of land use restrictions commonly known as C-C and R's. The ARRL indicates it plans to try again when the 103rd Congress convenes early in 2003. (ARRL)

**

RADIO AND THE LAW: CALIFORNIA SUPREME COURT SIDES WITH HAM

Still with antennas and land use, we have an update on the court battle of Mark Abrams, WA6DPB versus the city of Rancho Palos Verdes California. Amateur radio Newsline's Bruce Tennant, K6PZW, has the good news:

--

The good news is that the California Supreme Court has upheld the right of a California property owner to use antennas on his property for any reason he wants. It did so on Friday, November 15th when it denied the request of the the City of Rancho Palos Verdes to hear an appeal of the decision of the California State Court of Appeals in the case of The City of Rancho Palos Verdes vs. Mark J. Abrams. This means that the decision of the Court of Appeals is now state law.

The earlier decision of the said that Amateur Radio operators are entitled to an "exalted" status, thus giving amateurs new hope for getting antenna arrays approved. And Abrams says that there are many precedents that can be extrapolated from this ruling, but he says that the case clearly establishes that a city in California cannot tell a resident what to do with an antennas once they approve the actual array.

According to Abrams, the legal precedent applies only to California. But he says that when most states are looking to set a precedent, they will look to either California or New York. And since there is no precedent in New York on this subject, it makes California the one to serve as a guide to other states.

For the Amateur Radio, I'm Bruce Tennant, K6PZW, in Los Angeles. (WA6DPB)
--

Abrams tells Amateur Radio Newsline that he is now going to file with the Federal Court of Appeals to declare the City's appeal of his injunction against the City of Rancho Palos Verdes as moot.

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WE4B repeater of the Palmetto Amateur Radio Club serving Miami Florida.

(5 sec pause here)

**

RESCUE: ZL1AMO REPORTED ON LIFE SUPPORT
The Radio Society of Great Britain reports that well-known D-X'peditioner Ron Wright, ZL1AMO, has been taken ill. According to Wright's daughter Terri, her dad suffered collapsed lungs while in Fiji. He was air lifted by an emergency air ambulance to Auckland New Zealand where he was initially reported to be in critical condition and on life support.
A later report from Terri Wright says that her father is currently in stable but guarded condition. The RSGB says that Wright had been operating from Fiji as 3D2RW. Regular updates on Wrights condition are being posted to the web at www.papays.com/opdx.html (RSGB, ZL2BHF)

**

ENFORCEMENT: EX-HAM ARRESTED FOR ALLEGED ATTACK ON POLICE OFFICER

A former ham who resigned from Amateur Radio has been arrested in the hills of North Carolina following a manhunt that has lasted over a year. Steve Anderson, the ex-AA8DP, is accused of shooting at a police officer.

Anderson was a member of the Kentucky State Militia, a civilian paramilitary group, until April 2001. As previously reported, that militia group dismissed Anderson because he refused to shut down his unlicensed radio operation. (Published news reports)

**

ENFORCEMENT: ATT FINED FOR TOWER VIOLATIONS

The Federal Communications Commission has released an order imposing a $117,000 fine against AT&T Wireless Services, Inc. for safety-related violations of the Communications Act and the Commission's antenna structure rules. This action follows routine antenna structure inspections and related investigations conducted by Commission field offices throughout the country.

Before issuing the fine the FCC determined that AT&T Wireless committed seven separate violations of the antenna structure requirements as outlined under Part 17 of the Commission's rules. Included were failure to register, light, and paint antenna structures, and failure to post antenna structure registration numbers at the base of the antenna structures. (FCC)

**

ENFORCEMENT: VICTORVILLE CA PIRATE STILL ON THE AIR

Another unlicensed station has been discovered in California. According to Chris Compton writing in the CGC Communicator, he noticed a pirate operating on 90.9 MHz in Victorville while driving through the town not that long ago.

Compton, who is a Director of Engineering said that the unlicensed transmitter was taking out KGZO on 90.9 MHz in Shafter. The pirate was also heard doing commercials for his Nextel Store in Victorville.

Now here's the best part. When Compton called the unlicensed operator, the person responded that he had a "demonstration license" from the FCC and that it was good for one year. He told Compton that the licensed allowed him to "demonstrate" the line of transmitters he was selling along with custom built antennas for the FM band. He then asked Compton if I wanted to buy one.

The first monitoring of the pirate was in September. Compton said that he reported the situation to the FCC. He adds that he was in Victorville not long ago and the pirate was still on-the-air. (CGC Communicator)

**

RADIO POLITICS: JONATHAN ADELSTEIN SWORN IN AS FCC COMMISSIONER

FCC nominee Jonathan Adelstein has been sworn in to fill the Commission's remaining open slot. Adelstein will finish out the term of former Commissioner Gloria Tristani, which ends in June.

According to the ARRL Letter, the White House nominated Adelstein last February. But the nomination of the Democrat and a prot,g, of South Dakota Senator Tom Daschle had been held hostage for most of this year because of political wrangling over several judicial nominations. (ARRL)

**
CONVENTIONS AND HAMFESTS: HAM RADIO UNIVERSITY 2003

LIMARC -- The Long Island Mobile Amateur Radio Club - will hold the 2003 edition of its very popular Ham Radio University on Sunday, January 19th. Location is the East Woods School in Oyster Bay New York with the doors opening at 8 A.M. Eastern Standard Time.

Ham Radio University is a day-long session of intensive training in just about every aspect of Amateur Radio. The focus will be "hands on" with many demonstrations. And this year there will be special forums geared to the non-ham as well as the experienced ham radio operator.
There will also be a V-E testing session for those who would like to take an FCC exam and a Special Event Station set up and operational on the High Frequency bands.

Ham Radio University is a cooperative effort between over twenty clubs and organizations in the New York City- Long Island area. It is also the American Radio Relay League, New York City-Long Island Section Convention. For more information about Ham Radio University please contact George Tranos by e-mail to N2GA@arrl.org. (LIMARC)

**

GATHERINGS AND MEETINGS: MORSE CAMP IN THE U-K

A Morse code training camp is planned for the weekend of the 11th and 12th of January 2003 in the United Kingdom. The venue will be The Beacons, Simons Lane, in the town of Frodsham. For further details please contact either Catherine Pearson at RSGB HQ or Kath Wilson, the RSGB Regional Manager for North West England. Pearson can be contacted on by e-mail: toar.dept@rsgb.org.uk. Wilson can be reached at dwilson@btinternet.com (GB2RS)

HAMVENTION 2003: "THE YEAR OF THE YOUNG"

The 2003 Dayton Hamvention will have "The Year of the Young" as its overall theme. Planners say that the show's focus will be on the young ham and on bringing 12 to 18 year olds into the Amateur Radio hobby. More information will be posted on-line at www.hamvention.org as soon as final plans are made firm. (Dayton Hamvention*f*)

**
EMERGING TECHNOLOGY: MICROSOFT EASES RESTRICTIONS ON NEW XP MEDIA CENTER

Microsoft says that it will relax restrictions on how users of its new multimedia Windows XP Media Center operating system will be able to copy and distribute TV programs. As a result of the changes, users will be able to view unprotected TV programs copied onto DVD on any PC with Windows XP Media Center Edition. TV programs with built-in copyright controls will still prevent users from making copies.

Originally, Microsoft had developed the software so that users could only watch television programs stored on the hard disk or copied onto a DVD on only one machine. That being the PC used to record the original content. (Microsoft)

**

OUR HERITAGE: REMEMBERING THE RADIO OPS OF WWW2

The event that lead to the United States becoming involved in World War 2 will be commemorated by Amateur Radio. This, as a group of survivors of the Japanese sneak attack on Perl Harbor visit the USS Hornet and take to the air this coming December 7th.

The SSB Frequencies will be 7.260, 14.320, 21.320 and 28.320 MHz. CW operations will be found on 3.530, 7.030, 14.030, 21.030 and 28.030 Mhz. Operating hours will be from 0900 to 1700 Pacific Standard Time. A special QSL Card will be made available for those who make contact. (KB6SSN)

**

INTERNATIONAL - CANADA: VC2C ON 60 METERS

An update on whats become an international version of the U-K five megs experiment. Word from Canadian that station VC2C was recently given special permission by the Canadian radio authorities to operate on the 60 meter band. It took to the air between the 21st and 25th of October. During that time, VC2C made two-way C-W contacts with four G stations, one GM and one GI operator. All contacts took place on 5.280 MHz. (RSGB)

**

INTERNATIONAL - NEW ZEALAND: NZART CALLS FOR ELECTIONS

New Zealand's national ham radio society, the NZART has placed a call for nominations for those who want to serve on the Council and as the organizations President. NZART says that New Zealand hams have until December 31st to file their nominations. (NZART)

**

ON THE AIR: WSWSS 2 METER NET GOES PSK-31

A popular weak signal net is going digital check-in. David Peters, KI6FF, says that the Western States Weak Signal Society 2 meter Southern California Technical Roundtable net held Tuesdays at 8:30 PM Pacific on 144.130 MHz is going PSK 31 only for check-ins. Once the

evenings roster is complete the net will move to SSB and help people who need to get their equipment and software setup and checked out. (VHF REflector)

**

DX

In D-X, word that G0UIH will be in Australia and active as VK2IAY/P until the 15th of December. During this period, Steve will operate from several different rare IOTA island groups. Look for him on or around 14.260, 18.145 or 21.260 MHz on SSB only.

And NK3T will be active from McMurdo Station Antarctica as KC4 slash NK3T until late January or early February. QSL via his home call.

Also, special event station ER60SB will be on the air from the 23rd of January through the 2nd February 2003. This to commemorate the 60th anniversary of the Battle of Stalingrad. QSL via ER1DA either direct to Valery Metaxa, ER1DA, P.O. Box 3000, Chisinau, MD-2071, Moldova or via the bureau. (This weeks DX courtesy GB2RS)

**

THAT FINAL ITEM: FIGHTING BACK WITH A PHONE

And finally, here's one from the pages of the French e-magazine La Companion that we found surfing the Internet. Its the story of fighting back with a cellular telephone. Amateur Radio Newsline's Norm Seeley, KI7UP, has the curious details:

--

Maybe its all net-lore, but supposedly a female bus rider in a Paris suberb was annoyed by a loud-mouthed cellular telephone phone user a few rows in front of her. The fellow so boisterous that she could not even hear her companion seated right next to her.

Then the cellular bully supposedly made the mistake of mentioning his cellphone number during the conversation. A few minutes later, the lady picked up her own phone, called the man and asked him to: "...be quiet please".

But he refused. In fact he was so incensed by the call that he started to use all kinds of unsightly language. That is until he finally realizing where he was and that everyone on the tram was staring directly at him.

Undaunted, he supposedly stood up, uttered a few more choice words and exited at the next stop. The woman and her companion received a round of applause.

For the Amateur Radio Newsline, Norm Seeley, KI7UP

--

And what else needs be said! (Tommorrows Technology)

**

NEWSCAST CLOSE

HI THERE

Paul here , can anyone help me , iam trying to find a circuit
diagram for a FC757 ATU , the station it was connected to was struck by
lighting , and the power supply jumped to 24v dc .

this seemed to have taken out the 5v regualtor , and the UPA2004
but not to sure what else it may have effected .

ps
does anyone know where i can get a UPA-2004??
OR WHAT IT ACTUALLY IS , OR WHERE I CAN FIND A DATASHEET??

any help welcome

5147. Icom IC-2000H manual(s)

Newsgroup: rec.radio.amateur.misc
Date: 2002-11-30 18:37:51 UTC
From: Bernard B&#65533;lisle <belisleb@webnet.qc.ca>
Message-ID: <7B7G9.10685$i%.1945330@localhost>
Source record: 71590

I bought recently an Icom IC-2000H radio with the microphone from a widow. The radio is brand new but does not have any manual(s) that came with it. Is there somebody in the group that could scan it and sent it by internet. I searched on the Icom website and had not been able to find it there for free. If you can scan it and send it directly to my personal address, (belisleb@webnet.qc.ca) I would appreciate it very much. Either in English or French would be OK.
Thank you very much
Bernard Belisle

I've always got the HF rig running in the background while I'm working on stuff on my bench. Can anyone tell me some interesting nets or groups on HF that would be audible in the North East US that are worth listening to?

Nets like technical info, computers, SSTV, RV/truckers, etc. would be great. I'm not interested in the "aches and pains" type nets ;), but any net or group that actually has interesting conversations. (I hope that is not a rare thing!) I often get non-hams in my shop and I'd like to promote the best of ham radio for them to hear.

Bob

ENFORCEMENT: FCC SAYS YES TO SCHOENBOHM

The FCC is granting the application of Herbert L. Schoenbohm for an Amateur Radio station license and a General class operators license.

According to the W5YI Report, the decision was adopted by Administrative Law Judge Arthur Steinberg on October 9th as a follow-on to a May 7th hearing to determine if the former ham possessed the requisite character qualifications to
be a Commission licensee. If no objections were filed with the regulatory agency prior to November 9th, this initial decision becomes effective on November 29th.

Whether or not Schoenbohm will be granted his old KV4FZ call sign remains to be
seen. It has not yet been reassigned and appears to be available callsign pool. (....via W5YI Report)

Don't know if this is the real Lloyd or one of his many imitators.
(And you know what they say about imitation and flattery...)

On the off chance this was a serious question: nope, there's nothing
wrong with a (PLL) synthesized LO.

The "old" way was a tunable coil/capacitor. This can give you very
clean signals but can drift with temperature and vibration and doesn't
easily support direct frequency entry or memory presets, so it's rapidly
moving to "dead-tech" status.

Almost all digital radios today are PLL synthesized, because it easily
supports direct frequency entry, memory presets, and highly stable
operation because everything is ultimately referenced to a multiple of a
precise quartz crystal reference frequency. Disadvantages include a
higher noise background than the old way unless care is taken to filter
out noise components and harmonics of the LO before it hits the mixer
and the inability to tune between frequency "steps" without taking some
special trouble. However, even super-high-end receivers use this
technique, so it can obviously give excellent performance.

DDS synthesis is the new kid. It can be the noisiest of the bunch unless
care is taken in filtering. However, it can generate very small
frequency steps with incredible accuracy, can jump virtually
instantaneously between widely-separated frequencies without a settling
time required of a PLL loop. (think spread-spectrum anti-jamming
applications), DDS has special capabilities like generating multiple
signals of the same frequency with very precisely-controlled relative
phase shifts, which can be very useful for some kinds of sideband
generation/detection and digital signal recovery (quadrature carriers
etc.). You have to pay big bux today to get DDS synthesis, but the cost
will undoubtedly drop fast and find its way into pocket portables before
too long (if it hasn't happened already?)

Almost everything uses synthesized frequency generation, has for quite some time. A PLL is a synthesizer, so is the mixer in any radio. All synthesization means in the context of RF is the combination of two frequencies to obtain another one. IE an incoming signal at 1000 KHz enters your radio, this frequency is beat with the local oscillator at 1455 KHz, to SYNTHSIZE a frequency of 455 KHz for your IF strip to use. A more exact use of the word sythesizer applies more to old crystal controlled 23 channel CB radios, which used only 14 crystals to get 23 channels both receive and transmit. Without synthesis, you would need 46 crystals to do this.

Source record: 71606

Hi,
I was wondering if anyone knew which Amateur radio dual/tri band
mobiles or ht's have Memory Bank scanning capabilities like a scanner.
This makes it usful if you want to scan only public saftey or only
amateur,, ect and is also nice if you travel a lot between locations.
So far I have encountered only two, and of that I am not 100% sure.
They are:
Yeasu vx-7r ht
Icom IC-2720H dual band mobile.

I am also interested in the Yeasu FT-7100m, ft-90r, ft-8900 but i dont
beleive any of them allow you to scan by memory banks.

If any one has any iformation or recomendations I would greatly
appreciate it.
Sal

Hey all, looking for a programming cable for the TK280/380. Willing to pay a small profit over dealer cost on new or cost on good used factory cable and will negotiate on aftermarket cable. I've given up on ebay as prices there have soared to near $80 each for USED factory cables excluding shipping! NOT interested in anything with clips, exposed wires, 9v battery hangy things, or the like. Prefer factory, but will consider if you have a top-notch aftermarket using sp/mic connector housing, etc. Please email direct and thanks for taking the time to give a read.
Randy

5176. 70, 23 & 13 cm - Adaptation of redundant GSM phones

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-01 07:34:19 UTC
From: "Brine Reay"
Message-ID: <3de9bbdd_1@mk-nntp-1.news.uk.worldonline.com>
Source record: 71619
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc

I have suggested before about using the wealth of
throw-away GSM phones as a source of hi-tech
computer components. Sadly, there was no response
to this, perhaps indicating the extent to which the hobby
in general, and this NG in particular, has degenerated
into the abyss that is CB and its related topic, the M3/CB/Farce
Licence?

However, I'll try once again.

The later models of GSM phones have within them a Direct
Conversion RX together with a Phasing TX with both working
at the "air interface" frequencies. There is a separation between
TX and RX that varies from 45MHz to 90 MHz depending upon the
band in use. The bands span from 450 MHz (GSM450) to 1900MHz
(Either DCS or PCN, ISTR).

Perhaps we could adapt this technology for use in the Ham Radio
UHF and Microwave bands? The RF sections are very specialised
towards the various frequency bands, and we might find ourselves
having to manufacture an RX Preamp, or a TX PA stage, but these
are relatively trivial matters for any _REAL_ Radio Ham.

We'd be doing our bit for the environment by reducing the
amount of land-fill, and also for the exchange rate by reducing
our dependence upon the imported rice box.

I'd suggest the following.....

1. Retain the GSM modulation scheme and voice encoding but
without encryption.
2. Use the Convolutional Coding, Class 1 protection bits and Interleaving
to ensure continued working under noise schemes.
3. Retain the RF channel scheme, representing 200kHz channels.
4. TX and RX to be co-channel using slots 1,3,5 & 7. 1 to be TX FCH,
5 to be TX TCH & BCCH, 5 to be RX FCH & BCCH and 7 to be RX TCH.
BCCH = Broadcast Channel, to be replaced by Callsign.
FCH = Frequency Correction Channel
TCH = Traffic (Voice) Channel.
6. The CQ caller to be the governing FCH, to ensure co-channel operation.
(The drift within the channel is thus determined by the CQ caller)
7. Great reduction in the protocol, there being no ground network.

Having shown certain failings in understanding the basics of Slope Detection, the dB, nuclear emissions, BR68, mmw detectors, 'bandwidth', DSP, and other topics, is it difficult to understand your need to reassert some form of technical knowledge to bolster your apparent standing?

Now you have found a subject which no-one chose to respond to, you make an error of logic in describing that as 'sad' in reposting your original article. You could, BTW, have posted a Google link, and saved 'bandwidth'. That your topic just may be uninteresting is, apparently, not considered by you; or that people may choose to carry on enjoying their own aspects of the hobby, including the operating allowed under the rules.

You then say that, simply because you received no replies, the hobby has 'degenerated into the abyss'. Why? What reasoning lies begind this leap of, er, logic? Contrast this to the response you made when you received two considered replies to your posting re DSP. Unfortunately you suffered an 'ISP failure' at that point, but never semed to acknowledge that you could have recovered the articles from Google and continued the debate from there.

I believe that your reposting is, like the first, a troll.

To other readers of the group, I advise: DO NOT FEED THE TROLL.

Isn't in more likely that people have thought "That looks interesting but,
if I get involved, I may end up talking to Gareth on air."

Surely this would convince them to take up knitting or cross stitch in
preference.

Perhaps if you managed a single post without climbing on your hobby-horse and denigrating those who have chosen to follow the hobby in their own way then perhaps you would get more of a response. "A _REAL_ Radio Ham" assists and offers encouragment wherever he or she may. I see nothing to be gained by using every post as an opportunity to put down those who may be less knowledgable than yourself. Whilst your idea may have some merit, your attitude does not.

Or perhaps the problem is that the phones are very low-power devices that
are useless without a network of 200-foot towers on every hilltop, tied
together with routers and T-1/T-3 connections, and maintained by staffed
24-hour network operations centers.

Would the originator of this idea like to tell us who will finance the
ground-based network that makes these things work?

Perhaps the originator of the ideas stressed that no ground network
would be needed?

With up to 4W of output power and a decent Yagi-Uda, I do not
understand your concern.

In addition, you seem to be discussing a network of mobile
phone infrastructure and not the use of QRP point-to-point
rigs.

Brine,
I would be most interested in this idea. As you seem to be taken
by the challenge could you suggest how we get over the problem of a lack
of infrastructure? Without it the phones will not work, similar to
trying to use trunked sets without an infrastructure. If you know a way
of reprogramming the firmware in a cell phone to a more conventional
personality then please let me know.

5191. Re: 70, 23 & 13 cm - Adaptation of redundant GSM phones

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-01 17:55:29 UTC
From: "Brine Reay"
Message-ID: <3dea4dc8_2@mk-nntp-1.news.uk.worldonline.com>
Source record: 71634
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc

The point I make, probably not clearly, is that these old (and not
so old) phones could be a source of UHF gear. Some of the technology
we'd retain (the RPELPE speech model would be an interesting one),
but some of the technology we'd junk.

The need for a ground network is one such aspect. Thinks - apart from
repeaters, we have no such ground network on other bands.

Let me stress this - I do not anticipate using these phones with just
minor channel reprogramming as is discussed often about PMR
gear in this NG. I intend that the phones would be reprogrammed
in their entirety - it would be an impossibility to get source code
from the manufacturers - but not all the functions would be
reprogrammed, in particular there will be no need for Q931
and similar protocols.

However, information about the very fantastic chips _IS_ available,
and such things as programming the synthesizer and adjusting the reference
frequency to come up onto the proposed FCH are well within the
bounds of possibility.

This would not be a project for an off-the-shelf habitue. Those
who dabble in technicalities are my intended audience.

One project using this equipment which I have in mind (keyboard,
LCD display, RF circuitry, synthesizer) is a pocket Spectrum Analyser-
if we can all be legal with frequency measuring apparatus that
knocks the Absorption Wavemeter into a cocked hat, but at
almost a zero cost (throw-away phones) then this could only be
a good thing.

5217. FS: sma-to-bnc custom fit antenna adapter

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-02 01:22:02 UTC
From: gulyas@earthlink.net
Message-ID: <12235960.0212011722.3b79c3b8@posting.google.com>
Source record: 71559
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment,rec.radio.swap,rec.radio.scanner

Do you have a need for a high-quality SMA-to-BNC antenna adapter that
is custom made to fit and protect your H.T. or scanner radio?

Adapter allows you to:
Quickly change antennas to base, mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna
changes.

Adapter features:
Gold plated contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed
for moisture and dirt protection.
The base also provides an excellent support for any length of antenna
or application.
No need to remove adapter once installed to make a quick and safe
antenna change.

Sizes to fit radio models:
Yaesu: VX-5R, VX-7R, VX-1R, FT-50-R, VX-10, VX-150, VX-110,
VXA-100, VXA-120
Icom: IC-T90, IC-T8A, IC-T81A, IC-Q7A, IC-R2
Kenwood: TH-D7, TH-G71, TH-F6A, TH-F7A
Alinco: DJ-V5, DJ-X3, DJ-S40
Standard: C508A, C510A
Radio Shack: HTX-420, HTX-400, HTX-245, HTX-200
Aor: AR-16

Previewed in the May 2000 Issue of CQ Magazine, and the Nov. 2000
Issue of QST Magazine.

$11.95 + $1.50 S+H(One to unlimited)
(Check or money order only in U.S.Funds)

5222. (UPDATE, SHORT) Auto-FAQ Sent to Over 27,500 rec.radio.amateur.* Posters

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-02 03:21:08 UTC
From: pschleck@novia.net
Message-ID: <3dead0eb$0$202$45beb828@newscene.com>
Source record: 71565

For the previous (SHORT) update, see:

http://groups.google.com/groups?selm=3d52733f%240%2498805%2445beb828%40newscene.com

In September of 1996, I started mailing an introductory message to all new posters to rec.radio.amateur.misc. This is accomplished via a special Perl script originally written by comp.infosystems.www.* FAQ maintainer Tom Boutell, who uses it on comp.infosystems.www.authoring.html, to send each poster such a message once, and only once, to a given E-mail address. It runs from a Unix cron job on my host every morning at 2 AM and queries my local news server via NNTP for the headers of any new articles posted to this newsgroup.

The project was expanded on June 19, 2002 to cover all rec.radio.amateur.* newsgroups, but with the same previous-poster database (as I stated my intention to do in previous updates). This means that if you have already received the message to a given E-mail address, you won't receive it again to that same E-mail address. This expansion increased the average number of recipients each day from about 7 to about 25. Feedback statistics remain about the same for the additional 2,500 recipients (see previous updates via the link above for more details).

Here are the milestones in terms of number of recipients, and the date each milestone was attained:

Recipients: Date: Average Recipients/Month (approx.):

0 September 21, 1996 N/A
5,000 July 5, 1997 625
7,500 December 7, 1997 500
10,000 June 2, 1998 420
12,500 December 20, 1998 420
15,000 September 29, 1999 280
17,500 May 30, 2000 310
20,000 April 7, 2001 250
22,500 April 3, 2002 220
25,000 August 8, 2002 625
27,500 December 1, 2002 670

For those who are curious, here is the current version of the message, modified in response to feedback as the project progressed.

>Subject: WELCOME to rec.radio.amateur.*
>X-Loop: rec.radio.amateur-auto-faq@oasis.novia.net

Hello,

The following message is automatically sent to every new poster or cross-poster (as of June 19, 2002) to any of the rec.radio.amateur.* newsgroups. It should be sent once, and only once, to each unique address. This is a welcome message. The Internet amateur radio community welcomes you to the newsgroups, including rec.radio.amateur.*, and welcomes your input, opinions, and constructive participation. To help make you feel welcome, experienced participants like myself have chosen to systematically inform you, as a new poster, about useful information resources and user tips to enable you to get the most out of these newsgroups. I hope you will consider the message in that spirit.

* * *

1. The news.announce.newusers newsgroup, moderated by Jon Bell, et al, contains a number of very informative articles providing an overview of net-etiquette, suggested writing styles for electronic forums, and other various do's and don'ts concerning Internet culture. If the articles have expired at your site, you may also access them from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/news/

2. Original newsgroup voting and charter information for the rec.radio.amateur.* hierarchy, as well as for rec.radio.info and rec.radio.swap, may be accessed from:

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur-reorg
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

3. The Guide to the rec.radio Newsgroups, originally written by Jay Maynard, K5ZC, is now maintained by Jeffrey Herman, KH6O. It provides an excellent overview of all of the Usenet newsgroups devoted to amateur and CB radio. It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/personal-intro

4. The rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet, also originally written by Jay Maynard, K5ZC, is now also maintained by Jeffrey Herman, KH6O. It contains a number of good pointers for reading and posting articles concerning the buying and selling of radio and radio-related equipment on the Usenet newsgroup rec.radio.swap (which, with the sole exception of rec.radio.amateur.boatanchors for vintage equipment, is the only appropriate newsgroup in the rec.radio.* hierarchy for such articles). It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/swap-guide

Please direct any submissions feedback, or administrivia regarding the above two resources to jeffreyh@hawaii.edu.

5. The national amateur radio society of the United States, the American Radio Relay League, has a presence on the Internet. You may access their comprehensive and informative home page at:

http://www.arrl.org/

(They also have information about amateur radio organizations in other countries.)

6. Read the newsgroup first to see if your question has already been answered. You may also view, and search for keywords in, older news articles (going all the way back to 1981) at the Google (formerly DejaNews) archive:

http://groups.google.com/

Many topics have been discussed before, often in great depth, but the articles have expired at your local news server. Services like Google allow Usenet a much longer "institutional memory," greatly benefiting both new and experienced users.

7. If you do post to the newsgroup, give as many details as possible. After you post, read the newsgroup for a week or two to see all replies to your posting. A recommended practice is to ask for responses by E-mail and offer to post a summary if others are interested in the answer to your question. Note that it is (almost without exception) inappropriate to post your article to all (or even a significant subset of) rec.radio.amateur.* newsgroups. Please pick only the most relevant newsgroups (2 or 3 at most), and post your article as a simultaneous cross-post (check your newsreader documentation) so that only one article is propagated, and the article is only shown once in a newsreader.

8. Remember, Usenet newsgroups are based on the idea of mutual aid. Usenet only works if we put as much into it as we get out of it.

73, Paul W. Schleck, K3FU

The author welcomes any and all constructive feedback. Please direct all such feedback to pschleck@novia.net and retain the original subject (e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.

I'm gonna tell you again to stop posting in my name. I will be contacting AOL this week. To the people using my name in vain on AOL, when I get done with you, you are gonna wish you never created that screen name.

For the record - for everyone else.

1. I use MSN as my e-mail account
2. I stopped using AOL back in June 2001
3. I no longer use Terranews.com for my Usenet access. (MSN does not provide Usenet access)

So anyone else using those above ISP's - you can tell it is a fake Lloyd.

I would appreicate any help in stopping the abuse of my greatness.

Lloyd Davies - The real McCoy!

The profit hopes Jesus will get here REAL soon, or else I predict that the profit will have to explain to Ty-Rone and Le-Roy what he was doing with the young sisters out behind the barn.

If this happens, it ain't gonna be pretty. So I predict that the profit is praying about this probably 24-7.

Maybe the profit and The Colonel can be cell mates.

> UHF and Microwave bands?
<snip>
>
There wasn't any interest in the conversion of 900MHz FM TAC
analogue phones when the TAC BTSs were switched off,
tons of phones that could easily be put into engineering scanning test mode
across 900MHz ended up in landfill sites
If there wasn't any interest in converting them, why on earth do you think there
would be, in more complicated and harder to convert to anything useful GSM
phones ?!

What would make more sense is looking at converting 446MHz PMR HHs to 70CM
to use on the already existing and under used 70CM repeaters and simplex.
No need to reinvent the wheel, and trying to find the funding for 1296MHz
repeaters for modded GSM phones !

So has anyone modded 446 Sets to 430 ??
I understand the Team Telcom 446 can be easily modded for 420 to 470MHz
continuous coverage, but it's a rare and expensive set

Steve Terry

If you ever had any interest in 313, 275, or 901, Jon's page is informative, sometimes tongue in cheek, but always interesting. He also keeps us informed about other frequencies, local to his area, that are good for a laugh, also. Try doing something constructive for the hobby, instead of criticizing someone who is.

GSM phones aren't particularly sensitive, are they? I believe -110dBm is the cut-off point for service from any BTS.

It would take so much fussing about, SMT hassles, and extra circuitry, that you might as well just design a transverter so that you could use SSB from 2m.

But don't let me stop you from experimenting. Feel free to develop low range walkie talkies on 23cm if you like. I don't believe you'll get many followers. Then again, you must be used to that :o)

Hi,
hr is (1) Set of Sinclair P-201g 4 cavity Duplexer w/ Cabinet That I am selling. 24" tall cans X 6 3/4" Dia. with all the Cabes ready to go...just tune to your Freq. Pics of F-201G Sinclair Duplexers.....All Aphenol Connectors & Good RG214 Cable.

P-201 GR

The P-201G bandpass duplexer combines Sinclair's high Q bandpass cavities into a unit of superior performance in the 132-174 MHz range.
These Duplexers are easily field-tunable and feature rotatable lops for selectivity settings other than the performance detailed below for 0.5 dB per-cavity loss. In addition, vernier tuning is provided for fine frequency adjustments. Because of carefully designed temperature compensation, frequency drift over the operating temperature ranges extremely small, typically 0.5 ppm/�C.
These duplexers are available in rack-mounted or cabinet configurations.

For Specifications go to this site.

<http://www.wiscointl.com/sinclair/BaseStation/p201gr.htm>

$550 w\Cabinet
$500 wo\ Cabinet

Will Meet with buyer 1/2 way from Baskin,La.71219
upto 150 miles.

Don't forget WBCQ 17.495 from 1-2 PM EST today.

Jermiaha 33 & 1/3 Ministries - KOOKIER THAN
BROTHER STAIR AND ALEX JONES
PUT TOGETHER!!

I kid you not people - this guy at the time
above is a bigger WHACK JOB than
anyone I've heard on shortwave - even
James Lloyd who he comes on afterward!!!

Cukooo! Cukooo!!!

I read this message shortly before the broadcast times listed above. I listened for about two minutes. The guy likes to manipulate numbers to suit his delusions. There is a book by the late Dr. Carl Sagan entitled "The Demon Haunted World" in which he devotes an entire chapter to the manipulation of numbers to justify biblical prophecies, and how this type of thinking is flawed.

Tom - N8ECW

5250. Damn "Jesus Radio" Anyways....

Darn near nothing left on SWL anymore, unless you're into blasted
Jesus radio. If I have to listen to that forever in heaven,
you can send me to the other place.
All the "official" stations sound like clones of
VOA or BBC, and that's pretty dull stuff.

I miss Radio Moscow telling us how wonderful their worker's paradise
was, and the Voice of Vietnam going on about GIs eating babies.
I miss SAC on 6761 USB saying "Skyking, Skyking, do not answer."
I miss coping the weather on CW from WNU or WLO.
I miss listening to the fishing boats on 2 MC cuss each other.
I miss my Model 19 teletype, whamming out news/weather at 60 WPM.

Unless you like Jesus kooks or Mr. Monotone, it's hard to
find anything worth the trouble.

Why should we pay $11.95 when they only cost $3.50 new. I can buy them
here in the UK from Maplins mail-order for ï¿½2.25 UK Pounds post free.
I could even ship one to someone in the states and it still wouldn't
cost anything like the $13.45 inc shipping you are asking.

These are custom units designed to fit the radio, with rubber gaskets that form to the radio to help stabilize the antenna and keep the connector on the radio from becoming broken.

I have some suggestions

1. Hal Turner is on tonite! WBCQ 7.415 8pm est 0200 UTC
Learn about jews and "savage negroe beasts"

2. 75m WWF action on 3.865, 3898, etc
How long will it take for Criss, W8CH, to get drunk?

3. Alex Jones "Real Talk Radio" 5.085

4. Pastor Pete Peters "Scriptures for America" WWCR 5.070

5. My Favorite - Profit Stair - WWCR 9.475 - 7.465 - 7.560 - 5.070
24/7/365

6. The GREAT Liberty Net and the Freemans Net. 3.947.5 LSB Friday and
Saturday nites.

This is the new shortwave lineup - Get over it.
Who were you referring to as "Mr. Monotone" ?

But it is good to "take notes" on these religious
screwballs, this way when you run into one of
"his followers" either live in person or on the ham
radio you can have some fun with their warped minds.

An example: You run into one of these nuts on the radio
in a qso. Tell em that on *Dec 26* the New World
Order will take effect and all x-ians will be herded into
boxcars equipped with guillotines. Their disembodied
heads and bodies will be buried underground on secret
altars at the "ultra-secret Illuminati USA HQ" (located under
the new Denver Colorado airport) as a offering to the
"Alien Grays" from Planet X who are already there and
building triangular-shaped UFO's which happen
to be shaped like the capstone-topped pyramid of the
"all seeing eye".... (Dec 26! 2 + 6 = 8 - 2 = 6 = "666" !!!)

...in short the screwballs who listen to and *believe* this shit
are where the REAL FUN lays! Wind em up with an outlandish
bullshit story and watch'em spin!!! Folks of the type who believe
the BS put out by Alex Jones and others of his "ilk".
These people are soooo easy to manipulate to their own destruction.

Hi,

Newbie questions:

What modes (am, fm, usb, lsb) does CB radio use on 26.965 - 27.405 MHz ?

Might as well also ask, please:
Any idea on the modes for:

5696 Coast guard

11175 for the US military.

11300 middle east commercial air

Much thanks.

I'm gonna tell you again to stop posting in my name. I will be contacting
AOL this week. To the people using my name in vain on AOL, when I get done
with you, you are gonna wish you never created that screen name.

For the record - for everyone else.

1. I use MSN as my e-mail account
2. I stopped using AOL back in June 2001
3. I no longer use Terranews.com for my Usenet access. (MSN does not
provide Usenet access)

So anyone else using those above ISP's - you can tell it is a fake Lloyd.

I would appreicate any help in stopping the abuse of my greatness.

Lloyd Davies - The real McCoy!

CB operates whatever they want, or think they know how to. But for a start try AM and then LSB.

The other freqs USB is a good guess. Most commercial/governmental stuff will be on USB.

I thought Illuminati headquarters was at Area 51.
You are just part of the conspiracy, spreading the official government
position that there IS no Area 51.

Besides, why would the Illuminati bury ANYTHING in a place where there is
no stopping or standing?

This is no bullshit. I work for a major telco as cust svc rep. Little Mom & Pop restaurant across the street where lots of us get lunch, coffee, etc. Went in there on break last week with a lady from the office who is a notorious holyroller. She bought coffee and pastries for herself and two others and her bill came to $6.66. She was horrified so she bought more to run up the total.

Give me a break.

--

Regards,
Joe S.

Wuz de nite befo Crimmus. And all ower da hood. ereybody wuz' sleepin dey wuz sleepin' good.

We hunged up our stockins An hoped like de' heck That old Santa Clause Be bingin our check

All o'de fambily Wuz layin in de bed`s While Ripple and Thunderbird Danced through dey heads.

I passed out inna flo Right nex to my maw When I heard sech a fuss I thunk:"it mus be de law !

I looked out thru de bars What covered my doe spectin de sheriff Wiff a warrant fo sho.

And what did I see I said "Lawd look at dat ! Ther wuz a huge watermellon Pulled by giant warf rats.

Now ober all de years Santa Clause he be white But looks liken us bros Gets a black Santa dis nite.

Faster dan a po'lees car My home boy he came. He whupped on dem warf rats an called dem by name.

On Leroy on Lonzo And on Willie Lee On Saphire,on Chenequa Dey wuz a site to see.

As he landed dat watermellon Out der in da skreet I knowed it wuz fo 'sho' Da damndest site I ebber did see

He didnt go down no chimbley He picked da lock on my doe An I sez to myself "Shit he done dis befoe".

He had his big bag Full of presents I xpect Wid air Jordans and fake gold To wear roun my neck.

But he left no good prezents Jus started stealin my shit Got my drugs , got my guns Even got my burglars kit.

Wit my stuff in de bag Out de window he flewed I woudda tried to catch him but he stole my knife too.

He jumped on dat watermellon An whipped out a switch He wuz gone in a seccon Dat son of a bitch

Nex year I be hopin Anutha Sanna we get Cuz dis here Sanna Clause Jus ain`t werf a shit

{Remainder deleted}

This newsgroup [alt.ham-radio.uwave] gets less than two dozen legitimate posts per year. The Spam sent to this group is far in excess of any real posts here. Therefore if you want accurate information, this message should be posted to other active Amateur newsgroups.

Besides, it appears that this study might be done for the benefit of your employer, Black and Veatch, Inc. It certainly reads much like someone wanting to usurp this ham band for commercial use. Low participation to this questionnaire, caused by posting to a seldom used Usenet group, is certainly not grounds to claim this Amateur Radio band is not used.
I have not seen this questionnaire on any of the Microwave mailing lists where the true microwave hams congregate.

Does the ARRL know about your survey?

5284. Decriminalizing on-air obscenities: pro & con

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-03 02:47:13 UTC

A blasphemous thought occurred to me a couple days ago: what if the FCC announced "from now on, we will no longer pursue any complaints of obscenities transmitted or broadcast over the airwaves... this includes all words which refer to sexual or excretory activities or organs, as well as to nudity and insulting gestures transmitted via image communications. Nor will we pursue complaints involving excess transmitting power. We will only pursue cases involving threats of bodily harm or property damage, or of jamming interfering with life-or-death emergencies".

Pro: by making nude pics/middle fingers/mooning legal on ATV, making linears legal on CB, and making cussing legal on CB & ham, there wouldn't be any challenge to it anymore from the outlaw's point of view. No adrenaline rush = no incentive.

Con: too many hams & CBers think such things should be as illegal as 1st-degree murder **NO MATTER WHAT** the law says--- after they cried their eyes out at being so cruelly betrayed by their beloved bureaucrats, they'd be outside the FCC's HQ picketing the place the very next morning, ready to wash scabs' mouths out with soap.

I didn't have a problem talking with Valery Korzun on the Mir Space Station
several years ago on several occasions.
That was on 2 metre simplex using a Standard C-520 HT on high power
(4 or 5 watts), and a discone antenna.
Distance just over 400 kilometres (was not directly overhead).

Paul.

That same arguement has been used by pro-drug people for years. They claim, with the same logic that you have, that the main reason people use drugs, is because of the "rush" of doing something illegally. Make it legal, and that "rush" goes away. At least that's what they would have you believe. I believe that the issue is much more dynamic than that, and throwing in the towel and giving into social deviancy is not the answer.

The much broader question would be why people feel the need to be able to swear, and bring to light, actions that are best left behind closed doors. This need for exhibitionism, and the juvenile need to say things like "F*ck" over the air, is a litmus test as to how our values have slipped, and where we, as a society, have failed as parents, in teaching those values.

The issue shouldn't be whether or not such activities should be legal, but rather why something like that would appeal to you in the first place.

Dave

You shouldn't because you don't recognize that there might be better parts out there than the stock $3.50 ones, and consequently you will need to learn by breaking your radio's SMA connector.

Everyone else should buy them because they are a quality product, and offer better stability and appearance than the stock adapters.

I have several of them. One of them had a problem (faulty connector from his supplier) and Stephen replaced it without hesitation.

does this calculation figure in?
Square of height in feet multiplied by 1.415?

I highly doubt this would protect your handheld for the rigors of a bnc
antenna being changed on a semi-often basis.
Stephens connector is a good one. Granted, it is the 'cream' of the crop,
and demands a premium.

5298. tk7 v0.4 open source software for ICOM IC-Q7 available

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-03 15:41:16 UTC
From: "Bob Parnass, AJ9S" <usenet2@parnass.org>
Message-ID: <3deccefc$0$1457$1dc6e903@news.corecomm.net>
Source record: 71442
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.scanner,alt.radio.scanner

tk7 version 0.4 is now available for free download.

tk7 is open source, multi-platform software which configures the
ICOM IC-Q7A wide coverage walkie-talkie. It runs on Linux, MacOS X,
BSD, UNIX, Windows (95 and later), and other operating systems.

Changes in version 0.4 include:

1) Memory bank channels may now be edited within tk7. Channels may
be changed, deleted, inserted, or swapped with adjacent
channels. More comprehensive changes can be made by exporting
the channels to a CSV file, then using a text editor or
spreadsheet program.

2) Added a duplicate frequency check.

3) Fixed a bug so tk7 now recognizes whole number CTCSS frequencies

You can learn about and freely download an experimental version
of tk7 from:

http://parnass.com

Thanks to Vojtech Bubnik for documenting the IC-Q7 memory structure
from Goran Vlaski's IC-Q7 Windows software. Thanks to
BlakkeKatte@yahoo.co.uk for publishing detailed information about
the IC-R2 protocol and file layout on the web. I am indebted
to Debbie Fligor, N9DN, for testing tk7 on MacOS X 10.2.1.

I don't warrant the software, though it will cost you nothing.

Hi all.Again I have this Kenwood TM-V7A up for sale.Everytime I get to deal with (some New Yorkers and some from New Jersey) I get the so called run around.Am I the only one that this happens to?I spend more time listening to all the bull and then they back out of the deal.No wonder why I won't ship COD or do anymore Paypal.Well anyway here it is.

I have the TM-V7a dual band mobile with (box ,and all docs) that came with it in (mint condition).Never mobile and in a non smoking home.I am asking $325.00
shipped to your door in the USA.Email me if interested at:
grburke@adelphia.net or

This guy is a proffesional police officer in NY.He sends money through paypal to someone else and they refused it and he tells me I refused it.Thats why he backed out.Poor people of NY if you gotr police officers that don't know what side is up or down.Here is some of what he claims.

With all due respect I sent you the money and then you denied the payment! This is a copy I received from Pay Pal:

This email confirms that Nichole Burke has denied the $312.00 you sent and no money has been
transferred from your PayPal account.

Unless you do not know who Nichole Burke is?? And as far as the $9.60 I would have gladly sent you the additional amount but you choose to deny the payment I sent you. I am a busy man as well and your comment about people from NY and NJ shows how unprofessional you are!

Message-ID: <f5bc0fc5.0212031809.68368265@posting.google.com>
Source record: 71456

I Like all these radios, but does anyone have any recomendations.
Between Yeasu FT VX-7R vs Kenwood TH F6A vs Icom IC-T90..

VX-7r is the one I like the most, but it does not utilize memory banks
for scanning.

TH F6a is my next choice, but I hear the casing is not that great,,
being plastic.

Icom IC-T90 is great value and solid construction, but it does not do
dual receive, i think? and the display is small. Plus there is not
rapid charger with it.

You cant have every thing and no radio is perfect,, so any input
please..
Thank you for your time,, it is appreciated..

oh chuckie's girth is a problem .....but just for the
record.....just take a bleach bottle with you when you see him and
spray his sorry ass with bleach.....that is a known germ killer and
at least you won't get aids from your friendly car parking lot
attendant and his funky ass body fluids.....rogo d????

I had that happen, too. A store in my old home town. Can't remember what I bought, but it came out to $6.66. Teh lady behind the counter grabbed one of those little $.25 choclate cubes rang it up and tossed it in the bag.

At about 7:30pm my time, during a net that operates there, Mr. Hollingsworth checked in. I suppose he is gonna monitor the frequnecy based on complaints made by Criss, W8CH. Criss is the victim of a QRM campaign organized by newsgroupie, KR4AJ.

Stay tuned to 3.865 khz the next few nites, sounds like it could get interesting!

And as always....

The nearest I ever came to anything like that was in 1965. I managed to have a **reasonable** qso with Mike, W2OY, on 75. Never liked 20 meters (except when on Guam Island as it was almost always open to the states for a number of hours). 160, 80, 40, and 15 were my hangouts (mostly 160). About 80% of the contacts were CW. These days it's 440 FM. Oh, a very few folks whining over cw vs. no code, but no bad operators that I've encountered. I haven't been on HF since 1970.

Back in the 60s, W2OY was very well known. His cq went something like "cq cq de W2OY .... no lids, kids, space cadets, or school bus riders. Only class A operators on this frequency from W2OY". He was a classic. Actually, a very good friend of mine, Tim, WB2KAO, tells me he was a nice guy in person ... I think he enjoyed 'trolling' the radio the way some folks troll the newsgroups ;-)

73 from Rochester, NY
Jim
ps - I use Tim's machine quite a bit. Nice bunch on there. We became friends in 1963.

I got the F6A, because it had 220. I really like it so far. Check out the review in the Nov. CQ magazine on the F6. MW/AM reception is pretty good. I was even able to listen in on a local HF net in LSB with the tiny radio! I like mine.

I think it was more like this;

CQ CQ CQ THIS IS W2OY...NO KIDS, NO LIDS, NO WA's NO WB's NO SPACE CADETS
PLEASE....CLASS A OPERATORS ONLY W2OY KAY SOMEONE PLEASE.

He answered me once. Told me I was weak and puny with poor modulation and
to grow some hair the next time I called him. I was 15 or so at the time.
Never did call him again..grin.

313 has been 'Rileyized'. A mockery of its former self. Just two or three democrats crabbing and moaning. And a guy in New Mexico telling us all about his latest antenna invention. And the blind golfer and of course Queenie sending SSTV to his buddy Larry....if the Queen can figure how to turn on the puter that is.

On rare occassions you can here the famous mascot of the frequency. Polly Parrot, W4FQF. But only rarely. The wife wont let him out of the house long since they got a new young mule. (thats where his TR7 is located...in the mule barn)

And don't forget the Minnesota goof sending 'Herby number one' with his Vibroplex. And the boys from out west using CBisms straignt off of 27.555.

Interesting yes, entertaining yes. Informational no.

Jim,

That's how I remember it - or at least how I remember it being told to me by the "old-timers" back in 1969 - when I was first licensed - and was a kid, a lid, and a WB - there was no way I was going to respond to the guy's CQ! ;-)

It's ironic that this discussion thread emerges after all of these years - pretty harmless fluff compared to some of the traffic you hear on the airways today -- but 33 years ago W2OY was a pretty radical dude.

Granted you don't need to check in to monitor, but if Hollingsworth checked in, he undoubtedly did it because he wanted people to know he was monitoring the frequency.

Back on the night when Col. Klink was caught in NC
you should have heard them cry like paranoid onion-peeler
washer women on the Eastern Regional Patriot's
Net ! (3.860 LSB M-F @ 8 PM EST)

On kook on there even went on a rant about how
he was a "prisoner in the clutches of the zog". Or some other
such pay-triot verbal masturbatory loon bullshit.

Forget the Liberty Net, these guys are the real whackjobs!

Hollingsworth and Homeland Security both had better
monitoring 3.860 LSB - these bozos sound like
the next crop of Tim McVeighs

From: "Lloyd" WhatLloyd@hoome.com
Date: 12/3/02 10:37 PM Eastern Standard Time
Message-id: <ask0o5$ln2$0@pita.alt.net>

I messed with lots of people
Figgered I was smart...
Made a lot of trubble
And stalked em' in the park

I called em' almost nightly
and gave em' tons of shit
I told em' I would get em'
And watch em' have a fit

I never thought the cops
would come to my front door
I never thought they'd bust me
Or my fat assed wh***

They cuffed me and they stuffed me
and shoved me in a car
then took me into booking
and said Hardy Har Har!

I sat there for a month or two
You know the storys true
And then they took me down the road
for another charge or two!

I'm not sure just what I'll do
my future's looking rough
But when I'm finally outta here
I'm gonna quit my stuff!

My momma is ashamed of me
My landlord tossed me out
I gotta do a couple years
But I'll be out and about

And when this life is over,
And I'm on my way to Hell,
Nobody will even give a damn,
'Cause I screwed 'em all so well

I reworked her face with a pepsi bottle,
To try and make an attraction,

But when I roll her a$$ in the flour,
I know she'll see no action

No they haven't. There never has been a requirement to use standard
phonetics. Shoot, the ARRL had a different phonetic alphabet in the
'60s (I don't know when they changed) than the ICAO one that was
standard for the FAA and the military. They couldn't possibly have
promoted that if the FCC had any "standard."

I am considering the F6A sounds like just what I am looking for to replace my HT and portable scanner - plus the HF SSB as an added bonus.

However I also like to listen to the military aviation band (225-400MHz AM) and have seen comments from two European users that the sensitivity on that band/mode is very poor. I am curious if this might be just the European model since the wideband receiver bands differ from the North American model.

Are you able to comment on this? I'd really appreciate any North American comments.

Thanks

Dave

There are upsides to having 666 show up on something.

Many years ago, before I became a ham, I helped my brother buy his first car. This was in Arkansas, a state which I had only lived in a couple years at the time. In order to get a bank loan for his car, I had to title my car in both of our names and put a lien on it to the bank. So we had to go down to the local Department of Revenue and get both cars re-titled and re-plated. I got KYN 665, he got KYN 666. He was delivering pizzas in those days. . . Well, one night he got a call from one of the less savory parts of town. He went in with the pizzas. Turns out the people in that part of town were going to 'roll' him, but when they saw the 666 on his plate, they decided that he would be better left alone . . . That and the hand painted front plate that said 'The Ripper' with a hand-drawn picture of a dagger dripping blood. . . .
(Arkansas only issues rear plates.)

Most likely an urban legend as the FCC did not require the use of
standard phonetics. We made up all kinds of phonetics for our
calls. The last three letters of a friend's call who drove for
Greyhound Bus was DGD (Drunk Greyhound Driver), another was AGG
(America's Greatest Gabber), ect., ect., ect.
No one was ever cited and the FCC did quite a lot of monitoring of
the ham bands in those days.

Dan, I think he used to state "no wet-bottom boys". He'd sometimes speak with a station with a WA prefix, but seldom to a WB. I did chat with him once and had a fairly nice chat. At the end of the chat he said he'd have to go as his grandkids were arriving. He said his grandkids needed a paddling. ;)

Right. "adam, baker, charlie, david, edward, frank ..." was the ARRL
phonetic alphabet whilst the military used "alpha, bravo, charlie, delta,
echo, foxtrot ...".

73 from Rochester, NY

Reminds me of W7TPG, Herman Middleton. His schtick (50's & 60's) was
along the lines of "Calling CQ from W7TPG, W7 Tuned Plate Grid, "from
the beautiful 'valley of the sun', Phoenix, Arizona, where the birds
fly backwards, not because they don't trust each other, but because
they want to keep the sun out of their eyes."

Yeah Rich is history. His pride overtook his brain and he is history. The Herpster will be back. He shucked and jived his way back into ham radio. Check 14.300in the mornings for Queenie and Herby fun hour.

Welcome back Mike. Hope ya get the tower up and no one comes down to visit ya anymore. Poor Judy has given up on ham radio tho. So who are you going to talk to about masturbation? Maybe you can find David Tolassi to help you out there, eh?

Oh one more thing Captain....grin...we both know thats bull don't we?. Be careful of the 'enforcer'. He talks softly and carries a big stick. They call him Riley......ask Polly about him.

Well, now you're going to get me started on Blackie, W6HLH.

He'd sit on 28.503, or 14.203 (back when the American phone band
stopped at 28.500 and 14.200) and call,

"CQ, CQ, CQ; CQ 10 (20) meters. CQ, CQ, CQ, California calling, dubya
six, hotellll, leema, hotellll, calling CQ on 10 (20) meters. Dubya
six, hotellll, leema, hotellll, listening this frequency or 28.495
(14.195). If you are transceiver equipped, tune your VFO to 495 (195)
and turn your RIT to the far clockwise position. CQ, CQ, CQ; CQ 10
(20) meters. CQ, CQ, CQ, California calling, dubya six, hotellll,
leema, hotellll, calling CQ on 10 (20) meters."

Eventually someone would call him and there wasn't much to listen to
after that. He was a far better CQer than a QSOer.

Mike,

Did you find out all of this information through the Freedomation Act?

Stay away from those freekencies, you will get into trouble!

Oh, I almost forgot, I spent that money I was supposed to send your wife when you died. I'm sure you will understand.

"Buh-lackey, neeeear the airport...Saaaan Fraaaancisco". I've heard him use "Honolulu-London-Honolulu" to break the monotony of those 10 minute CQs :-) "All Collllllinnngs (sic) equipment"
Funniest part was when he finally unkeyed and there was a great pileup of people razzing him for being such a lid.
I actually had a QSO with him once. It basically consisted of a 10-minute monologue from him of how everybody on the band was an asshole. He went into drunken rambling spells in some of his CQs where he just went on and on muttering about how everybody was.
I'll give the OF his due, he always had one helluva signal!

It's not safe to just return such a radio!

Instead, you should gather up all your sythesized radios and
ship them to me for PLL synthesizer detoxification. I do
charge a small fee for my service. One radio per radio. :)

About 11:30pm my time, W8CH and his gang and the group from 3860 got into a funny QRM-fest. They went back and forth between 3865 and 3860. Looks like this 75-meter zoo is getting more interesting. Don't get Mr. Hollingsworth involved, this is a comedy-central!

At about midnight or after, WB2CLN (Tommy tube) goes up to 3865 and tells Criss, that the group from 3860 were going to QRM him. This went on for a almost an hour, back and forth, until Criss passed out drunk on 3860.

I Have a Motorola S-1056-C Test set with Tone Gen it comes with the round cable and TEK37A Cable. The test set is in good condition. I am looking to trade for a Motorola RIB box and programming cable for a MTX-9000. Anybody interested contact me direct jlanz@peoplepc.com , If no takers it goes in the scrap heap.

Thanks
John

Herb Schoenbohm returns to ham radio (Dec 4, 2002) -- After nearly two years off the air, Herb Schoenbohm, ex-KV4FZ, has made good on his promise to one day return to the Amateur Radio ranks. The FCC on December 4 issued Schoenbohm a new call sign, NP2MJ, as a General-class licensee and was expected to act quickly on his Amateur Extra-class application. In 1994, the FCC put Schoenbohm's renewal application for KV4FZ up for hearing following his 1992 felony conviction on federal fraud charges. The Commission finally turned down his renewal application in 1998, the US Appeals Court upheld the FCC's decision in 2000, and the US Supreme Court declined to hear the case later that same year. After losing his renewal bid, Schoenbohm applied for a new license in 2001, first passing the General and then the Extra exams. The FCC subsequently designated Schoenbohm's General application for hearing on the basis of character issues stemming from his 1992 conviction as well as his alleged lack of candor during subsequent FCC hearings on the matter. Following a hearing last spring, Administrative Law Judge Arthur I. Steinberg in October cleared the way for Schoenbohm's return to ham radio by declaring that Schoenbohm appeared rehabilitated and qualified to again become a Commission licensee. Schoenbohm has said he may apply for KV4FZ as a vanity call sign.

> Criss, that the group from 3860 were going to QRM him. This went on for a
> almost an hour, back and forth, until Criss passed out drunk on 3860.

It went on till 1:45 AM when Chris finally
passed out "drunk-as-a-skunk-three-sheets-
to-the-wind" in his radio room.

What was all the fuss about CLN and "Chicken Feathers"
however. I heard this late-on and there seemed to be a
complete disentegration of the Motley Group as a fallout
from all of this. What happened???

Truly it was a 5-star evening of radio mayhem on 75 meters.
Was almost as good as the days of the classic 14.313/14.300
net wars.

Will there be a repeat tonight? I just gotta set the VCR Audio
Record Line Channel to SLP this evening with a T-160 Tape
in it on 65 just like I used to do with the Art Bell Show !!

"Christ" was not a proper name, though Christians subsequently turned it into one. The Jews have legitimate objections. From the Catholic Encyclopedia:

The word Christ, Christos, the Greek equivalent of the Hebrew word Messiah , means "anointed." According to the Old Law, priests (Ex., xxix, 29; Lev., iv, 3), kings (I Kings, x, 1; xxiv, 7), and prophets (Is., lxi, l) were supposed to be anointed for their respective offices; now, the Christ, or the Messias, combined this threefold dignity in His Person. It is not surprising, therefore, that for centuries the Jews had referred to their expected Deliverer as "the Anointed"; perhaps this designation alludes to Is., lxi, 1, and Dan., ix, 24 26, or even to Ps., ii, 2; xix, 7; xliv, 8. Thus the term Christ or Messias was a title rather than a proper name: "Non proprium nomen est, sed nuncupatio potestatis et regni", says Lactantius (Inst. Div., IV, vii). The Evangelists recognize the same truth; excepting Matt., i, 1, 18; Mark, i, 1; John, i, 17; xvii, 3; ix, 22; mark, ix, 40; Luke, ii, 11; xxii, 2, the word Christ is always preceded by the article.

Only after the Resurrection did the title gradually pass into a proper name, and the expression Jesus Christ or Christ Jesus became only one designation. But at this stage the Greeks and Romans understood little or nothing about the import of the word anointed; to them it did not

convey any sacred conception. Hence they substituted Chrestus, or "excellent", for Christians or "anointed", and Chrestians instead of "Christians." There may be an allusion to this practice in I Pet., ii, 3; hoti chrestos ho kyrios, which is rendered "that the Lord is sweet." Justin Martyr (Apol., I, 4), Clement of Alexandria (Strom., II, iv, 18), Tertullian (Adv. Gentes, II), and Lactantius (Int. Div., IV, vii, 5), as well as St. Jerome (In Gal., V, 22), are acquainted with the pagan substitution of Chrestes for Christus, and are careful to explain the new term in a favourable sense. The pagans made little or no effort to learn anything accurate about Christ and the Christians ; Suetonius, for instance, ascribes the expulsion of the Jews from Rome under Claudius to the constant instigation of sedition by Chrestus, whom he conceives as acting in Rome the part of a leader of insurgents.

The use of the definite article before the word Christ and its gradual development into a proper name show the Christians identified the bearer with the promised Messias of the Jews. He combined in His person the offices of prophet (John, vi, 14; Matt., xiii, 57; Luke, xiii, 33; xxiv, 19) of king (Luke, xxiii. 2; Acts, xvii, 7; I Cor., xv, 24; Apoc., xv, 3),and of priest (Heb., ii, 17; etc.); he fulfilled all the Messianic predictions in a fuller and a higher sense than had been given them by the teachers of the Synagogue.

From: "Lloyd" WhatLloyd@hoome.com
Date: 12/3/02 10:37 PM Eastern Standard Time
Message-id: <ask0o5$ln2$0@pita.alt.net>

I messed with lots of people
Figgered I was smart...
Made a lot of trubble
And stalked em' in the park

I called em' almost nightly
and gave em' tons of shit
I told em' I would get em'
And watch em' have a fit

I never thought the cops
would come to my front door
I never thought they'd bust me
Or my fat assed wh***

They cuffed me and they stuffed me
and shoved me in a car
then took me into booking
and said Hardy Har Har!

I sat there for a month or two
You know the storys true
And then they took me down the road
for another charge or two!

I'm not sure just what I'll do
my future's looking rough
But when I'm finally outta here
I'm gonna quit my stuff!

My momma is ashamed of me
My landlord tossed me out
I gotta do a couple years
But I'll be out and about

And when this life is over,
And I'm on my way to Hell,
Nobody will even give a damn,
'Cause I screwed 'em all so well

I reworked her face with a pepsi bottle,
To try and make an attraction,
But when I roll her a$$ in the flour,
I know she'll see no action

> American comments.

I actually have 2 of the 3 ... the F6A and the VX-7R.

The F6A certainly has the wider and more flexible recieve range --
picks up sideband and all ...

Also I like the way it lays out it's A/B band -- only the frequencies
in and near the transmit range go in the A bank, so you can scan on A
and just have amateur and police frequencies come up, with the radio,
TV, and weather stations on the B band.

Bad side -- obviously you can't hammer nails with the F6A like you can
with the VX-7. Good side though is that its heat sink is INSIDE the
radio so you don't get 3rd degree burns on high power transmit.

The RECIEVER is fine on the F6A -- it's the *#*&$*$@)#(*$ stock
antenna that is a piece of #**)$(*#)(*)%. Add a good telescoping whip
and you're in business on the F6A. If you can only have ONE radio,
this is the way to go.

The VX-7 has the advantage on ruggedness ... and one very nasty
problem -- low transmit audio. This can be fixed with an external
speaker/mic which is pretty much a necessity as if you transmit for
long periods on high power you will need skin grafts.

The VX-7 is also assisted quite a bit by a good outside antenna.

The display is a little bigger, it has many more "bells and whistles"
-- optional barometer/altimeter unit ... and you can just about hammer
nails with the thing.

Oh ... and it has some very, very interesting mods.

The Icom I have not had a chance to evaluate.

Ax

Why don't you take a hike and take your B.A.R.F. with you,
before I start barfing (AKA puking) from all this Neo-Nazi crap.

BTW, Jesus is a Jew, and Bro. R. G. Stair isn't a prophet!
& For the record I am not, a Jew, a black, or gay!

Lets get one thing straight, you were never appointed as the B.A.R.F. Chief of Communications.

Second, I do not want to have "anything" to do with you and the rest of the riff raff.

I will be content to be an amateur radio operator.

Please do not try to contact me ever again!

Herb

What so "Neo-Nazi" about having a ham radio club for whites? Whites with
like-minded interests? We have a ham radio club for gays, dont we?

I have a firewall (ZoneAlarm) but that slimy Xupiter ToolbarLoader MFC Application and Gator (ugh!) were both slipped into my machine by that website. Spybot Search and Destroy quickly eliminated both. Xupiter has been all over lately. That program is the most irritating 'worm' I have encountered. I haven't found a foolproof defense yet.

The following e-mail was posted on r.r.amateur.misc yesterday by Hans K0HB.

This has to be the ultimate rejection letter ever! Herb basically didn't even
acknowledge our resident moron Lloyd Davies.

Tubby is probably considering slitting his wrists and/or getting professional
counseling.

This is like getting the best Christmas present ever!

Imagine that, Lloyd Davies was a pretender all these years. And, a self
appointed one at that.

:
: As Chief of Communications, it's my honor to unveil a website in the next
: few days........
:

Lloyd,

I forwarded your message to my friend NP2MJ. He responded, saying....

Hans,

I plan not to get suckered in to any radio wars. My principle interest is 160 meters and chasing some new ones when they show. I probably won't have much up until next year. I have so busy with my regular government job, 6 radio station where I have engineering responsibilities, a well as still participating in the local Republican party leadership.

Let them have their fun. I am going to find enjoyment elsewhere.

73

Herb NP2MJ

In other words, BARF is not on his Christmas list.

With all kind wishes, <chuckle, smirk>

de Hans, K0HB

Is there any software out there that can convert Morse code, that is recorded from my Radio, then turned into text? I have not even the slightest clue about morse code and dont really want to learn it, but on my radio i can hear people using it and it is way to fast for me to write it down or anything

First things first...
Happy Holidays to Keyclowns and Anti-Keyclowns alike.

There was a hamfest in the Detroit area which a few of us
Anti-Keyclowns attended last Sunday. Who did we see, with about a 3
day beard, homeless shelter type clothes and a glazed expression on
his goofy face????? None other than Chukkee Sukkee herself!

Chukkee was so goofed up in the head he didn't even recognize us
Anti-Boys, although he had met one of us under very bad <for him>
circumstances in September. He called one of us "Mike", a name which
none of us carry, and mumbled incoherently at our table of antique
radios, variacs, antennas, modern transceivers, etc...and departed the
scene hastily.

Chukkee Sukkee can say things like "puff a root, dickhead", etc. , but
has absolutely no power or credibility. This lying toad of a human
being has said the following things on the NG's, all proven false:

1. He works for Jeff Roush racing
2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN
SEPTEMBER>
3. He is affiliated with a gang called the Latin Counts
4. He is affilaited with a bike gang called the Iron Coffins
5. He owns a .45 caliber pistol
6. He owns a 9 MM pistol
7. He has faced down police officers over his pistol. <he calls police
officers "pigs" in his posts>
8. When accused of selling illegal radio equipment Chukkee Sukkee
vehemently denied doing so. That is, until an enterprising amateur
looked up his advertising for sale of illegal amplifiers on
various
amateur radio and CB forums. This documentation drove him back
into the woodwork a while.

Chukkee Sukkee says these things to make himself appear to be some
sort of a formidable human being. When confronted in person he wilts
like a dandelion hit with weed killer. For example, Chukkee Sukkee
threatened in rec.radio.cb to shoot people with a 9mm pistol at the
Findlay, Ohio hamfest in September, 2002. The persons he threatened
walked up to his table and asked him if he wanted "to settle the hash
now", and he could not have been faster to stretch out a hand to shake
if he had a spring loaded elbow.

In late 1999, he lost an ISP because he threatened another amateur with raping his wife and daughter, killing his dog, and doing a drive by shooting on his home. The local police and the Toledo office of the FBI became interested in Chukkee Sukkee recently because of his long record of violent threats to people in newsgroups. The Lincoln Park, MI Police dept. paid Chukkee Sukkee a visit in September, 2002 because of these threats. After the cops were done with him, Chukkee Sukkee whined like the cowardly person he is, and posted to rec.radio.cb a long and lying denial of making any violent threats, and specifically admitted he had never owned a hangun or had a CCW permit. This admission ran counter to the fact that he had stated many times he owned either a .45 caliber or a 9 MM pistol, and had a CCW permit. This exposed the lies, of course.

There is now an outstanding warrant for Chukkee Sukkee's arrest in Lucas county, Ohio for meancing as a result of his violent threats. The Anti-Keyclowns have a copy of the police report in our posession. This will be made available to anyone who wants it, as it is public information. Email us for details.

Chukkee Sukkee should be considered a fat mouthed idiot, and very desperate to belong to some group or organization. He has been rejected by most rational persons, and will continue to be until he moves somewhere that has a population that has never been exposed to his moronic actions. <the planet Neptune, maybe?>

In summary, we have among us a lying idiot who has obvious psychological issues. He is prone to violent threats against people, even women, children and pets. When confronted, though, he shows a spineless, yellow, cowardly nature.

If Chukkee Sukkee is smart he will stay in Michigan. If he gets confronted by any LEO in Ohio he may be on a road he does not wish to travel. Chukkee Sukkee makes a big blatting issue of the fact that he was at the Toledo hamfest last year and that his truck and his carcass emerged unscathed. Fact is, no one threatened either. It is Chukkee Sukkes's mentality, however, that most intriguingly emerged in the dust up over this situation last March... Why would anyone be concerned about their auto being damaged unless: A> They are in the habit of damaging autos and have that mid set, or B> They are guilty of doing something bad and expect retribution?

Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

...Anti-Keyclowns attended last Sunday. Who did we see, with about a 3
...day beard, homeless shelter type clothes and a glazed expression on
...his goofy face????? None other than Chukkee Sukkee herself!
...

Goofy face??? you ain't miss america either dude! yes, I have a beard.. at least I can grow one...Homeless shelter???HAHAHA...what an idiot.

...Chukkee was so goofed up in the head he didn't even recognize us
...Anti-Boys, although he had met one of us under very bad <for him>
...circumstances in September. He called one of us "Mike", a name which
...none of us carry, and mumbled incoherently at our table of antique
...radios, variacs, antennas, modern transceivers, etc...and departed the
...scene hastily.
...

I walked around twice....was looking for the guy I came with James Keller W8WW....(whom I have a feeling might have authored this...)

and I might have called you Mike...sheesh...cut a guy some slack...

and for the record....you didn't do jack shit, Dougie...and you fucking know it....

...Chukkee Sukkee can say things like "puff a root, dickhead", etc. , but
...has absolutely no power or credibility. This lying toad of a human
...being has said the following things on the NG's, all proven false:
...
...1. He works for Jeff Roush racing

Jeff Roush....???? I never said that...I worked for Jack Rouch...as in
Rouch Industries Inc. . a job I HATED...Because of the fucking MORONIC
management...you know Morons....like your dumb fucking ass?

...2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN
...SEPTEMBER>

I never admitted anything...

I know what I got, and who said it's registered?

...3. He is affiliated with a gang called the Latin Counts

Again, dougie...you TWIST the truth! I never said I was " affiliated"
with them! I said I know a few of them....and a few owe me a few
favors..

Can't you do anything more original????

...4. He is affilaited with a bike gang called the Iron Coffins

Again, dougie...you TWIST the truth! I never said I was " affiliated"
with them! I said I know a few of them....and a few owe me a few
favors.....

...5. He owns a .45 caliber pistol

Like I said...you don't know what I got...

...6. He owns a 9 MM pistol

see above.....

...7. He has faced down police officers over his pistol. <he calls
police
... officers "pigs" in his posts>

again.....you twist and make up shit....I never said this....period.

...8. When accused of selling illegal radio equipment Chukkee Sukkee
... vehemently denied doing so. That is, until an enterprising
amateur
... looked up his advertising for sale of illegal amplifiers on
...various
... amateur radio and CB forums. This documentation drove him back
... into the woodwork a while.
...

I never DENIED selling them in the past....I don't sell them now....

...Chukkee Sukkee says these things to make himself appear to be some
...sort of a formidable human being. When confronted in person he
wilts
...like a dandelion hit with weed killer. For example, Chukkee Sukkee
...threatened in rec.radio.cb to shoot people with a 9mm pistol at the
...Findlay, Ohio hamfest in September, 2002. The persons he threatened
...walked up to his table and asked him if he wanted "to settle the

hash
...now", and he could not have been faster to stretch out a hand to
shake
...if he had a spring loaded elbow.
...

Now this REALLY FUNNY!

Douglas Adair.....YOU NEVER EVEN FUCKING SPOKE A WORD TO ME...UNTIL I
MENTIONED THE THING TO KEITH KC8TCQ....YOU'RE SUCH A FUCKING LYING
ASS'ED BASTARD!

YOU AIN'T SHIT!

...In late 1999, he lost an ISP because he threatened another amateur
...with raping his wife and daughter, killing his dog, and doing a
drive
...by shooting on his home. The local police and the Toledo office of
the
...FBI became interested in Chukkee Sukkee recently because of his
long
...record of violent threats to people in newsgroups. The Lincoln
Park,
...MI Police dept. paid Chukkee Sukkee a visit in September, 2002
because
...of these threats. After the cops were done with him, Chukkee Sukkee
...whined like the cowardly person he is, and posted to rec.radio.cb a
...long and lying denial of making any violent threats, and
specifically
...admitted he had never owned a hangun or had a CCW permit. This
...admission ran counter to the fact that he had stated many times he
...owned either a .45 caliber or a 9 MM pistol, and had a CCW permit.
...This exposed the lies, of course.
...

AFTER THE COPS WERE DONE WITH ME?!?!?!?
BAAAAAAAAAAAAAAAAAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHHAHAH!

NOT!

AGAIN! MORE BULLSHIT LIES!!!!!! ONE DETECTIVE COMES HERE...AND I
TALKED TO HIM....

SHEESH! DOUG YOUR LACKING ORIGINALITY...

...There is now an outstanding warrant for Chukkee Sukkee's arrest in
...Lucas county, Ohio for meancing as a result of his violent threats.
...The Anti-Keyclowns have a copy of the police report in our
posession.
...This will be made available to anyone who wants it, as it is public
...information. Email us for details.
...

I WANT TO SEE IT FOR MYSELF!!!!

...Chukkee Sukkee should be considered a fat mouthed idiot, and very
...desperate to belong to some group or organization. He has been
...rejected by most rational persons, and will continue to be until he
...moves somewhere that has a population that has never been exposed
to
...his moronic actions. <the planet Neptune, maybe?>
...

YEAH, FUCK YOU DOUGIE....MAYBE I'LL COME DOWN THERE THIS WEEKEND.

AND WE'LL "TALK"

...In summary, we have among us a lying idiot who has obvious
...psychological issues. He is prone to violent threats against
people,
...even women, children and pets. When confronted, though, he shows a
...spineless, yellow, cowardly nature.
...

YOU'RE A ONE TO TALK!

...If Chukkee Sukkee is smart he will stay in Michigan. If he gets
...confronted by any LEO in Ohio he may be on a road he does not wish
to
...travel. Chukkee Sukkee makes a big blatting issue of the fact that
he
...was at the Toledo hamfest last year and that his truck and his
carcass
...emerged unscathed. Fact is, no one threatened either. It is Chukkee
...Sukkes's mentality, however, that most intriguingly emerged in the
...dust up over this situation last March... Why would anyone be
...concerned about their auto being damaged unless: A> They are in the
...habit of damaging autos and have that mid set, or B> They are
guilty
...of doing something bad and expect retribution?
...

MORE BULLSHIT TO COVER THE FACT THAT YOU'RE AN IDIOT DOUG...

...Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

SO IS DOUGIE AND A NO-CODE, 2 FUCKING METER PENCIL-NECKED GEEK!!!!
WITH NO CLASS, NO LIFE AND NO FUCKING JOB....AND HAS TO BUILD 2 METER
ANTENNAS FOR A LIVING...

TELL ME DOUG, WHY DID YOU CLOSE THE RENTAL SHIP IN COLDWATER? PROLLY
BECAUSE YOU WERE SELLING DRUGS OUT THE BACK DOOR AND COLDWATER SHUT
YOU DOWN! YOU SEE, i HAVE FAMILY THERE AND i HEARD ALL ABOUT
IT!!

AND THEN YOU COWARDLY RAN TO CHICAGO!

LATER DOUG...

P.S.....the shit never stops

I check in here once every 5 years...it's enough. Same old people hashing
the same old thing. -

FWIW, if Herb (KV4FZ) is back on the air, it's good news for those who enjoy
low band DX'ing. The guy's accomplishments on 160 are, by anybody's
standard, remarkable-- especially when you consider that he did it all from
the noisy Caribbean.

Message-ID: <asrmr7ulp1@slb4.atl.mindspring.net>
Source record: 71372

Poor ignorant fool. Certainly Mr. Morse initially thought so. But when all those 'macho numbskulls' that he and his company hired to roll up tape from the floor and transcribe it via the typewritter....or hand...or whatever...he/they discovered it was far more accurate and cheaper to let the 'grey matter' do the copying.

This CRAP about computers and programs copying off the air CW accuratly is a bunch of hooey. Sure if the sending station is sending perfectly spaced and timed Morse and if the conditions are good and if there is no noise or fading of the signal then you could probably get 75 percent copy. A good 'grey matter' operator can do much much better than that.

Remember 'Floyd' it takes two things to communicate....an operator at both ends.

Now Im back to the 160 meter CW contest. Having a ball working the dead mode of CW. No place to call CQ, too many antiquated operators going along a 40plus to find a hole. And guess what? Not a code reader amongst them.

Have a good day.

This is Mr. Macho (yeah right)

Dan/W4NTI

A couple of hours ago during the 160 m CW contest I heard the call NP2MJ.....as I recall that is the new and reformed Herby...ex KV4FZ.....course it could have been a bootlegger. But I doubt it. None of the Barf/Stumper crown could operate CW.

Hope he stakes out a spot and calls CQ Contest. I need the mutliplier.

Bye

Dan/W4NTI

*** post for FREE via your newsreader at post.newsfeed.com ***

Hmm.... I downloaded a few to see if they really did work.
DOS!! - I couldn't even get some to open up (Windows XP here). I tried a command line on boot and everything. I am in the process of learning the characters and must say... its not that hard at all. An hour a day makes perfect...
This software (ones that I COULD open) is hard to use/just didn't detect my signals as I keyed CW into my line-in port. :-(

Douglas Harrington

Herb Schoenbohm returns to ham radio (Dec 4, 2002) -- After nearly two years off the air, Herb Schoenbohm, ex-KV4FZ, has made good on his promise to one day
return to the Amateur Radio ranks. The FCC on December 4 issued Schoenbohm a new
call sign, NP2MJ, as a General-class licensee and was expected to act quickly on
his Amateur Extra-class application.

And why the whining, bleating, blubbering, childish complaining that seems to be the mark of so many Hams over the return of Herb?
If the return of Herb is all that concerns you, one must consider the fact that you guys have little in your lives to keep you occupied.
Fancy this scenario...grown men (allegedly) pissing and moaning over the return of one Ham operator.
You guys should look into your personal portfolios before you condemn and castigate. It is obvious that a few of you have miles to walk in the shoes of others...

But if he's going to stay away from 14.313 and 14.300
as he said he would, then his return is meaningless
and all the 20m toilet-tics can go back to 3.865.

Actually that's a pretty good reason to learn it. However there are programs that do decode morse code through the sound card input. Depending on the quality of the code being sent, the results vary from great to lousy. When the code is poorly sent or there is a lot of interference, the trained human ear and brain does a better job.

Whichever way you go, have FUN! That's what it's about anyway.

My radio won't tune down to that low a frequency i.e. 3.865 kHz!
(Three point eight six five kilohertz?)
Maybe it should read 3.865 megahertz? Or perhaps 3865 kilohertz?
After all 3.865 kHz is 3865 hertz and that's in the audible
range; I think?
Just curious?

5445. Mr. Lloyd Davies' true identity

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-07 14:53:59 UTC
From: lewislouisathens@aol.com
Message-ID: <20021207095359.02861.00000152@mb-cq.aol.com>
Source record: 71287

It has been learned through exhaustive investigations, that Mr. Lloyd Davies has decided
not to continue with his foolishness and to quit his obsession with Mr. Herbert Schoenbohm. I'm sure that Mr. Schoenbohm is quite relieved with that.

During these investigations, it was found that Mr. Davies is non other than a crossdresser whos real name is Helga Rubenstein, the heir to the Helena Rubenstein cosmetic fortune. The job at Poppa John's Pizza was just a cover for his wealth.

I have directed our financial personnel to return those checks that were sent in to check Mr. Davies' background, as it appears that our work is done.

I will say this, Mr. Davies/Helga Rubenstein is probably one of the wierdest, sickest perverts that we have ever investigated. His arrest record is a long as a mules...errrr, ahhhh well you get the message.

>The job at Poppa John's Pizza was just a cover for
>his wealth.
>
We've been trying to tell you that, Mr. Lewis. And Mr. Louis. And it was his own computer empire that got him all that wealth.

Here's the story. Two years ago Mr. Davies received a "Christmas package" from one of the little people. It contained an A+ study guide, which proved to be his ticket to spectacular wealth.

With the exams passed, he moved on and not long ago swapped a 2002 'Vette (the high end one) for a Bimmer 8-ish. The V-12 one with the Michelin ZTP 40 tires.

Our Huntsville sources advise us that he's also purchased a LARGE home on the side of one of those mountains overlooking downton H-vl.

Room enough to entertain a dozen or more guests at next year's hamfest. Hint hint.

Now if he could just dig deep and hire a good lawyer to represent The Colonel.

I should guess that the numerology of the Book of Revelations was done either in Greek or Hebrew letters with the first letter = 1, second = 2, ..., tenth letter = 10, and THEN 11th letter = 20, 12th = 30, ...

Jewish dates are stll given in this system and Jews tend to give religious charity in multiples of 18 units (chet = 8, yud = 10, chai = life) and there is a whole strain of Jewish numerology based on this system.

Of course if you're trying to flame someone or something it is not difficult to find SOME way in which they add up to 666.

Mathematical prestidigitation is not rare. Look at all the postings and emailings of "pyramid scam" chain letters in which you're going to MAKE MONEY FAST by sending money to people on the list and rotating your name onto the list of marks.

Many of them come up with some flawed mathematical hand waving where you are certain to make $50,000 or even (five reports) $500,000 every 4-5 months. (if only there were an endless supply of suckers)

There are thugs in the FCC who take confiscated electronic
gear for their personal use, fraudulently completing paperwork
in the process. The FCC has more of its share of thugs than
they would care to admit, then be forced to prosecute. Very
embarrassing, especially when many of those thugs are in positions
of trust and/or management.

5465. Altering Wireless mike for 'regular' FM band

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-08 02:24:57 UTC
From: petermiller@cstplan.com
Message-ID: <3f650a55.0212071824.6d62ca1b@posting.google.com>
Source record: 71308

I'd like to wear a tie clip mike with wireless transmitter on
bird-watching expeditions with small groups of people listening to my
quiet comments and observations on their own pocket FM radios. via
earphones.
I already own a PA System with an FM wireless mike unit which is
calibrated for use with the receiver amplifier unit at 49.83Mhz.
(Realistic Model No.32-1225T)
Is there any way to adjust the wirelss mike to transmit within the
87-108Mhz range?
Inside there are 4 block-like aluminum adjustable 'pots'? marked RT27
E462 / E463 , M315 E462 and a white plastic + shape which looks
adjustable marked 472 4193 and lastly a small brass screw in a white
base soldered to a spot on the circuit board marked CT1.
Any information would be appreciated.
Thanks

Amateur Radio Newsline™ Report 1321 – December 6, 2002

Amateur Radio Newsline report number 1321 with a release date of Friday, December 6, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. North Korea takes its only ham off the air and the first digital voice Q-S-O across the Atlantic. These stories are first on Amateur Radio Newsline report number 1321 coming your way right now.

(Billboard Cart Here)

**

INTERNATIONAL – N. KOREA: LAST HAM FORCED OFF THE AIR

The Peoples Republic of Korea appears to no longer want Amateur Radio operating from its soil. It made its intention clear when it asked its only ham ito pack his gear and send it out of the country. Jeramy Boot, G4NJH, in Nottingham England has the details:

--
Ed, P5/4L4FN, the only radio amateur operating legally from North Korea, has had to close down. On the evening of the 22nd of November, Ed was called into a meeting with the North Korean Radio Regulation Board. Without any explanation he was politely asked to stop all transmissions and to pack up all his radio equipment.

Ed spent the following day dissembling his antennas and packing boxes. That afternoon government officials sealed all the boxes and Ed has been told to take everything out of the country when he leaves North Korea for a two-week holiday on the 10th of December.

Jeramy Boot, G4NJH
--

With Ed now off the air, ham radio is gone from North Korea and nobody expects it to be resumed anytime in the near future. It also puts North Korea back near the top of D-X'ings most wanted list.
More on this story is at www.amsatnet.com/p5.html. (RSGB)

**

EMERGING TECHNOLOGY: DIGITAL HAM AUDIO SPANS THE ATLANTIC

Two ham radio communications pioneers have achieved a major breakthrough. The first two-way digital voice transmission across the Atlantic via Amateur Radio. Norm Seeley, KI7UP tells us who did it and how it was accomplished.

--
Doug Smith, KF6DX, and Didier Chulot, F5MJN, have successfully transmitted and received HF digital speech signals between Sevierville, Tennessee and Paris, France. It happened on Friday, November 22 nd.

The first historic contact took place on 21.218 MHz in the 15 meter band. Chulot spoke with Smith for several minutes using a high-frequency digital link within a 3-kHz bandwidth. Signal strengths were S-5 to S-7 and readability was solid in both directions.

The feat was accomplished using Ten-Tec transceivers and digital audio systems from Thales Communications.

--
DEMO AUDIO HERE
--

The Q-S-O demonstrated the advantages of digital audio for two way radio. This includes noise-free, FM-like reception and the potential for simultaneous voice and data exchange.

With an eye toward the digital future of Amateur Radio, I'm Norm Seeley, KI7UP.
--

The Ten-Tec/Thales system used in this experiment is based on a new international broadcasting standard for digital radio adopted last year by the International Telecommunications Union. The FCC has approved a similar standard for broadcasting in the United States. An Amateur Radio version is expected to appear on the market sometime in 2003. (KF6DX, Ten-Tec)

**

EMERGING TECHNOLOGY: PPW PROPOSES ELECTRONIC INFRASTRUCTURE TO WARN PUBLIC OF DANGER

A group of U.S. communications security experts has recommended that Americans be alerted to impending danger over their wireless devices. Amateur Radio Newsline's Fred Vobbe, W-8-H-D-U, takes a look at this new concept in emergency notification:

--
The Partnership for Public Warning says that a national wireless system could send alerts to citizens via their pagers, mobile phones or computer screens.

The Partnership for Public Warning is a newly formed thirty-member advisory body that includes representatives of government agencies, relief agencies and even a ham radio operator. And on Monday, November 25th it released a report that says conventional media broadcasts may spread alerts too slowly in instances of pending natural disaster or terrorist threat.

P-P-W says that the newly formed Department for Homeland Security should take responsibility for leading development of a national all-hazard public warning architecture. This, in partnership with other federal agencies, state and local governments, industry, universities and other stakeholders. The technology itself would be produced by private industry with the alert system

operated by governments and selected other organizations following a strict set of alert protocols.

P-P-W says that improved warning systems and procedures will reduce losses from natural and man-made disasters, and will speed recovery. Most important is that it will save lives.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

President Bush cited quick responses to attacks as a priority of the new Department of Homeland Security which will consolidate parts of 22 departments to better prevent attacks in the wake of the September 11, 2001 terrorist attacks in which some 3,000 people died.

information about the Partnership For Public Warning is on the web at http://www.partnershipforpublicwarning.org/ppw (Published reports)

HAM RADIO GROWTH: GOOD NUMBERS TO US

The folks on that "other band" might call this “almost good numbers.” This with word that the number of radio amateurs licensed by the Federal Communications Commission is at a five-year high. But there are some caveats. Bill Pasternak, WA6ITF, has more:

--
According to the CQ Magazine website, FCC numbersshow a total United States ham population of 684,498 as of October 31st. And breakdowns provided by Joe Speroni, A-H-Zero-A, say that the primary growth has come among Amateur Extra Classand General Class licensees. Extra is now breaking the 100,000 point for the first time.

Technician Class figures have essentially held steady. Also we had 20,000 new hams entering the hobby in the year ending October 31st.

License renewal statistics were also encouraging with the renewal rate climbing from an abysmal 45% two years ago to a better, but still unacceptable, rate of 55% in the past year.

Better numbers, but not the best.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, in Los Angeles.
--

More on licensing figures are on the web at www.speroni.com/fcc (CQ)

HAM RADIO IN THE PUBLIC EYE: THE ATLANTC MONTHLY

The November 26th edition of Atlantic Monthly Magazine On-Line has some good words about ham radio and its role in homeland security. In an article titled America's Secret Weapon in the War on Terror, one of the groups singled out for attention is the nations corps of Amateur Radio operators. Its described in the article as an ever-ready line of emergency communications.

The story goes on to say that America boasts 650,000 licensed ham-radio operators. It quotes he ARRL's Mary Hobart as saying that about 1,500 of them are fully certified in emergency communications and are prepared to rush to the scene of a forest fire, flood, or hurricane with a jump bag full of portable radio equipment. And says Hobart, That can be crucial.

Atlantic Monthly notes that when phone lines, radio towers, and even satellites go down, ham operators -- broadcasting each to each other , and operating on batteries or generator -- stay on the air. And says Atlantic Monthly, after the terrorist attacks of 911 when New York's cell phones turned into paperweights hundreds of hams, some from as far away as Texas and California, turned out to provide radio lifelines for emergency workers and relief agencies.

The article is must reading for everyone involved in Amateur Radio public relations. It can be found at the U-R-L listed in this weeks Amateur Radio Newsline print edition.

The complete article is at
http://www.theatlantic.com/politics/nj/rauch2002-11-26.htm (KS2G)

**

ENFORCEMENT: FCC INVESTIGATING INTERFERENCE TO EMERGENCY TRAFFIC IN LOS ANGELES

The FCC is looking into allegations that two Los angeles area hams interfered with a distress call on an area repeater. The FCC's Daryl Duckworth, NN0W explains:

--
"The Enforcement Bureau has opened a case involving allegations of deliberate interference to emergency communications on the N6SAP repeater in the Los Angeles area. Anton W. Johnson, N6OAY, and Ledge Musselman, KC6NCN, are being asked to explain the allegations of the operations on October 2.

Information is also being sought from the repeater licensee. Scott Press.

This mater is being taken very seriously by the Enforcement Bureau since emergency communications is one of the foundations of Amateur Radio."
--

The FCC claims that Johnson and Musselman interfered with attempts to relay emergency traffic on the 147.435 repeater at about 9:45 a.m. on October 2nd.

Press is being asked to explain what action he is taking in this matter. He is also been directed to summarize any conversations he may have had with the licensees against whom the allegations have been made. The FCC says that Press must also provide any written correspondence he may have sent to Johnson and Musselman. All three were given twenty days from he date of the FCC letters to respond.

**

ENFORCEMENT: THE STORY OF THE EX-AA8DP

A follow-up now to last weeks report of the capture of Steve Anderson, the ex AA8DP. Anderson was wanted in connrection with an alleged attack on a police officer. He was arrested in the hills of North Carolina following a manhunt that has lasted over a year. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the story of how Anderson was caught:

--

A tip to the Fox Television program "America's Most Wanted" and forwarded to federal investigators has led to the arrest of Kentucky fugitive Steve Anderson, the ex-AA8DP. Anderson, an alleged white supremacist who resigned his Amateur Radio license almost two years ago and then operated an unlicensed radio station from his home, had been at large since October 14th of 2001.

According to the Louisville Courier-Journal, Anderson was arrested in the mountains of southwestern North Carolina by the Bureau of Alcohol, Tobacco and Firearms and the North Carolina State Bureau of Investigation. The A-T-F's Don York told the newspaper that America's Most Wanted received a tip about Anderson's whereabouts after airing its second segment on him about a month ago. The tip was forwarded to the A-T-F, which worked the case with North Carolina authorities.

Anderson is accused of shooting an automatic weapon at Deputy Scott Elder. This, after Elder had pulled Anderson's truck over north of Middlesboro Kentucky for a traffic violation. Elder was unharmed after Anderson allegedly opened fire, but his police cruiser was struck about two dozen times. Police said Anderson then drove into the mountains, and a search of his property turned up explosives and guns.

Anderson had attracted attention of authorities several years ago by playing host to a small Ku Klux Klan rally during which a cross was burned. He also allegedly operated a shortwave radio station out of his home, where his commentary against minorities, immigrants and the government drew the attention of the Federal Communications Commission. The Anti-Defamation League complained to the FCC about Anderson's broadcasts which were taking place in the Amateur bands. Rather than explain his actions, Anderson sent in his AA8DP license for cancellation. It was accompanied by a rather convoluted message that said he did not recognize the licensing authority of the FCC which he called an agent of a foreign power.

Anderson continued to broadcast but bowing to extensive pressure from the nations ham radio community, he took the transmissions out of the Amateur

service bands. They stopped after he disappeared following the alleged attack on Officer Elder.

For the Amateur Radio Newsline, In Henry Feinberg, K2SSQ.
--

As previously reported, the ex-AA8DP had been a member of the Kentucky State Militia until April 2001. That group dismissed Anderson because he refused to shut down his unlicensed radio operation. (ARNewsline(tm) from published reports)

**

THE INTERNET VS. HAM RADIO: HOTMAIL AND JUNO BLOCK ARRL E-MAIL FORWARDING

If you get your e-mail using the American Radio Relay League's @arrl.net vanity address, and use Juno or Hotmail as your account you know that you were cut off for a few days. It wasn't the ARRL's doing. Blame it on the twi internet service providers.

According to an ARRL bulletin the two companies notified the League on November 25th that they had stopped accepting e-mail messages forwarded to users of their services from the arrl.net e-mail server. According to representatives of the two companies, this was part of heir solution to the Internet-wide problem of spam.

The ARRL, through the vendor for the arrl.net server began working with both companies to resolve this matter. The ARRL and Hotmail reached a accord the fllowing day and service was restored. Juno was back late on Monday December 2nd. During the peak of the service outage, forwarded e-mail to nearly 6,000 ARRL members was curtailed. (ARRL)

**

RADIO LAW: NEW CODES DEVELOPED TO HELP STUDY RADIO RELATED HIGHWAY ACCIDENTS

State highway departments will soon get help tracking how many traffic accidents are caused by drivers chatting on their handheld cell phones or C-B sets, using their pagers or checking their personal digital assistants. In January, every state will receive a booklet of revised codes that describes causes of vehicle crashes, including distractions from electronic communication devices. The codes were developed by traffic safety and crash data experts, including the Governors Highway Safety Association and the Federal Highway Administration.

A spokesperson for the Governors Highway Safety Association, says that the updated crash codes will allow the organization to develop data that demonstrates whether electronic distractions in cars are a serious safety problem. A March report by the National Conference of State Legislatures suggests device-related distractions killed an estimated 600 to 1,000 motorists in 2001 and could kill 2,000 a year by 2004. (Published news reports)

**

RADIO EDUCATION: HAM RADIO COURSE OFFERED AT PENN STATE

Amateur Radio is a part of the training being offered this fall to freshmen at the Pennsylvania State University. According to Brad Parola, KB3HQE, Vice President of the Penn State Amateur Radio Club, part of the course during the first half of the Fall semester included exposure to Amateur Radio. Students were shown how to tune radios like the Ten Tec Pegasus, shown how to receive PSK 31 signals, and were given a tour of the world famous Rock Springs Antenna Test Range run by Dr. Jim Breakall WA3FET. Early in October, those students who were interested were given the opportunity to take their Technician class tests. So far 15 students have passed an Amateur service exam. (KB3HQE)

**
RESCUE UPDATE: ZL1AMO CONDITION REPORTED UNCHANGED

We have an update in the medical condition of famed D-X'er Ron Wright , ZL1AMO. Jim Meachen, ZL2BHF, has the latest:

--
A bit of good news this week. Wrights daughter Terri says the family visited Ron in the hospital and he was sitting up in a lazy boy chair. This is the first time any of the family had seen seen him out of the bed since he was hospitalized. Terri Wring says that Ron is also trying to communicate with those around him and he looks a lot better than on previous visits.

As reported last week, Wright suffered collapsed lungs while visiting Fiji. He was air lifted by an emergency air ambulance to Auckland New Zealand where he was initially reported to be in critical condition and on life support.

The INDEXA – the International D-X Association -- has established a fund to assist Wright and his family with the cost of air evacuating him from Fiji to Auckland. Donations go to the ZL1AMO Air Ambulance Fund, in care of Bill Jennings, W4UNP, P. O. Box 607, Rock Hill, South Carolina, 29731. Sorry, but INDEXA says that contributions to this fund are not tax deductible.

From Auckland New Zealand – down under – I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline
--

Updates on the fund and Wrights condition are being posted to the web at www.papays.com/opdx.html (ARNewsline(tm), INDEXA, AA7UC)

**

THE SCIENCE PAGE: WHALES YES – NAVY NO

A federal judge has tentatively blocked the Navy from deploying a new early warning system because it might harm whales. Amateur Radio Newsline's Brucce Tennant, K6PZW, has the rest of the story:

--
A Federal court has said no to a new high-frequency SONAR system designed to detect enemy submarines at long range because it could further endanger the worlds whale population. But in making his ruing, the judge also said the Navy may use the sonar during wartime and must be allowed to train with it beforehand.

In partially siding with environmentalists, the judge ordered both sides back to court to begin formulating a plan balancing environmental and military concerns. Environmental organizations say the Navy's powerful sonar system can strand, maim or kill marine mammals. The Navy disagreed.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--

A few days earlier, a different judge ordered the National Science Foundation to stop firing high-intensity sonic blasts into the Gulf of California because they harm whales. So far there has been no comment from either the Navy or the N-S-F. (Published reports)

**

HAM RADIO IN SPACE: UO-22 IS BACK WITH US – FOR NOW

G7UPN reports that U-O-SAT 22 is back on line and open for business. At least for the time being.

Chris tells the AMSAT News Service that new software has been loaded to try and keep the downlink operating most of the time. But says G7UPN, UO-22 is an older veteran satellite. This means it may give problems in the near future. More information is in cyberspace at www.amsat.org (ANS)

**

INTERNATIONAL – JAPAN: JA SAYS NO TO PLT

Japan has said no to the introduction of Power Line Transmissions or P-L-T in that nation. Following extensive trials, the Ministry of Public Management, Home Affairs, Posts and Telecommunications has decided not to permit their roll-out for fear of interference to other services.

The Japan Amateur Radio League had been actively working with the government, radio astronomers, broadcasters and others to assess the impact of P-L-T systems on the radio spectrum. The results of this P-L-T study in Japan is a real eye-opener. It showed conclusively that Power Line Transmission system emissions are harmful to High Frequency communications operating in the range 2 to 30 MHz. Because of this Japan's telecommunications regulators have refused all requests from P-L-T manufacturers to operate these systems. (JARL, Q-News)

**

INTERNATIONAL: GETTING ON THE AIR DOWN UNDER

Still in that region of the world, were you aware that New Zealand is one of very few countries in the world where licensed amateurs visiting from overseas can immediately operate?

Well it is and a visiting amateur can get off an airplane, walk into the terminal building and start operating on 144 MHz and above by simply signing his own call sign portable Zed-L. This, without the hassle of getting a license and without paying a licence fee.

For more information on operating in New Zealand as a tourist or visitor take your web browser over to www.nzart.org.nz (NZART)

**

ON THE AIR: COMMEMORATING DIANA

Back here in the U-S-A, the first successful moon bounce experiment was conducted by the Army Signal Corps on January 10th 1946. And to commemorate the event, the Ocean Monmouth Amateur Radio Club will operate from the historic Diana radio site on January 10th 2002. The Ocean Monmouth group plans to operate using Morse and SSB in the General and Novice Technician sub bands of the 80, 40, 20, 15, 10 meter bands. For more information on the Diana Project and for QSL info please visit the OMARC web site at www.qsl.net/n2mo (OMARC)

**

DX

In D-X, F6COW is reporteed tobe operating from the 9S1X club station in the Congo. He will reportedly be there until the 9th
of December. (GB2RS)

Also, F6BLQ will participate in the ARRL 10 Meter Contest on the 14th and 15th of December, also as 9S1X. His operation will be on SSB only. (GB2RS)

And ST1MN is a new ham in the Sudan. He will be active on all bands until the end of June 2003. Q-S-L as directed on the air. (GB2RS)

A lot higher in frequency, FT1ZK, is active on 6 meters every afternoon from Amsterdam Island. The operator is named Caroline and she has a beacon transmitter active on 50.086 MHz and running 24 hours a day. She will be on Amsterdam Island until January 16th. QSL via F5JCB. (VHF Reflector)

**

THAT FINAL ITEM: THE CANALS OF VENUS - DEBUNKED

And finally this week lets turn our eyes toward the planet Venus. Just our eyes. Not our telescopes. Because if we do use a telescope we might make the very same mistake made by a very famous astronomer regarding canals on that mist shrouded planet. Q-News Graham Kemp, VK4BB, takes us into the cosmos for this one:

--
Turn of the century astronomer Percival Lowell is well known for promoting the incorrect notion that water canals had been built on the surface of Mars. He

also drew a map of the "canals" on Venus; the only problem was that no one else could see anything resembling canals because Venus is always shrouded in clouds.

Turns out that Lowell had narrowed the aperture of his 24" telescope down to about 3" to attenuate the bright light from Venus. That little known fact - recently publicized - caught the attention of optical experts who realized that Lowell had unwittingly turned his telescope into a reverse ophthalmoscope, an instrument used to examine the interior of the eye. Instead of mapping the surface of Venus, Lowell was apparently mapping the shadows of blood vessels and other structures on his own retina!

Sky & Telescope magazine explains the situation in detail, presents Lowell's sketch of the Venusian "canals," and a photograph of retinal blood vessels. The two patterns are strikingly alike.

From Q-News Australia, I'm Graham Kemp, VK4BB, for the Amateur Radio Newsline.
--

You can see the pictures Graham reefers to in the online edition of Sky and Telescope magazine. Just take your web browser over to http//skyandtelescope.com/news/current/article_648_1.asp (Q-News)

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I
also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape
I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to
the deal. 100 watts in gets you about 1000 watts out. I will trade this 2KD 5 Henry amp for a FT 990 or a FT 1000. It has new caps
and a pair of Emac 3-500. It is wired for Single Phase 240. The same
voltage that runs your dryer and electric range.
I also have a Icom AT 500 auto tuner. This tuner will handle 500 watts. It works fine and I have no use for ICOM equipment. My station is all Yaesu at this time. I will trade this tuner for a Kenwood TS 50, or other small HF Gen. coverage rig, or a good Short wave receiver. I also have a Pentium III 500 Mhz computer for trade. It has 128Mb ram, CD burner 52X CD rom S3 Virge video card, 1Gb hard drive, 10/100 Mb network card, Motorola SM 56 modem, Yamaha sound card in a ATX tower. Of corse keyboard and mouse included. I will trade this computer for 350 bucs plus shiping or a good HF moblie rig.
I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.

Yes I heard him a couple of times. But he was so weak here it just was not possible. When I came back and looked he was gone. Oh well. He was the only VI on I reckon. Guess he didn't get his vertical working yet.

Go to www.google.com and do a search on FCC and
Corruption, FCC Corruption, and other similar words/phrases.
It will take you a while to read, but it is quite an eye-opening
experience. You'll find people, places, events, legal actions,
etc. In some cases, people/times/dates, etc. are very well
documented. You can also sense the frustration of trying to
expose criminality and corruption inside the FCC. Apparently,
there is a good ole boys system in place that sweeps dirt under
the carpet quickly and efficiently. One very interesting case
where that system failed was when several FCC employees at
Laurel MD were caught by county law enforcement officials in
the act of running a child pornography ring. They used government
computers and ran their dirty little business while on the public
payroll!!!!! Incredible! You can bet the FCC never published a
press release on that little caper!

With all due respect, I must disagree. Mr. Baxter the one true leader in your ham radio. He fears nobody. He fights for his beliefs and never backs away. He never makes a promise that he does not keep.

The American Amateur Radio Association of which he is President is your one clear choice as a true democratic representative ham radio body. It welcomes all two-way radio people as members and works with all of them regardless of the radio service they represent.

The International Amateur Radio Network which he presides over is always "hours ahead when minutes count." When a communications emergency is declared it is Mr. Baxter's International Amateur Radio Network "Jump Teams" that are always first to arrive. No other organization is as well prepared or as responsive to human suffering!

Clearly, Mr. Baxter is a man amongst men. He desreves your respect and admiration. He has had mine since 1986.

I'm willing to try, but you will have to rotate your beam 180 degrees, and
point it east to NJ.

Give an example of a promise he's made.

>The American Amateur Radio Association of which he is President is
>your one clear choice as a true democratic representative ham radio
>body. It welcomes all two-way radio people as members and works with
>all of them regardless of the radio service they represent.

Demoocratic? Who's the president/CEO? Who elected him? I'm an amateur
and I want an amateur radio association representing me. If the aara
works with other radio services, then they aren't giving me the full
representation I want.

>The International Amateur Radio Network which he presides over is
>always "hours ahead when minutes count.

Nice tag line. Now give one verifiable example of it.

>" When a communications emergency is declared it is Mr. Baxter's
>International Amateur Radio Network "Jump Teams" that are always

5492. RS HTX202 146.76 'birdie' partial fix

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-09 04:33:09 UTC
From: Jim Shorney <jshorney@inetnebr.spamblock.com>
Message-ID: <3DF41D05.503EF9F9@inetnebr.spamblock.com>
Source record: 71235
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

Some years ago I came up with a partial fix for the much-discussed 146.76 birdie in the Radio Shack HTX-202. The cause is well documented, but apparenty my mod never made it into the system anywhere. It began when I noticed the signal strength of the birdie was reduced by pressing the 'Lamp' button on the side of the radio. As others have found, I then determined that the signal was radiating from the keypad circuits. The solution was to install a .002 uF chip capacitor directly across the terminals of the lamp pushbutton (other values should work, this is just what I happened to have on hand). While this did not completely eliminate the offending signal, it greatly attenuated it.

Here is the procedure:

1) Remove the four screws from the battery plate, and carefully remove the battery plate and spring.

2) Remove the four screws securing the back of the radio to the front.

3) Carefully pull the front away from the back, taking care not to damage the mylar ribbon cable between the radio halves on the right side of the radio.

4) Lay the radio on your bench and remove the two small screws securing the switch circuit board on the side of the radio.

5) Pull the switch PCB away from the side of the radio, taking care not to damage it's mylar ribbon cable.

6) Pull the rubber switch cover away from the circuit board. You will now have access to the switches.

7) Carefully solder your chip cap across the two terminals on the left-hand side of the Lamp switch (marked LIG on the PCB).

8) Re-assemble the radio and enjoy!

It is possible that other placements for bypass caps will result in more improvement; I was happy with my results, so I never persued it any further. YMMV. Standard dislcaimers apply.

Email comments directly (remove the spamblock), as I don't read this group much.

73,

Jim, NU0C

P.S.: A correction: the 'Zener' in the power/battery circuit that causes heat problems isn't a Zener, it is a Schottkey rectifier diode according to the Tandy service manual.

I just sent in my renewal to W5YI over the net yesterday.

I also checked out the K1MAN school of ham radio!
http://www.k1man.com/web39/Page_18x.html

They have free morse code software.

I use Logger ver. 8.07 - and I like this software.
I didn't do any backup before. Yesterday I was in need to create copy of my data from Logger.
From Utilities -> Export Logs ->Complete Logbook -> logger format -> file name-> OK
I'm getting appropriate file ve3azg.asc but unfortunately this file is empty.
The same situation when I try to create adi file (adif format).
Do you have any idea what I'm doing wrong.
I also want to ask you about opinion of ZAKANAKA.
Thanks in advance
73 de Adam VE3AZG

Horses for courses, I say. Phasing works optimally when you're in the lab or have a line-of-sight to the transmitter. Once you start bouncing photons around, there will be a differential change in both phase and frequency between sidebands. And you should be able to do AF DSP even more simply by AF conversion. You can select sidebands after detuning 10 kHz away, which will generate an 'AF carrier' at 10 kHz, and then use your AF DSP to select the sideband that you want, and convert it down to audio frequencies. It's easier to get 24 bits of dynamic range at AF.

Except when you're locked into using DRM, if their receivers are using a proprietary algorithm, and won't let you program them for the algorithms of others (such as those that are better-sounding by not having a lot of overhead built-in, unlike DRM and other DiVX-like algorithms, or even those that are worse-sounding but based on an open standard).

If you can get a 24 kbps stereo mp3 stream down an phone line w/a 3 kHz bandwidth, then it seems that one should be able to send that

stream via packet radio w/out any need for DRM. Any hams doing this?

You can download DRM specification's final draft from the
internet - the file is called "es_201980v010201m.pdf".
Basically it uses MP4 for sending audio. As far as I know
(though I'm not 100% sure) using MP4 decoders doesn't
involve paying royalties. And right now you can find free
implementations of MP3 decoders (MP4 is MP3 + some
mods for low-speed transmission channels) on the internet.

What really wories me is that FCC will open market for
"home-grown" standards and while the whole world will
be using DRM, US will have 3 or 5 competing, completely
incompatible (even among themselves) "standards".
Oh well... I would go for European/whole-world-except-US
version anyway - the programming would be probably
much more interesting (as it is right now on HF).

On the other hand, some HAMs are still using CW invented in the era
of steam engine. :-) The point is: they use what they like and enjoy.
Anyway, SSB is still better for DX voice than DRM would be...

Besides using DRM coders (MP3/4 coders) require paying
royalties. So what's the point of using it and paing for it when
one can use free SSB, AM, FM, etc.?

73, Piotr

5510. FT 920 For trade and MORE!

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-10 22:52:36 UTC
From: Oris <orisnospam@dirtball.com>
Message-ID: <3DF66EE2.8060606@dirtball.com>
Source record: 71253

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I
also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape
I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to
the deal. 100 watts in gets you about 1000 watts out. I will trade this 2KD 5 Henry amp for a FT 990 or a FT 1000. It has new caps
and a pair of Emac 3-500. It is wired for Single Phase 240. The same
voltage that runs your dryer and electric range.
I also have a Icom AT 500 auto tuner. This tuner will handle 500 watts. It works fine and I have no use for ICOM equipment. My station is all Yaesu at this time. I will trade this tuner for a Kenwood TS 50, or other small HF Gen. coverage rig, or a good Short wave receiver. I also have a Pentium III 500 Mhz computer for trade. It has 128Mb ram, CD burner 52X CD rom S3 Virge video card, 1Gb hard drive, 10/100 Mb network card, Motorola SM 56 modem, Yamaha sound card in a ATX tower. Of corse keyboard and mouse included. I will trade this computer for 350 bucs plus shiping or a good HF moblie rig.
I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.
oris@dirtball.com
Happy Holidays
73 and thanks for reading

There are Hams among us!

It could be your neighbor, the butcher, the baker, the candlestick maker, … anybody. Secretly, they may be Hams. Some of them wear an "identifier" which consists of numbers and letters. They identify themselves and fellow Hams through this identifier. Also, their mannerisms and colloquialisms are recognizable for those who know about them. Still, they travel unrecognized.

On the outside they look like humans. Like a body snatcher, their goal is to convert each and every one of us. They communicate with each other with electronic devices over the airwaves. Those who have gotten this far have seen certain traditions and protocol utilized. They form secret societies. Some, which know of the existence of Hams, have called it a cult.

They use codewords in their conversation, replacing regular works with Qxx. Some have developed the ability to send and receive real time encoded symbols. One gains higher status in the Ham society for demonstrating this ability. Some of them feel superior because of this.

They live.

I have had an FT7100M since June 2002, use it mobile, no problems, easy to use. I sat down with it one afternoon and programmed the memories full of repeater and simplex freqs and access tones where needed and now I rarely do anything but twist the knob or push the up/down button on the mike.

Now we have it! Here, for the first time it is out in the open. The ARRL is
a cult! They speak in codes. Tongues. Have secret societies with arcane
initiation rituals.
Odd groups such as the QCWA, ARES, and an odd-duck bunch calling themselves
the 10-10 Club abound and all are rather reclusive and exclusive.
Yes, indeed. This strange bunch of other world types are often seen with
funny little metal sticks protruding from the roofs of their cars, from the
tops of their funny little aluminum hard hats, and some even keep funny
looking protuberances on their belts to, one assumes, keep their dungarees
from falling down from their chests.
Where do these strange critters come from? What do they do? Do they bear
their children live? Incubate them? Why do they glow in the dark? How do

they reproduce?
They must.
They live.

The 8th International CCF Contest/DX Meeting in Finland

Contest Club Finland welcomes contesters and DXers to the 8th international
Contest/DX Meeting in Finland!

Date: 17-19 January 2003
QTH: Vantaa, Finland

Presentations with perspective - Agenda (preliminary):

Friday 17.01.2003
19:00 (local time) "Unofficial" Get-Together in Sokos Hotel Vantaa

Saturday 18.01.2003 Sokos Hotel Vantaa
Meeting 12:00 - 19:00:

CQWW DX 2002 CW at EA8ZS &#65533; la OH2U by OH2XX
(Claimed multi/multi winner)
- The story behind
- Setup and technical solutions
- Audio examples

Serious RTTY Contesting by OH2BP

WRTC2002 Analysis by K3NA

ZA1B CQ WW CW Operation by OH5BM

Logistics Behind A Contest/DX Pedition To a Remote Location, Case
C53M/C56R
by OH9MM

Contest Dinner 19:00 -
(please inform when you pre-registrate, if you are taking part in dinner
too
... menu/prices available soon)
WRTC2002 Video Presentation - World Premier by OH2BH

Sunday 19.01.2002
Goodbye Finland (program still open)

Meeting QTH information:
SOKOS HOTEL VANTAA, Hertaksentie 2, 01300 Vantaa
(5km from Helsinki-Vantaa Airport, 15 minutes to Helsinki City Centre
by
train)
Rooms: single 77 euros/night, double 88 euros/night

Reservation: phone +358-20-1234 600 (020 1234 600 from Finland), fax
+358-20-1234 646 (020 1234 600 from Finland), email:
sokos.hotels@sok.fi
Web site: http://www.sokoshotels.fi (choose Vantaa)
MAKE YOUR RESERVATION AS SOON AS POSSIBLE !

Other accommodation in Helsinki area:
A great deal of other accommodation is available in Helsinki for a
variety
of categories and rates.
Here is a good contact point for general accommodation:

Hi Gary,

I have one for mobile and sometimes 1k2 or 9k6 slow commutation use. Since 6 months of use (in loc. JN37/38 where it's hot, rainy cold and whatever you want) I had no problems.
It only lacks the possibility of full duplex, but for FM use it's not so important.Very simple to handle with.

5523. USA QSL Bureau, and QSLing

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-11 23:07:35 UTC
From: Anonymous Ham <NoSpam@yahoo.com>
Message-ID: <XyPJ9.44637$jf7.2529194@news2.west.cox.net>
Source record: 71266

I've been doing some reading and am wondering....
What ever happed to the USA Bureau? I suspect it just collapsed do to lack of popularity, but does it still exist in any form?

Also, why doesn't the Incoming US Bureau's allow us to send US-US cards. Why couldn't they just accept the cards and charge some fee for handling them. They still don't have to send them out... that is still up to the receiving station to get their cards. A fee upwards of 10 cents a card would still save us money. And... if the USA Bureau collapsed because of lack of interest... I don't see how the Incoming Bureaus would get overwhelmed with US-US cards.

I like QSLing, but find that it is starting to put a dent in my already slim budget. Especially if I want to send QSLs out after a big contest.

Just recently, I sent a few plain domestic QSLs out, using the 23 cent postcard rate. I received one card back with a note on it saying "Don't request a QSL without an SASE!!!"

Is there any services out there that can make domestic QSLing cheaper?

I am currently studying Computer Science, and am very interested in technology. But don't tell me that eQSLs are the way to go. I don't like the idea of eQSLs, probably because I am too much interested in having actually cards, that came from other places, to display and show to people. And also seeing stamps from foreign countries that come back on the few Direct DX QSL requests I send out. (But DX cards are not the issue in this message)

So, does anyone have any secrets or advice, or any reasons why we can't make domestic QSLing cheaper? I'd especially like to hear from anyone who be a member of an Incoming QSL Bureau club.

73

Sincerely
A Young Anonymous 20wpm Extra Class Ham

Join the ARRL for a very cheap way to SEND QSLs. Dont need to be a member
to RECEIVE them. Just send some envelopes to your district bureau. Some
prefere a check.

Go to www.arrl.org and scan around for QSL Buro for all the info.

Since youdidn't bother to put down a call I cant help you on where to send
the sase/check to. All they ask is pay the postage...domestic that is.

Of course these are DX not stateside cards.

5526. K1MAN jamming countinues

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-12 01:30:26 UTC
From: "N0VFP 2.0" <brother_lloyd_99@yahoo.com>
Message-ID: <3df7e523$1_2@corp-news.newsgroups.com>
Source record: 71269

The nuts that dislike K1MAN continue to jam his amateur radio bulletin service. I enjoy the K1MAN service. I wish those that did not like him, would just tune him off and goto another frequency.

This afternoon on 14.275MHZ, K1MAN was QRM'ed with music and a QSO on top of him. I almost picked up the phone called Mr. Hollingsworth, I was so disgusted. Why Hollingsworth allows this to continue, I do not know.

They are easy to spot. Their the cheap bastards who do
much of their shopping at discount places like WalMart,
wear the same clothes 3-days in a row to save washing
machine water/electric expenses, and would rather let their
offspring and xyl's go about in old clothes, drive a rattletrap
car and eat at mcdonalds - all so they can buy another
FT-1000MP and 2KW Amplifier on E-Bay for big signal
on 75 Meters.

> Basically it uses MP4 for sending audio. As far as I know

It abuses mp4 by adding the overhead needed to encrypt the data as well as compress it, so that only those people w/the right smart cards can listen. I just bought a DVD player that has such a smart card built in. If I want to enable the extra features, I'll have to pay extra. One of those features is to be able to play mp3 files below 128 kbps or above 320 kbps. DiVX also added such overhead to the data, but I don't think they offered any 'extra' features.

> (though I'm not 100% sure) using MP4 decoders doesn't
> involve paying royalties. And right now you can find free
> implementations of MP3 decoders (MP4 is MP3 + some
> mods for low-speed transmission channels) on the internet.

It's called something like MPEG 2.5 layer 3. It's an unofficial modification of MPEG 2, w/bit rates as low as 8 kbps. Sounds better than Real Audio at that rate, and consumes less cpu cycles to decode.

> What really wories me is that FCC will open market for
> "home-grown" standards and while the whole world will
> be using DRM, US will have 3 or 5 competing, completely
> incompatible (even among themselves) "standards".

Why not? The analog world also has incompatible standards: AM/SSB/FM. (Although an AM radio can use slope detection to listen into narrowband FM.)

> Oh well... I would go for European/whole-world-except-US
> version anyway - the programming would be probably
> much more interesting (as it is right now on HF).

Don't count on it. They'll probably have different encryption keys for different stations.

>> If you can get a 24 kbps stereo mp3 stream down an phone line w/a
>> 3 kHz bandwidth, then it seems that one should be able to send that
>> stream via packet radio w/out any need for DRM. Any hams doing this?
>>
> On the other hand, some HAMs are still using CW invented in the era
> of steam engine. :-) The point is: they use what they like and enjoy.
> Anyway, SSB is still better for DX voice than DRM would be...

Sure. DRM would abruptly cut off to zero when the signal becomes marginal.
But if the signal isn't marginal, you'll still need to have the right
decryption key for the specific station/region. BBC Worldservice will
have a way to keep you from easvesdropping in on their African service.

> Besides using DRM coders (MP3/4 coders) require paying
> royalties. So what's the point of using it and paing for it when
> one can use free SSB, AM, FM, etc.?

That's assuming that they're doing the encoding. They could still
broadcast non-copywritten mp3 files that had been encoded by others.
So my question still remains: has any ham done so?
And if yes, how well could such broadcasts be received?

Reminds me of the ham I knew that had this van for years with a
bashed in front fender. I would often see his wife driving it
around. I ask him why didn't the get the thing fixed? He said it
would cost him several hundred dollars and he could not afford it,
yet he had probably $3000 worth of radios in it.

Sadly a lot of hams are like that, have their priorities all wrong.

>I'm pulling for the Profit.
>
He did nasty stuff with teen-age "colored" girls ... and now you're gonna pull for him? Doesn't this make the profit a "race mixer"? And a "race trader"?

Woe is me. I hope Kevin doesn't read this post. He'll never speak to you again. He may read this thread to The Great Liberty Net. Sorta like when Nashville Joe got ratted out. You remember that, don't you?

Everyone knows what your dark purposes are now. Too late to avoid *suspection*. Vic is gonna have a cow when he hears this. Woe is me.

Everyone's gonna hate you now. The Great Liberty Net. Chicken Fornicator's Net. The Colonel. National Vanguard. Kevin. Professor Bryant. Firebottle. Ed Norton, Sewer Expert. EVERYONE ! !

>I'm gonna predict that he'll get an 11th hour
>"plea bargin" agreement.
>
He probably will .. then he can go back to "the farm" and play hoozya-daddy with a few more young "colored" girls.

But I'm pulling for him to get some time. So he can meet Tyy-Rone and Lee-Roy. If this happens, I predict that the profit will find true love .. behind them thar prison walls. Lots of it.

This is news to me. I didn't think hams are allowed to broadcast. Have
the rules changed?

Why? You do not like Stair? But you pull for a man who shot up a patrol car and was on the run for over a year. Stair, on the other hand, has never blown up a police car, or called for race wars on ham radio. I would feel safer with Anderson behind bars for the next 20 years or so. Stair, who is almost 70 years old, is a old man, and mostly harmless. I would want to him to pay, if he is found guilty. If so, he should shut down his Overcomer, and never come on shortwave radio again.

There you have it.

Yes. You are correct. I can think of numerous Hams that do as you describe.
However, aside from the misguided Hams such as AMP who are as you describe,
there are many, many others that keep to themselves, pay their bills and
keep a low profile.
Don't paint all of us with the same brush....unlike AMP and his ilk, my
house and cars are paid for and I do not owe anybody a penny. I am gainfully
employed and wouldn't dream of going to a Hamfest with a stupid aluminum
helmet replete with antennas galore.
Not all Hams are Nerds, but there are always going to be those who are still
closer to CB than being a Ham.

Definitley not right (and illegal) to Jam his Broadcast. I just wish the FCC would eliminate broadcasting on the amateur bands, including W1AW.

Awww....BULL SHIT on-a-stick up k1man's arse !!

You two probably *wish* you'd each got as much of
that fine young black poontang as ole Bro Stair has already!

He probably got as much of, if not more, than Jefferson
allegedly got from his evening-visits to the "slave quarters"

GRIN

Adleast W1AW does not "borrow" other peoples copyrighted
broadcast material and put out the same redundant old horse crap
5 times a day seven days a week.

Not all Hams are Nerds, but there are always going to be those who are still

closer to CB than being a Ham.

You shouldn't talk about poor ole AMP. He screwed a CBerone time(many times actually} and the CBer busted out the winder of AMP's car. AMP never fixed it, just put Hefty bags up when the weather threatened. I do think, in all fairness to AMP, that he upgraded to Zip-Lock trash bags, eventually. LOL

W1AW is transmitting legal and authorized bulletins for the Amateur
community.

K1MAN is broadcasting a 'variety' show with plagerized material.

Yes, those fundys would want "thier 10 percent" right away. Ironically,
after the passing of Dr. Jack Hyles, they put up a webpage with sermons:
http://www.baptist-city.com/

Lots of interesting stuff.

But the preacher at my church has a good standing in town. No worries
there. The "old pastor" is leaving town, to take a church near Atlanta. I
heard that the old Chruch gave him a "no confidence" vote - 6 moths ago.

I'm pulling for the truth too. Let's both pray for the right thing.

Been listening to alot of 20 meters, 40 meters and 75 as well. Been even
listening to some CW these days too. Just found some good stuff at the
K1MAN school of Ham Radio.

Here it is: http://www.k1man.com/web39/Page_18x.html

Glenn also endoreses W1WCR's books :
http://www.k1man.com/web39/Page_21x.html

You got proof of that? Of course you don't. Those ARRL reports are aired on 2 meter repeaters all the time. I bet Mr. Hollingsworth is sitting in his office, just laughing at you. Do you know that Holligsworth once worked with Nextel, to help them win contracts with the FCC. I bet you when he retires, he is gonna use a case file, that he is building with every day, to sell off the ham bands, and put lots of money is his pocket. Not yours or mine. Every day you and ND8V jam K1MAN, it gives Hollingsworth another entry into his file, and another nail in the coffin of Ham Radio.

Think about it.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I
also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape
I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to
the deal. 100 watts in gets you about 1000 watts out. I will trade this 2KD 5 Henry amp for a FT 990 or a FT 1000. It has new caps
and a pair of Emac 3-500. It is wired for Single Phase 240. The same
voltage that runs your dryer and electric range.
I also have a Icom AT 500 auto tuner. This tuner will handle 500 watts. It works fine and I have no use for ICOM equipment. My station is all Yaesu at this time. I will trade this tuner for a Kenwood TS 50, or other small HF Gen. coverage rig, or a good Short wave receiver. I also have a Pentium III 500 Mhz computer for trade. It has 128Mb ram, CD burner 52X CD rom S3 Virge video card, 1Gb hard drive, 10/100 Mb network card, Motorola SM 56 modem, Yamaha sound card in a ATX tower. Of corse keyboard and mouse included. I will trade this computer for 350 bucs plus shiping or a good HF moblie rig.
I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.
oris@dirtball.com
Happy Holidays
73 and thanks for reading

5550. Cellphone jammer needed. Where can I purchase one?

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-12 22:33:10 UTC
From: toomanyradios@aol.com
Message-ID: <20021212173310.03151.00000031@mb-mq.aol.com>
Source record: 71193

Received this e-mail from a friend of mine today. She's not a radio expert or technical type. Just an average citizen who is tired of rude people making nuisances of themselves in public with cellphones:

"I just came from having lunch with friends at (a rather expensive restaurant.) Everything was fine until a cellphone started ringing at the table next to ours. The guy answered and proceeded to engage in a loud argument with his wife/girlfriend/lover. This went on for over 20 minutes! This inconsiderate S.O.B. stayed at his table for the entire time. He made no effort to go to the lobby or outside and finish his call, despite the fact that he had finished his meal and his eating companion was waiting for him to get off the phone so they could leave!

Ove the past few months, I have been interrupted by these selfish slobs at movie theaters, restaurants, even at church! A cellphone rings during the middle of the sermon and it's owner takes the call! Stays right there in the church pew and talks for several minutes, conveniently ignoring the angry glances of both pastor and parishoners. If these were emergency calls, I could understand. But in each instance, these were simply routine telephone conversations that could have been made at another time and place. Due to the loud and boisterous nature of those engaged in the calls, I couldn't help but to hear all the fine details of their conversations.

I realize modern-day America is a society of "me, me, me, and the hell with everybody else." I also realize this type of behavior is only going to get worse, not better. But I am damn sick and tired of having my outings compromised by these people. When I pay money to see a movie or eat at a fine restaurant, I have the right to enjoy myself and not be constantly bothered by some jerk talking on a cellphone. Asking the offending party to "please take your call somewhere else" is a waste of time. These people simply have no regard for common courtesy or public decency. If I'm going to maintain my right to peace-and-quiet, I'll have to take matters into my own hands.

Is there any kind of device I could buy which would allow me to shut off these phones? Someone at work told me that in Japan, they have "cellphone jammers" which cut off all conversations and keep phones from ringing within about a 50-foot radius. Have you ever heard of these? If so, where can I get one? Thanks. I knew that if anyone knew, you would."

I tend to agree with my friend. The cellphone situation has gotten completely out-of-hand. All information and suggestions on this would be greatly appreciated.

I don't need to prove a thing...all you have to do is listen to K1MANs bullshit. Anyone with any sense knows what he is doing. Which apparantly elliminates you from the equation.

I dont Jam K1MAN and never have. The rules state and the FCC agrees that IF someone or group is on frequency when K1MAN begins his tapecast...it is LEGAL TO REMAIN ON FREQUENCY AS LONG AS YOU WANT.

Don't belive me? Drop Mr. H a line at RHOLLING@fcc.gov

Have a nice day numbnuts.

Quote FCC rule. If so, then does it apply to the interCON phone patch net?

Too many double standards coming from Holingsworth.

RE-read my comments, Dan. It's people like you who put nails in the coffin.
I was not the one who threatened people over the air. I did'nt get on the
air and make certain people "my business"

I'm working on upgrading to General class this next year. I plan on getting
on 17 meters and 15 meters. No contesting, just getting on the air and
having fun. No fights on the air.

and I am....

Lo all.

I'm a computer engineer, with growing interest in wireless technology. Its time i finally bite the bullet and get my amateur license. i've been meaning to do this since 5th grade when my teacher showed me his ham radio.

I'm mainly interested in digital communications, although some analog would be good too.

Where do I get started? My background knowledge still isnt strong enough to get me certified right yet...

Thanks
Matt

What I cannot understand is how the K1MAN content meets the
regulations. Section 97.111 b (6) Transmissions necessary to
disseminate information bulletins;
How is a so called talk show, editorials, etc an information bulletin?

Its not. Mr Baxter has been trying for years to force a confrontation with the FCC and the ARRL. Up until his recent re-occupation of 14.275 no one really stood and fought him about it.

Now we have a radio war going on. Thanks to K1MAN. Everyone is a loser of course. Have you noticed how few calls he actually gets? Tell you something? Does me....most of the hams know he is nothing but a troublemaker.

Some Xmas letters from Santa to the kids of some
75 Meter Op's we all know and love.

Merry phuckin Xmas Y'all!

(1) Dear Santa, I wud like a kool toy space ranjur fer Xmas. I'v ben a gud
boy all yeer.

Yer Frend, BiLLy

Dear Billy, Nice spelling. You're on your way to a career in
lawn care like that 20M fuckhead in Georgia. How about I send
you a fucking book so you can learn to read and write?
I'm giving your older brother the space ranger.
At least HE can spell! Go back to the Liberty Net with Vic.

(2) Dear Santa, I have been a good girl all year, and the only thing
I ask for is peace and joy in the world for everybody!

Love, Sarah

Dear Sarah, Your parents were smoking when they had you, didn't they.....?
:)

(3) Dear Santa, I don't know if you can do this, but for Christmas,I'd like
for my mommy and daddy to get back together. Please see what you can do.

Love, Teddy

Dear Teddy, Look, your dad's banging the babysitter like a screendoor in a
hurricane, do you think he's gonna give that up to come back to your frigid
mom, who rides his ass constantly? It's time to give up that dream.
Let me get you some nice Legos instead, OK kid?

(4) Dear Santa, I want a new bike, a Playstation, a train, some G.I.Joes, a
dog, a drum kit, a pony and a tuba.

Love, Francis

Dear Francis, Who f-n names their kid "Francis" nowadays?
I bet you're parents are same-sex cohabitation flaming drag queens.

(5) Dear Santa, I left milk and cookies for you under the tree, and I left
carrots for your reindeer outside the back door.

Love, Susan

Dear Susan, Milk gives me the runs and carrots make the reindeer fart in my face when riding in the sleigh. You want to do me a favor? Leave me a bottle of scotch instead. Chivas Regal or Pinch preffered.

(6) Dear Santa, What do you do the other 364 days of the year? Are you busy making toys?

Your friend, Thomas

Dear Thomas, All the toys are made in China nowadays silly! I have a condo in Vegas, where I spend most of my time making low-budget XXX-porno films. I unwind by drinking myself silly and squeezing the choice asses of cocktail waitresses at the Mirage while losing money at the craps table with Art Bell. Hey, you wanted to know kid!

(7) Dear Santa, Do you see us when we're sleeping, do you really know when we're awake, like in the song?

Love, Jessica

Dear Jessica, Are you really that gullible? Good luck in whatever you do. You have a promising career as a college admissions administrator. I'm skipping your house till next year unless your 26yo single mom wears the cherry-edible undies I left her last year.

(8) Dear Santa, I really really want a puppy this year. Please please please PLEASE PLEASE could I have one?

Timmy

Timmy, That whiney begging shit may work with your folks, but that crap don't work with me homeboy. You're getting a red or green sweater again.

(9) Dearest Santa, We don't have a chimney in our house, how do you get into our home?

Love, Marky

Mark, First, stop calling yourself "Marky", that's why you're getting your sorry ass whipped at school . Second, you don't live in a house,you live in a low-rent apartment complex with 29 gooks in the unit next door. Third, I get inside your pad just like all the burglars do, through your bedroom window.

Sweet Dreams, Santa

On Mon, 9 Dec 2002 01:40:01 -0500 (Eastern Standard Time) "skyhawk",
after having his auction ratted out, <sky444@abs.adelphia.net> whined
like the impotent sissy boy he is...:

yea whatever dipshit....you just money away from my kids
Christmas,,,,,the only reason I was selling this as a package and
cheap I might add so it would sell fast and I could have that cash for
Christmas.....Happy Now asshole.....let me guess now your gonna call
the FBI....we went from Narcing on eBay to Adelphia......wow aren't
you just to special.....please refrain from sending me anymore
email as you are doing nothing but pissing me off more and
more.....and you might think that's funny but you know what it
really isn't....now I'm gonna have to figure out how to sell that
somewhere else quickly to get my damn money for Christmas for my kids
stuff.....this is how the not so rich live....pretty isn't
it...someone like you comes along playing God and they fuck it all
up.....thank you so much ,it really is appreciated

My usual type of totally accurate and completely moral reply"

Hey,
Have fun yourself. You can tell anyone and everyone...They already
know...Anti-Boys been rattin out scumbags like you a long time.
You were just another notch on my holster. As far as being an asshole
goes, I consider it a compliment to see you call me that. If a
criminal hates me I am likely doing something right.

You are really stupid. You think I CARE if you TELL ABOUT ME? On the
contrary. If I did I would not have emailed you to letya know.

Do your worst, buttlick...

I think I will report your illegal business transaction to adelphia.
Since you like to call names so much you can go there and call them
names after your access gets pulled.

You are an impotent shitball and a little boy in a man's world. Take a
hike, sonny.

2002 CHILDREN'S STORY HOUR: SENATOR LOTT & PRESIDENT BUSH READ ALOUD FROM SHANIQUA: THE LITTLE NEGRESS THAT COULDN'T
Joint Appearance by the Senate Majority Leader and the President
THE PRESIDENT: Good afternoon, children of Booker T. Washington Elementary School. Please be quiet and pay attention. This year, for the 2002 Presidential Children's Story Hour, I had intended to read aloud to you from Lynne Cheney's brilliant College: Cesspool of Intelligentsia, but at the last minute, Senator Trent Lott urged me to not only let him do the talking, but to read from a different volume altogether. Well he didn't have to ask twice, so let's put our hands together for Senate Majority Leader Trent Lott! (Applause.) SENATOR LOTT: Thank you President Bush, and hello children. Today, I will be reading aloud from a heartwarming book that is beloved in my home state of Mississippi, as well as the home state of my dear friend and mentor Senator Strom Thurmond of South Carolina. It's called Shaniqua: The Little Negress That Couldn't, by Mrs. Eunice Wallace-Duke. (Applause.) Let's begin, shall we? Chapter four. Shaniqua and Tyrone arrived home long after dark. They both felt the bone-weary satisfaction brought on by a sixteen-hour day picking cotton in the fields, and they were proud to have the privilege of reclining on mildewed straw mats beneath the rusty tin roof of the decrepit, vermin-infested outhouse the benevolent master let them mortgage. "Tyrone?," said Shaniqua. "Do you think that tomorrow, the master will allow us the honor of digging ditches for no pay, or perhaps even cleaning out the pig pens at high noon?" "Sho nuff, Shaniqua! He done axed me yessirday if'n I'ze wuz ready fo dat!," answered Tyrone. Shaniqua thought to herself, "That's good to hear. I know that the master needs us to work our fingers bloody in order to make Segregation Plantation look beautiful during President Thurmond's visit next week. Videographers will be shooting footage for El Capi-Strom's re-election commercials, and I would hate for their message to be sullied by a less-than-perfect backdrop." "Shaniqua?," inquired Tyrone, "How come don't no white folk live round he'ah?" Shaniqua sighed. "It's called 'separate but equal,' Tyrone - and we must never forget how much we really really really LIKE it that way. Remember, if President Thurmond hadn't been elected to the first of his twelve consecutive terms back in 1948, there would be white liberals just swarming around this plantation expecting us to go out and make all kinds of nasty terrible waves that would rock the boat." "Shaniqua?," said Tyrone, "Ain't hardly no water round he'ah on da plantation fo makin' waves. Jez dat old crick we gets to take our baffs in!" Exasperated, Shaniqua continued to explain the way of things to Tyrone. "By 'make waves,' I mean that anti-family America-haters would actually want colored folks like me and you to go out and steal all the jobs where you DON'T get covered in feces away from the nice white people. Not only that, they'd expect us to do all kinds of stuff with whitey - like eat at the same lunch counters, share seats on buses and trains - even use the same swimming pools and churches!" Tyrone was puzzled. "What's wrong wif dat, Shaniqua?" "Tyrone! We'd get the white people dirty!"

"Ooooooooooh," said Tyrone. "And dat would be real bad, right Shaniqua?" Shaniqua smiled and nodded her head. "Yes it would, Tyrone. Because you and I are very very happy nestled all snug and secure in the tender bosom of Jim Crow, and so long as President Thurmond stays alive, we can count on it staying this way for ever and ever and ever!" "Shaniqua, I sho do hope to run for prezeedint some day." "There's nothing stopping you, Tyrone! So long as you sneak past the attack dogs late at night, then manage to walk all the way to Canada without getting shot. There's lots of negro-lovin' homos up in Canada who'd be happy to vote for someone dumb enough to preserve socialized medicine. Someone just like YOU Tyrone!" Tyrone frowned. "Dat sound awful dangerous. I'ze think I'ze gawn stay right he'ah instead! And Miss Shaniqua?" "Yes, Tyrone?" "I don't wanna never go rockin' no boat, neitha!" "Good for you, Tyrone! That way, we'll all live happily ever after." The end. SENATOR LOTT: What a wonderful, wholesome, and uplifting story. I hope you children took it to heart as much as you really should. Thank you for coming.

I don't consider myself a "nut", although others may disagree. I certainly don't know enough about K1MAN to like him or dislike him personally. What I DO know is that Part 97 says that nobody owns a frequency. K1MAN himself doesn't listen to a frequency before he starts transmitting; his "Radio Shack Timer" just starts things rolling and QRMs whoever happens to be on "his" frequency at the time. His defense is that he's advertised his schedule, and people should know better.

He doesn't own "his" frequencies, and stomping on people who happen to be using them qualifies as "harmful interference" according to Part 97. Whether I like K1MAN or not is irrelevent. His behavior says he's not a hero, he's just a plain old asshole who thinks he doesn't need to live by the same rules as other amateurs.

Hello Bill
Do you know about minicom? I have SusE 6.4. Minicom is a terminal program that you use to access your PK 232 with the SusE Linux OS. Make sure you have it configured to the right com port tty0 or tty1 etc etc etc.... You shouldn't have to buy or download any special software. Minicom is a simple to use terminal program which resembles the DOS program Telix. To configure Telix type
earth:/ # minicom -s
earth:/ is the command prompt, minicom calls the software and -s is for setting up the software.
Good luck
Best of the Holiday season

Agreed. So, what are you gonna do about it? Since Riley seems to be giving
asshole MAN a free ride, what are you gonna do?
K1MAN is in violation of many rules. He is an arrogant anal aperture...but
what can we do about him? Nothing, simple as that. Nothing.
If you or I jam him we are violating the terms of our Ham licenses. It
stinks, does it not? Butthole Glenn Baxter can jam us and not look backwards
but we better not do as he does?
Riley seems to be staying at arm's length on this one....why? When Riley has
the audacity to ask certain Hams to cease txmitting on certain freqs. why
then can he not also ask K1MAN to do the same?
Something stinks in Mudville and Riley ain't telling the whole truth....

The above rule SHOULD apply to W1AW also. Their broadcasting falls within
the same parameters that K1MAN falls into. Like it or not, guys, you either
accept both broadcasting stations or you accept neither. Baxter, despite
being hateful, is doing nothing more than what the ARRL is doing.
In all fairness if you wish to ban one, you should ban both.
The bottom line is, who cares?
When only 20% or less of licensed Hams belong to the ARRL....well, why
bother? The ARRL has nobody to blame but themselves.
Maybe if they raise their rates again they will get more members.....DUH!

Yes. W1AW is just as much in violation as K1MAN. What is the REAL
difference? Think about it...there is none. Be honest. Be realistic and look
it from both sides.
Me? Heck. I do not care one bit for either...one is as bad as the other. I
could not care less for the ARRL agenda and I could care even less for
K1MAN' s stupidity.
Should I join? Join what?
Sorry guys, but I am gonna pass all of you up. I have better things to
do with my time.

Source record: 71233

I have a TS-130S that a friend asked me to sell. It works fine on all bands on a dummy load and 80 & 40 meters when I switch to an antenna -but when I go to 15 and above the needles on a dual meter ping to the top and no adjusting of an antenna tuner will get it down.

I took the rig to a friend's shack near me and tried it using his antennas...same deal.

Anyone run into this and have any suggestions?

de Keith VO1AE

I think Martti can get this one done without me, but it's Dave who is
his protege. Maybe the State Department can get Dave over there on a
secret mission.

But I do wonder if the video presentation will be via amateur
frequencies?

And it's just plain N0iMD now. I could be portable 8 if there were a
requirement to claim "portable," and if I had written permission.

Thanks for the thoughts, though.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get
the technical supplement too (AKA Service manual), as well as the owners
manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in
good shape I will trade both for a FT 990 or a FT 1000.. I have been
using the FT 920 as a backup rig. Drop me a line so we can work out a deal.

Ever wonder JUST WHY those manuals that
come with your new Yaesu or Kenwood are
so freakin BOTCHED UP in their presentation?

Ever wonder why Japanese products are
(in general) so kooky and quirky in their
"logical" operation and functionality ?

Well my fellow Americans, wonder no more !

This site explains it all for you, and has some
damm funny bits of classic Japanese "Engrish"
that will have you peen you pants with laughter!

ENJOY!

I'm predicting that Profit Stair is gonna take the hour on Monday nites from Hal Turner. Too bad for Hal, he did a good work. Looks like they are falling, first the Colonel and his UPR, then the profit and the farmhouse hanky-panky, now Bro. Hal cant make the bills.

But Herb is back. Rumor has it that he was on 14.313 last week......

I'm gonna start on CW, maybe someone can donate a 756-pro and a SB-200, and I can check into the Liberty Net, when I upgrade!

We need some radio-fun folks!

I have an old clock instruction manual in 'Engrish'. It's difficult to
understand but I got a real kick out of its abuse of the English language.
Some time I'll scan and post it.

Remember when W2YEE, years ago would get drunk and play music during the Liberty Net? He would do his check-in early in the net, and then a few hours later, play German Marching Music. I remember one night about 4 years ago, that he played his music, ALL NIGHT LONG! I fell alseep next to my DX-394, and then woke up about 4:30am and he was still playing it!

And then, during the 1998 attack on Iraq, W2YEE played his music on 3950. One SWL commented that he turned his TV volume down, and the had 3950 on in the background, during the CNN coverage!!!!!!!! LOL!!!!!

RIP W2YEE

The manual of our first Sony Color TV also came in Dutch.
Never had such a good laugh.
Even orse than the English version.
Still wonder why such large manufacturers save on a few bucks to have
their manuals corrected by a "local".
Ruud

Big-headed Baxter is jamming again. The trouble is he uses his "broadcast"
to make personal attacks upon Riley and other Hams who have displeased him.
This fat head rectal cavity should have his license pulled for malicious
interference as has been done to several others.
Why has this not happened? Riley? Huh?

As a technical writer who desperately needs a job, I, too, have long been angry with the Japanese for their miserable documentation. * (The manuals with German products can be even worse, believe it or not.) I have repeatedly asked Sony to hire me to oversee English-language documentation, but have been repeatedly rebuffed.

In the early years of the Japanese consumer-electronics invasion, manuals were of much-higher quality. Whether this was because writing jobs were farmed out to the limited number of Japanese who spoke idiomatic English, or because the manuals were written/edited by the importer, I don't know. But I do remember buying a Nikon Photomic FTn body in 1970, with a manual written in clear, simple English -- probably by someone at EPOI. It was the first and last really good "Japanese" manual I ever saw / have seen. **

I once asked Ken what's-his-name at Denon about the problem. He told me Denon would send the manuals to him for review only a few weeks before shipping the product -- and would invariably ignore his corrections and suggestions.

There are several reasons why the manuals for Japanese and German products are so poor.

1. The most-fundamental is that the writers DON'T KNOW what constitutes a good manual! The Japanese are notorious for "tree" manuals -- where all the details are explained in excruciating (and sometimes pointless) detail -- without presenting the "forest" -- an overview of what's going on.

In general, the best way to explain anything is to start with the "general" and work down to the "particular." The Japanese don't understand this.

2. The Japanese worry about "losing face." They refuse to acknowledge they don't know how to write good manuals in good English. Accepting corrections or enhancements from foreigners is an even worse loss of face.

3. There is such a overwhelming flood of new products that there's no time to do good manuals -- even if they wanted to.

4. They don't understand that good documentation helps your company's image and, in the long run, reduces the money spent on customer support.

* About 10 years ago Mitsubishi tried to produce "good" English-language docs for their VCRs. The resulting manual was nearly 100 pages and hopelessly "overwritten." Whoever wrote it never read Thoreau.

** The manuals for my Yaesu amateur-radio equipment are written by the importer. There's room for improvement, but they're not at all bad. I hate to think what

they'd be like if the Japanese had written them.

I've heard that the Japanese school system is "broken" when it comes to
teaching English. That the textbooks have basic flaws and teachers trained
with these flaws. And that this produces students that are reasonably
consistent in producing similar screwed up English when they write
about the same things. And that nobody in the Japanese education
system wants to "lose face" by owning up to this.

A friend owns an advertising company, and he and his people need to
fix and filter the copy from his Japanese clients. But his clients have
already made the first step in realizing that they need help with that.
The ones that don't produce ads that make little sense to Americans.
American companies screw up in this as well, did you know that
the name of the Chevy Nova car means "no go" in Spanish. Thus bad
sales results in Latin America.

> 4. They don't understand that good documentation helps your company's image and,
> in the long run, reduces the money spent on customer support.

Good design of a consumer product would result in a product that can
be figured out without having to read a manual. Or at least good on screen
comments to walk the user thru the process of programming the VCR.
Including error messages saying "The programmed amount of time is
not gonna fit on the tape at 2 hour speed, should I 1) record the first
2 hours of the program, 2) change the record speed on the tape, or
3) have you change the program length?

My 2 cents, for what it is worth.

When traveling in Japan, I found that very few Japanese could speak English, even though it was a required second language in their schools. Our tour guide, who had been a middle-school teacher, explained this by saying that the schools teach reading and translating, but virtually no conversational English.

Compare this to the Chinese system, where all the young students strive to perfect their English. On the Bund in Shanghai, I was surrounded by young people who just wanted the opportunity of speaking English with a Westerner.

To get back to the manuals question, let me begin by saying that I spent 40 years in the technical writing business. Too often, an acceptable manual written in a foreign language is converted to English by a *translator*. (You will note my emphasis.) To translate anything technical into another language requires a technical writer or editor who is *fluent* in both languages and familiar with the discipline involved. Otherwise you get "Engrish."

Bob, W6NBI

When Sony introduced their CV-format 1/2" video recorders in the 1960s, Sony of America did its own instruction books for them -- complete with photos -- and the difference between those and an instruction book from the 1980s (or later) is like night and day.

I think I've posted this here before, but here it goes again. When I worked in sales in a store that also held an importer's repair service in the late '60s-early '70s, one piece of equipment we had still sticks in my mind.

A VOM with "HIOKI ERECTRIC COMPANY" carefully reverse silk-screened on a brass plate on the front.

Wish I'd have bought it.

> have seen. **

I have the manual to my dad's F2S somewhere around here. Well written,
but a bit overentusiastic - "Hold the camera. Feel it's strength and
promise." "Nikon also makes binoculars - they're made from the same
excellent optics as your camera lens" But overall a great manual -
"Even if you're a professional, it's always good to review some
'basics', as yuou might have forgetten them over time"

I remember reading a Panasonic VCR manul that sugessted 'editing' a tape
by recording a dead TV channel over the parts you wanted to 'edit' out.
I somehow seem to think that by 'editing', they meant erasing the dirty
parts of the recording. Or they thought we were a nation of Nixons...

Ah, so (ahso?) that explains why some {most} of those manuals are written ass backwards! I never could make sense out of their manuals or their "language".

Actually, a friend of mine was living in Japan a few years ago. Yaesu's manual writer was retiring and suggested he - my friend - apply for the job. He did. He got it. He told me they use a computer program with most of the lay out already in format... it was only a matter of plugging in steps and so on. I'm not sure if he still works for them or not, as I have found out he is no longer in Japan, but on the west coast. But I did quiz him one day about why those manuals are so damned goofy.....When I get a new rig, I look to see what the buttons do and throw the manual in a corner. I waste more time doing it by the manual. I hate the way they bounce you back and forth in the pages like a ping pong ball to figure out a command or two.

An old Panasonic cassette deck service manual describing their new
"Relay Logic Controls" stated: Check reray one. If not reray one check
reray two.

If not reray one WHAT? :) I told the boss and he told not to make fun
of the japanese, that they don't really talk that way. I had to go get
the manual and show him before he would listen. Then he sat there
scratching his head trying to figure out what they meant.

Well, you can't come down too hard on the Japanese..At least they are trying. WE are the ones failing.
Our language is starting to suck more each day with some of the newer words or expressions coming about. And my pet peeve is, it seems "most" everyone can learn our language EXCEPT those who speak Spanish.. WHY is OUR country catering to them...You live here, you damned well ought to be able to speak and read HERE. If I went to their country, I would have to learn Spanish. I see our Social Security, Welfare and other agencies catering to them... If I'm not mistaken the last time I called the Social Security office I was met with Spanish "FIRST"...WHAT THE HELL? THIS IS AMERICA - an ENGLISH speaking country..... If the Germans, Chinese, Japanese, Russians and so on can speak English - broken as some of it may be, why the hell can't these people? Is it something in their system that prevents it:? Best part is, "WE" are allowing it to happen. Or it 's being shoved up our ass, one of the two.

In my earlier post, I did make a crack about the Japanese manuals being backward,.but then again if my memory serves me correct, they do read and write right to left. So, aside from me being a smart ass, I was not totally wrong (if my memory is correct) in how they do communicate in writing.....

To comment on the recent posts. I have a Japanese friend, who is here trying to get into UCLA's film preservation graduate program. He sent me his application essay for comments and corrections.

It was and is a well written and interesting essay about the differences between Japanese American culture verses other Asian American cultures, based on his observations as well as the research of the World War II internment.

He was somewhat surprised that I did not change all that much, and frankly, so was I. His written English is quite a bit better than his spoken English. Part of the problem is with simple articulation. He's much easier to understand in person than on the telephone, for example.

Most of my corrections involved verb usage and substitution of nouns that I thought were more precise for the context. And of course, as Truman Capote said in "Murder by Death", PRONOUNS! In a few instances, I rearranged sentences, but for the most part, I tried to refrain from that in order to preserve his words whenever possible.

A few things struck me. One was that the errors tended to be consistent. Another was that while he would often use a word that technically appeared correct, there was another word that would work better. Perhaps it is just the case that English has five words for the same thing sometimes, and the subtle differences between them in actual usage is very much an acquired thing.

This was an essay, not a technical instruction manual. It was about the equivalent of 3 typed pages, single spaced. It took me about an hour to do my "magic". Of course, part of my job is writing letter to clients about somewhat sophisticated financial instruments, and me and my boss often edit each other's work, so I am used to the task.

Still, I wonder, considering my lowly salary, how much could it cost for Sony or Nikon to run their manual by a technically competent native English speaker for editing? I'd do it for them. $500 a pop.

Regards,

DAve

Hi, Lou,

I wondered about that also, while living in California for a number of years. One day I went on a rant very similar to yours, and my boss at the time (and *NOT* a Hispanic American) pointed out that California originally belonged to Mexico, and was annexed by the US - and that therefore, Spanish was California's first language.

We have a similar situation here in Canada, and it's not unusual to hear tirades very similar to yours. However, there again it was merely due to the accident of history that the English-speaking army conquered the French-speaking army at the Plains of Abraham. I'm glad that the Quebecois had the strength and sheer stubborness to insist on equal treatment of their language and culture -- even at the "expense" of "having to put up with" French-language text on our cereal boxes. Canada is a better place for it. I think that the United States of America gains from the Hispanic, African, and European influences also.

Cheers,
Fred

Sometimes you get a dictionary translation. From the directions for assembling a stand for the Yamaha DX-7 synthesizer: "Fuck the left assembly to the base"

Guess the dictionary had slang equivalents for the word "screw"

Seems that in the Chinese language, the English pronouns "he"
and "she" map to the same Chinese word. Which can make for
some funny errors. A Chinese friend was telling me about his
girlfriend: "My girlfriend, he likes to dance...". "he"? I knew that
he wasn't gay or something like that, I recognized it as a translation
error.

I have heard that English has a very large vocabulary compare to most
other languages. Many words have been pirated from other languages.
Some Chinese guys I have worked with said that that large vocabulary
drove them nuts learning English. But each word has its own precise
and "flavor" and nuance. The SAT test uses an analogy format to
test your knowledge of this (but I've heard they recently dropped that).

As much Spanish language influence we have in the United States, I
find it interesting that most products designed for the North American
market have instruction manuals in English and French. To my
knowledge, Canada is primarily an English speaking country with the
exception of Quebec. Yet the instruction manuals for my TV, VCR, DVD
player, etc are bi-lingual in English and French with nary a word in
Spanish.

Hm.. curiouser and curiouser. But, come to think of it, it's probably
because bilingual instruction manuals are legislated in Canada. It
follows that it's cheaper to supply the same manuals to the USA, saving
the cost of a separate English-only manual.

I remember a time not-all-that-long-ago when manuals were routinely
supplied with English, French, German, Italian and Spanish sections,
sometimes additionally with Hebrew, Arabic and Greek.

Cheers,
Fred

Not even the francophones I know care much about that -- what they seem to want is their heritage and language protected at home and that sentiment is more consistent with a unilingual (sp?) policy, i.e. no English in French speaking communities (esp. Quebec); they fear that as more immigrants arrive in their communities, the immigrants will not adopt the French language and assilimate into the French heritage. Whether or not one can buy stamps in Alberta speaking only French seems irrelevant.

Bob, I totally agree with you on this.

I occasionally "translate" technical manuals from English to French
and vice-versa. My advantage is that I am fully familiar with the
discipline (HF communication systems and equipment). We used to farm-
out some of these and the results were simply horrible.

Amateur Radio Newsline™ Report 1322 – December 13, 2002

Amateur Radio Newsline report number 1322 with a release date of Friday, December 13, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds as a winter blizzard sweeps the Carolinas and the FCC asks a V-E team to explain. Find out what on Amateur Radio Newsline report number 1322 coming your way right now.

(Billboard Cart Here)

**
RESCUE RADIO: HAMS RESPOND TO CAROLINA BLIZZARD

Weathecasters described it as a clash of titans. A large cold mass of air from the North collided with a warm wet airmass from the Gulf of Mexico. The result was blizzard-like conditions in many areas of the Mid-West and along the Eastern Seaboard.

It all happened late Wednesday December 4th and all day on Thursday December 5 th. Hardest hit was North Carolina. Gary Pearce, KN4AQ, lived through the storm in Raleigh and has this first hand report:

--

The storm began moving across North Carolina as snow and sleet on Wednesday afternoon, and turned to ice overnight. With temperatures hovering just below freezing, a half-inch or more of ice coated trees and power lines. Power failed to several million homes across a wide belt in the center of the state. Telephone service had fewer outright failures, but both wired and cellular service was sluggish due to the high volume of calls.

The amateur radio story began Wednesday afternoon, as SKYWARN spotters tracked the storm for the National Weather Service. As night fell and power failed, the Red Cross and county emergency management's began opening shelters to give people a warm place to stay. Amateurs in several dozen counties staffed EOCs, shelters and Red Cross offices to assure continued communications. There was no statewide communications emergency, but ARES operators kept watch on the statewide ARES HF nets, and the state EOC in Raleigh remained on the air.

On Friday, with millions of people heading into the second night without power out and temperatures predicted to dip to 18 degrees, North Carolina Governor Mike Easley declared a state of emergency and decided to send the National Guard out to do house-to-house canvassing in 22 counties, to make sure people without phones, radio and TV knew there were shelters available.

The communications plan for the Guard units was to use cell phones to call into the State EOC and make their reports. North Carolina Emergency Management asked if Amateur Radio could provide a backup if the cell phones didn't come through. But, they couldn't pin down when or where amateurs might be needed.

John Guerriero, KG4HDT, the Emergency Coordinator assigned to cover the State EOC, arranged for the Tarheel net -- NC's statewide ARES -- Net to operate all day Saturday. He announced on Friday's nets that operators may be needed at any time in the 22 counties covered. He was especially interested in hams with HF mobile capability.

Operators from many of the affected counties maintained watch Saturday, and Guerriero demonstrated the HF and VHF Amateur Radio operation to the National Guard coordinator at the EOC. Ultimately, however, the hams received no requests for Amateur Radio communication.

One county did work directly with the Guard. In Alamance County, ARES operators who already on duty providing communications between the EOC, the Red Cross and shelters offered to accompany the Guard, but were told that civilians could not ride in military vehicles. Instead, the county provided VHF radios left over from a recent move to 800 MHz, and the Amateurs at the EOC acted as dispatchers. Alamance County EC Dwayne Ayers, N4MIO, reported that this arrangement wasn't nearly as good as the coverage the hams could have provided, but it was all the Guard would accept.

ARES operation in some counties continued through Monday, though with much power restored and shelters closing, most Amateur Radio activity secured by Tuesday.

For the Amateur Radio Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

As we go to air almost everyone in North Carolina have had their power restored. And the hams of North Carolina are standing by -- just in case Mother Nature has more winter storms up her sleeve. (KN4AQ, ARNewsline(tm))

**

HAM RAIO IN SPACE: ARISS MEETS IN WASHINGTON

It may have been snowing outside, but that did not stop ham radio delegations from descending on the Washinton D-C area for the Winter 2002 meeting to plan the future of ARISS and manned ham radio on board the International Space Station. Roy Neal, K6DUE, was there and filed back this report:

--

THE DELEGATES AND REPRESENTATIVES OF ARISS…AMATEUR RADIO ON THE INTERNATIONAL SPACE STATION... MET AT THE GODDARD SPACE FLIGHT CENTER, NEAR THE NATION’S CAPITOL.THEY DECIDED THAT 2 THOUSAND AND TWO WAS A GOOD YEAR FOR THE SPACE STATION. IT GREW RAPIDLY AND IS WORKING WELL. THE SAME IS TRUE OF ARISS.

THERE WERE MANY EXCELLENT CONTACTS WITH SCHOOLS ALL OVER THE WORLD, INCLUDING EUROPE, SOUTH AFRICA AND JAPAN. GROUND STATIONS IN SOUTH AFRICA, AUSTRALIA AND HAWAII WORKED VERY WELL IN MAKING THOSE CONTACTS .

PACKET HAS BEEN BROUGHT ON LINE AND SEVERAL THOUSAND VERY SATISFIED USERS ARE MAKING THE MOST OF IT.

FOUR EXTERNAL ANTENNAS WERE INSTALLED LAST YEAR. A MONUMENTAL ACHIEVEMENT THAT GAVE ARISS THE CAPABILITY OF OPERATING ALMOST ANY FREQUENCY FROM 20 METERS UP INTO THE GIGAHERTZ RANGE.

AMONG ITS PROBLEMS, THE SPACE STATION HAS A CREW OF ONLY THREE ASTRONAUTS AND COSMONAUTS., INSTEAD OF SEVEN AS ORIGINALLY PLANNED. THAT SEVERELY LIMITS OPERATING TIME FOR AMATEUR RADIO. THE ARISS DELEGATES WERE TOLD THAT THE INTERNATIONAL PARTNERS HOPE TO INCREASE CREW SIZE IN THE NEAR FUTURE. HOPEFULLY A LOT MORE AIR TIME WILL BE AVAILABLE.

HAM RADIO ON THE SPACE STATION PLANS FOR THE NEXT PHASE CALL FOR EXPANSION TO 70 CENTIMETER OPERATION AND A SECOND STATION ON THE AIR. THIS WOULD OPEN THE DOOR TO FULL DUPLEX OPERATION. AT A FUTURE DATE IT MIGHT EVEN ALLOW STUDENTS TO RECEIVE PICTURES ON 70 CM WHILE TALKING ON 2 METERS!

WORK WILL CONTINUE, TESTING SLOW SCAN TELEVISION AND SPACE CAM HARDWARE, HOPEFUL OF GETTING BOTH THESE PROJECTS ON THE AIR PERHAPS BY THIS TIME NEXT YEAR.

MANY OTHER EXCITING, ADVANCED TECHNOLOGY PROJECTS WERE DISCUSSED. THEY WILL BE REPORTED HERE ON NEWSLINE DURING THE COMING YEAR AS THE ARISS TEAM CONTINUES BUILDING ITS HAM RADIO STATION IN ORBIT.

ROY NEAL, K6DUE, FOR AMATEUR RADIO NEWSLINE

--

Thanks Roy. (K6DUEE, ARNewsline(tm))

**

HAM RADIO IN SPACE: RS-20 IN ORBIT

Russia has a new ham satellite in space. Well, kind of.
According to the AMSAT News Service, the new ham radio bird is actually an Amateur Radio telemetry beacon operating as a secondary payload of a new Russian navigational and scientific satellite. It was launched on November 28th, is at an altitude of 720 kilometers and circles the Earth every 99 minutes. Its beacons can be heard transmitting telemetary on 145.828 and 435.319 MHz. The new satellite has been officially named RS-20. (AMSAT NA)

**

SPECTRUM ISSUES: 40 METER REALLIGNMENT DISCUSSED
The just-ended preparatory meeting for next years World Radiocommunication Conference heard five ways to fix the problems plaguing 40 meter. It also heard a sixth presentatoion that would essentially leave things as they are.

Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--
Without going into minute detail, the five concepts differ markedly from one anotgher. League Executive Vice President Dave Sumner, K1ZZ, says in the ARRL Letter that all five options do represent improvements for Amateurs operatng in the 40 meter band, although two fall short of fulfilling the 300-kHz worldwide requirement.

The International Amateur Radio Union is on record as supporting a 300-kHz worldwide amateur allocation in the vicinity of 7 MHz. Sumner says that achieving this will require the fixed and mobile services to make room for broadcasters and for the broadcasters to change their operating frequencies.

The five proposed methods for change include a variety of transition schedules to ease the impact on these other services. Even with this Dave Sumner says that there is no guarantee that proposals will be limited to the six methods described in the report.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

More on this story is on the web at www.arrl.org (ARRL)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4VRB repeater serving warm Vero Beach Florida.

(5 sec pause here)

**

ENFORCEMENT: VE'S ASKED TO ANSWER STRANGE PASSING GRADE

The FCC's Enforcement Bureau has begun an audit an ARRL VEC sponsored test session held in Pelham Georgia on June 10th 2000. Letters have been sent to the three V-E's who supervised the test. They ask some key questions:

--
Duckworth" “The bureau seeks information as to how a candidate who has seriously failed seven tests passed the Pelham test with a perfect score on Element 2 and only one wrong answer on Element 3.”

--

The reason for the suspicion? Again the FCC's Daryl Duckworth, NN0W:

--
Duckworth: “The candidate got a license but was recalled for testing. He did not appear and his license was canceled.”

--

The three V-E's were given an appropriate amount of time to respond. In the meantime the FCC has also recommended to the ARRL VEC that it not not accept their services while the matter is under review. (FCC, RAIN)

**

ENFORCEMENT: FCC SUGGESTS THAT FIVE VE'S ARE OUT

Meantime, the FCC has closed the books on its audit of a pair of ARRL sponsored ham radio exams in Cookville Tennessee. The sessions were held back on December 14th 1999 and March 11th, 2000. And as the FCC's Daryl Duckworth, NN0W, tells us, the Enforcement Bureau has recommended that five Volunteer Examiners not be used again:

--
Duckworth: “It recommended that the services of five V-E's be no longer accepted because they knew or should have known that one of the test candidates was related to a V-E. Also, the location of one of the test sessions was not revealed in the documentation sent to the ARRL.”
--

A final decision on the future of the five V-E's is now in the hands of the ARRL VEC. (FCC, RAIN)

**

HAM RADIO TESTING: NEW TECHNICIAN CLASS QUESTIONS NOW AVAILABLE

Scotty Neustadter, W4WW, says that the new question pool for Technician class exams is out. Neustadter heads the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators. And, in an e-mail, W4WW says that the committee has released a revised and expanded Amateur Technician class question pool into the public domain.

The new question pool becomes effective July 1, 2003. It must be used for all Technician written examinations given on or after that date. The complete set of questions can be downloaded in text or Portable Document File format from www.arrl.org/arrlvec/pools.html. You will need a free Adobe Acrobat reader program to view and print the P-D-F version. It can be downloaded at www.adobe.com. (W4WW)

**

ENFORCEMENT: FCC EXPECTED TO OK MITNICK RENEWAL

The FCC is expected to approve the license renewal of former computer hacker Kevin Mitnick, N6NHG, if it has not done so already. The W5YI Report says that an Administrative Law Judge says that Mitnick has paid his debt to society and has been adaquitey rehabilitated to where he now holds the requisite character requirements to continue as an FCC license holder.

In rendering his decision the Judge added that Mitnick has been using his radio gear since his release from prison and it is significant that there have been no complaints filed regarding his radio operations. Also, that Mitnick's post

prison conduct demonstrates that his rehabilitation can be relied upon to deal honestly with the Commission and to comply with all rules and regulations.

Mitnick's ham radio license renewal had been on hold based on his conviction for computer hacking which the FCC alluded brought with it questions regarding his fitness to remain a Commission licensee. (W5YI, ARNewsline(tm))

**

ENFORCEMENT: FCC RE-LICENSES HERB SCHOENBOHM

The former KV4FZ is back on the air but not under that call sign. Herb Schoenbohm who used tohold that call sign showed up on the air during last weekends 160 metrer D-X contest sporting the call NP2MJ.

FCC records show that Schoenbohm’s new call was issued to him on December 7th. The action to grant a new ham license comes about two months after an FCC Administrative Law Judge ruled that he now holds the requisite requirements to again become a Commission license holder.

Two years ago Schoenohm was forced off the air after the FCC refused to renew his ham ticket based on an earlier fraud conviction and the U.S. Supreme Court refused to hear his license renewal appeal. Its not known if Schoenbohm will apply for his old KV4FZ call under the vanity progam -- or -- if the FCC would grant such a request. (Numerous listener reports)

**

ENFORCEMENT: VK CB'ERS IN TROUBLE

Still with enforcement news, word from down-under that a pair of Australian C-B operators are in trouble with communications regulators. VK7HG-O reports that the two U-H-F C-B operators have been charged with breaches Australia's Radiocommunications Act for operating where they were not supposed to be.

On November 22nd, the two C-Bers were talking on the input channel to an emergency repeater. They refused to relinquish the frequency and would not move away. They were tracked from the town of Reinna to Richmond and back to Honbart by a ham radio direction finding team and the Australian Communications Authority. The regulatory agancy has already spoken with the two V-K Citizens Radio operators and is reportedly considering further action. (Q-News)

**

RADIO POLITICS: HAM ELECTED MAYOR OF CALIFORNIA CITY

The New Mayor of Agoura Hills California is a ham. Jeff Reinhardt, AA6JR was sworn in as the city's new leader on December 3rd. He says his theme for 2003 is “The Year of Discovery.”

Reinhardt, a public relations specialist, is best known nationally as he author of his “Magic in the Sky” column at appears regularly in C-Q Magazine. He will be starting a new quarterly column on mobiling also for C-Q.

Among those attending the swearing-in ceremony were Reinhardt's wife Melissa KD6BIT, daughter Jessica KD6ARA and son Steven K6SJR. Also present were Jim Fortney K6IYK, Doug Wynn WY6NN and a number of other local Southern California hams.

2003 marks the 20th year of cityhood for Agoura Hills but only the first time a licensed radio amateur has sat in the Mayor's seat. (WY6NN)

**

CONFERENCES: THE SOUTHEASTERN VHF SOCIETY

Turning to conventions and hamfests, a first call is out for papers to be presented at the 2003 Southeastern VHF Society Conference. This gathering is slated for Huntsville, Alabama, on April 25 and 26. The deadline for submitting papers to Dick Hanson, K5AND, is March 11. Dick's e-mail address is k5and@adelphia.net. Contact him directly with any questions. (VHF Reflector)

**

HAM RADIO MEMORIBILIA: COLLINS REPRODUCTIONS AVAILABLE ON-LINE

Collins reproduction items, including a new antenna switch unit are now being marketed by the Collins Radio Association. This, through its Collins Radio Center location, near Johnstown, Pennsylvania. Items can be picked up in person at the center or shipped via U-P-S. More information on what's available is in cyberspace at www.collinsra.com. (Press release)

RADIO LAW: NEW STUDY SAYS MOBILE PHONES CAUSE ACCIDENTS

Researchers say increased cell phone use has led to more crashes caused by drivers on the phone. According to a December 2nd news report, researchers at Harvard's Center for Risk Analysis, drawing on previous research involving cell phones and government figures for auto accidents, say there is a growing public health risk from the reliance on cell phones in cars.

Data on the number of crashes caused by cell phones is incomplete but it suggested that drivers talking on their phones are responsible for about 6 percent of U.S. auto accidents each year. Translated into a human toll it means that an estimated 2,600 people are killed and another 330,000 are injured.

Researchers say that the figure was reached using current cell phone usage estimates to update a 1997 study. That study looked at phone records of Canadian drivers involved in crashes to see if they were making calls at the time.

The number of cell phone subscribers has grown from 94 million in 2000 to more than 128 million today. Opponents of banning mobile phone usage by drivers say that the benefit of car calls outweigh the possible dangers that they may pose. (Published reports)

**

EMERGING TECHNOLOGY: EMERGENCY RADIO CAN INTERFERE WITH PACEMAKERS

If you wear a pacemaker or know someone who does, listen up. A new emergency radio system could affect you. Q-News Graham Kemp, VK4BB, has the details:

--
United Kingdom and setting the pace –makers: New Scientist 23 November carry an article warning that TETRA, the two-way radio system being adopted by many of the worlds emergency services can interfere with the operation of medical devices like heart-pacemakers.

TETRA operates at 400 megs and uses pulse-rates of 17.6 Hz. Rex VK4LR suggests that anyone playing with PCM at VHF or even HF should be very careful in case someone nearby suddenly has unanticipated ticker problems!
--

The TETRA system is a European developed standard that being adopted by emergency services in 50 countries. In addition to Europe, TETRA radios are in Africa, Asia and Latin America. Great Britains' Devices Agency found that TETRA radios can upset heart pacemakers, confuse defibrillators, and stop ventilators from working. (Q-News)

**

INTRUDER WATCH: AIR ACTS ON INTERFERENCE TO 10 MHZ

A shortwave broadcaster has acted to eliminate interference to a ham band. Following a report that All India Radio was radiating spurious signals from it's 9.950 Mhz channel the broadcaster has taken the offending transmitter off the air.

All India Radio's Deputy Director said that the company decided to suspend the transmission on November 21st to investigate the cause of spurious emissions. The unwanted spurs were being heard in 50 kHz increments and included 10.1 and 10.150 MHz . (Q-News)

**

INTERNATIONAL - KENYA: NEW US-KENYA RECIP AGREEMENT
According to ZS6AKV, Kenya has new reciprocal licensing agreement between it and the United States. Under it, U-S citizens with F-C-C issued licenses may apply for and be granted Kenyan licenses.
ZS6AKV notes that it has taken the IARU close to ten years to achieve this

agreement. The application form to operate in Kenya can be downloaded a www.cck.go.ke. (SARL)
**
INTERNATIONAL – UK: NEW UK-THAILAND RECIP AGREEMENT

The United Kingdom's Radiocommunications Agency has signed a reciprocal licensing agreement with Thailand. Visitors to Thailand may apply for a Thai license with an H-S-Zero prefix and long-term residents of Thailand receive a full Thai callsign. (RSGB)

**

DX

In D-X, HG4I reports that he will be on from Hungary between the 20th of December and 12th January with the special event call sign H-G-Zero 3-H-N-Y. This call celebrates the new year with the numerals Zero 3 representing 2003 and the H-N-Y suffix is abbreviation of phrase Happy New Year. Look for him on all of the H-F bands running CW, RTTY, BPSK, SSB, and FM on 29 MHz.. QSL directly with a self addressed stamped envelope to HG4I at the call book address. (HG4I)

**

THAT FINAL ITEM: THE PAPER SAID WHAT?

And finally this week, an update to a simple story that has now taken a rather bizarre twist. As in -- a reporter made part of it up and nobody caught it. Fred Vobbe, W8HDU, is back with the rest of the story:

--
Last week we at Amateur Radio Newsline brought you an item about a call by the Partnership for Public Warning to create a national wireless emergency alert system. One that could send warnings to citizens via their pagers, mobile phones or computer screens.

It sounds like a good idea, only thats not what P-P-W had in mind when it released a report based on a workshop that the group conducted last June.

You see, one of the worlds largest news services picked up the story and put it out on the wires. Several news organizations including many newspapers picked up wire service story and ran their own versions of it. We were sent a number of copies by our own listeners that appeared in their local papers. And who ever questions a newspaper article? Well in this case we all should have.

Richard Rudman, W6TIA, is a Director of the Partnership for Public Warning. He ways that when his organization learned of the story its Press Relations Director contacted the news agency. Rudman says they admitted to P-P-W that their reporter made up the lead sentence about using pagers to contact the public. And as a result, the news agency actually issued a very rare retraction, but many news organizations that ran the original story did not pick up the corrected release.

For the record, Rudman says that the Partnership for Public Warning does not endorse any one vendor or technology over another. Its goal is to promote what it terms as a level playing field. One where all warning marketplace players can be more certain of rules and standards. This says W6TIA will permit them to develop on a level playing field which does not now exist. It will also promote development of common warning terminology to better serve the publics need.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

That full report of last June's P-P-W workshop was released on November 25th. You can read it on-line at www.ppw.us.org. (PPW via W6TIA, W6VR)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go this note. We have been advised that last weeks story on the Canals of Venus credited to Q-News actually originated in Bob Gonsett's CGC Communicator. There was no credit line in the Q-News audio report and we thought it was theirs. Turns out it was actually written by Bob Gonsett, W6VR.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Mert Garlick, N6AWE, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

But by not learning and becoming proficient in the language that dominates the rest of the country, the people cut themselves off from the options that are accessible to the rest of the population. While being bi-lingual would be a great asset, the high paying jobs in this country require you to be proficient in English as that is the language in which you will need to conduct business negotiations. It is the language that the lawyer will need when he presents his case in court. Even in "ordinary" positions, it is essential. Receptionists even in areas that are dominated by Spanish in the US need to be good at English.

Thus is essential that people in the US learn and use English well. Otherwise they are limited in opportunities by language. The country does them no service by having them in elementary schools, etc that use Spanish for teaching.

The United States has benefited immensely from its melting pot culture. People can preserve their culture and languages in their homes and communities but also need to participate fully in the overall culture and

language to benefit from the immense diversity and opportunities of this country.

Oh, BULL-loney. The Japanese aren't trying even remotely.

If the Japanese were serious about providing good documentation, they would turn over the work to their importers, or at least let the importers edit the material they've written. They don't.

The only manuals I've ever seen that "routinely" included instructions in multiple languages are those from Polaroid. The manual for the Macro 5 SLR is in English, French, German, Italian, Spanish, Japanese, and Russian. And that's _not_ very many languages for Polaroid -- some manuals include Arabic and Chinese.

> test your knowledge of this (but I've heard they recently dropped that).

When I took the SATs over 37 years ago, I wondered why I got "only" a 750 on the English part. The reason, of course, was the analogies.

I have a superb vocabulary and understanding of the subtle differences in meanings among words, but the analogies drove me crazy. They require making subtle distinctions in a very short time. I don't think they reveal much about anyone's vocabulary or ability to think.

I know this is all in good humour; eh?
But at this point, as a Canadian cousin, and since we are making
fun of 'Japanese English', I have to comment as follows.

1) If so; why do we buy so much Japanese electronic equipment?
Because it works well? Maybe?
I don't think we can plead 'slave labour rates'. Japanese
salaries/wages and living standards have been, at least until
recently, some of the highest in the world!

Have to agree that US technical documentation such as that
provided for equipment surplus, available publicly after W.W.II,
was/is among the best in the world. Usually well written and more
than likely well illustrated; in one language only, ENGLISH!
And despite the tremendous co-operation and help between the
Allies of those times there were jokes about it.
For example British Techs. had to be warned NOT to say something
was 'US' i.e. Unserviceable (or something less polite in
colloquial use!) and, in the interest of co-operation to use some
other more tactful terminology!

These days North American products, with exception of some
produced in Canada with French language on an equal basis, not
usually accompanied 'at all' by brochures/technical info. in
other languages! So we'd better be careful before pointing any
fingers?
BTW one can visualize a Japanese comment such as; "They don't
understand our technical manuals but they still buy our products.
Big time! Must be doing something right?".

2) Educationally similar criticism might be made of our 'North
American' school system in regard to subjects such as world
history, world geography and lack of knowledge of other countries
and cultures! In other countries it is sometimes perceived as a
sort of "If it ain't Amurican it don't matter", attitude. (The

poor grammar and spelling is deliberate btw!).
On other hand I have friends in Europe, which is very small, who do not realize that North America is 4800 miles wide; and think that you can hop over from say Boston on the east coast to Vancouver on the west in a few hours drive! they also confuse Canada with the United States!

3) Japanese make good motor vehicles too. Although my last (new) Toyota partially made/assembled in USA was not as good as my other Toyotas made in Japan itself. We now drive Nissans. I can't recall what percentage of the North American car market is now made by Japanese based companies? It is high in spite of tariffs and trade barriers! Documentation is OK. Some good maintenance and repair documentation for our Japanese vehicles has been available, in English, from Britain!

And just to put the shoe on the sole of the other foot; ever see an unpractised 'westerner' (say myself) try to use chopsticks? Pathetic! Please may I have a fork?

Cheers. Terry. Newfoundland, Eastern Canada; settled by the Vikings at 'Lanse Aux Meduse' around 900AD!

Also a few miles from where Marconi (An Italian btw) received the first Transatlantic wireless telegraph signal from Cornwall, England in 1901.

Very true,, and by 2005-6 there will be no more anolog cell period.
The FCC has stated that by that time frame all analog will be gone
and replaced with all digital. The next 3-4 years will be the phase out
period. They havent even manufactured analog cell phones in years.

Greetings,
I am preparing for an extended trip around the US with my family.
I have a 2 channel iCom 5 Watt radio that I can take with me.

I would like one chanel progrmmed to a weather band and the other
prgrammed for use to contact Police/Fire/EMS in case of life threatening
emergency.

Are there established nationwide frequncies I can have this unit
programmed for the presribed purpose?

Thank you for your time.

Bob: Excellent explanation IMHO. And I recall a story (apocryphal
maybe?) about attempts to translate a Russian technical treatise
about a hydro electric project, into English using a computer.
Right in the middle of the text appeared the words "Water sheep".
Puzzled they ran it through the computer again. Same result!
So they got hold of a technical expert (like yourself) who really
could understand Russian. "Oh that's simple" it was explained.
The translation is really "Hydraulic ram". Yep. Makes a lot more
sense doesn't it?
Now don't go 'crackers' laughing at this. Terry.
PS. BTW Bob, I tend to use the 'English' rather than the
'American English' speller-check on this computer. You should see
some of words it doesn't like!

what kind of radio? i assume from your questions below that it is probably
a vhf high band type.

>

there are at least 4 and i think a few more frequencies in the 162mhz band
that are used by nws broadcasts. they are spread geographically so they
don't interfere with each other. if you want to monitor those pick up a
radio at radio shack that includes alert features.

i know of no nationwide access frequency for police/fire/ems. there are a
variety of frequencies from 30mhz up through 900mhz and probably some higher
now that are used by those services. which ones are used are determined
locally by geographic considerations, licensing, and in many cases budgets.
it is hard enough to make sure that adjacent areas can talk to each other
without coordinating a nationwide system. as far as allowing the general
public to have direct access to those frequencies you won't find that
anywhere, any non authorized use on those public service frequencies is
subject to heavy fines and jail time.

your best bet is a cell phone if you are on major highways or near cities.
beyond that get a satellite phone or subscribe to on-star if you are really
worried about getting out of touch.

Hi Lou: (You are probably named after the kings of France? e.g.
Louis 14th.)
Alternatively an English/Welsh version of your name could be
"Lewis" or "Lew".
In Spanish; "Luis"?

Quote: {WHAT THE HELL? THIS IS AMERICA - an ENGLISH speaking
country......} ?????

Some people would dispute that! :-)
However the beauty and flexibility of the 'English language' has
been it's ability to adapt, change, and take in new words from
other languages and cultures! And it survives as, at the moment
anyway, lucky for us Anglophiles, the predominant business
language of the world. 'American English' is one version; a very
important one.
If we heard the 'English' of Shakespeare or Chaucer as originally
written we would not understand it.
More recently; for example the word "Bungalow" is from India.
Other words, such as "Quota", "Forum", "Constitution", "Voter",
"Senate", "President", etc. are derived from Latin, Greek etc.
French words very little changed have entered the language; quite
apart from the newly invented ones of the electronics and
computer eras.
We might as well get used to it! Welcome to the rest of this
multicultural world!

Bonne Chance. (Good Luck).
PS. "Bonne Chance" is also the name of a hostelry in New Orleans,
btw.

Which is why cultural background can have such an influence on
results. Imagine trying to explain 'reaping' or 'making hay'
(literally) to a person of the Innu (Esquimaux/Eskimo)
culture/background who has never seen grass or a cornfield. Or
the concept of a snow machine to someone in the Sahara desert,
say, who has never encountered snow! The Innu have as many words
for different types of snow as we have for different types of
cheese!
Imagine trying to explain 'radio antenna', 'transistor',
'battery' etc., to someone living in the Amazon jungle.
Another example: Some words/expressions are culturally taboo.
The term 'Knocking up' has entirely different meanings between
North America and Britain, for example.
In Britain it refers to waking people up on a workday morning by
knocking on the bedroom window! The other (North American) usage
will leave to reader's imagination.
But thank goodness we are NOT all the same. Even those of us who
all think we speak 'correct' English!
Have fun chaps! Terry.

K1MAN EDITORIAL - ED021215

THE HIDDEN AGENDA OF RILEY HOLLINGSWORTH, K4ZDH

The United States Attorney can indict you AT ANY TIME within the seven year statute of limitations for a felony committed as charged and documented by a Felony Complaint Affidavit, and then he can prosecute you in federal court. He must prove to the jury, beyond a reasonable doubt that: 1) You did interfere with a K1MAN bulletin and 2) that it was your INTENT to interfere with a K1MAN bulletin. Your first witness, FCC Special Counsel Riley Hollingsworth, K4ZDH, will be of little help when he admits that he encouraged you to commit the felony, since this is ALSO a felony under Sections 333 and 501 of the 1934 Communications act. You can read these statutes at www.K1MAN.com. Scroll to the bottom and click on "Legality of K1MAN Bulletins."

Ask yourself why? Why does Hollingsworth encourage the scum of 14.313 to talk over K1MAN bulletins? In addition to being a felony, this is also against all notions of good amateur practice isn't it? Is He a Moron? Perhaps Riley Hollingsworth was sick on the day they taught law at law school, hi. What is REALLY going on here?

The answer is quite simple. FCC Special Counsel Riley Hollingsworth, K4ZDH, has a hidden agenda. The immediate effect of his open advice to talk over K1MAN bulletins to the scum of 14.313 is significantly increased bad radio amateur behavior on 20 meters, in front of the whole world. Riley is steadily building up a huge file of amateur radio bad behavior. When he retires from the FCC to face huge college tuition payments for his grand children, he will take this huge amateur radio bad behavior file to the large Washington communications law firm of "Do We Cheat Em and How." "Do We Cheat Em," of course, specializes in delivering valuable amateur radio spectrum (and our collective amateur radio heads) to the wealthy commercial interests on a silver platter. Don't be duped by this corrupt and cheap politician, Riley Hollingsworth, K4ZDH.

Beware, my fellow Radio Amateurs, Riley Hollingsworth is a wolf in Sheep's clothing. If you are one of those who thinks it's cool to talk over K1MAN bulletins, think again. You are playing into the hands of Rot Riley the Ripper. He wants your spectrum. Don't be a fool and let him continue to insult your intelligence. Just say no to Amateur Radio Ignorance. 73 and good luck, de K1MAN.

Service announcements on the NYC subway can easily be nine languages,
depending on the line. Also, advertising can run through a few. I've
even seen cyrillic billboards in parts of NYC.

The #7 subway line has something like 120 ethinc groups along it's
route. It's supposedly the most diverse part of the world...

Many people in the NYC area are bilingual, or even trilingual. I work
right next to the NYC border and there's at least 4 different languages
spoken in our shop.

There is a lot less to K1MAN than meets the eye!

Amateur-to-amateur radio interference, whether deliberate, accidental, or incidental, doesn't even rise to the level of misdemeanor (let alone a FELONY). At best, it a family squabble.

K1MAN (as usual) is pandering to the ignorant in hopes of impressing them and developing a following of groupies who will then pay $299.00 for a certificate signed by a "Registered Professional Engineer", or maybe apply for one of Baxter's affinity credit cards, or (insert whatever money-grubbing deal he's currently running which strikes your fancy).

Sunuvagun!

With all kind wishes,

What is your opinion of the Quebec language laws that make it a crime to speak English in the workplace, Illegal to have an English language sign in the window of your business, and illegal to have an English language internet site even if all the business done by your company is in English. Unless a person can prove that their parents had English as their mother tongue their children must be educated in a French school.
French in Quebec is much more than the language on your cereal box. Being an English speaking person in Quebec is almost a criminal offence.

I recall a letter in one of the L.A. newspapers many years ago from a
Japanese-American who had come here as a child speaking only Japanese.
He strongly protested the concept of bilingual education if it meant
that one could graduate from high school without a decent knowledge of
written and spoken English.

My wife came to the US from the Netherlands when she was 9 years old,
which was still early enough to acquire a perfect English ("American
English," anyway) accent, although some odd Dutch idioms translated
word-for-word into English pop out sometimes. There was no "bilingual
education," but there was a Dutch-speaking teacher around who was able
to help her.

I am a great supporter of bilingual education in the form of "immersion
programs," no matter what specific language is used. We know one man
whose daughter (Anglo) was in a Spanish immersion program in Oregon and
had all her science and math taught in Spanish all through high school.
Our school district is now proposing a similar move (language not yet
decided -- depends on who is available), but there is much opposition
despite the rich variety of languages spoken here (Long Island, NY). I
say that it should have been done long ago, and I don't care whether the
second language is French, Spanish, Chinese, Japanese, Korean, Hebrew,
Greek, Hindi, Swahili, or....

Q. What do you call a person who speaks three languages?
A. Trilingual.

Q. What do you call a person who speaks two languages?
A. Bilingual.

Q. What do you call a person who speaks only one language?
A. American. ("British" is another acceptable answer.)

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get
the technical supplement too (AKA Service manual), as well as the owners
manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in
good shape I will trade both for a FT 990 or a FT 1000.. I have been
using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working
Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM Han station
with at least 200 watts out. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter) two 3-500s 100 in
will give you 1250 out, New Caps,
that I will trade for a Globe King or full legal output Ham band AM transmitter.
this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
Happy Holidays
73 and thanks for reading

> French in Quebec is much more than the language on your cereal box. Being an
> English speaking person in Quebec is almost a criminal offence.

In my opinion that's ludicrous, of course. Even thinking francophones
are appalled by such reactionary policies.

I spent a summer working in Ottawa a number of years ago. On several
occasions I made little day trips into Quebec. The hostility would
sometimes be palpable when I'd ask for something in English at a
convenience store -- until I explained in my broken French that I was
just a dumb westerner, or pointed to my BC license plates. Then all was
well, we'd share a laugh, and magically my new-found Quebecois friend
would demonstrate a workable command of English.

The point of the story is that in situations where there has been a
long-standing conflict, everything is perceived in terms of that

conflict, and anyone walking into a francophone convenience store and speaks English "must be" a jerk by definition. But when the realization hits that this is an outsider to the conflict, suddenly the conflict loses its hold on the situation.

Cheers,
Fred

When are you guys going to learn that the FCC isn't going to do anything to K1MAN. If the FCC where to do anything about this guy like it or not the news ARRL broadcasts would have to stop. That is the truth of the matter. I'm sorry to say that but the truth is the truth. Just like everything else in this country nobody wants to see the truth in things. The FCC isn't going to do anything about anything anymore. Boys they are giving us enough rope to hang ourselves. You can take that to the bank. The rest of the world looks at us as a black eye to the rest of the world. We all know who is doing the jamming of K1MAN and with that Great big listening post that the feds have in Maryland the FCC knows too. WAKE UP!!! They ain't going to do anything. So the Jamming just isn't going to stop! The broadcasting isn't going to stop until we are all outlaws and CB pirates.

Yes, several years ago, visiting my grandparents in their apartment
near Brighton Beach in Brooklyn, we were talking with one of their
neighbors.

She mentioned that besides English, she could speak at least somewhat
in Italian (her heritage), Spanish, and Yiddish, and figured she could
get by in most parts of the city.

In a diverse environment, it's not a bad idea to learn a few basics in
the other languages. You don't have to able to write poetry in the
other language, just be able to order a meal.

I am a little baffled. W1AW has CW and RTTY and SSB buliitens and starts up WITHOUT ever asking if the frequency is in use! I hear NOONE in this newsgroup complain about W1AW or an organized effort to QRM W1AW.

If you look at the K1MAN website - www.k1man.com You will find a statement by Robert H Mc Namara - They fall within the SAME category as W1AW!

The same rules have to applied to both partys. When when did we get wishy-washy and live a life of double standards? I think Bill Clinton taught us that, very well indeed. Mr. Hollingsworth must take his tactics from Clinton. Heck he was appointed under Clinton!

Same old Glenn...delusional and full of himself as always. What have you been smoking, Glenn? Getting a tad bit paranoid, are you?
No, Glenn. Riley is not a threat to Ham Radio but goons such as yourself are. You, Glenn, are irresponsible and selfish. You purposely jam ongoing conversations of others with what you consider to be a "broadcast" of some worth.
Here's hoping you lose your Ham ticket in the very near future and your insipid "bulletin service" goes down the toilet where it so richly belongs.

Get a clue stupid, W1AW transmits amateur bulletins that pertain
to amateur radio, all K1MAN has is a talk show no one is
interested in. He is a total ass.

Yeah your right. Poor Donny has so little in his life anymore. Since he
can't 'chat' on 313 anymore he has decided to make GB his 'new' love object.

I guess it is the same for GB too. I heard him say if you want to hear some
technical stuff go listen to Donnie.

Yeah buddy....be right there with note pad in hand.

Could it be . . . . could it be . . . now this is just a guess . . . but . . . could it be that W1AW is broadcasting bulletins and code practice that are of benefit and interest to radio amateurs in general and W1MAN is broadcasting personal bullshit.

Once upon a time the USofA was a nation in which mutual respect and decency were the rule. Now, mutual respect and decency are the exception. This is why such dolts as W1MAN are given a free ride -- that is, given a free ride by people just like him. He performs no useful purpose, W1AW does.

But, then, this nation has turned to an ethic that says "I'll do my thing and the rest of you can kiss my ass."

Sad.

Kim
The new phones today cannot be scanned. They produce a digital signal
that produces no more than a hum on a regular scanner. The old car
phones were no more then radios. Cell phones of today are a little more
then a radio. Basicly they are a radio that uses a digital mode. I 'm
not sure but I think that it also uses a 128 K encryption so it would
take your pentium 4 computer about a day to decode the signal. A waste
of time!

I agree. I might not like K1MAN taking up space in the voice part of the
spectrum. However I do believe that he has the same rights as the ARRL.
So if he has to stop then the ARRL has to stop too. They used to use
the argument that it was for code practace. Which is fine but they use
other digtal modes too. With code becoming a thing of the past the FCC
needs to open up that part of the spectrum for voice operation and this
would make more room for the K1MAN newcasts.

that is what I love about canada. We are mostly digital. But Here in the hills. Digital only goes so far. Any fringe area, The Mall. A building. etc. We auto go to the analog signal. But this is only Places where I have been. From BC to saskatchewan. I even see lots of people swear their phone is always digital. I tell them to look on their display at that persice place. Opps they were analog. Canada Does not charge for analoge. If you get a pay as you go phone or even a contract. Digital and Analog are included. Most of Saskatchewan is still analog too. But they have some digital features. Heck. even west edmonton mall was mostly analog. I ain't flaming or anything. but here. there is still lots of analog activity. Even though people insist that they are tx'ing on digital. I guess that is what I get for Living in BC.

Does the profit really want this? I mean .. as much love as he showed Tameeka and Rasheeka and LaReeka and Shaneeka, surely he'd want to hang around long enough to show some love to Ty-Rone and Le-Roy.

5686. Serious crisis in the URE (Spanish RadioHam Society)

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-16 00:01:00 UTC
From: otromas@lared.zzn.com
Message-ID: <bc08f00c.0212151601.5d1dfcdd@posting.google.com>
Source record: 71129
Cross-posted to: rec.radio.amateur,rec.radio.amateur.misc,rec.radio.amateur.policy,uk.radio.amateur,es.rec.radio.amateur

Last week the Chairman-EA1RF and the ViceChairman-EA2NO of the URE (Union de Radioaficionados Espaï¿½oles ~ Spanish Radioamateur Society) have resigned.

This contribute to aggravate the chaotic economic situation of this Society.

A great majority of members demanded a long time ago responsibilities to these Board of Chairman and studying to do a censorship motion to substitut the Chairman.

Before that censorship motion, the President has taken the door and has left fleeing, anticipating his probable defeat. Simultaneously, the Vice-Chairman has done the same. Of temporary form, the functions will have to be made by the Secretary-EA1QF, who is known as a non-operative man in the management of any type of activity.

If the URE had a very doubtful future, now it has it still more complicated:
-A load of debts with banks (more than 90.000 euro).
-An important reduction of members (at the moment only about 10,000 members).
-An high increase of the quotas (20 % for the 2003)

In addition to all that, last summer, the Board of Chairman eliminated diverse basic services for the members, decision very badly welcomed by the social mass.

According to some comments in the spanish radio forums, a great number of members is not going to pay the annual quota, because they doubt that the collected money can reach to cover the ordinary necessities of the association, and it is probable that shortly the New Board of Chairman decides to put an extraordinary quota to be able to support the numerous expenses of an association that maintains infrastructures to take care of about 25,000 members.

It is possible that we be attending to the final of a founded Association more than 50 years ago with a great illusion by a group of radiohams, and how in the last 10 years has seen how by a bad management she is destroying itself.

>Go ahead Mr. Firebottle,
>
Nashville Joe would like to invite Bro. Bottle and Bro. Norton to visit him at Dalton Hamfest.

Extra chairs will be provided so they can take a load off and join us for a cup of coffee to discuss the days events.

After speaking with "N.J." on the phone, I *predict* that there will be some events.

Tune in to The Great Liberty Net that night for complete coverage of these events.

Yes, you are very pitiful. Right now, ND8V is on 14.275, just complaining
about K1MAN.

"size 46 pants" <fatasshamop69@yahoo.com> wrote in message
news:3dfb7980@snipnews.snip.net...
Who's those unconsiderate hams jamming k1man
on 14.275 as I type this! How ineffective, hey guys
you'se gots to crank up the power more, ole Baxter
Boy's obsolete transmitter is splatterin 3 kc's either
side and sounds like he's got his Henry runnin illegal power.
You just ain't cuttin it boys, TURN UP THE POWER
VOLUME and you'll obscure the RF from Maine
a little bit better. This barefoot jap crap just ain't doin
the job O-Tay? :) :) :) :)

Big-headed Baxter is jamming again. The trouble is he uses his "broadcast"
to make personal attacks upon Riley and other Hams who have displeased him.
This fat head rectal cavity should have his license pulled for malicious
interference as has been done to several others.
Why has this not happened? Riley? Huh?

Having never listened to K1MAN, I am not sure what his "broadcasts" are about, but as I recall, the only "broadcasting" allowed by FCC rules are bulletins and such related to amateur radio, not personal viewpoints, etc. W1AW definitely fits that criteria, I am not so sure about some of these other guys that I keep reading about here.

No disrepect, but if you had said you were from Ontario, you would not
have been sharing a laugh. And there's nothing about Ontario that makes
it any different than BC, except it's closer to the Quebec border.

Our son is studying French ("standard" French, not Quebec French) in school (Grade 8) so we thought of taking part of our last summer vacation in Quebec and give him an opportunity (and me -- but it's been a looooong time) to practice -- until we ran into a native French speaker (of "standard" French), who told us that the speakers of Quebec French hate speakers of standard French almost as much as they hate speakers of English. So we settled for a vacation in New England instead.

Gee, and it seemed like just a week ago he posted this under the title
"My retirement from the BARF":

>As of today,

>I am stepping down from the BARF - I had a long service record as Chief of
>Communications.

>Due to the fact, that the BARF is no longer a needed entity, I am herby
>stepping down.

I noted then that the "I am herby" must have been Freudian.

>That does not mean I'm leaving the newsgroup. I'll be here, at every turn,
>to speak my piece.

I thought that since he said several times that he was leaving and
then didn't, that saying he was staying might mean he would go. I, for
one, did not get my hopes up, and, once again, I was right.

It's because Canada is officially bilingual, no matter what the
demographics say in practice. It is illegal to sell stuff without
bilingual labelling. It's cheaper for manufacturers to make one
set of docs, in compliance with necessary law, than two just to
make things practically better for their customers. The only way
for the spanish to be catered for is for the US to be officially
bilingual. (I wouldn't hold my breath).

Similar to the problem in many latin languages, where the
adjectives like "his" or "her" agree in gender with the
noun, not with the possessor. So common slips might be
to say something like "his shoes" referring to a woman.

The legislation (I recall it as being Bill 101?) is actually that
signs displayed in English must also have a french equivalent, and
the english may not have larger font or brighter colours.

The washing-machine we recently got (in S.Africa) had about 18
languages in it. [granted it was pretty thick]. I'm not sure
if any of those was afrikaans, never mind the other -9- [there
are 11] official languages of this country.

>and "flavor" and nuance.

It's very true. You can see the roots of this in things like
Dutch [and Afrikaans] which I find have far fewer words with
the fine distinctions, and that most words have obvious roots
in simpler combinations ["shell-frog" is a turtle?].

It's not that English has pirated the other languages, but that
it evolved (very recently, i.e. last 500 yrs) from a lot of inputs
thanks to all the invaders. (Roman, Norse, Saxons, Normans each
giving their input). Consider that the coarse, "animal" terms are
Saxon while the fine, "cuisine" terms are (conqueror, "lingua
franca") Norman, for example.. (cow vs beef). It's all a matter
of development and how many ingredients went into the soup pot.
Anyway, I think it's far more exciting to have a surfeit of words
than an excess of rules. [e.g. 16 verb tenses in Finnish?]

Japanese lacks a future tense, but has no particular difficulty
conceptualizing the future. You just throw in a postpositional phrase
describing the time frame, and then the verb is interpreted relative to
that frame rather than the present.

English has a large number of verb tenses, which allows very fine distinctions -- "Had the airplane arrived on time, I would have been on my way to California at this time."

5721. what happened on 3860?

Newsgroup: rec.radio.amateur.misc

What happeved on 3.860 last night? I got back home
after a great xmas party and I'm hearing that Tommy Toobs
and his xyl were both the centre of a very lively and amusing
conversation. I am so pissed off that I missed this and
didn't leave the VCR audio tape running. It sounded like
it was a real hoot and that the toobman finally got what
was comming to him. What now? will he and his pal
in Va stay on 3.865 or go and start a Motlet Crew II
on another freq? Baaaa ha ha haaaa!!!

Flushing allegedly got a good FLUSHING last nite - pfhbltttt!!!!

I'm surprised you didn't throw a future conditional into that one...
"... I shall have been in California". ;-)

(Not sure if I could even still rattle them off. Future conditional was
just so weird I remembered it all these years.)

Cheers,
Fred

How does one say McDonald's or Pizza Hut, or Radio Shack in French?

The tunnel connecting Britain and France across the English Channel
was in controversy not long ago from what I remember. Seems on the
French side, signs said, "Le Tube." This was apparently looked upon
as bastardized English rather than French.

I do admire the French for being so protective of their language and
culture. To do so here in the United States we would be labled as
racist. Then again, the United States doesn't exactly have a dominant
culture.

A bulletin is not a broadcast. Broadcasting is defined as a transmission to
the general public. The entire term 'broadcasting' in in-correct in any
aspect of Amateur Radio...since it is illegal...period.

K1MAN and W1AW share one and only one thing in common concer ing the
transmissions. They both use radio waves.

W1AW has a special place with the FCC because it has earned that privlidge.
Did you know that during WW2 when ALL HAMS were shut down that W1AW was
allowed to transmit its bulletins?

You see the ARRL has earned the respect of the FCC by helping the FCC
'control' amateur radio. Some of this is good and some is bad. But my dear
sir...the ARRL is ALL WE HAVE.

If you don't like the ARRL thats fine....Im sure it is tearing them apart
that you dont. I don't support a lot of things they do or have done. But
it beats the alternative...no representation at all.

Dan/W4NTI

Those would remain the same, since they're trademarks. However, if you
were to try to advertise "Order a pizza straight from the comfort of
your radio shack" (meaning your shop) you'd have to call it "chalet de
radio" or something to that effect. ;-)

Those signs, in the UK, back in the 1940s and 50s, used to be
labelled "HALT".
Again only four letters to convey the intent.
Much more commanding I thought than a wishy-washy sort of "please
'STOP' here"!
Wonder what they say today?
And in France they don't seem to be so preoccupied with
protecting 'La langue'!
So you get 'Le Rost Bif' and 'Le footbal' etc. Meanwhile we enjoy
'Crepes' and 'Pie a la mode' etc.
Cross cultural stuff like that!
BTW I never knew why British castle gates were protected by a
'Port Cullis'; until I saw a sign in French Canada warning about
sliding doors 'Porte Coullissant'. (Don't trust my spelling btw
in either language!).

My favourite is the one that crossed the channel twice - "boeuf" became
"beef" going one way, then returned as "beefsteak" becoming "biftek."

Hi,

I am a Radio Ham and also a Hot Air Balloon Pilot. I would be interested to know if there is aan active net on HF for same ?

Also, if the interest permits, I would be interested in making aernautical mobile contacts with other Ham Radio Balloon Pilots possibly when they are also airbourne.

Regards,

Aidan EI5HW.

One of my wife's oldest friends is a lady who came from Italy at third-
grade age. This lady claims not to speak Italian (though her parents
speak no English, and she visits them frequently). I can't resist playing
tricks on her; I'll start a conversation, and at some point I'll say
something in Italian, she'll answer in perfect Italian without a thought,
and when my wife and I point out that she did so she'll deny it, believing
firmly that she spoke nothing but English.

So the native americans who lived in California spoke Spanish? I don't think so.

One question. On a recent trip to Ottawa, I noticed of course the bilingual treatment of most everything. I though "Okay, there you have it". But then one day we made a side trip to Hull, right across the river. The English dissapeared at the border, and French language was the only thing we saw after that. What is with that? Does the bilingual treatment only go one way?

If I lived in an area that the main language was (whatever) you can be darn sure I would learn the language. My kids would know the language too.

His: de él
Hers: de ella

Where it has no gender is in "suyo"or "su" as in "su sombrero" or "el
sombrero suyo."

Very difficult. The US has no official language, by design to protect
freedom of speech.

You're right, of course. I guess it depends when you start counting.
California had of course been invaded... er.. "colonized" by the Spanish
long before the Anglos appeared, thus the Spanish language was by that
time already well entrenched.

It does in Hull. ;-)

I suspect that this is one of those knee-jerk reaction things. Ottawa
being the seat of government of a predominantly English country, in a
heavily English-speaking province, I guess the Hullians (Hullites?
Hullois?) feel they have to make a point.

> If I lived in an area that the main language was (whatever) you can

Yes, but the gender agreement is with the person, not the object.

Actually in that case, the the gender is determined by the object in question, not the person it belongs to: for example "la cartera" (the purse) is "La cartera suya" but it's gender neutral when you say "su cartera"

Both mean "your purse"

Ah, but when us Brits rule the world (again!!) we can teach you all to speak

PROPA INGLISH, LIKE WOT I DOES!!!

Of course you have the Welsh situation here where, for some strange reason,
English people go to Wales on holiday and wonder why the locals are speaking
Welsh (oh yes and when the English go to France on the shopping day trips,
why the French shop assistants are not speaking english.

Still when the revolution comes.... we will all speak..... ENGRISH!!!

I think the U.S. government advisors in Vietnam in the pre-war days
ran into this problem in trying to communicate technical terms that
didn't exist in the Vietnamese language to their native assistants, so
they got around it by teaching them the English word.

This is quite different from the methods that were used to teach English names of objects in certain Native American languages. A number of tribes came up with their own words for the "modern" objects they became familiar with through contact with European settlers. These objects were often described by using agglutinations of already-familiar words and terms in their own languages.

Oftentimes, this would make for a relatively large phrase to signify something that could described in English by using a small word or phrase. For instance, the Ojibwe word for "blueberry pie", which was something that wasn't familar to these folks in pre-European-settlement days, became this:

Miinibaashkiminasiganibiitooyingwesijiganibakwezhigan

Which, when translated from the Ojibwe, means this: berries smashed together between layers of bread.

Please don't ask me to pronounce it. I'll have terrible flashbacks to a couple of exams that I had to complete by giving spoken word translations of several Ojibwe phrases.

When I was living in Taiwan and learning Chinese (Mandarin), I bought some of the local computer magazines and started looking up phrases in the dictionary, but when I used some of these terms in talking to my teacher, she often looked quite puzzled. It turned out that she was accustomed to using the English word (e.g., "printer") instead of the Chinese term (which translates literally as "print form machine").

> culture.

True. Speaking of different cultures...

...what might be interesting (maybe) to some of you, as long as we are on the off-topic but quite engaging subject of languages, is the fact that American Sign Language (which is also used as the primary communication of the Deaf in Canada) and French Sign Language are intimately linked.

The first teachers in 19th century American schools for the Deaf were from France, namely Abbe Charles de l'Eppe and Laurent Clerc. Much of the sign language in the US (and later Canada) that developed amongst the students who were educated in the American schools for the Deaf was a strong amalgam between their own, native sign usage and French Sign Language. Even today, more than 1/3 of the signs and phrases in American Sign Language are direct offshoots of those from French Sign Language.

If a native ASL user were to go to Britain or Australia, they would find themselves lost- since those nations use an entirely different forms of sign language from ASL (actually, Australian SL is related to British SL- which is entirely different and unrelated to American SL).

Its just a matter of time and we will all be pirates. Keep on Jamming the airways OLD MAN. You have all ready got you hand slapped once for that kind of activity. One question what is the differance between a bulletin and a broadcast? Its been my experace is that a bulletin is on paper and it becomes a broadcast when it is put out over the air. What W1AW does is broadcast CW for the public to improve there morose code ablity. THAT IS A BROADCAST FOR THE PUBLIC!! Even by your definition of a broadcast. Right or wrong I call it the way I see it. I doesn't mean I like it but a spade is a spade. Just because something is right or wrong dosen't mean that I have to like it. Face the fact if K1MAN has to go so does W1AW. Don't get me wrong I think that W1AW needs to keep on broadcasting ARRL bullitens so new hams can get their code speed up to par. I also think that K1MAN needs to obtain a SW license and broadcast his stuff somewhere on the 41 meter band. We just don't have the room for his broadcasts in the genral portion of the phone bands. But right now as long as the FCC has not done anything to put K1MAN off the air you and anyone else jamming his broadcasts are breaking law. If I where you I would just pick my OLD (Yes your old becareful you might break a hip) ass up and move to another frequency to hold your QSOs there. I think that your not smart enough to see the simple way out. Like it or not those are the facts! You always get personal with people that don't agree with your old ways. I won't be long and we will all be pirates

http://www.dailymail.com/news/News/2002121645/

Monday December 16, 2002; 12:45 PM

Man allegedly had sex with sheep
Charleston police arrested an East Bank man for allegedly having sex
with a sheep used in a West Side funeral home's live nativity scene.

Joseph Armstrong, 29, allegedly broke into a shed that housed the animals
used in the holiday scene at the Bartlett-Burdette-Cox Funeral Home on
Tennessee Avenue about 5:50 a.m. Saturday, Charleston Police Sgt. Brent
Webster said.

Police, who were responding to a suspicious person call, say they found
the suspect at the nativity scene, Webster said.

Armstrong was charged with trespassing, destruction of property and
cruelty to animals. He was being held at South Central Regional Jail on
$2,500 bond.

Webster said police are consulting with the prosecutor's office and
bestiality charges could be issued against Armstrong.

We do?

I wish someone would tell that to the CRTC! (For you non-Canadians that's the government agency which controls the music our radio stations can play and dictates that if I watch a TV program on a U.S. network which is also on a Canadian one the U.S. one will be replaced with the Canadian one for the duration of the program; so that I cannot be seduced by U.S. advertising.)

Oh yes, and then there is the religious nonsense when something like the memorial service for the victims of the Swissair disaster is ordered not to make any reference to Christ.

But, other than that sort of stuff we can listen to what we want, and if we don't like what we hear a simple call to the CRTC and the offender will be punished - thank God (oops sorry can't use that word) for Short Wave Radio.

Dave

Are you sure? I always thought that the cable companies did
this unilaterally (perhaps receiving payoffs from Canadian
networks).

The 1970s Jap manuals still rule.....

From a Honda motorcycle repair manual:

"You must work diligently to ensure that the gearing assemblies come
together in a harmonious fashion".

Translation: Make sure the gears mesh.

From a TEAC reel-to-reel tape recorder owner's manual:

"Do not attempt to perform a repair function on the subject mechanisms
unless you are technically minded well"

Translation: Don't mess with the innards of this thing unless you know
your s__t.

And just so the Germans don't feel left out....A quote from a beer keg
tap instruction sheet:

"Please make doubly certain that the containing vessel is chilled to a
precision temperature prior to utilizing the tap, and thus we will
have a royal beer!"

Translation (As if one is needed): Make sure your beer is cold!

Actually, we were taught in school here in Southern California that the
treaty which deeded California to the United States stipulated that
California would have two languages, English and Spanish.

Keep in mind that immigrants, particularly women who did not work
outside the home often did not learn English before the advent of radio.
After radio, there was not much excuse!

I don't remember what the signs said when I was in Britain in 1977,
but I do remember my mom doing something really stupid while driving
her rented English Ford, and getting stopped by a cop. The cop pulled
in front of her to get her to stop, and the cop car had a top sign on
the roof which alternately said STOP and HALT in big flashing letters.

He let her off with a warning, BTW.

As far as Vietnam goes, the government had a list, explained in my slang dictionary, of "counter culture" terms that had come into popular usage during the 1960s. Soldiers returning to the US after having been overseas for a tour of duty were having trouble with the language of the country they grew up in because so many new words, or more properly, new meanings for old words had come into being. The army recognized the problem and made up a list for returning servicemen.

Just listen to how people speak, in normal, informal conversation, on old radio programs or movies and compare it to how language is used today. English, at least, is a living and evolving language.

Regards,

DAve

Bill, been there, done that. Worked for 5 1/2 years at Mitsubishi
Consumer Electronics editing user and service manuals from the
"Jenglish" originals to finished English manuals included with the
product. Did same job at JVC from 82-85.

>There are several reasons why the manuals for Japanese and German products are

Bill, that is because, at least with Mitsubishi and JVC the manuals
are written by engineers, NOT by technical writers.

>
>In general, the best way to explain anything is to start with the "general" and

>enhancements from foreigners is an even worse loss of face.

Yes, that was a LONG battle to get the Engineering Group in Japan to
accept the idea that a lowely American could actually produce an
English language manual that was better than what the Japanese could
produce, but once we got that hurdle scaled the other overseas
locations (including Canada) started using our English language
manuals as a base for their manuals.
>
>3. There is such a overwhelming flood of new products that there's no time to do

Ahhhhhh, THANK YOU so very much for vindicating what I told the
Marketing Manager for VCR Products in 1991: THE worst one of the bunch
was the HS-U82 VCR Manual. You could damn build the VCR from the
Instruction Manual!! Hell, the User Manual was bigger than the
Service Manual (which I did). Just for the record, the Marketing Dept.
had those manuals done by an outside MARCOM firm whose name escaped
me.
>
>** The manuals for my Yaesu amateur-radio equipment are written by the importer.

If buying a receiver that will only be useful for the next few years
is a bad idea, people should stop buying trunktrackers.

When 700 MHz opens up, public safety will flock there in droves to get
away from the interference Nextel causes on 800 MHz. At that point
the current trunktrackers will be useless.

In most cases, yes.

However, to make your mind reel even more, sometimes
the typically "masculine" article "el" is used instead of the more
femenine "la":

Here are two examples: EL agua (the water), EL ala (the wing). To say "la
agua" would be incorrect.

Contest Bulletin!!!
January 03, 2003 9:00PM Central to January 05,2003 9:00PM central
President's 50MHz and up Challenge!!!
The rules are simple... Honor system, or submit cards with S.a.s.e.
For category 1.)"Most contacts / modes",
make the most confirmed contacts on 6 meter thru visible light, and
Utilize the most modes, SSB, PSK31, SSTV, CW, etc etc.
submit your qsl cards, (eQSL accepted also) to AB8KO,
or alternately, for your convenience, submit just your log entries
via email to: K8VC@QSL.NET
For category 2.)"Aurora",
make the most confirmed contacts on 6 meter thru visible light,
"Aurora backscatter" and submit your qsl cards,(eQSL accepted also)
to AB8KO, or alternately, for your convenience,
submit just your log entries via email to: K8VC@QSL.NET

Winner in each category will receive
a handsome frameable Wall Certificate noting their acheivement
from "The Lone Wolfe Pack High Frequency Amateur Racio Society"

For more information about the society and how to join please check out K8VC at
QRZ.com

Hey, since when is vacationing in New England "settling"?

There are many interesting things to do and see in New England,
including a variety of cultures in various parts.

If you want, we could find someone to be rude to you in the language
of your choice.

Happy trails,

It gets even better.
El agua fria.
El planeta roja.
El mapa ...
and then some have totally different meanings such as 'el guia' (the
guide as in a person) vs. 'la guia' (guidebook, phonebook)...
and then the butchered ones like 'la foto' from 'la fotografï¿½a'.
And of course, 'una radio antigua' as might be said in Spain vs. 'un
radio antiguo' as might be more commonly said in the Americas.
'
(El lo de la, etc.)

In "grammar" school, (60's) we spent tons of time on grammatical trivia.
"Past-future perfect". "Split infinitives" "subjunctive" None of
which I can remember what they were. Also there were terms
for words what have the ending "ing" tacked on. "I am repairing the
antique radio". And "used to" is a kind of tense of verb IIRC.
Like: "I used to replace tubes before checking anything else".
And we made schematic diagrams of sentences. Say
"I repaired the radio" would look like:

```
I | repaired | radio
--------------------------
\ the
```

At the time I was trying to figure out if I could get a job
diagramming sentences when I was grown up, and who would
pay me to do that......

Though "Give Way" seems a bit less so than "Yield" (perhaps
it's appropriate to use a more polite term there). As for
"Way Out" as opposed to "Exit", maybe it helps avoid the
imperative and be more explantory. Or it's just fun.

Yes, the constitution (although Quebec has not signed it..hmmm...)
provides for protection of a "distinct society" by having, in effect,
positive discrimination in ways. Obviously it's not all that popular
amongst some.

A Lafayette portable AM/FM radio from 1969 had a set of instructions
that actually were quite understandable. " Tuning in an AM or FM
station, always tune the radio to point of maximum output and least
noise." This English only needs a bit of polishing to be good English.
Like "When tuning in an AM or FM station, always tune the radio
to a point of maximum clear sound and the least amount of noise."
...Well, better English.... :-)

What do you mean UNUSED? In my area (Southern California), it is well used, and on the repeater section of the band, there are an average of three repeaters per pair. There is also some BBS-to-BBS message passing via packet.

Try section 30 of the BROADCASTING DISTRIBUTION REGULATIONS, pretty
lengthy legalese specifying: "Programming Service Deletion and
Substitution". It doesn't even have to be the same program, just
comparable? Section 30.(2)(a)(i).

I would much prefer some requirment to improve the technical quality of
the signal, instead of regulating the content I am allowed to see/hear.

Dave

That one's a simple present participle. But there are also gerunds,
i.e., verbs that act like nouns; "Repairing is fun."

> And "used to" is a kind of tense of verb IIRC.
> Like: "I used to replace tubes before checking anything else".

Hm... don't know that one, but it makes sense.

You too? I loved diagramming sentences. I'd look for the longest
hairiest sentences I could find (Hemingway comes to mind) and see if I
could diagram them.

I'm glad I didn't take it up as a career though. I think burnout rate is
pretty high amongst sentence diagrammers. ;-)

Cheers,
Fred

> channels

This is funny.

About thirty years ago, Wayne Green petitioned the US FCC for
a "hobby band" to use part (or was it all?) of the 220MHz band.
Apart from the idea of taking the band from hams, there were a few
weird bits about the proposal. And if I'm remembering properly,
while it was not to be a quite a ham band, there was some cross-over
areas,

That proposal went nowhere, but not longer after the EIA proposed
that some of the 220MHz band in the US be taken away and made into
another CB band. I could have sworn they were talking about 80 channels,
too.

That got people excited, and the hobby magazines after a while treated
it like a done deal. Electronics Illustrated even published a project
or two "for the 220MHz CB band"; the one that I remember for sure was
a grid dip oscillator.

It was deja vu again, since 11Meters had been taken away from US
hams about 12 years before. So again a "use it or lose it" campaign
started up, with the result being a sudden interest in 220. While
before, there had been little commercial 220MHz gear, a Gonset
Communicator that had only a brief run and a CW/AM transmitter or
two from small manufacturers, now there were a slew of 220MHz FM
rigs, and repeaters too. The manufacturers even had programs in
place for bulk purchase, or discounts for the transceivers when
a club bought a repeater. Some of this was commercially driven,
but the result was that 220 which had always been an orphan band,
suddenly had equipment and more activity.

The EIA proposal went nowhere either, though it had seemed more
possible than the hobby band proposal. I can't remember exactly
what killed it beyond resistance from hams. There was something
about Canada and Mexico taking issue, because of potential interference
in border areas, but I can't remember how significant that was.

So now you think 220 is again a suitable band to pick apart.

People hardly ever talk about CB nowadays. After the seventies boom
went bust, it seems to have pretty much disappeared from sight,

despite no requirement for a license anymore (I gather). Now FRS is the big trend, and people who would never have needed communcation before, or gotten by with CB or 49MHz unlicensed walkie talkies, are being sold everywhere. Realistically, I suspect it too will fade to some extent, and we will be able to buy plenty of the units at garage sales for practically nothing.

Apart from the issue of taking part of a ham band away, just what need do you see for more FRS channels? And practically, having two separate bands may cause more problems than not.

I had a bit of difficulty understanding all this incoherent blabber, but I must address some of the more readable areas.

A. His position on pirates is from one of experience. You see he was BUSTED by the FCC for being a pirate broadcaster. This by his own admission.

B. His claim of my jamming is interesting, and a total fabrication. I'll just add this ...it is a FELONY to LIE to a FEDERAL OFFICIAL. 'MARK MY WORDS'.

He know what I mean.

C. I have already defined 'Broadcasting' . No one else has a problem with it. Why is that Orfis does? Remember he is suffering from brain damage.

D. If you don't care for me getting personal. Then stay the hell out of my way.

E. As for 'breaking a hip'.. Could be Orfis...but it wont be mine.

Your punt fool.

Dan/W4NTI

"Oris" <orisnospam@dirtball.com> wrote in message news:3DFE935D.2040209@dirtball.com...
Its just a matter of time and we will all be pirates. Keep on Jamming the airways OLD MAN. You have all ready got you hand slapped once for that kind of activity. One question what is the differance between a bulletin and a broadcast? Its been my experace is that a bulletin is on paper and it becomes a broadcast when it is put out over the air. What W1AW does is broadcast CW for the public to improve there morose code ablity. THAT IS A BROADCAST FOR THE PUBLIC!! Even by your definition of a broadcast. Right or wrong I call it the way I see it. I doesn't mean I like it but a spade is a spade. Just because something is right or wrong dosen't mean that I have to like it. Face the fact if K1MAN has to go so does W1AW. Don't get me wrong I think that W1AW needs to keep on broadcasting ARRL bullitens so new hams can get their code speed up to par. I also think that K1MAN needs to obtain a SW license and broadcast his stuff somewhere on the 41 meter band. We just don't have the room for his broadcasts in the genral portion of the phone bands. But right now as long as the FCC has not done anything to put K1MAN off the air you and anyone else jamming his broadcasts are breaking law. If I where you I would just pick my OLD (Yes your old becareful you might break a hip) ass up and move to another frequency to hold your QSOs there. I think that your not smart enough to see the simple way out. Like it or not those are the facts! You always get personal with people that don't agree with your old ways. I won't be long and we will all be pirates MARK MY WORDS!

>So now you think 220 is again a suitable band to pick apart.

You left out the part where the FCC DID take away part of the 220 band
(220-222). The commercial project for which it was taken away never
materialized, and the hams were given 218-220 (if memory serves) as
compensation.

It never made sense to me that the 218-220 couldn't have been used for
the commercial application, nor that we couldn't have gotten the
allocation back when the project died, and just flipflop the
allocations in the event of some future nutty proposal.

At least that's how I remember it.

Message-ID: <3DFF9E9B.80303@dirtball.com>
Source record: 70897

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station with at least 200 watts out. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter.
this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
Happy Holidays
73 and thanks for reading
Oris

Your memory isn't perfect. What we "got" back was an UNUSABLE 218-219 MHz band,
where the primary user has denied every application by amateurs for specific
station uses (which is allowed as a condition of the frequency grant to the
amateur community). So, in effect, we have nothing back.

Could be that's her honest belief.
I was once fluent in Latin, but believed I'd forgotten it long ago. A
few months ago I was reading a book in English when I came upon a Papal
Bull in Latin. My mind shifted gears automatically, read the page of
Latin, then several more pages of English before I realised it! Trouble
is, when I went back to the Bull I could no longer read it even tho I
remembered what it had said! Truly our subconscious minds are wonderful
things!!

Why do you keep 'spamming' the ham newsgroups with this same message Oris?
Havent you figured it out yet that no one wants this 'deal'. How about
taking this crap and peddle it with your local good buddies? Im sure they
would love to have that 920.

Thats the one that splattered all over the bands, right? And that you ran
on 10 meter AM trashing up that end of the spectrum.

Is that the same amp that 'eats tubes' ??

Have a nice day.

Your 'friend'

Can anyone tell me how to renew your amateur radio license these days?

I know that they have probably made it as complicated as possible
rather than sending in a simple 610 form like you used to do.

Why is W5YI trying to run a business out of amateur license renewals?

Please reply in the newsgroup. No e-mails will arrive.

> special status by the FCC.

What special status? If you mean that because the ARRL has, over
some 70+ years, cultivated a relationship and respect from the FCC
because of the ARRL's being a positive and supportive organization, then
I see nothing for anyone to complain about. The ability to start an
organization,
gain members, cultivate a relationship with the FCC has always been
an option for anyone or any group...and some have indeed done so.

> There are many of us who think that is just plain wrong.

You would propose what to make it right then?

> Let the ARRL register as a lobbying orginization,

I would ask why...if the ARRL isn't violating any "lobbying" laws now,
should ARRL have to register any more than myself or other
organizations?

> ...and also make sure that it is not treated as the FCC
> Auxiliary in its relationships with the federal government.

An "auxiliary of the FCC"! Now I've heard everything.

> Then, severely restrict anyone who would broadcast
> on the ham bands.

Who's broadcasting now on the ham bands?

Your point? Odds are most of the 556K of non-ARRL hams
are just not interested enough to join and probably
wouldn't join any "alternative" type of ARRL organization
if you started one.

> And I've listened to K1MAN too. So what does that have to do with
> equal treatment under the law?

The ham bands are NOT for broadcast of just any political garbage
and clearly ARRL does not transmit any. What the ARRL transmits is
100% ham information for those that might need it. The distinction
is pretty clear to most people...but apparently not all.

Cheers,
Bill K2UNK

Urban legend. There was some minor discussion due to the German colony in
Pennsylvania at the time,b ut there was never a vote.

I believe Prof. Long can detail this better than I can, however.

Here is some additional information:

"Subject: Return of the US Language UL
Date: 12 Jul 92 16:43:24 GMT

Those of you who have been around here for longer than you care to admit
(like me) may remember the time someone brought up a legend about German
having narrowly missed becoming the official language of the United States.
This is a common story, and the usual cap to it is that Congress voted - by
a majority of one vote - to make English the official language of the US,
this significantly altering the course of development in the US textbook
publishing industry.

The story is false. Matter of fact, the US at present does not have an
"official" language in the sense of a language declared by law to have
special status; English is merely the de facto standard. There _was_ indeed
some discussion about which language to adapt, with some strong separatists
arguing that English was the language of the "enemy". However, there were no
cliff-hangers as suggested by the legend mentioned above; the strong
separatists were a minority group, and it was pretty clear from the start
that most people considered changing from English to be too much trouble.
All this junk was discussed the last time around, but I wanted to summarize
it for those who weren't with us then.

The reason for bringing this up is that I have found an incident that may be
the source of this UL. (Drum roll.) My source is the _Cambridge Encyclopedia
of Language_, by David Crystal, published by the Cambridge University Press,

(c)1987. In the interest of completeness, ISBN 0 521 26438 3.

from page 365:

A planning myth

Probably the best-known myth in the history of language planning is the story that German nearly became the national language of the US in the 18th century, losing to English by only one vote in the legislature (the "Muhlenberg" legend). In fact, all that was involved was a request, made by a group of Virginia Germans, to have certain laws issued in German _as well as_ in Englih. The proposal was rejected by one vote, apparently cast by a German-speaking Lutheran clergyman, Frederick Muhlenberg (1750-1801). But the general status of English as the majority language was never in doubt. (After S.B. Heath and F. Mandabach, 1983.)

[End quote]

Just to show that i did my homework, the paper referred to is: Heath, S.B., and Mandabach, F. 1983. Language status decisions and the law in the United States. In J. Cobarrubias and J.A. Fishman (eds.), _Progress in language planning: international perspectives_ (Berlin: Mouton), 87-105.

heh..

yeah, it does "appear" to be complicated.

I ahd a run-in with the fcc site over this. I have since suggested that they may want to review their lic. renewal site and compare with section 502 of the ADA (they are definitely NOT in compliance).

otherwise, renewals are easy. you can still get the 610's from the arrl, or go to the fcc site and renew there.

as for w5yi, well, he has the right to make money, but what good is that when there are free alternatives?

It is so ingrained in American folklore, I never gave it much thought
that it wasn't true. It seems nearly everyone knows the story (as far
as missing by one vote in Congress) and believes that we might have
become a German speaking nation. I have even heard of studies trying
to predict what might have become if our common language were German.

Ah well, as Paul Harvey says, Now you know the rest of the story.

The only two "Trunking Units" available outside N America are:

UBC-245XLT (http://www.javiation.co.uk/ubc-245xlt.html)
UBC-780XLT (http://www.javiation.co.uk/ubc-780xlt.html)

The handheld UBC-245XLT is only distributed by Uniden in Australia.

COMPLETE TRANSCRIPT OF SENATE MAJORITY LEADER TRENT LOTT'S APPEARANCE ON BLACK ENTERTAINMENT TELEVISION
Certified Government Transcript

THE PRESIDENT: Good morning. As you know, I'm a humble man of principles. I only do what I feel is right in the heart of my pollsters, which is why I'm gearing up to stick it to Senate Majority Liability Trent Lott but good. But before I do, I'd like y'all to reconsider one last time. Read what Trent said on something called "BET" last night, and if you still aren't convinced that Republicans can pretend to be sensitive, then me and Karl will string Captain Hairpiece's ass up from the highest tree and sip Mint Juleps while he twitches. Roll tape.
[BEGIN TRANSCRIPT]
MISS CLEO: Welcome back, brothers and sisters! We hope you enjoyed that brief fifteen minute block of messages from the sponsors of my infomercial! But now, on behalf of the management of Black Entertainment Television, I want to tell you that it's OK to put down your credit cards for the next three minutes or so, because we have a very special guest joining us today - Senate Majority Leader TRENT LOTT, who's here in a last-ditch effort to try to erase a lifetime of racist politics by using that little pink pig snout of his to root for truffles in our collective booty crack!
(Boos.)
SENATOR LOTT: Thank you, Mammy Cleo. It's my pleasure to be the first ever Republican to appear here on the colored channel. You know, many's the evening Tricia and I turn on BET and "get niggy with it" to the "hip-bopper" videos and such. Really fabulous stuff!
MISS CLEO: So Trent, there's a lots of people out there saying you don't like us black folks. What gives?
SENATOR LOTT: Well you know, it's important to me that people don't believe that, regardless of what my daughter told the Ku Klux Klan on Friday. True, I fought tooth and nail to keep you people out of my college fraternity, and I've voted against affirmative action, Martin Luther King Day, and pretty much anything that all you nigr--, uh, darki--, uh... all you Africanioids have wanted the past thirty years - but still, I desperately want you to believe me when I say that I'm really, really SORRY that what I said at Strom Thurmond's birthday party brought my life's record and deepest held convictions into such searingly accurate focus. Furthermore, it pains me greatly to think that people would draw the correct conclusion that all white Republicans share my feelings on this matter, because honestly, we need to trick at least 5% of you people into voting for us every year if we're going to stay rich.
MISS CLEO: Well Trent, you know we're going to need quite a bit of convincing. What else are you willing to do to get our votes and save your job in the Senate?
SENATOR LOTT: Well I'm glad you asked. Because I've put together a little list

of events which make up my itinerary for the next week. When I've finished them, I'm counting on this whole shi-bang having blown over once and for all. Here it is:

* Tuesday: Book club/slumber party with Oprah and Toni Morrison
* Wednesday: Distributing Holiday Greetings in Harlem
* Thursday: Recreational Cotton Picking back in "The New Mississippi"
* Friday: Smearing myself in black shoe polish and trying to hail cabs in Manhattan
* Saturday: Singing "Swing Low" with Method Man & Snoop Dog at the Apollo Theatre
* Sunday: Eating collard greens with honorary brother Bill Clinton
* Monday: Photo session where I lovingly pick Cornel West's afro

MISS CLEO: That sounds real good, Trent! You do that, and I think we can forgive you!
SENATOR LOTT: Well you know, it's been my pleasure to appear here and eat watermelon-flavored crow, and I hope that people have been sufficiently moved by my ability to touch you and not compulsively wash off the cooties with HandyWipes.
MISS CLEO: OK. That's a wrap. Let's have a big hand for our special guest Senator Trent Lott!
(Boos.)

>> Let the ARRL register as a lobbying orginization,

>I would ask why...if the ARRL isn't violating any "lobbying" laws now,
>should ARRL have to register any more than myself or other
>organizations?

The ARRL *does* have registered lobbyists. I was in the library reference section one day and came across a thick book entitled something like "Registered Lobbyists to the U.S. Government." Out of curiosity, I looked up "American Radio Relay League" and found, sure enough, that it had several lobbyists registered, including Paul Rinaldo, W4RI.

Now, I don't think that's a bad thing. It's a good thing that we have lobbyists for our interests in Washington, and all the better that we be up front about it, especially if such registration is required by law. But it's a lot of semantic hair-splitting, to no good end, about whether the ARRL does any "lobbying" or not..

Well then. You have an opportunity you may not have realized you have -
obviously the replies to this thread shows there might be a market for this
idea as well...

Since you have the skills, and need the money, why not rewrite the manuals
in plain english and SELL them yourself?

I'd pay a few bucks extra for a manual that made sense! I'm actually one of
the few people who has learned the value of taking the time to read one
before playing with something new.

It's a thought... if you don't do it, someone else will I'm sure.

Because the time and effort it takes to do a proper rewrite would never be recouped by the sales.

Rainbow Dan,
You lie on the air almost ae well as you lie in the newsgroups. What a loser. Has Riley allowed you back on 3.901 yet HAHAHAHA? Are you still causing willful interference on 14.275? You know Riley asked you to stay off of that spot as well as other spots on the ham bands. You got caught Jamming me and now all you want to do is cause more trouble.I didn't turn you in YOU GOT CAUGHT HAHAHAHA! Do you still threaten everyone who doesn't agree with you. Didn't you get warned about MAKING THREATS? I think you need to go check yourself into the VA AGAIN your starting to believe your own lies! Your a old man that can forget what happened over 30 years ago. Are you still getting flashbacks from the time you ran hand hid in the bunker when the rest of your unit was taking flack. What a yellow coward! Forget about it Rainbow Dan the war is over CW is about dead and your getting older and older. Just becareful going up and down those steps of your little home you might break a hip. None of us would want to see that.

In <atj87t$94b$1@slb6.atl.mindspring.net> "Dan/W4NTI" <w4nti@NOSPAMmindspring.com> writes:

>Robert H. McNamara is history...long gone. We are dealing with the
>'present' FCC. Pay attention.

>Dan/W4NTI

Indeed.

Furthermore, has anyone besides me actually read the last two letters sent by the FCC to Glenn Baxter, K1MAN? I ask, because most of the posters in this thread seem to be oblivious to the information contained in them. You can find them at the ARRL web site:

http://www.arrl.org/news/stories/1999/07/02/1/
http://www.arrl.org/news/enforcement_logs/2002/0209.html

The only issue that's confusing for me is why the FCC is taking so bloody long to take care of the matter. Perhaps Mr. Hollingsworth, like Bush and Iraq, is making sure that the FCC dots every "i" and crosses every "t" to make sure that whatever hammer falls on K1MAN will find its mark and stay there.

Individuals who continue to blather on about "K1MAN is doing the same as W1AW" are assigned the FCC letters above as remedial reading. You won't find the FCC writing to the ARRL with such a detailed listing of multiple violations of FCC rules, including illegal broadcasting, absence of a control operator, interference, broadcasting recordings of telephone conversations, and threats. You won't find ARRL officials responding to the FCC with such pathetic, almost comical, baiting of authority that Mr. Baxter has been engaging in over the past few years.

Hi All,

I have always wanted to QSO with contestors, but I have no idea whether they want to QSO with a non-contesting ham. Does it increase their score, or is it merely a bother to them? (I know time is of the essence during a contest, so I realize I would have to QSO in their rapid Callsign--RST--Number style; BTW, what does the number signify, and what number would I send back?). And do contestors send QSL cards after contacts? I'm afraid I know very little about contesting, and I cannot find a web site that answers these questions.

Thanks!

Mike

COMPLETE TRANSCRIPT OF SENATE MAJORITY LEADER TRENT LOTT'S APPEARANCE ON BLACK ENTERTAINMENT TELEVISION
Certified Government Transcript

THE PRESIDENT: Good morning. As you know, I'm a humble man of principles. I only do what I feel is right in the heart of my pollsters, which is why I'm gearing up to stick it to Senate Majority Liability Trent Lott but good. But before I do, I'd like y'all to reconsider one last time. Read what Trent said on something called "BET" last night, and if you still aren't convinced that Republicans can pretend to be sensitive, then me and Karl will string Captain Hairpiece's ass up from the highest tree and sip Mint Juleps while he twitches. Roll tape.
[BEGIN TRANSCRIPT]
MISS CLEO: Welcome back, brothers and sisters! We hope you enjoyed that brief fifteen minute block of messages from the sponsors of my infomercial! But now, on behalf of the management of Black Entertainment Television, I want to tell you that it's OK to put down your credit cards for the next three minutes or so, because we have a very special guest joining us today - Senate Majority Leader TRENT LOTT, who's here in a last-ditch effort to try to erase a lifetime of racist politics by using that little pink pig snout of his to root for truffles in our collective booty crack!
(Boos.)
SENATOR LOTT: Thank you, Mammy Cleo. It's my pleasure to be the first ever Republican to appear here on the colored channel. You know, many's the evening Tricia and I turn on BET and "get niggy with it" to the "hip-bopper" videos and such. Really fabulous stuff!
MISS CLEO: So Trent, there's a lots of people out there saying you don't like us black folks. What gives?
SENATOR LOTT: Well you know, it's important to me that people don't believe that, regardless of what my daughter told the Ku Klux Klan on Friday. True, I fought tooth and nail to keep you people out of my college fraternity, and I've voted against affirmative action, Martin Luther King Day, and pretty much anything that all you nigr--, uh, darki--, uh... all you Africanioids have wanted the past thirty years - but still, I desperately want you to believe me when I say that I'm really, really SORRY that what I said at Strom Thurmond's birthday party brought my life's record and deepest held convictions into such searingly accurate focus. Furthermore, it pains me greatly to think that people would draw the correct conclusion that all white Republicans share my feelings on this matter, because honestly, we need to trick at least 5% of you people into voting for us every year if we're going to stay rich.

MISS CLEO: Well Trent, you know we're going to need quite a bit of convincing. What else are you willing to do to get our votes and save your job in the Senate?
SENATOR LOTT: Well I'm glad you asked. Because I've put together a little list of events which make up my itinerary for the next week. When I've finished them, I'm counting on this whole shi-bang having blown over once and for all. Here it is:

* Tuesday: Book club/slumber party with Oprah and Toni Morrison
* Wednesday: Distributing Holiday Greetings in Harlem
* Thursday: Recreational Cotton Picking back in "The New Mississippi"
* Friday: Smearing myself in black shoe polish and trying to hail cabs in Manhattan
* Saturday: Singing "Swing Low" with Method Man & Snoop Dog at the Apollo Theatre
* Sunday: Eating collard greens with honorary brother Bill Clinton
* Monday: Photo session where I lovingly pick Cornel West's afro

MISS CLEO: That sounds real good, Trent! You do that, and I think we can forgive you!
SENATOR LOTT: Well you know, it's been my pleasure to appear here and eat watermelon-flavored crow, and I hope that people have been sufficiently moved by my ability to touch you and not compulsively wash off the cooties with HandyWipes.
MISS CLEO: OK. That's a wrap. Let's have a big hand for our special guest Senator Trent Lott!
(Boos.)

Go to the ARRL web site at www.arrl.org

There are simple directions there. You can renew by sending in a form (the form number has changed however) or you can renew online.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100

watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station with at least 200 watts out. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
Happy Holidays
73 and thanks for reading

Contesters are not into regular qso's during the contest for the most part.
Of course if it is a slow contest you could probably have a 'quick chat'.

The exchange depends on the contest. If the contest is one that is
exchanging serial numbers, and if its your first contact of the contest, it
would be number 1. And so forth. If a report is needed. Everyone is
always 59.

If you want to find more about contesting go to www.contesting.com they
have some excellent articles on the subject.

Thanks for the links. I read them in real time when they were first
published but their content had faded in my memory. It was fun to
review them.

>The only issue that's confusing for me is why the FCC is taking so
>bloody long to take care of the matter. Perhaps Mr. Hollingsworth, like
>Bush and Iraq, is making sure that the FCC dots every "i" and crosses

I suspect that with license renewal in October of 2005, he will be
designated for a hearing and the voluminous evidence will be heaped
upon him with the burden of proving he's worthy falling on him.

You're right about the idiots. Listen to any of the ARRL sessions
(they'll have to listen to the phone transmissions, because I doubt a
one of them can copy CW), and it is clear that it is an amateur radio
bulletin or code practice. There's no nonsense like call-ins, breaks
for "commercials," editorials, or anything other than either news or
(in the case of code practice) technical information.

Listen to a Baxter broadcast. It's formatted like a broadcast, it's
paced like a broadcast, it sounds like a broadcast. It fails the duck
test; it's a broadcast, and it's illegal.

Moreover, ARRL has been providing their services for 75 years or more,
and there is every reasonable expectation that they will continue to
provide them for the distantly forseeable future.

Baxter is 60, and barring his hoped for removal, will likely only have
the energy to carry this charade on for, at most, 15 years. That
should put the lie to any judgement of "value" he is providing to
Amateur Radio. He's not here for the long run. Just a short burst of
easily forgotten self-aggrandizement.

Oh, and someone said he was a lawyer ("and a fine one"); check his
bio, he's an engineer. Not a single mention of law anywhere. I've yet
to meet a lawyer who doesn't manage to bring it up somewhere in a

conversation.

>I have always wanted to QSO with contestors, but I have no idea whether
>they want to QSO with a non-contesting ham.

If by QSO you mean a lengthy chat, probably not, since rate is
everything, but yes if you're going to give them a contact they can
use; namely with a valid exchange (unique to each contest).

>Does it increase their score...

Absolutely.

>...or is it merely a bother to them?

Every QSO (in the context of a short exchange of report for a QSO)
counts. What every contester knows is that it is not the big gun
contesters or even the regular little pistol contesters that allow
them to run up amazing scores. It's the drive by contester such as
yourself, or the new contester (or even time-limited old hand) who
just gets on for a few "Qs" that fill the bulk of the log.

>(I know time is of the essence during a contest, so I realize I would have to QSO in
>their rapid Callsign--RST--Number style;

No, we're not THAT busy. Do whatever speed you can comfortably handle,
and that includes CW. Even though it is not unusual for a CW contester
to operate routinely in excess of 40 WPM, I don't know one who won't
slow down (even to 10 WPM or less) to help someone else make a QSO.
Unless, of course, they're getting a good rate (120/hr or better) at
the higher speed; then it may take a while for them to want to slow
down and work you.

>BTW, what does the number signify, and what number would I send back?).

By number, I assume you mean other than the "5-9" (or "5-9-9") you
routinely hear as the signal report part of the exchange.

The "number" often is a serial number, but depending on the contest it
could be a zone, the year you were first licensed, or even a
membership number (such as 10-10).

You should have a bit of an idea of the contest exchange, so you will
know what the number means, and so you can respond in kind. If it's a
serial number, just start numbering your QSOs in that particular
contest and give the appropriate number.

> And do contestors send QSL cards after contacts?

Most do, very well. However, serious contesters and especially big multi-op stations routinely make 1000-4000 QSOs per contest. To get that good, they are probably operating 6 or 8 contests or more per year. They are unlikely to generate QSLs on their own, and they recognize the regulars who they've worked over and over, so you should be able to depend on getting a card if you send one.

>I'm afraid I know very little about contesting, and I cannot find a web site
>that answers these questions.

Try http://www.contesting.com. There are all kinds of links there, and also links to discussion groups where people would be glad to answer your questions in more detail than this.

5867. Pennsylvania Hams

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-19 04:34:52 UTC
From: nospam@pa-sitrep.com
Message-ID: <3e014b2a.55204937@news.verizon.net>
Source record: 70959

Emergency Situation Report Group for Pennsylvanians

PA-SitRep is a free, 100% non-commercial,
non-profit, emergency communications related web
site and emergency alert e-mail list. The PA-SitRep
list is free of charge and we currently have 500
subscribers, many of whom monitor the list via SMS
(short message service) capable cell phones.

We are developing a group of PA-SitRep Contacts,
most of whom (27 so far) are Amateur Radio
Operators and we are currently seeking as many
volunteers as possible.

PA-SitRep Contacts submit their contact information
which is posted on the PA-SitRep Contact page
(http://www.pa-sitrep.com/contact.htm).

PA-SitRep Contacts are asked to post (or relay)
minor, as well as major, emergency situation reports to
our second higher volume e-mail list, "PA-SitRep
Discussion". The situation reports can be moved to the
main list by the list administrators if warranted.

Contacts may also be contacted (by alternative means of
communications if necessary, i.e. Amateur radio or 2-way
SMS) for a first-hand situation report should an emergency
situation arise in their area.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate emergency situation
reports, free of charge, to those subscribed to our e-mail
alert list.

In addition to providing the situation reports for the
PA-SitRep list, our eventual long-term goal is to provide
situation reporting service, free of charge, to any interested
served agencies, much in the same way that SKYWARN
provides weather situation reports for their served
agency, the National Weather Service.

The ideal candidate for a PA-SitRep Contact might be
a retired Pennsylvania resident with HF Amateur radio
operating capabilities who enjoys monitoring police,
fire and public service frequencies. Having regular
access to e-mail and 2 way SMS cell phone capabilities

is a big plus, too, but there are no minumum requirements
other than having a willingness to participate and the ability
to provide ACCURATE situation reports.

If you're interested in volunteering as a PA-SitRep
Contact, or have any questions regarding PA-SitRep,
please drop me a line at owner@pa-sitrep.com.

Or visit the website to learn more:
http://www.pa-sitrep.com

Thanks. We'll look forward to hearing from you.

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder

Interesting. Somehow, I suspect though that cable companies
petitioned for the adoption of this regulation to the CRTC.

Since Japanese is difficult to learn to read, most people overestimate the importance of reading in the process of translating Japanese to English. Reading skill sufficient to puzzle out the meaning with a dictionary on your lap suffices. While this isn't exactly easy to learn, it's far short of fluency.

English is taught in Japanese schools and is also widely used in advertising in Japan. English language instruction in Japanese grade schools is not high in quality, but Japanese students still achieve a higher level of capability in English than Americans commonly achieve in their own foreign language studies. The Japanese are well aware of this.

I think these facts have a tendency to cause some Japanese to overestimate their prowess at translation. If you're a Japanese engineer with the best English skills in your department, the boss may mistakenly think he can save money by having you translate things. It is very un-Japanese to consciously do shoddy work, but without critical feedback how would you know? Feedback from the USA doesn't count: many Japanese think Americans are self-centered crybabies (with some justification).

Literal translation is problematic anyway: Japanese has a wildly different grammar from English. Japanese verb tenses don't map well to English tenses. Adjectives have tenses. A verb relates three nouns to each other, not two. Word order is completely different. The result is that a Japanese writer will build up to a concept from a very different path than an English writer will.

Engineering and science are especially difficult, as the languages often use different metaphors. A Japanese translator might know to use the English word for a collection of cannon in place of "denchi" (literally "lightning pond"): after all, "batteri" is also a modern Japanese word. On the other hand, I never got a satisfactory translation of "yomikomi" until I figured it out myself: my Kodansha dictionary translates "yomi" as "judgment" and "komi" as "included". I had to look hard at context and go back to the roots "yo(mu)" (read) and "ko(mu)" (load) to get "operand fetch"! You have to *really* understand the subject matter to do a decent job of translation.

It has to be a "high tech" language? It's not enough to be able to
communicate with your neighbors or understand what you hear on the radio?
I certainly would find Spanish useful sometimes, but I don't know it.

I have found French quite useful professionally. I think most US schools
still teach that. My town's public school system certainly does.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get
the technical supplement too (AKA Service manual), as well as the owners
manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in
good shape I will trade both for a FT 990 or a FT 1000.. I have been
using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working
Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM
Han station
with at least 200 watts out. I hope to find something to work with my
Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter)
two 3-500s 100 in will give you 1250 out, New Caps, that I will trade
for a Globe King or full legal output Ham band AM transmitter. this is a
pickup trade only. I will be willing to travel 100 miles from Athens
GA. Happy Holidays
73 and thanks for reading

Okay, which language do you learn when you already know English?
There is no obvious choice unlike in Japan or China or Europe or
elsewhere (English). They tried to teach me Spanish in high school.
Waste of time; Spanish is not a high tech language. They didn't
offer Japanese or Chinese, which might have been more useful.

You never had a ham band on 11 meters Orfis. It was taken because no one used or for that matter much wanted it.

You have been harping on this theme for years on your website. It went over there just like it does here. Like a brick .

Go get that plate in your head replaced. They do good things with teflon these days.

Regardless who does the translating, it just seems stupid
that the manufacturer doesn't test the manual out on a
sample of people from the target audience. Why is it so
hard for many firms to understand this? It's probably also
not a good idea to have engineers write the (users) manual
either (I know, this last remark is flame bait).

Because it costs time and money. When I worked full-time at The Evil Empire, we user-tested the QuickBasic 4.0 docs. It was a botch, because we had a bad sample group ("professional" software testers interested mostly in getting free samples), and no one wanted to commit the project to the extended testing that would have been needed to really learn something.

I might add that a good, experienced technical writer can "get it right" (most of the time) without testing the docs on a live audience. Honest.

> It's probably also not a good idea to have engineers write
> the (user's) manual either (I know, this last remark is flame bait).

Most "professional" technical writers are incompetent; I'm sure there are engineers who could do a better job.

The problem with having the engineers write the documents is that they are "too close" to the product and don't (usually) know how to look at it from the users' point of view.

5886. Kenwood R2000 tuning problem

Hi,

I have an old R2000 and it has developed a tuning problem. The
main tuing dial will tune "down" freq. but not "up". The band "up"
"down" works fine. I think it maybe one of the diodes in the tuning
mechinism but I am not sure.

I tried to adjust the pots on the tuning board, and when I did
all I could do is get it to tune "up" and not "down".

Has anyone seen this problem and if so point me in the right
direction. I do not have the maint manual on it.

I have 2 Belkin UPS units, 1 on a Home Automation system and 1 on the PC which I use for logging etc.

If I transmit on 80 or 40 with greater than 20 watts the units malfunction then shut down.

I have tried all sorts of filters on inputs and outputs, but with little success. As soon as I connect them in ciruit I get problems

It is a real pain. No other equipment in the house is effected.

The units are marked with CE and EMC stickers.

The antenna is a Windom, and I have spent quite some time getting all the RF off the feeder. This improved things, but still no go.

Has anyone else had probelms with these particular units, and maybe has a solution. Thank goodness I'm not running a Kw !

TIA

I agree with this. It also seems to me that writing is not necessarily
their forte -- though this varies from individual to individual.

Certainly sounds like Lloyd must be a groupie following whoever and whatever blindly and without any real reason other than just to make a name for himself.
Its amazing that this "Lloyd" character doesn't have any sort of original ideas or the ability to actually mount anything sustained with some intelligence. Pretty much the only thing he is capable of is to be hanger on and try to make a name for himself.

The only thing that 'publishing of a schedule' is relating to is if the station doing the 'bulletins' is a club station and if the operators are payed for their work.

Which is really of no importance at all. You see the ISSUE is dumping on top of on going communications. NOT whether what he calls a bulletin is legal or not. The next issue is the control operator problem. MAN is sidestepping the issue like a good Democrat slips and slides around the truth. It wont work. Riley will prevail and MAN will be another has been.

Next dumb ass.

Contrary to Lou's rants, it behooves anybody in the US to pick up on a
bit of Spanish if you want to get your order right if that has become
the norm in your community.
My OM, 74 this year, can do it (since his $150k Charlotte neighborhood
has gone almost totally Hispanic). And he loves the fun (and irony) in
it as do the people he now has to deal with.
Its all smiles and broken jokes...while the next guy just goes on an
angry rant and will probably get cheated on his change.
Those who categorically refuse to play the game might as well be left
behind...as they rightly should be...and will be.
There's no We vs. Them battle that needs to be fought. I'd rather hear
a Spanish accent at McDonalds than some marble-mouthed suburban Anglo
kid who I have paid for his education.

These are the same folks who go to a non-English speaking country and
think that if they YELL loudly enough at the natives, they will
somehow understand the English.

You got it right! They came here to WORK and get ahead - just like my ancestors did. There are ins and outs as to HOW we ought to manage the situation, but I'll never fault someone who is here looking to get ahead in a legal fashion. I try to treat people with respect and almost invariably get the same in return. I'd bet I am a good deal more difficult for them to put up with than vice versa.

Besides, Spanish is a very easy language to learn, very easy. It's logical, easy to pronounce, and very easy to read and write. I've learned four languages beyond English, and Spanish was the easiest of the four to learn, by far. If you start to study Spanish, you realize how much Latin grammar has found its way into English. Spanish was also influenced by the Greeks (and English has quite a bit of Greek in it, too).

Jackie

Talented people usually know how it works but can't seem to get it across to people who would little care. If YOU know how it works, it's just a matter of deciphering the usage of all the doohickey buttons on it, 65% of which are probably generic concepts. Push 'em till you figure it out!

Steven, not on all 39000 posts yet...(it's 4:20 am, give me a break)

Especially the English in boarding schools...

English and Spanish have basically the same sentence structure, but Spanish (like all Romance languages) is more highly inflected than English. Learning how to decline verbs is a real pain in the toches.

Sorry, I got to reply to this one.

Person who speaks one language - US Citizen.

I was born and live in the US, and I seem to remember that anyone in North,
Central and South Amarica is an Ameican.

Just my rant.

Hello - Does someone here know of a public library in Sydney, Australia, that subscribes to QEX magazine (http://www.arrl.org/qex/) ?

I was specially interested in this November's issue that has Gerald Youngblood's article "A Software-Defined Radio for the Masses - Part 3". Part 1 and 2 are obtainable online from the QEX website here: http://www.arrl.org/tis/info/sdr.html in case anyone's interested.

Cheers
Sonam

Nope. In both continents there is only one nation that uses America in it's
name and only one country whose denizens call themselves Americans. You
will never find a Mexican who says he is "American". Ditto Canadians.

You have confused continent names with nations names

Steve

I have often wondered, over the last few years, why is it that when a discussion is won by someone his opposition nearly always resorts to either name calling, and/or pointing out spelling or grammer errors? Kind of obvious me thunks.

In Japanese, the usage closely follows American English usage: "Amerika" means USA unless qualified by "north", "south", or "latin".

Lloyd, with your actions in this newsgroup, you are hardly being a brother that provides a beacon of light to those who knoweth not of Christ. It is really a shame you spend countless hours in here agitating and stirring up trouble supporting those who are hardly ones you should be emulating. You ever read the scripture about the company you keep.

Didn't God see we were building a tower to Heaven and were a bunch of idiots, and struck us all unable to understand each other? If that's what he wanted, I think all the gibberish is fine, thank you!

Now I'd like to hear about radio+phono, especially Daniele's wonderful mail from over there. Where you think they all babble.

Steven says give it a rest.

I vaguely recall that the formal name of Brasil includes the
Portuguese equivalent of "United States" as well.

But in common usage, "American" is understood to mean relating to the
United States of America.

We were using the current name before Mexico and Brasil decolonized.

Looks like recent events by k1man have not
helped things that much. In fact it seems
to have taken the channel down Cuckoo's Nest Lane.
[perhaps it was there all along?]
14.275 all afternoon.has been a 3-ring circus.
While Maine is transmitting with peanut-butter in ears,
there were ten stations talking over him all at once. This
was accompanied by various potty-mouth and generally
retarded commentary, broccoli fart noises, ginger ale
gaseous-grade belching, SpongeBob Squarepants .wav's,
some guy playing a "mouth organ" (that's a harmonica
for the uneducated) taped music, a kid making "goo-goo
baby" noises (95% probability "goo-goo baby" tape is transmitted
from the Flushing NY area) some old farts talking about
how to make potato soup, the F-word sent in CW over
and over, and a perennial station down South who's
chastising everyone who's talking over Maine's Broadcast.
You want it, they got it and a everything in between folks, it sounds
like the old 14.313 War all over again. Amazing that
grown men an act like this, sounds like a bunch of 8 year
olds in a sandbox that just found out the stray cats been using it
as their litter box at night! All in all a quite an amusing time on the
ham ray-deeoh. Makes me comfortable in the knowledge that ham radio
is still the best screwball magnet we have going. Looks like
14.313 is baaaaaack my SWL's !! (sound of toilet flushing)

Merry XXX-mas (from Suzie da "kiebassa queen")
Happy Hanukkah bush (you all messhuga!)
Happy Quanzaa (KFC & Wateymelon from Trent Lott to all)

And another CBer adds his/her comments. Myself, I'm happy with 2 meters and 440 FM although my license allows more. Australia - all rf path - has been no problem. Had a chat with friends in British Columbia today (although this was supported, in part, by internet linking). Who cares? I haven't received qrm in quite some time (like ... um ... 35 years). Life is too short to live with your panties tied up in knots. HF is best experienced with digital modes. The lids haven't gravitated there yet. The repeater? Well, we had a couple of problems. Only two. Neither lasted for more than a couple of minutes (in any case, I didn't suffer - the one guy had to suffer 40 words per minute CW from me, however ;) The other had the rug pulled out from under him. For every frequency with a problem (allowing 3 KHz bandwidth) there are thousands without problems (and that would be HF plus, perhaps, 6 meters - a lot more if you allow those frequencies above 6). If you enjoy listening to problems, go ahead but don't complain. If you don't, QSY. End problem. I think I'll see if Bill, VE7DTM, is back on the air.

The reason CB does not get much legit use is the position that CB band is allocated in, one where its useless during the day because of skip and truckers using linears to punch through the skip. CB is useless due to skip and AM.

220 is totally unusued in my part of town and it gets no use in many places I have travelled, most activity is in 2m and some in the 70cm band. if a experimenters unlicensed FRS type band did exist in parts of the 220mhz band (80 channels, 4-5 watts erp) I can see that getting more use by those who need something like CB but cant use FRS due to its .5w restrictions and restrictions regarding antenna/base/mobile use. and no skip+ the FM capture properties would mitigate the abuse caused by linears since the payoff is not there. It might even get others who enjoy using a 220mhz FRS band interested in Amateur radio once they get the radio bug and want to see what else is out there. The public pays plenty of federal taxes, they deserve a "Real CB" band and 220 seems to fit the bill, maybe convert that unused commercial segment over.

Certainly sounds like Lloyd must be a groupie following whoever and whatever blindly and without any real reason other than just to make a name for himself.
Its amazing that this "Lloyd" character doesn't have any sort of original ideas or the ability to actually mount anything sustained with some intelligence. Pretty much the only thing he is capable of is to be hanger on and try to make a name for himself.

Hi!

New javaradio in beta test at:

http://www.javaradiofrance.com

Coverage : 100 kHz to 1300 MHz with all mode.
Situation : based at Orly (just near Paris)
Online : 24/24

Free access, just give a nickname and your location to connect on server.
Troubleshooting? Send a message to jean-marc.cera@wanadoo.fr

Thx!

I think the country is just called "Estados Unidos de Mexico" (Mexican United States). The Mexican provinces are also called states, just like here.

"Estados Unidos Mexicanos"- "United States of Mexico".

Mexico has states too, just the like USA does.

Rrrrrp. Wrong.

The name of Mexico is Los Estados Unidos Mexicanos. The United Mexican States.

Brazil is Estados Unidos do Brasil. The United States of Brazil.

"America" is not in the name of any other country in the Western Hemispnhere except for the USA.

All Latinos in the Hemisphere, however, consider themselves "of the Americas" or American. South Americans are "Sudamericanos" and Central Americans are "Centroamericanos." The group of Latin American nations are members of the Organization of American States, or the "OAS" (Organizaci&#65533;n de Estados Americanos."

In English, in North America, maybe. Elsewhere, and in any other language,
would require specification of origin.

Let's see if I understand this.

I can publish on my website a schedule that says I will be broadcasting
bulletins.

I'll broadcast my bulletins on the same freq used by K1MAN for his nonsense
but my bulletins will start five minutes before his. Then, when he opens up
on my bulletin transmission, I can bring charges against him?

Just wondering.

By the way, were you born stupid or did you get that way after years of
study?

If you look at a reliable reference,s uch as the CIA guidebook, you see that
the usage in English and Spanish is:

conventional long form: United Mexican States
conventional short form: Mexico
local short form: Mexico
local long form: Estados Unidos Mexicanos

The term, "Republica Mexicana" is used in official documents as the legal
name for the Estados Unidos Mexicanos together as a collective body.

Ever notice that many of the old communist dictatorships had long names
like
"Democratic Republic of Korea" "Democratic People's Republic of
East Germany" or such. And then compare that to a country that really
has democracy "United States of America".

Where did the name "America" come from anyway? Heard some
urban legend that "America" was the name of some mapmaker the
king of Spain's staff hired to compile the discoveries of the New World
into a map. He drew the map, and signed it with his name at the
bottom. The King said something like "Oh, we're going to call the
new world 'America'. Okay." when he saw the name on the
bottom. So the most feared and dreaded nation of the world
today is named after some guy who drew a map.... :-)

"Interesting. Somehow, I suspect though that cable companies petitioned for the adoption of this regulation to the CRTC."

I can't think of a reason why cable companies would *want* to go to the trouble. In any case, simultaneous substitution is easier than the previous CRTC requirement that all commercials in *any* program on a U.S. station be deleted and replaced by public service announcements (so that, for example, GM of Canada would not benefit from Canadian cable viewers seeing U.S. commercials for GM cars, and therefore would be likely to spend more money on TV advertising in Canada).

"I expect they don't have Pizza Hut or Radio Shack, and McDonald's is just a name so not really English."

At one point there was a big stink over the Eaton's department store chain; the Quebec authorities demanded that they remove the apostrophe from their signs, since the mark is used in English but not in French. (When I looked a few months ago, Eatons no longer uses the apostrophe...but no longer has stores in Quebec.) McDonald's apparently was exempt because it was a foreign company that was just using its own name.

Using Baxter's mindset, what if ALL of us were to decide to each select a frequency, make announcements that we were going to be broadcasting a bulletin in three minus one, etc. Then we do what Baxter is doing...we proceed to make one-way transmissions and call them "broadcasts"? Gee, guys. Following Baxter's logic each and every one of us could pick a frequency between ten and 160 and do what Glenn is doing no matter who is on the frequency or how long they have been there. If Baxter can do it, why not the

rest of us?
This is, of course, just a theoretical query but just the same...what if?

What if, for instance, someone else would like to offer a bulletin service on 14.275 and what it they were to begin the service ten minutes before Baxters? Poor old Baxter has his shorts tied in enough knots as it is and the controversy is obviously getting to him. Baxter's "announcements" are fast becoming personal attacks on other Hams and as such he is cheapening himself even further.

Insofar as Baxter allegedly filing charges against other Hams I say "Bunk". If Baxter is stupid enough to even attempt same, and I doubt he has the money or the testosterone, then Baxter is wide open for countersuits for frivolous lawsuits. If Baxter has indeed filed such lawsuits I challenge him to submit the lawyer's name and the case number from the Court in which he filed .
I think you will all agree that Baxter filed no such suits and I challenge him to post proof or shut the Hell up.

Baxter has no credibilty as evidenced by a letter to him from a U.S. attorney informing him that his unauthorized "warnings" of felony violations to other Hams was illegal.
Glenn Baxter is, in short, a sham. They guy is a fraud, a liar, and a charlatan. And those are his GOOD points.

Hey, Glenn. You reading this? I just slapped you in the face and dropped the glove. Maybe you should file charges against me, too. Want to duel?

Made in Europe, sometimes means one of the former Sovjet states, another country in the Eastern part of Europe or maybe Turkey. It does not imply the equipment was made in a country in the European Community. This, of course, is a new development not seen 10 years ago.

Actually, Vespucci's claim to fame was that he was the first explorer to recognize that the new lands found were not Asia, as Columbus and others had believed. About the same time his friend Columbus was sailing around, Vespucci was exploring and mapping for the first time the Northern and Eastern coasts of South America.
His mapmaker friend Martin Waldseemuller is credited with 'inventing' the name which he did to honor the explorer. Waldseemuller's name only referred to South America at the time but the name caught on to describe all of the New World.

The name came from the name of the explorer & mapmaker Amerigo Vespucci. He
was the first to actually make landfall on the American continents.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station. I will trade this Receiver for a good working AM station. I want both transmitter and receiver. I want the transmitter to have at least 100 watts out. I hope to find something to work with my Audio rack. I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA. I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer) I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. (Make Offer) I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.

In Spanish, it should be called "Estados Unidos de Norteam&#65533;rica." But no one
gets upset over it.
>
> The translation would more-correctly be "The United Mexican States of
America."

No, it wouldn't. The translation is "United Mexican States." "America"
appears nowhere. Nor is it ever used in conjunction withthe name.

And Mexicans in proper discourse refer to "Americans" as "norteamericanos"
or "North Americans" since in Spanish an American is anyone form North,
Central or South America.

However, more and more people in Latin America now refer to those form the
USA as, simply, "americanos." It depends on the context. In fact, famous
singer Piero form Argentina did a parody of tourists from the US in 1969 and
called it, "Los americanos."

Hello
I have a Kenwood TM-2530A that I used as a 2 meter packet station. It needs a Mic and the light that lights up the liquid quartz dial. The radio works fine and is in good shape. I looking for a good AM transmitter.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2 meters. It needs a Mic and needs a new lithium battery backup. I turn the radio off and back on it forgets where it was and defaults to 144.000Mhz. Other than that the radio works fine. I want a working AM transmitter.
I have a Kenwood TM 201a. I used this 2 meter radio as sat transmitter. I worked Mirror before it came down. It Needs allot of work. It needs a dial. The Freq. read out is all screwed up. This is a fixerupper. It receives fine and transmits fine. It needs a mic too I will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that I would through in too with either one of the above 2 meter rigs. I also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2 meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading

It would seem to me that "Mexico" is also a variaton
Amerigo. Then, "Estados Unidos Mexicanos" is really the
same thing as "United States of America".

... and under very odd circumstances, by another guy who thought that
Amerigo Vespucci actually discovered the place. Interestingly, also,
only the southern continent was originally named after him!

I love how they take their stupid contest to an occupied frequency and blatantly yell CQ CONTEST CQ CONTEST over an existing QSO, and then pretend they can't hear the protests from the original occupants. It happens all the time.

Amerigo Vespucci
1454-1512

Explorer

Italy: Florence
Iberia

Raised and educated in Florence, Amerigo (also Americus) Vespucci was a merchant and navigator who sailed to the new world on two (perhaps even three) occasions, sailing for Spain and for Portugal. He made his most significant scientific contribution to the Age of Discovery when, through astronomical observations off the coast of South America, he confirmed that the lands Columbus had encountered were not Asia but were in fact an entirely separate continent. The letters he wrote describing his travels were published and widely distributed in Europe.

Vespucci owes the use of his name for two continents to the German clergyman and scholar Martin Waldseem&#65533;ller, who had read of Amerigo's travels and chose to call the new lands "America" in his honor when printing a wood-block map.

Well, if our politicians keep kissing their butts, in another generation, it will be The United Mexican States of America or is it "Mexico"? They'll have enough voting power to change the name too.

We cater to them more than anyone else coming into this country and a majority of our downfall from drugs comes right from there, or through there.

If THEY don't like US referring to ourselves as the UNITED STATES OF AMERICA, then why the hell don't they stay where they belong. No one asked most of them to come here. I live in a very quiet respectable neighborhood. WE recently had 10 of them who were imported here for "slave" labor you may as well say.. A landscaper bought a house here in town without telling anyone his plans, to put them in rent free while they worked for him on a work visa. They weren't here 2 months and a stabbing took place as a result of them. Our people were up in arms of them being here to start with and that incident only served to underline their concerns. They are "reportedly" coming back in spring. Our zoning doesn't stop it from happening. I can only imagine what this next round will be like. Between them and one family - recently evicted, our crime rate rose 75% in one year..... They are gone and our town is back to normal.... Speaks for itself. I'm not saying they are all bad.... But I sure don't like the precedent I'm seeing played out.

Another thing that would be interesting is to find out where the idea that this is a criminal charge anyway. A criminal charge can only be brought by the state or the governing authorities. However, he may bring a civil suit against various characters. Crininal charges are only brought by the appropriate governing authortiies such as the U.S. Department of Justice in coordination with a U.S. Attorney or through various state authorities. Therefore, despite Lloyds attempts at blowing off his mouth, there is a major difference between criminal law and civil suits being that government brings about criminal charges while individuals bring about civil charges. Of course, the all knowing Lloyd/ft-847 man etc. is all knowing and all seeing

I have heard that many products (particularly clothing) labeled "Made in the USA" are in fact made on some Pacific island (Saipan, perhaps others too) that is controlled by the USA -- and made by workers who are imported from Mainland China and kept in horrible conditions with few of the rights that inhabitants of the 50 States enjoy.

More than half the prescription drugs sold in the Continental US, and
labeled "Made in the USA" are manufactured in Puerto Rico.

Did it ever cross your mind that you may need to get a signal?
Not taking sides here, but the station your badmouthing may not hear you.
And if he does, and clobbers you anyway than there is nothing you can do
anyway. So go to the WARC bands or try CW.

Dan/W4NTI

Most Hams are appliance operators. I know this because I have been to four local clubs, met more visiting clubs at field day, have been to hamfests in three states, and have heard Hams in several states on long trip.

Most Hams do not homebrew. Some CBers do. One example quote from a CBer is below. Notice that it is CB slang, which means that it is common with CBers.

From: piper tweet nospamatthistimethanks@yahoo.com
>A variable capacitor can be made by reverse bias voltage across a diode. As
>you vary the voltage,
>the capacitance changes.

>both the transmit and receive functions to the clarifier knob.

Some CBer's homebrew (or make modifications). Most Hams at my local clubs do not homebrew and even dislike it. This shows that not all CBers are dumb, as some Hams may like to claim.

I am not a CBer. However, I may be biased since I have an EE degree and like to homebrew. I wish more Hams were interested in homebrewing. I am especially interested in rf circuits.

:
: Well, if our politicians keep kissing their butts, in another generation, it
: will be The United Mexican States of America or is it "Mexico"? They'll have
: enough voting power to change the name too.
:
: We cater to them more than anyone else coming into this country and a
: majority of our downfall from drugs comes right from there, or through
: there.
:
: If THEY don't like US referring to ourselves as the UNITED STATES OF
: AMERICA, then why the hell don't they stay where they belong. No one asked
: most of them to come here. I live in a very quiet respectable neighborhood.
: WE recently had 10 of them who were imported here for "slave" labor you may
: as well say.. A landscaper bought a house here in town without telling
: anyone his plans, to put them in rent free while they worked for him on a
: work visa. They weren't here 2 months and a stabbing took place as a result
: of them. Our people were up in arms of them being here to start with and
: that incident only served to underline their concerns. They are "reportedly"
: coming back in spring. Our zoning doesn't stop it from happening. I can only
: imagine what this next round will be like. Between them and one family -
: recently evicted, our crime rate rose 75% in one year..... They are gone and
: our town is back to normal.... Speaks for itself. I'm not saying they are
: all bad.... But I sure don't like the precedent I'm seeing played out.
:
: Lou/Tech@DP.NET
:
You would be truly shocked at how many houses in Southern California

are flying Mexican flags on their houses. Would that make them foreign nationalists? Is it OK for foreign nationalists to obtain services from, employment at, and authority within our local governments? Including control over personnel departments? What of people who reject American ideals outright because they conflict with a cultural view of murder, retribution and taboos. Is it unthinkable that some people would be amassing power while others give it away.

Then there's the "Assembled in ..." scam. Most recently, I got some
generic CD-R's that say on the liner "Assembled in Canada." Like, what's
there to "assemble"? A machine that sticks the liner and the CD into the
jewel case?

Cheers,
Fred

Ultimately, this is the ONLY rational course of action on ANY news group
when you run across a topic you don't agree with.

Trying to control the postings in a news groups is like trying to teach
a pig
to sing. You only waste your time and annoy the pig.

6012. Need help: programming Kenwood TH-79A

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-22 22:53:52 UTC
From: Don Edberg <dynamic3@flash.net>
Message-ID: <3E06427C.C230064B@flash.net>
Source record: 70757
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi,

I hope I am posting this correctly, and to the correct newsgroup. I am new to newsgroups and using them. However, I could use some help with a radio I am trying to get working.

I have inherited a used Kenwood TH-79A and have downloaded the manual from Kenwood's web site. but for the life of me, I cannot get it to work with a friend's repeater.

His repeater is at 427.620 and has a tone of 127.3 for the input only. The transmit shift is down 5 MHz.

I have tried several times to program this. I put in 427.620, minus shift, and tone=127.3 and when I key the mike, speak, and release, it powers up the repeater (it shows on the level display on the HT) but I hear nothing. The static goes very low for a few seconds and then comes back up with the level display drops.

My friend says he can hear my voice when I transmit, but I hear nothing after I release the PTT button. My friend says I need to turn decode off for receive, but I can't figure out how to.

I've also tried programming it with split frequencies, i.e. receive on 422.620 with no tone and transmit on 427.620 with tone on. This displays a funny +/- on the display and doesn't seem to work either.

I would appreciate any help anyone can provide on this. The manual is no help. Any web pages giving hints or someone who knows what to do in this instance would earn my utmost admiration!

Also, I would appreciate a direct email response also as I am not sure I can find this site again very easily!

thanks in advance,

Don E.

I like your defense of the pirate operator. I have been a firm believer that 11 meters should go back to the hams. I also believe that there should be a Amateur no license class ticket with privileges in the 11 meter band. Cb is not being used for what it was intended for. There has been a few people who have tried to have some of rules in part 95 changed. the 150 mile rule, add more channels etc. etc. etc..... the FCC has denieded all applications to change the rules in that service. I say with things the way that they are that that service should be done away with. If they really want things to get better they need to get the truckers to move to channel 10 on the FRS and allow manufactures to build the FRS radio more like a mobile radio. That would be perfect for what the truckers want. I have heard allot of truckers complain about the noise on channel 19 on the CB radio service. Allot of the restrictions that we have in amateur radio are due to the illegal activity on 11 meters. Lets make that activity legal. Allot of the amateur radio community came from the ranks of CB. Allot of the people in the ranks of CB don't look at there radios as business radios or a means of conducting business. They look at there radios as a hobby. Vshah101 is right about the artical below. Cbers do a whole lot more experimenting than the appliance operators that we have in the ranks if ham radio today.
I wrote more about this back when they reoganized the licnese structure.
http://www.dirtball.com/band.html
I wrote this before I changed my call sign. I still beleive when 4 million plus are breaking the rules there is something wrong with the law and it needs to be changed.

I wonder why Columbus didn't bring along someone who had really
been to India or elsewhere in the Far East before. Then Columbus
would have been told that this ain't India or Asia, we're somewhere
else. Or maybe Columbus knew it wasn't, but needed to say it was
to get more funding....

I like your defense of the pirate operator. I have been a firm believer that 11 meters should go back to the hams. I also believe that there should be a Amateur no license class ticket with privileges in the 11 meter band. Cb is not being used for what it was intended for. There has been a few people who have tried to have some of rules in part 95 changed. the 150 mile rule, add more channels etc. etc. etc..... the FCC has denieded all applications to change the rules in that service. I say with things the way that they are that that service should be done away with. If they really want things to get better they need to get the truckers to move to channel 10 on the FRS and allow manufactures to build the FRS radio more like a mobile radio. That would be perfect for what the truckers want. I have heard allot of truckers complain about the noise on channel 19 on the CB radio service. Allot of the restrictions that we have in amateur radio are due to the illegal activity on 11 meters. Lets make that activity legal. Allot of the amateur radio community came from the ranks of CB. Allot of the people in the ranks of CB don't look at there radios as business radios or a means of conducting business. They look at there radios as a hobby. Vshah101 is right about the artical below. Cbers do a whole lot more experimenting than the appliance operators that we have in the ranks if ham radio today.
I wrote more about this back when they reoganized the licnese structure.

Most Hams do not homebrew. Some CBers do. One example quote from a CBer is below. Notice that it is CB slang, which means that it is common with CBers.

From: piper tweet nospamatthistimethanks@yahoo.com
A variable capacitor can be made by reverse bias voltage across a diode. As you vary the voltage,
the capacitance changes.
You can see them in many vfo circuits, nowadays varicap diodes are common place.

Super Diode is a slang CB world description for a diode with much larger capacitance range over
a similar (to "normal") varicap diode. The thought would be to replace a standard range
varicap diode in your ssb radio clarifier circuit with the Super Diode.

The range of an example clarifier would extend from the original few kc's (KHz) of
operation up to some much larger value like plus or minus 15 KHz. You would be able
to move into the next frequency "channel" or "hole slot". For the most part, only
receive operation is changed with the clarifier, but mods are often done which tie
both the transmit and receive functions to the clarifier knob.

Some CBer's homebrew (or make modifications). Most Hams at my local clubs do not homebrew and even dislike it. This shows that not all CBers are dumb, as some Hams may like to claim.

I am not a CBer. However, I may be biased since I have an EE degree and like to homebrew. I wish more Hams were interested in homebrewing. I am especially interested in rf circuits.

I agree with Oris completely. Further, in the same vein as Oris's post, I think we also should abolish the following useless laws:

-- All drunk driving laws. Half-a-million people a year arrested for drunk driving can't be wrong. Abolish the stupid drunk driving laws and the silly open container laws and let the cops get back to the donut shops -- what I do inside my car is my business.
-- Credit re-payment laws. Hell, I'll repay my mortgage and my credit cards when and if I damn will feel like it. 750,000 people a year who default on mortgages and credit cards must be right.
-- Sexual harassment laws. Come on, everyone knows women are just asking for it.
-- Child molestation laws. Come on, now, every kid needs to learn what Uncle Ralph's Wee Willie is about at some time in their lives -- and a 4-year-old is plenty ready to learn. 500,000 perverts can't be wrong.

And I'm certain there are other useless laws that we need to abolish. Just make it all legal. Anyone else have suggestions?

Most Hams do not homebrew. Some CBers do. One example quote from a CBer is below. Notice that it is CB slang, which means that it is common with CBers.

From: piper tweet nospamatthistimethanks@yahoo.com

A variable capacitor can be made by reverse bias voltage across a diode. As you vary the voltage,
the capacitance changes.
You can see them in many vfo circuits, nowadays varicap diodes are common place.

Super Diode is a slang CB world description for a diode with much larger capacitance range over
a similar (to "normal") varicap diode. The thought would be to replace a standard range
varicap diode in your ssb radio clarifier circuit with the Super Diode.

The range of an example clarifier would extend from the original few kc's (KHz) of
operation up to some much larger value like plus or minus 15 KHz. You would be able
to move into the next frequency "channel" or "hole slot". For the most part, only
receive operation is changed with the clarifier, but mods are often done which tie
both the transmit and receive functions to the clarifier knob.

Some CBer's homebrew (or make modifications). Most Hams at my local clubs do not homebrew and even dislike it. This shows that not all CBers are dumb, as some Hams may like to claim.

I am not a CBer. However, I may be biased since I have an EE degree and like to homebrew. I wish more Hams were interested in homebrewing. I am especially interested in rf circuits.

I'll tell you what, LOU, when you find people already here in this country who will DO the kind of work they do, show up every day, not scurry off after the paycheck is passed out on Friday and then not show back up when they've blown the cash (usually by Tuesday or Wednesday) with a lame excuse, who will work without an incessant litany of complaints as to how they are treated and not getting any respect; you let us know! You do that; okay, LOU?

Sorry for the delay answering here, Dan. I usually don't check traffic on
rram.

Did sorta mediocre. Had a lot of family stuff going on all weekend, and
hadda watch the Vikes win (rare event this year). Only got about 3-4
scattered hours in the contest, but had some nice openings into Asia. Final
score just over 400,000 points.

See you in the DX test.

Lou,
I hope the authorities took care of this "landscaper". The penalties to the sponsors of immigration fraud can be very severe.
It sounds as if your community might have a problem policing its own. The precedent you are seeing is not based on language or national origin...its based on your local huckster who is probably skirting a dozen INS regulations and scraping the bottom of the illegal wetback market who would be prey to his scheme.
So before you jack yourself off with another one of your anti-Hispanic rants you might want to consider what you Lou can do to make the inevitable immigration consequences more palatable in your community.
Save your ire for the pig-dogs that killed 4000 Americans last year, not for people who simply come to the US as a matter of economic survival.

Hello,
I am trying to get a Yaesu FT-51R dual band HT going for a friend who has been inactive for some time and is just now getting back into the hobby....This thing will only tune and transmit on 144-146 and 430-440 MHz....I am an avid Yaesu user and own a FT-11 which is kinda half of this radio, but this thing seems pretty upsidedown to me. Anyways, I'm trying to figure out if this is a software problem that I can correct with a powerup key sequence (I don't have the manual), or if someone tried to modify the radio and accidentally turned it into the European version...?? Anyhow, any help with getting this thing running again would be greatly appreciated....thanx!

First of all, if you want to label me a bigot because I CARE about what happens in this country and to OUR citizens, then I wear the badge proudly.... But I DO detest how this country is being torn down and handed to others on a silver platter. As to the INS, it has been proven with 9/11, that they aren't worth the paper the name is written on. Our Borough officials did call the local office. They said unless a "crime" was committed, there was nothing they could do... Some help! The landscaper is still doing his thing. Our community does NOT have a problem policing it's own... WE did go round and round, we got no back up form those who should have provided it.

As for the "pig dogs" they should not be put in prison being fed by our tax dollars and getting better benefits than alot of our own citizens .. Their predecessors who tried to level the WTC the first time around are still there. NO, ALL of them should be SHOT. They didn't spare any lives, neither should we.

THAT is a part of the problem, we cater too much..... THAT is my beef..

Apparently a couple of you may have missed an earlier point. I SAID...this
is AMERICA. WE speak ENGLISH. Yet when you go into most Social Service
Agencies, they have signs up with SPANISH and ENGLISH. We also have Chinese,
Japanese, Vietnamese and so on living here. NO where in those places have I
seen any signs in THEIR language. IF I were them, I would be pissed. Do they
not use those services? Do they not deserve signs too? WHY do we cater only
to one group??????? WE supposedly pride ourselves on being fair and equal...
OK? Where are the signs in the places meant to "serve"????? IF those other
groups have to learn to read and speak English - rough as it may be to them
or coming from them to survive here, why can't the rest???? I'm only asking
how come we don't treat the other groups as fairly? HOW IS THAT BIGOTED?????

Oregon has NINE official languages which appear to rotate amongst twelve depending on the most prevalent foreign culture in the state. I treasure all facets of humanity that are pathetically catagorized by race, ethnic origin, sex and sexual orientation. The fact that he or she babbles differently or eats strange food or even feels affection for the same gender (or both) is inconsequential and a CRAP argument. God doesn't make mistakes, and everything is made by and is of God. That will be enough. You can't beat this dead horse any further! As they say in pubs, "Gentlemen (ladies too) the hour is nigh!"

According to www.snopes.com, this is urban legend.

The Usa page does not have a directly addressable URL, but you can find it by going to snopes and doing a search for USA. It's the first item in the resulting list.

Lou,
Its bigoted because you come up out of the clear blue to rant about
those terrible Mexicans and people who speak Spanish in general as if
there mere presence is an affront to you....cross-posting across five
radio oriented groups, no less. And this isn't the first time.
The USA is now about 15% Hispanic and it makes sense for everything from
Government to advertisers to not totally ignore this market. No other
foreign language group is as large or as widespread as the Hispanic
population....if it were, there would be signs in their language too.
This doesn't take anything away from your life, Lou.
As for learning the language, obviously you didn't read my post to your
last rant a couple weeks ago.
As a society we will be much further ahead if we try to get along and
work to improve things under changing circumstances. That doesn't mean
'catering' but it also doesn't mean treating people like assholes just
because they happen to come from Pittsburgh, Miami or Monterrey.
And if your local landscaper is indeed playing immigration tricks, go
directly to the INS instead of your local Barneys to report the fraud.
Peace, bro.

-Bill M

Thanks for replying Greg. Unfortunately, I've already checked the library
websites of UTS, UWS and U.Sydney - and none of them appear to carry QEX.
:-)

Hey Lou,
Perhaps you should read a few books about the history of the American
continent. Spanish was much more widely spoken than English in many
parts of the present USA. Where to you think the word "AMERICAN"
originates from? An Italian. Come on, there's room enough for
everybody on this planet.

In the spirit of the holidays, I award you 25 liberal points for your politically correct reply.

You, and like minded folks enjoy calling folks bigots, racist, and other pet names of those that would point out a truth.

Utter nonsense! No one group has the handle on perfection, not white, Black, Hispanic, or anyone else. You would have us believe that any statement made towards the less than savory element of a group is an attack on the entire group, thus rendering us deserving of a favorite liberal label.

You pick up the newspaper and read about a driveby shooting, does the image of a freckled faced, red headed white boy pop into your head?

Some members of every group are criminals and lowlifes, the poorer the group, the greater percentage of criminals. Sticking your head in the sand and refusing to acknowledge what is in front of you for the sake of political correctness is pollyannaish at best. Join the rest of us in the real world.

A bit of reality. Federal courts normally have no interest in ham
radio or CB radio issues. The exception was a guy out in California
named Burton who had his license revoked in 1980 or there about but
who stayed on the air. He went to jail.

In all my years as a paralegal I never heard of anyone else and I
doubt that any federal prosecutor will waste public tax money on an
issue as silly as this.

I am new to this www news group stuff. I hope this is the right place to ask for help.

I recently retired at age 62. All my life I wanted to be a ham radio operator but never had the time to study the morse code and the electronics. Now with free time I am going to do it.

I tried studying on my own using books and tapes I bought at Radio Shack and a video course I borrowed from the local library. The video was really old and taught by a ham named Larry N2NY.

I guess I am not the kind to do it by myself and I am looking for a really good professional ham radio training school near Pontiac Michigan. If you know of one, please e-mail me: hamop_62@hotmail.com.

Thank you very much and Merry Christmas to all.

Lou LeVine

Dear Fred,
I can't quite grasp what you are trying to tell me. "Political
Correctness" is an over used phrase and means what? I am amazed why
so many users of this group want to air their political thoughts hee.
Why not go down to a bar & do it? I like short wave radio, do you?

Of course I like radio, however it is not the do all be all of my universe.
When I come across an asinine statement in a newsgroup or a bar I respond.

Political correctness was best defined by George Orwell in his novel
"1984". It was called correct speak. May I suggest you check it out at your
local library if you really are interested in the definition.

Not only that, but anyone with significant operating experience should know that a band shift can occur at any moment. I've had QSOs stop in mid-syllable due to a band shift. I've heard other operators come up in mid-syllable due to a band shift and it was apparent from the status of the conversation that they had been talking awhile. Yet until the band shifted we were able to have independent, non-interfering QSOs. So then who should keep the frequency and who should move? Basically you just got to work it out.

Few people are aware of history... There were provisions in the treaty
that ceded California to the United States by Mexico that stated that
Mexican citizens would be free to cross the border at will, that
Mexican nationals would be allowed to do business and attend schools
in California, and that these people would not be required to learn
English to participate in their normal everyday lives in California.

I live in a neighborhood populated primarily by Mexicans and
Central Americans. They are the nicest people you could hope to meet...
two parent families with kids. They are law abiding, church going folks
who respect and appreciate America a lot more than some people who have
lived here for generations. When I think of what it means to be an
American, they are what I think of.

See ya
Steve

Shot the hell out of my History! Our books taught that the INDIANS were the majority here, before the arrival of those from Italy and so on. I've never heard of them speaking "Spanish" - however, if they did, then so be it. I wasn't there, so I can't defend or deny it. I can only go on what I've been taught.

I'm basing my statements on current day. MOST people are able to speak English - and do - however broken it may be......I just can't see why the catering to a "specific" group when many inhabit this country. Where is the fairness?

Eh, let God sort it out. It's more his line than mine.

6066. Re: Need help: programming Kenwood TH-79A

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-23 23:37:08 UTC
From: "Bob M." <xxxxx@yyyy.zzz>
Message-ID: <qOOdnUoTpdGFA5qjXTWc3A@comcast.com>
Source record: 70709
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

My TH-79A DOES tune down that far, and transmits on 422.620 as shown below. However I did cut the MARS jumper inside when I first got it. My other 440 MHz radio will NOT transmit down below about 435 MHz so I can't easily tell if the HT is receiving anything there. Just took the HT up to my shack and it hears a signal from my sig gen on 427.620 MHz just fine.

When you set the PL tone, press the TONE button (* key) to enable just the transmit tone. The display will show an inverse "T". If you press the CTCSS button (3), it'll enable both receive and transmit tones, and you'll see a "CT" next to the inverse "T".

Sounds like you've got it working but might just have the PL enabled on the receiver.

From the ARRL Site -- URL:
http://www.arrl.org/arrlvec/vanity.html
The FCC charges a fee to applicants seeking a Vanity call sign. The present annual fee (as of September 9, 2002) is $1.45 per year or $14.50, paid up front for the entire ten year Vanity Call Sign license grant term. Vanity applicants must currently expect to pay the fee at the beginning of each ten-year renewal term for their Vanity call sign.

The Vanity fee may be paid by bank draft/check, personal check, money order or credit card. For checks/bank drafts, the fee is made payable to "FCC".

BIOGRAPHY OF GLENN A. BAXTER, P.E., K1MAN

EXECUTIVE DIRECTOR OF THE AMERICAN AMATEUR RADIO ASSOCIATION

NETWORK MANAGER OF THE INTERNATIONAL AMATEUR RADIO NETWORK

PRESIDENT OF THE IARN AMATEUR RADIO PEACE CORPS FOUNDATION, INC.

Glenn Baxter, K1MAN, is probably one of the best known radio hams in the world today. He is Manager of IARN, the International Amateur Radio Network, founded in 1985. He is also Executive Director of AARA, the American Amateur Radio Associationï¿½, founded in 1992. Mr. Baxter was formally recognized by the State of Maine Legislature on March 13, 1991 for IARN's humanitarian work in world wide emergency communications and was named as a Vermont Academy Distinguished Alumnus on October 1, 1993 for his amateur radio contributions to society.

Glenn studied engineering at Northwestern for two years where he also played football for the Wildcats, and he received his B.S. in Industrial Engineering with honors from the University of Rhode Island in 1968. While at URI, he placed Fourth in the Boston University Annual Debating Contest and won First Prize at the A.I.I.E. Northeast Regional Contest for written and oral presentation of a technical paper.

Glenn worked as an Industrial Engineer at Allied Chemical in Syracuse, New York; Worthington Controls in Norwood, Mass.; and Collins Radio in Cedar Rapids, Iowa. He was also a Management Consultant with Booz, Allen, and Hamilton in Chicago. He is a Registered Professional Engineer in Maine and Illinois.

Glenn formed a Professional Engineering firm in 1977 and later organized Investors Financial Services, employing 20 NASD Registered Representatives in Maine and New Hampshire.

Glenn got his FCC Novice class license in 1956 and his Extra and First Class Commercial tickets in 1964. His first stations were a Heath AT-1 and Hallicrafters S40-B; Heath DX-100, SB-10, Collins 75A-4 and later adding a Collins KWS-1 which he ran until 1980 when he upgraded to Collins S-Line gear and a KWM-380. His biggest linear is a home brew PL-172, and he also runs a Collins KW-1 on AM. Glenn can heard

frequently on 20 meters from his mobile running a Yaesu 757 into a Hustler antenna.

IARN started with a spectacular bang in 1985 during the Mexico City Earthquake, and the IARN Amateur Information Bulletin Service began its 365 days per year transmissions on 80 and 20 meters in 1987.

The IARN Amateur Radio (call in) Talk Show format began in 1995 which included expansion to 90 minutes per program and double airings each evening between 8 and 11 P.M. Eastern local time and simulcast on 3.975 and 14.275 MHz. There is also an AM service on 3.890 MHz.

Glenn's long term goals are to raise the standards in amateur radio, encourage a significant increase in mutual cooperation among rival factions, and expose and eliminate the petty jealousies and cliques that may end up self destructing our vital and very valuable service.

It's been a while since my school days, but it would either be the
treaty signed by Pico at the Campo de Cahuenga, or the formal treaty
radified by Congress which defined the border between Mexico and the
US. (I think it's the formal treaty.)

As I remember it, the crux of the issue was that the treaty called for
all landowning rights of the Spanish and Mexican inhabitants to be
honored according to the Spanish or Mexican laws; and the Mexican
inhabitants of the territories be given all rights accorded to American
citizens. In essence, this was intended to preserve the established
Mexican infrastructure already in place in the territories and protect
the rights of the Mexican inhabitants and propery holders.

However, soon after this treaty was signed, the California gold rush
started. Laws were quickly enacted which negated the terms of the
treaty, and courts ruled against the claims of Mexican landowners
citing protection under the provisions of the treaty. Land was taken
away from its owners, Mexican infrastructure was replaced by American
institutions, and the Mexican population were never given the rights of
citizenship that they were promised. They were forced to either
relocate to Mexico, or take up drastically reduced social status along
with the Indians. In either case, they had to relinquish the homes and
property that were rightfully theirs. A lot of the hard feelings in
Mexican-American relations over the decades can be traced back to this
breech of promise.

Hope this helps.

See ya
Steve

K1MAN publishes a schedule just like W1AW does. If you interfear with his bulletins, it is just the same as interfearing with W1AW. If you are on freqency and W1AW comes on, you have to move but Riley says K1MAN is not equal and its ok to interfear with him.

That is bullshit and honest people know it.

I lived in Japan for nine years, and had a lot of contact with their version of English. Their method of teaching is primarily rote memorization, with only a little teaching on grammar differences, and differences in meaning between two similar phrases. They do try hard, and I would challenge you to learn their language half as well as the average Japanese learns ours. BTW, their primary written format is top-to-bottom, right-to-left.

You're right...

There are 2 (at least).

One in the W Valley in Jan or Feb and then the annual Scottsdale Hamfest.

I don't have the dates or info and haven't been to a hamfest in ages,
but I do know these 2 are coming.

The Scottsdale Hamfest at Scottsdale Community College, in particular,
was good, as hamfests go.

>
> Any one else have any comments?

Please read all my comments because there is
a few things that i need to point out.

You use different charging methods for the
type of service you are using a the battery for.

If you are using it for fork lift, motive power,
or other full charge/ full discharge application.

You want to bring it to full charge as quick as possible.
set current limit to c/10 or even c/5
So you set the float voltage to ~15V and when the
current drops off bellow c/100 then you have a full charged battery
that's ready to go back into the device it's running.
If you leave them hooked to the unit at 15V they will
broil dry after a while.(ie) destroy the batteries.

If it's a standby application where it's hooked up all the time.
Set charge current limit to c/20
You set the float to around 13.5 to 13.8 and hold it there.
That will keep the batteries at 100% charge and won't over charge them.
But it will take a long time for them to reach full charge.~2days or so....

And the charging rate is based upon the size of the battery.
C/20 means that it's charged at one twentieth of it's rated AH.

There is some batteries called gel cells that you can only charge
so fast because if you charge them too fast, bubbles will form in the electrolyte.
And the damage is usually irreversible.
The charging rate for them is usually limited to C/20 or even less......
If it's a 10AH battery, you can only charge it at 0.5A max.

> >I have some sealed lead acid batteries(commonly known as
> gelcells)
> > and looking for some advice on charging.

That is the main point that the correction needs made.
That common knowledge is INCORRECT KNOWLEDGE

Most sealed lead acid batteries are not gel cells.
They ARE most likely, "Absorbed glass mate."/"Starved electrolyte."

Gel cells are a decent bit more expensive and if a sealed lead
acid battery is a gel cell.... It will proudly proclaim it on the side.

If it doesn't specifically say "GEL CELL" ......
Or "GELLED ELECTROLYTE"
Or "GELLED BATTERY"
Then it isn't a gel cell.

The "Sealed battery is gel cell" myth is one common myth
that you need to realize is false.

I would say that 90 to 95+% of sealed batteries are NOT gel cells.

Most sealed batteries will handle the usage that a normal flooded
cell will handle.

There is one exception.....
You have to avoid applying overly high charging voltages to them.
Because they are, by their very nature.... sealed.....
So once you broil the electrolyte away.... you can't put it back.

> > Looking around I find that most of the chargers out there are mode
> > chargers. Some go by current or by voltage.

Ones that go by current are strictly for cyclic use.
When you charge at c/10.
You hook it up and 10 hours latter, you disconnect it.
Or the timer in the charger shuts it off.

>>On the common voltage chargers,
> > they say that during the "absortion mode" the charger limits the charging

> > charger lowers the voltage to somwhere around 13.4 - 13.8V as in the
> "float
> > charge" mode.

That is the best type for any application.

It charges them close to 15V to get them close
to full charge as quick as possible, then it switches to
13.8 V to keep it at full charge without broiling the battery dry.
That way.... if you forget and leave the battery on the charger
for a day or two....
When you see that it's still on, you won't find a FRIED battery.
You will find a nice fully charge one.

We cater to the group with the largest numbers. It is simply more cost
effective that way. I'd wager that in certain parts of Los Angeles and
Orange Counties, California, that several Asian languages are
represented very well. In San Francisco, Chinese has been a defacto
second language for over 100 years.

WE supposedly pride ourselves on being fair and equal...

OK, Lou. So the natives lived here once and their language use was overrun by then massive influx of Spanish. The natives perhaps complained but had to yield to the reality.

Then the Spanish influence subsided as it was overrun by then massive influx of English speaking caucasians. The Spanish speaking people perhaps complained but had to yield to the reality.

Currently here a massive influx of Latinos. English speaking caucasians may complain but some parts of the country are currently bilingual, like it or not. That is the reality.

I doubt the melting pot phenomenon will work any more due to the proximity of Latin America and technological advances in communications and travel. Latinos do not neet to severe the contact with old contries like those getting off the boat some generations ago.

Learn Spanish.

Happy Holidays.

Message-ID: <Fk%N9.156964$6k.2711923@news1.west.cox.net>
Source record: 70635

FROM URL: http://www.vanityhq.com/

Q. How long does it take to process a vanity application?
A. Usually 18-20 days. Vanity HQ's home page lists the filing date of the most recent application grants on the Home page.

More by clicking on 18-20 days.
Vanity Application Processing Schedule
Here some facts about the timeline for application processing:
a.. Vanity applications are usually processed on Tuesdays, Fridays, and Saturdays.
b.. Applications received on Monday are processed on Friday, 18 days later.
c.. Applications received on Tuesday are processed on Saturday, 18 days later.
d.. Applications received on Wednesday, Thursday, or Friday are processed on Tuesday, 18 days after the Friday date.
e.. Holidays occuring between the received date and the processed date don't seem to change the schedule. However, Monday holidays cause the Tuesday processing to be a day late.
f.. Applications filed on Saturday, Sunday, or a holiday are marked "received" and date stamped the next business day.
g.. Applications are processed as a batch job in the early morning hours while the ULS system is off-line. If the batch job fails it may cause grants to be delayed.

With ALL due respect Dave,

IT is happening to more than just "my" kids..... Or haven't you been watching the news?
Maybe they aren't being paid less than minimum, but some companies try to beat not paying - any more than minimum or "overtime". If they could get away with paying less than minimum, I'm damned sure they would. And MANY companies are shutting off Health Care. So, your wish is coming true, for my kids, your's - if you have any and every one else's. I wouldn't jump for joy even if you have a job with those "benefits". Here today, gone tomorrow. IT IS POSSIBLE!!!!!!!!! You may be taken from a corporate position straight into a McDonalds just to feed your family.... I would be careful what you wish for - for others, it has a terrible way of biting one in the ass.

May you have a Happy Holiday... Next year it could be a whole lot different!

Isn't that just sweat. Maybe we should welcome their desendants back with
open arms...right? Crap happens in war. We won, they didn't.

Maybe if the Mexican government really gave a rip about her people we
wouldn't be needing to put out armed patrols to keep them out.

If ya can't speak English in the United States of America, then GET THE FUCK OUT!

I'm a Bad American-this pretty much sums it up for me. I like big trucks, big boats, big houses, and naturally, pretty women with big tits.

I believe the money I make belongs to me and my family, not some midlevel governmental functionary with a bad comb-over who wants to give it away to crack addicts squirting out babies.

I don't care about appearing compassionate.

I think playing with toy guns doesn't make you a killer. I believe ignoring your kids and giving them Prozac might.

I think I'm doing better than the homeless.

I don't think being a minority makes you noble or victimized. I have the right not to be tolerant of others because they are different, weird or make me mad. This is my life to live, and not necessarily up to others expectations. I know what SEX is and there are not varying degrees of it.

I don't celebrate Kwanzaa. But if you want to that's fine; I just don't feel like everyone else should have to.

I believe that if you are selling me a Dairy Queen shake, a pack of cigarettes, or hotel room you do it in English. As of matter of fact, if you are an American citizen you should speak English. My uncles and forefathers shouldn't have had to die in vain so you can leave the countries you were born in to come disrespect ours, and make us bend to your will. Get over it.

I think the cops have every right to shoot your sorry butt if you're running from them after they tell you to stop. If you can't understand the word 'freeze' or 'stop' in English, see the previous line. I don't use the excuse "it's for the children" as a shield for unpopular opinions or actions.

I know how to count votes and I feel much safer letting a machine with no political affiliation do a recount when needed. I know what the definition of lying is, and it isn't based on the word "is"-ever.

I don't think just because you were not born in this country, you qualify for any special loan programs, gov't sponsored bank loans, etc., so you can open a hotel, 7-Eleven, trinket shop, or any thing else, while the indigenous peoples can't get past a high school education because they can't afford it.

I didn't take the initiative in inventing the Internet. I thought the Taco Bell dog was funny.

I want them to bring back safe and sane fireworks.

I believe no one ever died because of something Ozzy Osbourne, Ice-T or Marilyn Manson sang, but that doesn't mean I want to listen to that crap

from someone else's car when I'm stopped at a red light. But I respect your right to.

I think that being a student doesn't give you any more enlightenment than working at Blockbuster or Jack In The Box.

I don't want to eat or drink anything with the words light, lite or fat-free on the package.

Our soldiers did not go to some foreign country and risk their lives in vain and defend our Constitution so that decades later you can tell me it's a living document ever changing and is open to interpretation. The guys who wrote it were light years ahead of anyone today, and they meant what they said - now leave the document alone, or there's going to be trouble.

I don't hate the rich. I help the poor. I know wrestling is fake. I've never owned, or was a slave, and a large percentage of our forefathers weren't wealthy enough to own one either. Please stop blaming me because some prior white people were idiots - and remember, tons of white, Indian, Chinese, and other races have been enslaved too - it was wrong for every one of them.

I believe a self-righteous liberal Democrat with a cause is more dangerous than a Hell's Angel with an attitude.

I want to know exactly which church is it where the "Reverend" Jessie Jackson preaches; and, what exactly is his job function.

I own a gun, you can own a gun, and any red blooded American should be allowed to own a gun, but if you use it in a crime, then you will serve the time.

I think Bill Gates has every right to keep every penny he made and continue to make more. If it makes you mad, then invent the next operating system

that's better and put your name on the building. Ask your buddy that invented the Internet to help you.

I don't believe in hate crime legislation. Even suggesting it makes me mad.

You're telling me that someone who is a minority, gay, disabled, another nationality, or otherwise different from the mainstream of this country has more value as a human being that I do as a white male. If someone kills anyone, I'd say that it's a hate crime. We don't need more laws! Let's enforce the ones we already have.

I think turkey bacon, turkey beef, turkey fake anything sucks. I believe that it doesn't take a village to raise a child-it takes a parent with the guts to stand up to the kid and spank his butt and say "NO!" when it's necessary to do so. I'll admit that the only movie that ever made me cry was Ole Yeller. I didn't realize Dr. Seuss was a genius until I had a kid.

I will not be frowned upon or be looked down upon or be made to keep silent because I have these beliefs and opinions. I thought this country allowed me that right. I will not conform or compromise just to keep from hurting somebody's feelings. I'm neither angry nor disenfranchised, no matter how desperately the mainstream media would like the world to believe otherwise. Yes, I guess by some people's definition, I may be a bad American.

This might be cross-posted to 5 groups but they all have radio in them
so I'll argue that radio is "the do all and be all." You are off topic.

Most past immigrants from non-English speaking countries did not learn
anything but rudimentary English. The children were the bilingual,
assimilated ones.

What happened with Italians, Czechs, Poles, Germans, Greeks and many others
is happening with Hispanics. It's very, very hard for an adult to learn a
second language, but the first generation does learn and well.

How can they when they don't even try? I think Spanish culture forbids them
from learning English. They watch Spanish TV, listen to Spanish radio and
read Spanish newspapers...

The same as the Germans, Poles, Italians, Yiddish-speaking Jews, etc.
listened to radio in their respective languages and read newspapers in
their respective languages.

Get out of your suburban hell-hole and spend some time catching up on the
history of New York City and you'll see what it was like here during the
turn of the century.

Nothing new has been said on this thread. ENOUGH ALREADY!! We get the
point.

Just like Italians did... the original immigrants used Italian media, lived
in Italian neighborhoods and generally learned very minimal English.

It's an established, proven fact that becoming bilingual in the true sense
requires learning the second language before adolescence. Adults generally
learn new languages minimally and tend to never be bilingual.

I always use the Spanish button on the Kroger U-Scan so I don't have
to listen to the English. It's more pleasant if you don't understand
it.

I assume Hispanics will do the same thing only in English.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station. I will trade this Receiver for a good working AM station. I want both transmitterwith at least 100 watts out and receiver. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer)
I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. (Make Offer)
I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
I have a Kenwood TM-2530A that I used as a 2 meter packet station. It needs a Mic and the light that lights up the liquid quartz dial. The radio works fine and is in good shape. I looking for a good AM transmitter.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2 meters. It needs a Mic and needs a new lithium battery backup. I turn the radio off and back on it forgets where it was and defaults to 144.000Mhz. Other than that the radio works fine. I want a working AM transmitter.
I have a Kenwood TM 201a. I used this 2 meter radio as sat transmitter. I worked Mirror before it came down. It Needs allot of work. It needs a dial. The Freq. read out is all screwed up. This is a fixerupper. It receives fine and transmits fine. It needs a mic too I will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that I would through in too with either one of the above 2 meter rigs. I also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2

meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that
I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading
Happy Holidays

You have a good point. We (the USA) seem to actually be nuturing their native language here rather than nuturing english.

I also might add, I do not have a command of the english lingo myself, but I can write (a bit) read and speak it. I think anyone who wishes to become a part of our culture should make a faithful attempt at learning the english language. I would attempt do the same if I lived in their country. I think it's a basic respect for each other's culture to do that.

You should take a poll of how many of the roughly 500,000 gringos who live
in Mexico speak anything but rudimentary Spanish. You could probably use
your fingers and have some left over.

That does not suprise me. I have never been in Mexico. I think Spanish
is a great language, I wish I knew it, now a few words only. Russian is
another that I would just like to know at least a little.

What's wrong with knowing another language? Nothing!

I can only respect someone who knows more than one language!

I should get off my dead A.. and learn one.

Radio Pyongyang's Kim Yong Nam
and

Radio Overcommer's Brother Stair....

CONSIDER:

1) They both share their own flavor of
a "dear leader" who has a fixation for
god-like status amongst his "followers"....

2) Both prefer to engage in bizzare sexual escapades....

3) Both spend inordinate amounts of cash to spread
their unique message on shortwave radio....

4) Finally, they each live in strange and goofy domiciles
surrounded by an "inner circle" of "true believers" within
a closed and cloistered communal setting...

(scary eh? Look again at the similarities - it's FREAKIN surreal!)

Finally again from: http://www.tjpmd.com/tom's.htm

"Do the North Koreans Pay their Bills? Like the other communist partner
companies, they learned a lot of bad habits. In short, No. Everyone who
deals with North Korea is owed a tremendous amount of money.
You must have a person in country to collect and grease the skids.
North Koreans change the terms of contracts, ignore agreements.
They feel you are privileged to deal in their country and take what they
give."

(sounds like alot of xian "ministries" we have here in the US of A! grin)

Joe
How can you compare perverts and dangerous acts ie...Drunk driving
with the harmless activity as some uneducated redneck yelling how bout
it skipland in a microphone and making contact with another uneducated
redneck across the contry? What is so wrong with that? Four million
PLUS is a far cry from 500 thousand. Oh just because you have passed
a test means that you are the only one to do it? Calling CQ is the
same equivlant as saying how bout it skipland. I know the change will
be hard to sallow ecspecally from the hard core ranks of ham radio.
Most people don't like change even if its for the better. Remeber we
are in a dieing hobbie. So we need to bring more and more into the
ranks of hamradio. The rest of the world has done away with CW and so
has the Maratime moblies. So has you can see we need to do something
to increase the ranks of Ham radio. More and more Ham operators are
dieing off and there isn't anyone around to replace them. Amateur
radio operators seem to put themselves on a higher class than CBers.
You couldn't tell that by some of the closeminded trash that goes on
in this and other amateur radio news groups and the one CB news group
is pretty well behaived. Do you realize that such a change would take
alot of the pressure off of the FCC and it would allow for a larger
voice in Ham radio. It would also take away alot of the regulation
that we have to deal with in developing homebrew gear . It would also
open the door for small businesses sector. Manufactoring small amps.
The FCC started this mess when they put a a radio service for that
uneducated redneck in a slot with alot of good propagation. Then they
put a rule that states that one can't talk over 150 miles. Its only
human nature that if one hears person's voice from far away they are
going to try to talk to it. Thus there you have a rule that is totally
against human nature. Most of those clowns on CB radio don't hurt
anyone. The fact that what they do is illegal is what stops them from
getting help to solve TVI problems etc etc etc....
I think that once it took hold that it would make Ham radio more
interesting.
73 and happy holidays
Oris
Is all that jamming on 14.275 coming out of Alabama?????

Yep...its hard...but lets see some trying ... ok? I used to live in North Miami Florida, back in the 80s. The road signs were changed to Spanish. The schools became bi-lingual. No matter if the kid didn't speak Spanish...thats what they were taught in. BULL. I took my kids and moved to Tamarac where they still spoke English.

Then I moved further North. To Alabama where the only Spanish heard was to the Cuban prisoners in the Federal prison in Talladege county.

Hate to break the bubble here.....My background is Italian. Grandpa and
Grandma spoke Italian. Their kids spoke English. Grandpa spoke both.
Grandma cooked a lot.

My mother spoke ONLY English and was not ALLOWED to learn Italian.
Whatever.

Brother Stair does not have a nuclear reactor, weapon grade material or
weapons. If our differences with them are not resolved soon it could be
very messy.

My mother is Polish, she still speaks it especally when she gets angry.
She's 87 now and still gets very angry sometimes. I love it.

I know, I know this does not have a damn thing to do with radios, but
what the hell.

Happy holidays to everyone everywhere. I'm all done.

If you want to talk about contrived holidays, let's talk about Christmas. (And, as a caveat, I will say that I am Christian).

Christ was not born on Christmas (nor, for that matter, did He die on Good Friday or arise on Easter). According to actual historical accounts, He was born sometime in the fall, IIRC, in September. Christmas was "borrowed" by the early Church from the pagan holiday Saturnalia, in order to win converts to Christianity. This is not a secret, the Catholic Church freely admits this is so. In the early days they were trying to win converts in Rome to allow them to gain a foothold. Eventually (as is obvious today) they completely took over Rome.

So you see, contrived holidays are not something new (Easter was "borrowed" from the festival of Ishtar, the goddess of spring).

Besides all that.. what difference does it really make how the Kwanzaa came about? What does make a difference is how WE choose to deal with it. It appears to me that most who celebrate Kwanzaa do so in good spirit, and without the malice that it's creator allegedly intended...

Says Dan as he backpedals furiously to hide the fact that he can't
prove his claim.

But even if he could, that still leaves the question of why Walter
Cronkite recorded the announcements in the first place and why W1AW
couldn't get Cronkite's services.

And never mind the fact that K1MAN is staying at Rush Limbaugh's
Florida home this Christmas. That cant be true because Dan doesn't
want it to be true because that would make K1MAN a VIP and Dan couldn't
take that.

But K1MAN is a VIP and has been one for a long time and that's why the
FCC brass are afraid to mess with him. Mr. Baxter's freindships go
right up to the oval office and that scares the FCC career guys who
dont want to lose there pensions and so they won't mess with him.

And then there is the little matter of the afterdavid on K1MANs web
page. That is going to change things for the better.

>>

Lets see......how many words has lloyd misspelled this time?

"FREINDSHIPS" is spelled "Friendships," remember, I before E except after C.

"THERE" when used as you did as in THEIR PENSIONS tthat'show "Their" is
spelled.

"AFTERDAVID" that must mean you get to suck K1MAN off after DAVID is done.

It is spelled "Affidavit you friggin' moron.

You have to be the DUMBEST ASSHOLE in the universe!

Firebottle

I just ran it past Babelfish and it came up with Hutte De Pizza.

Anyway, we get the same thing in Wales with English / Welsh signs, and if you happen to live in London (not that I can work out why anyone would want to live in a city) you will end up with forms in one of 30 languages.

Why can't governments simply state what is the main language and have all signs in that language. Lets face it, we muddle through when we go to countries that don't speak our native languages.

Neil.

Annual Xmas Message from Lloooooooooooooooyd:
Jon, This is my annual Christmas message… Please post to your webpage….

Merry Christmas Everyone!

And I will say Merry Christmas too! I'm not some political correct bull-shit artist! I once again hope that everything is well with you. We have had many victories in the B.A.R.F this year, including Herb getting back on the air! We are glad that Herb has come back! We here at BARF HQ, are also dreaming of a WHITE Christmas, if you know what I mean! Keep it WHITE! Trent Lott was right, but did not have the balls. Enough about some politics, lets discuss the heart of the matter: Glenn Baxter, American Hero!

I support K1MAN. I feel that his bulletins have the same LEGAL footing as W1AW. Take a look at his website, and see a statement by Robert H. McNamara, FCC Chief of Special Services. After reading this, and understanding that it would take a case to THE SUPREME COURT of the United States, you all can do NOTHING about Mr. Baxter. So you people have better save all those empty beer cans, and save up for some kike lawyer. Because you are gonna need it! The FCC has already ruled in Baxter's favor. Case closed.

And no, I am NOT some mindless follower. I am a member of a Southern Baptist Church. I fight causes that I believe in. Weather they be right or wrong, I try to be sincere.

I'm also dreaming of a RRRRRRRRRooooooooolllllllllll
CCCCCCCaaaaaaaaallllllllllllllllll !!!

Merry Christmas too All!
Lloyd Davies, N0VFP
B.A.R.F

Lets see how many misspelled words this time....

1. "Political Correct" I'm sure that you meant "Politically Correct"

2. "Weather" are you giving us the "weather" forecast?
I would bet you meant "whether"

Now, the rest.....Herb doesn't even know or acknowledge you you mindless moron!

"We here at BARF HQ"...where is this located at? Is it next to your hud hovel apartment?

FYI, Robert H. McNamara is not the Chief of anything at the FCC. He was many, many years ago......get with the program you friggin' drooling idiot!

The only thing that you have been right on in your miserable life is, when you told the Athens Police Dept......."I don't know nothing"

I do that to a lot of things ranging from the computer monitor control
thingy to those double-sided bilingual forms they give you to fill
out.

This reminds me of something I saw in Monty Puthon's Flying Circus...
It was a sketch called 'Joke Warfare' or something. I got it somewhere
in my massive Betamax archive of shows taped off of TV.

Annual Xmas Message from Lloooooooooooooooyd:
Jon, This is my annual Christmas message… Please post to your webpage….

Merry Christmas Everyone!

And I will say Merry Christmas too! I'm not some political
correct bull-shit artist! I once again hope that everything is well with
you. We have had many victories in the B.A.R.F this year, including Herb
getting back on the air! We are glad that Herb has come back! We here
at BARF HQ, are also dreaming of a WHITE Christmas, if you know what I mean!
Keep it WHITE! Trent Lott was right, but did not have the balls. Enough
about some politics, lets discuss the heart of the matter: Glenn Baxter,
American Hero!

I support K1MAN. I feel that his bulletins have the same LEGAL footing as
W1AW. Take a look at his website, and see a statement by Robert H. McNamara,
FCC Chief of Special Services. After reading this, and understanding that
it would take a case to THE SUPREME COURT of the United States, you all can
do NOTHING about Mr. Baxter. So you people have better save all those empty
beer cans, and save up for some kike lawyer. Because you are gonna need it!
The FCC has already ruled in Baxter's favor. Case closed.

And no, I am NOT some mindless follower. I am a member of a Southern
Baptist Church. I fight causes that I believe in. Weather they be right
or wrong, I try to be sincere.

I'm also dreaming of a RRRRRRRRRooooooooolllllllllll
CCCCCCCaaaaaaaaallllllllllllllllll !!!

Merry Christmas too All!

A lot of the best was done in the 60's in Quebec. Do a search on language
learning abilities and you should get it.

Would you please take the rec.antiques.radio+phono group out of
your off topic discussion. For those of you who are newsgroup
posting challenged, it isn't very hard, just take the group out of
the list of newsgroup you are posting to. We really don't care
about your language problems.

Just think loser you will be able to run from the gooks again. It looks like North Korea :-D :-D :-D is trying to start a war.Oh that is right your to old you might break a hip. Damn it would be just like in the sixties when all your buddies were killer in that fire fight and you hid in the bunker. :-D :-D :-D By your comments below you just can't let go of it. Just because your captain popped you in the head with his 45 for being a chicken and they put a metal plate in your head at the tax payer expense you think everyone has one. Just think there rainbow if you can't fix stupid you'll never be fixed no madder how much of the tax payers money they spend on your chicken ass. I bet your company commander (we all know about you hiding in the bunker while your buddies were being killed) would roll over in his grave if he new how much money you cost the United States tax payer.

Actually, the USofA is one of those rare birds: a fully
industrialized country with NO official language.

There have been attempts to make such a declaration, and in fact
everytime Congress has attempted to pass a resolution making English
the Official Language of the US, it's been roundly shouted down.
```

So, not only is there no legal requirement in the USofA to speak English, there is less motivation to learn it every day.

If you don't like these facts, you may wish to write your Congressmen and Senators, they're the only ones who can change it.

In English, would be nice.

Wishful thinking to be sure. The ONLY thing our politicians are going to change is their pay scale. They are much too cowed by the politically correct crowd to stand up for anything but more taxes and increased government control over you and me. Expecting anything else is pure folly.

sorry dan,
wrong answer!
Unless you can prove it in writing, I can't realy take you at your word
(your posting history suggest that anything you have to say should be
suspect).

Talking about yourself again (and in the third person no less)?
Dan, wake up and smell the coffee. there are others out here who side
with Mr. Baxter simply because he might be right on some points.

as for under educated and ignorant? hmmm, guess you don't know who you
are dealing with here. I may not have a degree (paper note not worth the
ink used to print it), but I have a very high IQ and a lot of experience
that one doesn't get from the classroom. Guess it depends on the P.O.V
and the definition derived there from.

Me thinks that if he is using the amateur airwaves to broadcast his own show which is primarily an ego trip, then he should purchase airtime on any of the fine broadcasting outlets this country posesses. Because a lot of his broadcast has nothing to do with amateur radio.

And you purport that it is fine business for Baxter to use his air time to make personal attacks on Hams with whom he has a problem? W1AW does not stoop so low.
Is it OK for Glenn to refer to the Hams on 14.313 as "scum"? Is it OK, in your estimation for Glenn to refer to fellow Hams as "Cheap and Sleazy"?
Glenn is not furthering Ham Radio, but rather he is cheapening it. You bet I'll turn my VFO. I refuse to listen to this Charlatan. He is a detriment, a sham. Glenn is everything he accuses others of being but his problem is that he is so busy looking in the mirror and admiring himself that he just cannot see.

I will try the search. But surely, the "requires learning
the second language before adolescence" is an exageration.
I have several Asian acquaintances who have come to stay at
my home while studying English -- most were mid to late
20's. They did learn English fluently.

So you mean that the people who first started to convert the americas
to our western standards should still be commemmorated.

Uhhh, was that not some guy named christoffel columbus?

Was that a brit? or a german ? or a dutchy (who owned NY one day)

Geeee, that was a guy from spain.

First come, first serve ??? :)

Get over it, and think that all people should have the right to work
and live. Think of ways that politics and economics can serve the
world around you, and see that if everyone has a decent job and
a decent world to live in, there is no need to fight.
Just respect that some people eat different or speak different but
still have the same needs as you do. Eat and drink and think for
basics

So, go to them and speak with those that can speak english.
Get them to join in your community and understand what drives you
and while you are at it, find out what drives them.

Hint, their cooking aint bad :)

BTW same discussions applies to europe in respect to people from
other foreign countries that migrated over here to seek the pot of gold.

The discussion is for us how to find ways to respectfully integrated them
to our societies, whatever language that might be

grin, i can picture that

> I know, I know this does not have a damn thing to do with radios, but
> what the hell.

well .... If i switch on my shortwave set, I can hear and speak to all of those languages. If i turn on my TV I can find channels where I dont have the faintest idea what they are talking about.

Might it be that without all this, the immigrants were more forced to join in our local communities, on the other there is a good oppurtunity to speak with them.

Within the ham-community those people that love to communicate try and learn some universal language. That might be english, but for me i can chat along in italian/dutch/german/french/spanish and some rude jewish words. Maybe I can pick up scandinavian or east-european words.

I love to communicate, and if I trigger the other party to try and communicate
in some language we both know a few words in, the fun starts.

Really, I know a lot about other countries and their history. This enables me
to speak and respect them, but be respected as well. If that matters :)
Well, to me it does, and discussing things like that on this NG is part of that.

Ed (whose ancensestors were once kicked out of france because they thought different about the bible) (around 1530, so what is new :)

Which is true, but now there is something coming to my mind.
Based on the same experiences here in Europe, that mostly the people
that immigrate for work elsewhere are not the most well skilled cause
otherwise they would not have to seek for work and a better future else
where.

So it might not be disrespect, but perhaps their ability to learn this that
is hindering them. Food for thought is also that while they are hard at
work they get tired and rest at night.

This is a worldwide discussion for which I hope the politicians and
everyone involved find a good formula to let immigrants integrate
within their new community and all people to be happy with that.

The more the world is mixed, the more the world be a better place as
we all learn what drives the other and why and so. Xmas allways makes
me think of that (those darn romans invaded both the jewish as the
arabian world. They should not have done that. Would have saved us a
lot of hassle nowadays)

It wasnt posted in utf-8 format, dimwit. You have garbaged things
up as usual when you took the post from Jon's web page.

>>

poooooooor llooooooooooooyd,

you must be miserable trying to play with the big boys.

Here is the "Original Post".......

Now, go fix your crappy computer...

Annual Xmas Message from Llooooooooooooooyd:
Jon, This is my annual Christmas message… Please post to your webpage….

Merry Christmas Everyone!

And I will say Merry Christmas too! I'm not some political
correct bull-shit artist! I once again hope that everything is well with
you. We have had many victories in the B.A.R.F this year, including Herb
getting back on the air!   We are glad that Herb has come back!   We here
at BARF HQ, are also dreaming of a WHITE Christmas, if you know what I mean!
Keep it WHITE! Trent Lott was right, but did not have the balls. Enough
about some politics, lets discuss the heart of the matter: Glenn Baxter,
American Hero!

I support K1MAN.   I feel that his bulletins have the same LEGAL footing as
W1AW. Take a look at his website, and see a statement by Robert H. McNamara,
FCC Chief of Special Services.   After reading this, and understanding that
it would take a case to THE SUPREME COURT of the United States, you all can
do NOTHING about Mr. Baxter. So you people have better save all those empty
beer cans, and save up for some kike lawyer. Because you are gonna need it!

The FCC has already ruled in Baxter's favor. Case closed.

And no, I am NOT some mindless follower. I am a member of a Southern Baptist Church. I fight causes that I believe in. Weather they be right or wrong, I try to be sincere.

I'm also dreaming of a RRRRRRRRRooooooooollllllllllll
CCCCCCCaaaaaaaaallllllllllllllllll !!!

Merry Christmas too All!
Lloyd Davies, N0VFP
B.A.R.F

Lets see how many misspelled words this time....

1. "Political Correct" I'm sure that you meant "Politically Correct"

2. "Weather" are you giving us the "weather" forecast?
I would bet you meant "whether"

Now, the rest.....Herb doesn't even know or acknowledge you you mindless moron!

"We here at BARF HQ"...where is this located at? Is it next to your hud hovel apartment?

FYI, Robert H. McNamara is not the Chief of anything at the FCC. He was many, many years ago.....get with the program you friggin' drooling idiot!

The only thing that you have been right on in your miserable life is, when you told the Athens Police Dept....."I don't know nothing"

Firebottle

Why would you be glad to see the USA going to war? You'll hide in the
bunker like you did in nam. Oh as long as its some one else that's right
all your buddies are dead and you are still here. Did you pee yourself
when you were in the bunker? Your a chicken we know your a chicken so
why don't you get back into your wheelchair and just shut up old man!
Please becareful I'm tired of my money taking care of your yellow ass.
Hip surgery is expensive!

I see on Fox News this morning that US universities are upset because
the FBI wants information on all students from terrorist countries and
are resisting coming up with all the information they have on these
foreign students......how stupid.

I could just see the results if Pan Am Tech Services would have
resisted giving the Savak, the Iranian Secret Police, information on
me living in their country.

What's wrong with us? Are we crazy??!!

I'm, personally, for sending the problem home....EVERYONE, Arabs,
Iranians, Israelis, Afghans, Pakistanis, Kurds ...anyone born in the
entire Middle East region. Simply export the problem home and don't
let anyone from any of these countries back in MINE..... They have no
right to our country, none, no more than I have a right to live in
Iran or Bahrain or Arabia or Qatar.....

Damned Liberals think the whole world has a right to our country....

Larry

I hate to tell you this, but old Chris did not make it to America on his
voyage of discovery. He had four shots at it and never touched the coast of
the present USA. Also, he was not Spanish. Please review your references and
come back when you have something intelligent to add.

With all this hoopla about homeland security, why isn't there a
"Terrorism Information and Prevention System" that Americans can really use?
Why not start reporting illegal aliens and criminal alien residents?

Illegal aliens are technically subject to deportation at any time.
Their very presence violates federal law. Lawful permanent resident
aliens-that is, anyone with a "green card"- can become deportable if they
are convicted of certain crimes. These criminal alien residents can lose
their permanent resident status and be deported right along with the illegal
aliens and non-immigrant visa overstayers - if the proper authorities knew
about them.

The Immigration and Naturalization Service is the proper authority to
whom to report the presence of 1) illegal aliens, 2) non-immigrant visa
violators and 3) green card holders who have been convicted of crimes.

Contact your local INS office and ask for the Investigations Division
or the "Enforcement Office." If you cannot speak with an INS Special Agent
from the Investigations Division, ask to speak to a Deportation Officer from
the Detention and Removal unit. Make a report over the phone or go in
person. Officers in the Investigations Division are obligated by law to make
a written record of your report.

If you live in a border area - roughly, within 50 miles of the
border - you also have the option of contacting the nearest U.S Border
Patrol field office to report the presence of illegal aliens. You can call
or go in person. If there is no Border Patrol station listed nearby, contact
the nearest Border Patrol Sector Office to find out if there is a local
sub-station that is not listed on the web site. The group U.S Border Control

also lists additional contact numbers.

Illegal aliens and criminal alien residents might be up to some type of fraud against the Social Security system too, since false documents are a way of life. The Office of Inspector General of the Social Security Administration operates a fraud hotline for reporting misuse of social security cards and false statements on claims-whether by employers or employees.

Prosecuting Social Security fraud has been used successfully to tie-up terrorist suspects, even if they are not illegal aliens. Report criminal violators to the FBI for prosecution by the U.S. Attorney.

Though it has been accused of giving cover to illegal aliens through tax ID numbers, the Internal Revenue Service also accepts citizen reports on general tax fraud including "earned income tax credit" abuse. The IRS' criminal investigation division handles employment tax fraud reports.

The Department of Health and Human Services maintains a hotline for reporting Medicare or Medicaid fraud, child non-support, AFDC fraud, and abuse of related programs.

Also, believe it or not, all male illegal aliens (as well as male permanent resident aliens, ages 18 through 25) must register with the Selective Service System. If they do not register, they can be prosecuted for a felony and fined up to $250,000 and/or be put in jail for up to five years. They also may not then be eligible for U.S. citizenship. And there are state penalties for failing to register. Selective Service registration is conveniently available in Spanish. Report draft registration violators to the FBI for prosecution by the U.S. Attorney.

What will the INS actually do when you call?

It will take the information down, as it is legally obligated to do....and probably not much else. It may get interested in a criminal alien, an alien that's the subject of some other type of investigation - for example an Arab terrorist, an alien smuggler - or an alien who has been deported before.

Non-criminal aliens might be sent a letter by the INS Deportation section, saying, in effect "Dear Mr. Alien, you have been already ordered removed by an immigration judge, or we know you have overstayed your status, please come in to the INS office to be deported, bring one bag." (These are known as "run letters," for obvious reasons.) But even this doesn't always happen.

But none of this should make any difference to VDARE.COM readers. Your report will be on record. The government will know about it - and will know we know it knows about it. The Chinese say a journey of a thousand miles must start with one step. Americans can start regaining control of their borders - and of their nation's destiny - with one phone call.

6192. Icom IC-2100H or Yaesu FT-2400H?

Flame suit on.

Oris,

I made the comment about Iraq and North Korea. Dan was making his comment to me. I took no offense by it. Why should you? Just wondering.

Flame suit off.

Check my post. I said "to become bilingual." Some people have an ability to pick up a language after the pre-adolescence period and to speak it competently, but they will always be translating form their native tongue in most cases.

Nearly all people who learn a language in adolescence or adulthood do not learn to speak truly fluently. They may be able to conduct a conversation, but they are not at ease in the language ever. Most don't even achieve that level of proficiency due to the amount of time it takes, the degree of concentration required and the variances in individual skills.

The average immigrant comes to work, and has little time for formal study. Some pick up more of the language, others pick up very little.

We all know foreign born people who speak reasonable English because, and this is key, those are generally the only foreign born we are going to have contact with if we don't speak their language. So we see the exceptions, not the rule.

I once spoke to a business owner in Chapala, a retirement area in Mexico where well over 100,000 US retirees live. He insisted he had never found a single retiree who was even close to fluent in Spanish despite many of them having been in Mexico a decade or more.

Gentlemen,
first of all, I made a "typo." I should have written 447.620, I accidentally wrote 427 repeatedly. It was too late that evening. sorry about that.
that being said, the problem remains. I cannot get anything other than static on 440 band. On 2m I can hear voices just fine. Could it be that the 440 half of the HT is not working properly?
still awaiting any suggestions.
thanks,
don e N6CLP

This oil argument is BS. Are people actually so weak minded that they can't see how war with Iraq would actually effect the oil supply? We have very little if any support from the Arab world in taking any action against Iraq. If anything, oil supplies would dry up. We could not hold Iraq and force oil exports from that country. We would have the entire world against us. I realize that there are people out there that seem to think that we can take anything we want by force but they are wrong. If it's us against the world, we lose, guaranteed. This is a very touchy situation and anybody that is paying attention should realize that.

Please consider this curious and rather
astute observation now appearing in print:

The Most Dangerous Person on Earth
It's Not Who Bush Would Like You To Think It Is

by Jack M. Balkin

When George W. Bush was governor of Texas, his basic strategy was to stake out a position and refuse to budge, hoping to bully others into acquiescing. Only when met with strong opposition did he back down and compromise. We are seeing the same strategy in his policy over Iraq. In the past weeks, the president has attempted to bully the United Nations and now Congress into allowing him to attack Iraq and depose its leader. He is likely to get his wish. But the larger problem is not what will happen if no one stands up to Saddam Hussein. It is what will happen if no one stands up to the president and his vision of moral clarity.

Our Constitution left the power to declare war to Congress because of the fear that if the president could act unilaterally, he might seek to aggrandize himself by taking the country into one war after another. Although the president could always defend the nation if attacked, he could not initiate hostilities without Congress' approval. In the 20th century, Congress' role has receded of necessity, so the president's power to make

war has been hemmed in largely by domestic politics, the threat of nuclear reprisal and international law.

The Bush administration's new policy of pre-emptive attacks is a dangerous addition to this mixture, creating a host of bad incentives. Simply by announcing future threats that deserve pre-emptive action, presidents can seize control of the political stage. A president who takes the country to war pushes aside all other concerns. By shifting the nation's forces from one military offensive to another, he can divert attention from domestic failures and foreign policy blunders. The more often the president attacks other countries pre-emptively, the more likely it becomes that our country will be attacked in turn. The president can then justify additional military action in response, and no patriotic American will oppose it.

In this way, the president can effectively govern through war, with disastrous consequences for the nation and for the world. Armed with the doctrine of military pre-emption, the perpetual political campaign perfected by our last president might well become the perpetual military campaign of future presidents.

President Bush had good reason to take us to war after Sept. 11. Still, he has not accomplished his stated goal of eliminating al Qaeda or capturing Osama bin Laden. With victory not achieved and Afghanistan still unstable, he has now attempted to shift our attention to a new war with Iraq. Again, he may well have excellent reasons for doing so. But we must pay attention to the larger picture. Members of Congress debating authorization for an attack on Iraq should ask the president tough questions about what future military actions he is considering. The way the president's foreign policy is proceeding, Iraq may not be the last war he asks us to fight.

The president is right about one thing, however. Today the world faces a single man armed with weapons of mass destruction, manifesting an aggressive, bullying attitude, who may well plunge the world into chaos and bloodshed if he miscalculates. This person, belligerent, arrogant and sure of himself, truly is the most dangerous person on Earth. The problem is that his name is George W. Bush, and he is our president.

Jack M. Balkin is Professor of Constitutional Law and First Amendment Studies at the Yale University Law School.
His latest book is "The Laws of Change"
(Schocken Books, 2002).

This sounds like a GREAT TOY to place
right next to the HF rig speaker when the
14.313 or 14.275 Radio Circus is
running or the Liberty Net is in in session
or perhaps even when Chris is drunk-on-his-ass
on 3.865 !!!!!

(Can you just imagine for one minute a "Chatter Pal"
lip-syncing to Dumbass Donnie or Glen Baxter???)

ROTFLMAO

And you sir are a brainless twit that doesn't even pay attention to what people are saying.

I am nothing like your little tirade implies. Not only do I not advocate freedom "from" religion, quite the contrary, I feel very strongly that society, having removed God from the picture pretty effectively, has suffered immeasurably for it. What most seem to want now is freedom from religion.. they want the freedom to do as they please with no need of conscience or fear of repercussion. I grew up in a time when most held strong religious beliefs and values, and for the most part society was a lot better off.

Nor do I advocate "freedom from speech". I am a devout Constitutionalist. I support everyone's right of free speech, even those that I disagree with. Where I DO draw a line is when speech gives way to attempting to force others to comply with your ideals, or when speech turns to violence.

And no, I don't give a hairy rat's ass about how anyone thinks of what I say or do. I DO, however, care about the feelings of others.. this is not PC, this is an old fashioned concept called COURTESY... Ever hear of it? If you were born in the 70's, probably not. But those of us who were born earlier learned about it, and how other people deserved our respect. Ever hear the Gettysburg Address? The Preamble to the Constitution? I know, old fashioned values that have no place in today's society.

Now, you wanna talk about dare to be different? I think that Dubya is an idiot and a bully. I thought, and still do, that Al Gore was a pathological liar. I think both mainstream political parties are thoroughly corrupt, and that the two party system needs definate reformation.

I used to think that the militias were all a bunch of kooks (still don't agree with a lot of what they stand for), but having read and seen what has been going on in the past two years, I can see that maybe they aren't so crazy after all.

Enough for my rant. Merry Christmas to all, and to all a good night.

6231. Pennsylvania Hams

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-26 12:58:44 UTC
From: nospam@pa-sitrep.com
Message-ID: <3e0afc3a.556195046@news.verizon.net>
Source record: 70574

Emergency Situation Report Group for Pennsylvanians

PA-SitRep is a free, 100% non-commercial,
non-profit, emergency communications related web
site and emergency alert e-mail list. The PA-SitRep
list is free of charge and we currently have 500
subscribers, many of whom monitor the list via SMS
(short message service) capable cell phones.

We are developing a group of PA-SitRep Contacts,
most of whom (27 so far) are Amateur Radio
Operators and we are currently seeking as many
volunteers as possible.

PA-SitRep Contacts submit their contact information
which is posted on the PA-SitRep Contact page
(http://www.pa-sitrep.com/contact.htm) and are
asked to post emergency situation reports from
their area to the PA-SitRep e-mail list we use to
monitor developing situations.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate emergency situation
reports, free of charge, to those subscribed to our e-mail
alert list.

In addition to providing the situation reports for the
PA-SitRep list, our eventual long-term goal is to provide
situation reporting service, free of charge, to any interested
served agencies, much in the same way that SKYWARN
provides weather situation reports for their served
agency, the National Weather Service.

If you're interested in volunteering as a PA-SitRep
Contact, or have any questions regarding PA-SitRep,
please drop me a line at owner@pa-sitrep.com.

Or visit the website to learn more:
http://www.pa-sitrep.com

Thanks. We'll look forward to hearing from you.

-David Kleber, KB3FXI

Why is there a need for this service?

Aren't things like cell radiophones and "nextel" type services sufficient
with the existing FRS/GMRS services for those who need a radio but don't
want to be experiementers?

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working , Viking Ranger and SX 99 or Hamuland HQ 110. I'm looking for a good AM Ham station. I will trade this Receiver for a good working AM station. I want both transmitter and receiver. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter I have a meter for it just havent put it in yet.)that Ill trade. Two 3-500s 100 in will give you 1250 out, New Caps. I will trade it for a Valiant and a receiver, or full legal output Ham band AM VFO controlled transmitter. This is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer)
I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. QRPuke! (Make Offer)
I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 99 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
I have a Kenwood TM-2530A that I used as a 2 meter packet station. It needs a Mic and the light that lights up the liquid quartz dial. The radio works fine and is in good shape. I looking for a good AM transmitter. A Viking Ranger would be a fare deal.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2 meters. It needs a Mic and needs a new lithium battery backup. I turn the radio off and back on it forgets where it was and defaults to 144.000Mhz. Other than that the radio works fine. I want a working AM transmitter. Something like the Viking Ranger.
I have a Kenwood TM 201a. I used this 2 meter radio as sat transmitter. I worked Mirror before it came down. It Needs allot of work. It needs a dial. The Freq. read out is all screwed up. This is a fixerupper. It receives fine and transmits fine. It needs a mic too I will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that I

would through in too with either one of the above 2 meter rigs. I also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2 meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading
Happy Holidays
73 Oris

Hi Guys,

I'm thinking about getting my technician license and I was wondering if anyone new of upcoming classes in the San Francisco Bay Area. I've checked out the ARRL web site and several of the pointers to local clubs, but most of the web sites are a bit out of date so I was hoping someone could point me in the right direction.

Thanks,
--alex

It's not a matter of welcoming them back. Very few went back to Mexico.
They've been here all along. It's their country too, even though they
didn't get as fair a shake as they were promised.

See ya

Are you ready to finally get that HAM Radio license that you always wanted?
Maybe you need to upgrade that license?

Take a FREE Online HAM Radio practice exam and see if your ready. You can
take the exam as often as you like and best of all, IT'S FREE.

www.qsl.net/n4rpd N4RPD's HAM Radio Website has a practice exam for all the
current license classes. A new exam is generated every time you visit too.

Good luck and 73,
Rob N4RPD

Even if the sites are a bit out of date, get in touch with one of the contact people listed and they can get you more up to date info. Even if they are not the currently active contact, they can tell you who is.

Uh, Dan, I don't know what your bitch about "government agencies" is,
but there are a whole lot of workers in the private sector who take
time off during the holidays, too.

We in the 24/7 business (I was an air traffic controller; same applies
for cops, nurses, doctors, etc.) have to staff the places whether
government or not.

And by the way, it was my experience that on holidays in particular,
the place was so cluttered up with bosses and older employees in there
for their holiday pay that you could hardly find a seat in the
cafeteria.

Once I got as much as 7 years in the agency, I found it not to be
difficult at all to get Christmas off, what with all the old guys
grubbing for it. When I had 30 years in, ALL of them were junior to
me, so I still got it off.

6257. Station Earth / RF Earth for shack on 2nd / 3rd floor

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-28 01:25:24 UTC
From: Martin <Martin@_NOSPAM_g1gyc.demon.co.uk>
Message-ID: <auiv4t$f10$1$8300dec7@news.demon.co.uk>
Source record: 70500

Hi, and thank you for reading this.
I am in stalling my radio station in to the small "box room" on the 2nd floor
of the building and I have in the past not worried about a separate earth for
the station. But as this station is going to be a more permanent arrangement
than my other previous locations I want to make sure that :-
1) the station is safe electrically. (of course the supply earth will be
connected)
2) protected form static (lightening etc).
3) has a good RF performance. (this means low resistance earth connection)
4) is as clear of EMC problems as possible.

So any one got some pointers or helpful hints on installing a separate station
earth. The ground connection is easy 3 to 6 off 6' long 1" dia copper pipes
driven all the way in to the soil (I know it is a big is job but not
impossible).
The bit I am puzzling over is do I use a heavy copper strap as used on church
lightening conductors to provide a common earth for every thing or just for the
static protection and then a separate heavy conductor to provide the shack
equipment earth.
In either case how can I ensure that the earthing does not radiate RF (I assume
that making sure the aerials are correctly balanced with suitable baluns fitted is
the answer here.)
I did here about using RG8 type coax and connecting both inner and screen
to the hardware in the ground but only connecting the shack earth buss to the
inner - any thoughts on this.

Cheers Martin

According to the FCC web site, Mitnick's license is still not valid. And,
besides. What the heck is the big deal anyway? So what?
He couldn't be as overbearing as K1MAN or as insufferable as Dumbass Donny
or as irritating as EVE or as stupid as Lloyd.
Give him a break already!

It's likely that your house wiring is on a system called PME, in which case it's vital that your external earth is connected to the house wiring earth at the meter panel. I'm sure there will be IEE wiring regs on how this should be done. You might also try to get your hands on an article called 'The Killing Fields' by Peter Chadwick, G3RZP. It was in RadCom a good many years ago.

If you have a PME system you also need to ensure the earth bonding point where the supply enters your house is bonded by 10mm2 wire to your local earth rod(s). This is especially important if your power comes via overhead cables. You can usually get to the bonding point next to the power company fuses.

If not, under certain fault conditions a LOT of currrent can try to pass via your shack to earth. Not good.

> 2) protected form static (lightening etc).

Static isn't too difficult- use DC grounded antennas on VHF/UHF and provided a 'bleed path' via a choke or even a resistor for HF antennas.

You can get devices to protect against lightning but having seen the effects of lightning tests I don't think I would trust a cheap one. I always disconnect.

> 3) has a good RF performance. (this means low resistance earth connection)
> 4) is as clear of EMC problems as possible.

These often go hand in hand.

For VHF/UHF the problems are generally resolved by using good coax, connectors, sensible antenna siting, and filtering (as required).

For HF, given the likely problems of a earth lead impedance at HF, I recommend an external ATU- either a SGC (or similar) automatic beast or a remotely variable arrangement. The latter need not be overly complex- a simple LC arrangement, L either switched with relays or a roller coaster with a small motor (a cheap electric screwdriver is ideal) and a motorised capacitor(s). I can look out a circuit I did for someone else if you like- he want something cheap and cheerful and I think the motorisation cost him

about £10! I works very well, if I ever get around to HF myself I may build one.

To get a good RF earth you can run out radials from the ATU, the more the better. These should be bonded to an earth rod at the ATU. A buried 'earth mat' is nice but not always practical.

The above approach tends to keep the RF 'in' via the coax and equipment casing until it get to the ATU which, as the latter is remote, minimises coupling to other equipment.

Once the RF gets to the antenna it may still cause EMC problems- but that is down to the fact it is radiating, which it is meant to do ;-) Then it is down to filtering to minimise harmonics etc. and coupling into domestic items.

On the keypad you'll find above digit 3 the text CTCSS. This enables PL on RECEIVE and TRANSMIT.
On the keypad you'll find above the * key the text TONE. This enables PL on TRANSMIT only.
On the keypad you'll find above digit 6 the text TONE SEL. This selects the PL tone frequency.

When programming the radio, you want to get the correct tone frequency (via the TONE SEL button) and only want it on transmit (via the TONE button). When you're finished, you should see the letter "T" in the display. If you see the letters "CT" instead, you must have pushed the CTCSS button which enables receive PL. Push this one again to get rid of the "CT", then push the TONE button to get just the "T".

It goes without saying that to perform any of these settings you push the "F" (function) key first.

There is a PDF file of the user's manual on Kenwood's web site.

Amateur Radio Newsline™ Report 1323 – December 20, 2002

Amateur Radio Newsline report number 1323 with a release date of Friday, December 20, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Newfoundland joins the 5 megs experiment and Guam's ham radio community is reported safe following a super typhoon. Find out more on Amateur Radio Newsline report number 1323 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO TECHNOLOGY: NEWFOUNDLAND JOINS 5 MEGS EXPERIMENT

The 5 megs experiment is growing once again. This, as hams in Newfoundland come on board to try their hand at propagation on what may wind up as a future ham radio band. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--
VO1MRC, the Marconi Radio Club of Newfoundland club station, has received experimental authorization to transmit CW and upper sideband on seven spot frequencies around 5.3MHz for three four-day periods.

The next session is from the 20th to 23rd of December inclusive and the frequencies that VO1MRC can use are 5260, 5269, 5280, 5290, 5319, 5329 and 5400kHz. The experiment is to look at the differences in ground wave and sky wave propagation on 3.5, 5.3 and 7mhz.

Jeramy Boot, G4NJH.
--

The original 5 megs experiment began several months ago in the UK. It required British hams to get special temporary authority to use the band. The experiment proved so popular and so many hams applied that British telecommunications regulators had to put further permits on hold until they could reassess the impact to the band. (GB2RS)

**

RESCUE RADIO: SUPER-TYPHOON HITS GUAM - HAMS AFE AND OPERATING

Reports over a popular ham radio website that the territory of Guam was hit by a "Super Typhoon" on Sunday December 8th. And while no stations from Guam have been heard here in the United States, reports over the Internet say that everyone is O-K. We have more in this report:

--
Duncan Campbell, KF6ILA portable KH2 lives on Guam. He says over the QRZ

website that the typhoon packed sustained winds of 160 miles per hour with gusts topping 190 miles per hour.

News reports pick up from there. They say that the storm damaged much of the island's infrastructure including electrical power and knocked out wired and cellular telephone service. And Campbell’s posting adds that along with the loss of electricity and water, the port of Guam was the scene of a major fire that destroyed the reserve tanks of fuel used across the island. The blaze started during the storm and the island is now low on gasoline. He says that the sale of the remaining fuel is restricted to emergency vehicles only.

With the clean up now underway the good news is that all the Amateur radio operators on Guam are believed to be safe. Campbell says that several hams are known to have lost their antenna systems and the islands only repeater was also blown off the air. This, the result of the collapse of a nearby cellular telephone tower striking it as it fell.

KF6ILA says that some hams are already back on the air handling post storm related communications. All operation is on the high frequency bands centered near 14.310, 21.375 and 28.520 MHz. Another frequency -- 7.085 MHz is supposed to be used for emergencies but so far no stations have been heard.

By Sunday December 15th, Andersen Air Force Base and part of hotel row in the town of Tumon had power restored. But news reports say that other parts of Guam could remain blacked out for a fairly long time. And even though its almost two weeks since the storm hit, if you hear ongoing emergency or storm related communications please give it priority over any other use you might have for the frequency.

For the Amateur Radio Newsline, I’m Graham Kemp, VK4BB, of Q-News Australia.

--

A little more information comes from the Guam Pacific Daily News. It says that that the Red Cross and Salvation Army are on Guam providing post typhoon relief. Also, that the Red Cross service center has already processed over 200 requests for disaster assistance.

Meantime, another poster to QRZed says that he arrived in port at Guam on December 14th. N6HPX says that the repeater is back up and operating on 146.91 MHz, but there is nobody on the air using it. (QRZ, Q-News, others)

**

RESCUE RADIO: NEW SALVATION ARMY STATION

Speaking about the Salvation Army, word that it and the Oklahoma City Autopatch Association hosted the grand opening of the Salvation Army Emergency Communication Center. It took place in Oklahoma on Saturday, December 14th. The new center is located at the Salvation Army Citadel on SE 44th Street in Oklahoma City.

Frank McCollum, N5FM, the station trustee, held the first net from the new facility at 9 am. McCollum helped to establish the first station in 1986, at

The Salvation Army's Arkansas Oklahoma and Divisional Headquarters where it remained until two years ago.

The new station features very modern gear. It is designed to allow multiple High Frequency, VHF and UHF stations to provide ongoing communications services at the same time. (WA6LBU)

**

ENFORCEMENT: FCC CLEARS CT TESTING

Turning to enforcement news, the FCC has closed the books on its audit of a Connecticut VE testing session. The good news is that no violations of any rules were uncovered. The FCC’s Daryl Duckworth, NN0W, explains:

--
Duckworth: “The Enforcement Bureau has informed the ARRL that it has concluded its audit of the Trumbull Connecticut test session of May 10 2001 and found no wrong doing by the VE’s. The Bureau cautioned the ARRL however, that when the number of VE’s exceeds the number of test candidates, control and supervision of a test session is more complicated.”
--

The FCC says that all ten V-E’s did follow proper procedures while administering the exam. It also thanked them for their cooperation in resolving the matter. (FCC, RAIN)

**

SPECTRUM ISSUES: REVISED 6 METER BANDPLAN IN SERA TERRITORY

The South Eastern Repeater Association’s Repeater Journal says that there is a revised 6 meter bandplan in place for repeater operation in states that it oversees. Under the new plan the 15 repeater pairs using 2.51 MHz offset have been eliminated. This is because the outputs of the 2.51 MHz spaced repeater pairs fell on the 20 Kilohertz spaced channels from 53.71 to 53.99 MHz.

The South East Repeater Association says its goal is to simplify the bandplan for 6 meters. The revised plan calls for 15 repeater pairs using 500 kHz offset and 20 kHz spacing with outputs from 51.70 to 52.92 MHz and 39 channel pairs using 1 MHz offsets and 20 kHz spacing outputting between 52.01 to 53.99 MHz. The few repeaters originally coordinated using the 2.51 MHz offset are being grandfathered and allowed to continue operation under the old system.

The South Eastern Repeater Association is one of the nations largest all-volunteer repeater councils. It provides coordination services for repeaters in Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia. (SERA Journal)

**

SPECTRUM ISSUES: ADDITIONAL BANDS FOR UNLICENSED DEVICES

The FCC says that it is seeking comments on the possibility of permitting unlicensed transmitters to operate in additional parts of the electromagnetic spectrum. According to Bob Gonsett’s CGC Communicator, the regulatory agency specifically wants comments on the feasibility of allowing unlicensed devices to operate in the TV broadcast spectrum.

But that’s not all. CGC says that the Commission is also looking for comments on the feasibility of permitting unlicensed devices to operate in other bands and at power levels higher than other unlicensed transmitters. The FCC believes that advances in computer technology make it possible to design equipment that could monitor the spectrum to detect frequencies already in use. This says the FCC would ensure that transmissions only occur on open frequencies. So far, no Amateur Radio service frequencies have been specifically targeted by the proposal.

More on this issue is on the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-229400A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: NEW BANDS FOR EMERGING TECHNOLOGY

Also from the CGC Communicator comes word that the FCC has allocated 90 MHz of spectrum for advanced wireless services. The bands in question are from 1710 to 1755 MHz and from 2110 to 2155 MHz.

The FCC indicates that this spectrum could be used by current cellular and PCS licensees to expand their capacity by offering wireless voice and data services such as 3 G. Or it might be used by others to support the development of entirely new applications that are distinct from existing offerings. Either way, the FCC is seeking comments on licensing, technical, and operational rules.

More is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228237A1.doc (CGC Communicator)

**

NAMES IN THE NEWS: ROCK STAR GIVES MAJOR DONATION TO ARRL BIG PROJECT

Some good news on the ham radio education front. The ARRL Letter says that rock entertainer Joe Walsh, WB6ACU, has made a major contribution to ARRL's Education and Technology Fund.

According to the Leagues Chief Development Officer Mary Hobart, K1MMH, the significant gift through the Joseph F. Walsh Foundation. Hobart says that it will fund an additional eight pilot schools in the ARRL Education and Technology Program.

Walsh is best-known as a guitarist, vocalist and songwriter with The Eagles and The James Gang. He has been an active Amateur Radio operator for more than 37 years, is an avid collector of vintage radio gear and a longtime friend of Heil Sound's Bob Heil, K9EID.

The amount of Walsh's donation was not made public. An up-close and personal profile of WB6ACU appeared in the November issue of C-Q Magazine. (ARRL)

**

NAMES IN THE NEWS: REPEATER COORDINATION PIONEER NAMED NEVADA SM

A ham who helped to pioneer repeater frequency coordination in Southern California has been named as the new ARRL Nevada Section Manager. Amateur Radio Newsline has a look at Dick Flanagan, W6OLD.

--
Dick Flanagan, W6OLD, is replacing Jan Welsh, NK7N as Nevada Section Manager. According to an ARRL release, Flanagan, a resident of Minden Nevada was the recipient of the ARRL 2000 Excellence in Recruiting Award and was active in the successful effort to secure an Amateur Radio antenna bill in Nevada. But long before that -- back in the early 1970's, W6OLD started his ham radio political career while still a resident of Los Angeles California.

It was in 1971 that W6OLD helped to create the famed Southern California Repeater Association or SCRA. He also served several terms of office with that group. And it was during his tenure that SCRA pioneered many innovations in the area of repeater coordination and dealing with the FCC on repeater related issues. And under Flanagan's leadership the SCRA worked out a frequency sharing scheme with Baja California Mexico that still remains in force -- essentially as negotiated -- more than two decades later.

Since moving to Nevada W6OLD has held a number of positions in the ARRL Field Organization. This includes ARRL Official Observer, Official Emergency Station and ARRL VEC volunteer examiner. Most recently he has also been serving as an assistant Section Manager.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The ARRL says that Welsh is stepping down at the end of the year for personal reasons. (ARRL, SCRA Archives)

**

RADIO PUBLICATIONS: WRTH 2003 NOW AVAILABLE

The new 2003 edition of the World Radio and T-Handbook is now available. Better known as WRTH, the latest edition contains the details of most broadcast entities plus details of transmissions made in the English, French, German,

Spanish and Portuguese languages. To find out more, take your web browser to www.wrth.org (WRTH)

**

RADIO REMEMBERS: STAMP COLLECTING OPERATORS

The Radio Stamp Operators Group reminds us that a year ago, on November 15, 2001, the Japanese Postal Service released an 80-yen postage stamp honoring the 50th anniversary of commercial radio and TV in that country. The stamps depict the images of the microphone used when commercial radio broadcasting began, the first monochrome television camera used for commercial television broadcasting, and at television set up for street viewing. More information on radio stamp collecting is on yahoogroups at radiostamps@yahoogroups.com (RSG)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE ARNEWSLINE SUPPORT FUND REPORT WITH N6TCQ

Ladies and gentlemen, the administrator of the Amateur Radio Newsline support fund, Andy Jarema, N6TCQ:

--
With the holiday season upon us, I need to ask you to add one more name to your gift list. Of course I'm referring to Amateur Radio Newsline.

Without going into a bunch of numbers that will bore you, let's just say that we will end the year with a deficit and it will grow in months to come. That is unless you, the Amateur Radio Newsline listener step up to help.

What we need is immediate support so we can pay the back bills and ongoing support to prevent any back bills. And only you can make it so.

Remember, Amateur Radio Newsline is a federal 501 (C)(3) not for profit orporation and donations to it are tax deductable. This is an excellent way to do some end-of-year "window dressing" on your personal or club's taxable income.

The address is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California. The zipcode is 91066.

If you missed that address don't worry. It will be repeated in the close of this weeks report.

Andy Jarema, N6TCQ

--

Thanks Andy. (ARNewsline Support Fund)

**

EMERGING TECHNOLOGY: BOSTON TV STATION DISRUPTS POLICE SYSTEM

A Boston-area TV station's new 24-hour-a-day digital transmitter is disrupting Camden County New Jersey police communications over 100 miles away. Amateur Radio Newsline's Ken Locke, N8PJN, fills us in:
--
The South Jersey Courier-Post newspaper says that twice last summer, the new digital transmitter used by WCVB in Boston Massachusettes interfered with field communications to Camden County's communications headquarters in the town of Lindenwold. The town's leaders want the problem to go away.

By way of background, WCVB began broadcasting its Federally mandated digital television signal on Channel 20 in 1998. But the problem in the currently shared 506 through 512 megahertz band did not show up in Southern New Jersey until this year. In January WCVB began full time, round-the-clock digital programming. A summertime conditon hams call tropospheric ducting is being tabed as the cause of the interference.

A duct acts kind of like an R-F tunnel from one geographic area to another. This one is putting South Jersey in Boston's back yard and vice versa during the warmer months of the year.

Engineers seem to agree that the police or the television station will have to move frequency. The big question is which one will make the change. New Jersey Congressman Rob Andrews met with county representatives and is now working to arrange a meeting between them and the FCC in Washington. They want the station to move.

But some consultants and communications lawyers feel it will be the county thats told to change frequency. They say that broadcasting is mandated the spectrum on a primay basis.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.
--

The bottom line. This one looks as if it could become a political football for the FCC. (South Jersey Courier-Post , Portland SBE, KB4KCH, others)
**

HAM RADIO IN SPACE: SPACE STATION ACTION PLAN APPROVED

The leaders of the five space agencies that are partners in the International Space Station have approved a new operating plan for the orbital outpost. Meeting in Tokyo Japan, the group has approved. Among the more important items to Amateur Radio is increasing the number of permanent crew members so that research projects can proceed more swiftly. More people on-board the ISS means an increased chance or QSO's.

Right now, with limited crew resources of three Astronauts research takes a back seat to construction aimed at completing the orbital station. By 2006 that number is expected to at least double if a method of emergency evacuation can first be worked out. The current escape vehicle which is mandatory to ISS crew deployment can carry only three. (Adapted from published news reports)

**
INTERNATIONAL - CANADA: ONTARIO SM RE-ELECTED

On the International scene, Radio Amateurs of Canada reports that Robert McKenzie, V-E-3-S-J-Q has been re-elected Section Manage of the Canadian Province of Ontario. His next two-year term begins on March 1st.. McKenzie ran unopposed eliminating the need for a balloted election. (RAC)

**

INTERNATIONAL-CANADA: LICENSING RECORD UPDATE

Records maintained by Industry Canada and Radio Amateurs of Canada show that the Canadian callsign database is becoming corrupted by inaccurate information. Radio Amateurs of Canada says that one of the prime reasons for this is the failure of some Canadian Radio Amateurs to advise the licensing authority of address changes.

The rules in Canada that the holder of an Amateur Radio Operator Certificate shall notify the Department within thirty days with respect to a change of mailing address. Unfortunately, this does not appear to be happening in all cases. (RAC)

**

INTERNATIONAL - SOUTH KOREA: INVESTING IN THE WWW

South Korean telephone companies plan to invest the equivalent of $10.9 billion in U-S dollars in broadband networks by 2005. This, as a growing number of people in that nation demand access to high-speed Internet services.

In making the announcement South Korea's Ministry of Information and Communication did not provide breakdowns of the investment plans. It did note that South Korea boasts having the world's highest Internet penetration with more than one fifth of the population having access to high-speed Internet services. (News release)

**

HAM TESTING - SOUTH AFRICA: ZS EXAM SUCCESS

And talk about high exam scores. The South African Radio League has announced that during the October 2002 Radio Amateur Examinations that four candidates achieved the first place in the test. SARL says that each of these applicants emerged with an average of 99% in the overall exam. (SARL)

**

INTERNATIONAL – UK: FOUNDATION LICENSE PARTY

The United Kingdom plans to celebrate the first year of its new Foundation Class license with a big on-the-air QSO Party. The Foundation License for 'QSO Party' for M-3 prefix licensees and their friends on the 1st of January 2003 from 10:00 and 15:00UTC. Operations will be on 40 meters around 7.070 MHz, plus or minus any QRM. (RSGB)

**

DX

In DX, word of a new station on from the Sudan. His name is Marco. His call sign is ST1MN, and he is reportedly will be active on all of the High Frequency bands through the end of June 2003. (RSGB)

Also, VK8AN will be active as 4W6AN from Dili, East Timor. This, from around the 19th of December through the end of the year. Due to limited notice he will only be running about 15 watts to a dipole or groundplane antenna. QSL only via VK4AAR. (Via e-mail)

**

THAT FINAL ITEM: THAT FINAL ITEM: STAR TREK -- HERE WE COME

And finally this week a story about the ultimate form of communication. About sending yourself electronically to anyplace you might want to go. Bill Pasternak, WA6ITF, has the far out story of science fiction on its way to becoming science fact:

--
As incredible as it may seem, a Star Trek like transporter may be a step closer to reality. This, after physicists in Denmark make two samples of trillions of atoms interact at some distance.

The experiment involved a science called quantum entanglement. This is a mysterious theory of a controlled spiraling of two or more particles without any physical contact. Scientists say that these entangled states are needed for quantum computing and for teleportation.

Before the team at the University of Aarhus made its breakthrough other scientists had successfully developed entangled states of a few atoms. But the scientists in Denmark have now done it with very large numbers.

At the moment nobody is about to teleport anyone, anywhere. But the research, which was reported in the science magazine Nature makes the idea of instantly transporting an object from one place to another less far fetched.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.
--

We know you are waiting for the obvious tag line, so we won’t disappoint you. If all goes well, maybe the term “Beam me up - Scotty” will be reality in our great, great, great grandchildrens lifetime. The only question is whether or not a 5 word per minute code test will be required to “communicate” using that rather exotic mode. (Future Technology)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Keb Butler, W1NNR, saying Merry Christmas, 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

Amateur Radio Newsline™ Report 1324 – December 27, 2002

Amateur Radio Newsline report number 1324 with a release date of Friday, December 27, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to a Southern California gas leak and interference issues are front and center with the FCC. These stories and more come your way on Amateur Radio Newsline report number 1324 beginning right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS RESPOND TO SOCAL GAS LEAK

Ham radio is there to provide communications as a gas leak hits Huntington Beach California. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest:

--
Glorria Morrison, KE6ATG, is the Huntington Beach California Fire Department Emergency Services Coordinator. She was in the process of briefing the new Police Chief, Kenneth Small, on routine procedures on Wednesday, December 11th when the meeting was interrupted by a report of a natural gas leak. Nine fire companies were assigned to the incident. Public Works and Police Department personnel were also sent to the scene.

First order of business -- a near-by 55-unit apartment complex had to be evacuated. Fire Battalion Chief Jacques Pelletier requested that a Care and Reception Center be set up for displaced resident. Huntington Beach RACES was soon activated. It established a net and began logging-in availability of members for the response. 20 RACES made themselves available.

Meanwhile, a call was made to the Community Emergency Response Team Shelter Leader to activate five volunteers for service at the Care and Reception Center location. Tim Sawyer, WD6AWP, acted as net control operator. Huntington Beach RACES Chief Radio Officer Steven Graboff, W6GOS, responded to provide Amateur Radio, cell phone, Red Cross and fire radio communications. Other RACES operators were deployed to the Emergency Operations Center and the Fire Incident Command post at the gas leak scene.

Within 90 minutes the incident was over. The shelter was closed down and the residents went home. No injuries to the firefighters or the RACES volunteers were reported.

For the Amateur Radio Newsline, I'm Bruce Tennant., K6PZW, in Los Angeles.

--

RACES communications was utilized exclusively throughout this event because the city’s cellular telephone system was not working at the time. (KH6WZ)

**

RESCUE RADIO: ARES ASSISTS FOLLOWING MISSISSIPPI TWISTER

The ARRL Letter says that Amateur Radio Emergency Service teams from Jackson and Meridian Mississippi converged on the tiny community of Newton last week. This, to provide emergency communication following a devastating tornado on Thursday, December 19th.

The mid-day twister struck a Wal-Mart filled with holiday shoppers, blowing out the front windows and collapsing part of the roof. The tornado also damaged a furniture factory. According to news accounts, some 70 people were hurt, but no one was killed. Property damage in the town was said to have been widespread, and Governor Ronnie Musgrove has declared a state of emergency in Newton.

According to Mississippi Section Manager Malcolm Keown, W5XX, about a dozen amateurs from the Metro Jackson ARES and the Lauderdale County ARES groups turned out. They took turns supporting relief agencies in Newton which has no ARES organization of its own.

Keown said the ARES teams helped the Red Cross with damage assessment and with shelter communication. Hams also assisted the Salvation Army and the Southern Baptist Men's Kitchen canteen operations as well as making themselves available to local emergency management officials.

In the tornado's immediate aftermath, telephone service and electrical power were out in much of the town of nearly 4000 and in surrounding Newton County. (ARRL)

**
RESCUE RADIO: GUAM SUPERTYPHON - THE AFTERMATH
An update on the recovery effort on Guam following a typhoon that hit the island on December 8th. As reported last week, the giant storm packed sustained winds of 160 miles per hour. It damaged much of the island's infrastructure knocking out electrical power and all telephone service. Now the inhabitants of Guam are slowly digging out. We have this report:
--
By far the best source of what happened during and after the typhoon has been Duncan Campbell, KF6ILA portable KH2. He lives on Guam and survived the storm. He has also been posting regular updates to the QRZ.com website.
Campbell gives a reason why one key Guam station was off the air. He says that on Wednesday December 11th the high frequency ham station on the Naval Station from where he was operating was ordered to shut down because fuel to run generators that supply electricity was running low. The supply of fuel returned to normal on December 17th. Also, water and power is now back on at his home and there is some telephone service but long distance is still spotty, but life is stating to get back to normal.
One thing KF6ILA does not cover in his QRZ.com posts is why most other Guam

based stations have been off the air since the typhoon hit. But news video from the island pretty well covers that. The pictures show that the devastation was very wide spread. Its more than likely that antennas simply got blown away.
As far as medical services Campbell says that a military Field hospital from San Diego has been set up outside of Guam Memorial Hospital. He says its here to relieve the strain on both of Guam's regular hospitals. Both were damaged in the typhoon.
Finally, Campbell says that that he is now back at work and that there is a lot of post typhoon restoration taking place. That added to the times when the high frequency bands are open to the U-S mainland means that he has not been able to keep scheduled contacts.

Reporting from Auckland New Zealand, I'm Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.
--

Another ham on Guam -- Don Palko, N7GZA -- adds to the story. He says that he was with KF6ILA when he was trying to maintain communications with the mainland U-S. He says hat it was Campbell hat brought Guam's one and only 2 meter repeater back on the air. He adds that the American Red Cross is on scene to help with the recovery and they have brought ham radio operators with them. (KF6LIA, N7GZA via QRZ.COM)

**

Break 1

Wishing you the very best of seasons greetings from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world including the 145.600 MHz repeater serving the city of Durban South Africa.

(5 sec pause here)

**

ENFORCEMENT: OLD PROBLEM - NEW SOLUTION?

The FCC is using a new diplomacy to deal with an old problem. Its telling a repeater owner that he will be held responsible if an unlicensed individual is relayed over his system. Amateur Radio Newsline's David Black, KB4KCH, has the details:

--
Wayne Curley, WA6NRB, of Montrose, California finds himself receiving an interesting warning letter from the FCC. Curley operates a popular repeater serving the Los Angeles area. It's on that repeater where the Commission alleges that Richard Burton, the former WB6JAC, has been appearing.

Burton and the FCC have a long history. Burton is a former ham who had his license revoked back in 19-81. The following year, he was convicted on four counts of transmitting without a license and two counts of making obscene transmissions.

That conviction got him sentenced to 8 years in a federal prison. But the judge then suspended all but the first six moths. Burton appealed. The Ninth District Court of Appeals threw out his obscenity convictions but let stand the charges of operating without a license. But it doesn't end there.

The Commission says that Burton transmitted without a license while on probation in 1984, 1990 and again in 1992. After a second conviction, he was fined $2000 and received a year's probation. On his third unlicensed operation conviction, he was sentenced to serve 7 months in prison and do a year on probation.

In 1992, Burton decides to try and get his ham license reinstated. The FCC says no. So he waits four years. In 1996, he passes a Technician class exam. Burton is issued the call sign KG6GKS but that license grant is short lived. As soon as the Commission realizes that the new license has gone to Burton, it sets the license aside, putting Burton off the air again, at least as a Commission licensee.

In may of 2,000, another federal grand jury indicts Burton for operating without a license. He's arrested that August. In January of 2001, Burton agrees to serve three months in jail. He does his prison time at a federal detention center near Fort Worth, Texas. Burton is also placed on one year's probation following his release -- and he's ordered to undergo psychological counseling.

Now, the FCC says that Burton is back on the air again, this time, using Wayne Curley's Los Angeles repeater. And it appears that--this time--the FCC has decided to simply give him no place to operate by holding Curley, as repeater operator, responsible for letting Burton's unlicensed signal to be relayed.

On December 4th, the FCC issued a Warning Notice to Curley. The letter reminds Curley that a repeater licensee is responsible for continuing violations of Commission rules. And it tells Curley that enforcement action against him may result if he fails to prevent violations from occurring over his repeater. The FCC says this could include fines, license suspension or even revocation if Curley fails to act.

But the FCC also gives Curley some advice. It tells him he has several options available to prevent recurring and deliberate violations of FCC rules from taking place on his repeater. This includes locking rules violators out...or using access tones...or even limiting the repeater's operation.

But the Commission also adds a warning. If he is not able to do this, the FCC says, Curley must take his repeater off the air.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

As we go to air its not known what enforcement action the FCC might be planning to take directly against the ex-WB6JAC. (FCC with background from ARNewsline and Westlink Radio Archive)

**

ENFORCEMENT: YOU CANT OPERATE - YOU AGREED TO A SUSPENSION

The FCC’s Enforcement Bureau has issued a warning notice to Cornwall Chan, W3CI, of Dresher Pennsylvania regarding operation on a 2 meter repeater back in November. The reason: Chan is not supposed to be on the air.

You may recall that W3CI had forfeited his license back to the Commission for a period of three years. This, in settlement of an earlier enforcement action regarding repeater interference.

Chan is supposed to stay off the air until September of 2003. The FCC says that if he shows up again before that date it will take further enforcement action against him. The FCC adds that in view of the alleged violation of its agreement with Chan that it has now dismissed his request to have his suspension period shortened. (FCC)

**

ENFORCEMENT: SORRY -- THATS NOT REPEATER INTERFERENCE

The FCC says that the signal being heard by another Ohio ham cannot be considered as interference because the ham is listening from far to high of a location. Commission spokesman Daryl Duckworth, NN0W, explains the situation and why the agency declined to get involved:

--
Duckworth: “The complaint of Kim Lozier, N8ZW, of Portsmith Ohio was dismissed. Lozier complained about what he perceived as interference from the KF8HL repeater. Our letter pointed out that Lozier was listening from an 800 foot altitude and that merely hearing another repeater with no disabling interference was sharing -- not interference, and that frequency coordination is not necessarily exclusive use.”

--

In a related matter a petition for reconsideration from the KF8HL repeater group in West Virginia was also dismissed as untimely. That petition had sought reversal of an earlier Enforcement Bureau ruling that KF8HL was an uncoordinated repeater and had the primary responsibility -- but not the sole responsibility to prevent interference to the KC8FKP system located near Portsmith Ohio. (FCC, RAIN)

**

CONVENTIONS AND HAMFESTS: RILEY AT FROSTFEST 2003

The FCC’s chief ham radio rules enforcer, Riley Hollingsworth, K4ZDH, will be the keynote speaker at the Richmond Virginia FrostFest 2003. The FrostFest is February 9, 2003 in Richmond, Virginia. The venue is the Showplace center. For information please visit www.frostfest.com on the World Wide Web. (W4PW)

**

AWARDS: WILL THERE BE A WAS A-M?

Amateur Radio Newsline’s Paul Courson, WA3VJB, reports that the ARRL has promised to consider a proposal for special recognition of full carrier Amplitude Modulation. This, as part of efforts by promoters of the mode to earn the popular Worked All States or WAS award.

The proposal for a WAS AM was jointly developed by Pete Markavage WA2CWA and Mark Bell, K3ZX. League staffers have told the two that the idea will be considered at an ARRL Membership Services Committee meeting in January.

Several stateside hams have indicated they have achieved or are close to achieving WAS AM by working stations on popular AM gathering points on 160, 75 and 40 meters. More information is on the web at www.amwindow.org (WA3VJB)

**

SPECIAL EVENT STATION: A CELEBRATION OF KIDS DAY

Its a special event station to help celebrate one of the most important events in the ham radio calendar. K1D will be on the air through January 5th to celebrate the January 4th Kid's Day operating event. That’s the twice a year outing where hams are encouraged to open their hearts and their stations to youngsters nationwide.

As to K1D, that station is special in several ways. Even the call signs of the people operating are in the spirit of the event -- W1DAD and K1MOM who in real life Peter and Jeanne Schipelliti.

So keep an ear open for K1D and if you work Peter or Jeanne, QSL to 7 Dearborn Ridge Rd, Atkinson, New Hampshire 03811. More on Kids Day is on line at www.arrl.org. (News release)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

NAMES IN THE NEWS: ZL1AMO CONTINUES HIS RECOVERY

I’m Ken Locke, N8PJN, with an update on the recovery of famed D-X’er Ron Wriight, ZL1AMO.

Judy Roush, AA7UC of the International DX Association has some positive news this week. While Wright is still in medical isolation and continues to fight the E-S-B-L infection, he is improving. Intravenous feeding has been discontinued and ZL1AMO is now eating solid food.

Rousch says that Wright is still weak but he is able to communicate. In fact, he’s doing so with his family using a mobile phone. And Roush says that

Wright is anxious to resume his ham radio activities as soon as he has recovered. In fact, he continues to ask the family if they are receiving e-mails from the amateur radio community.

Meantime, the International DX Association reports that the ZL1AMO Air Ambulance Fund is within $5,000 of reaching its $20,000 goal. The fund was started to assist Wright in paying the fee to bring him home from Fiji where he was when he took ill. Funds received so far have been forwarded to the air ambulance account in New Zealand.

For the Amateur Radio Newsline, I’m Ken Locke, N8PJN. (INDEXA)

**

RADIO LAW: HACKER PHONE FREEKS PALO ALTO

The city of East Palo Alto California is stuck with a thirty thousand dollar telephone bill thanks to an alleged hacker. ATT says that the intruders were able to infiltrate the city's phone system last July. Over a five day period numerous long distance calls were placed to the Philippines.

East Palo Alto's typical monthly phone bill is about ten thousand dollars. In July, it was 40-thousand. ATT offered to reduce the total amount by about $10,000 but said that East Palo Alto was responsible for the rest. The city says it has no intention to pay the additional charges. (Published news report)

**

EMERGING TECHNOLOGY: MORE PEOPLE CARRYING CELLPHONES THAN EVER BEFORE

A survey by a telecommunications firm reports that over half of the overall nations population living in major metropolitan areas now own mobile phones and subscribe to service. This, according to ongoing measurements performed by Telephia Incorporated in 44 markets.

Telephia says that while the average penetration rate was at 51 percent, a handful of cities had penetration rates in excess of 60 percent. Some of the cities mentioned are in Greenville, South Cariolina with 68 percent, Atlanta with 67% and 63 percent in Orlando, Florida.

Telephia adds that recent results from an Attitude and Behavior Survey found the percentage of frequent wireless callers increased from 38 percent last year to 48 percent this year. Also that overall wireless service satisfaction increased significantly over 2002. (Telephia release)

**

INTERNATIONAL-AUSTRALIA: NEW SHORTWAVE CENTER OPENED

A new $6 million dollar radio Voice of International Asia broadcast center has been officially opened on Australia's Sunshine Coast. This, by the man behind the project - multi millionaire Bob Edmiston - of the U-K. The studio originates mainly programming for transmission on shortwave. It uses the former Radio Australia transmitters near Darwin in VK8 and the footprint covers

one-third of the globe. (Q-News)

**

INTERNATIONAL - THE AMERICAS: ANOTHER LOOK AT BROADBAND

Proposed U.S. government policies could harm competition in the broadband Internet and affect international e-commerce. This says the Consumer Federation of America could result in reducing market choices and driving up monthly fees for users who want high-speed Internet access.

The FCC ruled in March that cable providers do not have to share their systems or provide open access for competing Internet services. The agency is currently reassessing its line-sharing rules for local-phone giants like Verizon Communications and SBC. (Published reports)

**

DX

In D-X, five Chillian stations will be active as CE6M from Mocha Island from January 15th to the 18th. They plan to operate 160 through 10 meters on SSB and CW. Q-S-L to P.O.Box 591, Temuco, Chile. (425 DX)

QRZ-DX reports that someone pirated the call sign 9S1X and used it to operate 80 metres on December 13th. No other information is available at this time. (QRZ-DX)

And, W8GEX and WZ8D will be active as N8Z from St. Croix, in the Virgin Islands through January 8th. They will be at the home of WP2Z and will operate on 6 to 160 meters. QSL direct to WZ8D. (GB2RS)

Lastly, Q-News reports that the P29BPL, the six meter beacon in Papua New Guinea is on the air, but with reduced power and a lower antenna location. This is reported to be a preliminary test to make sure there is no interference to TV receivers located nearby. (Q-News)

**

THAT FINAL ITEM: IN MEMORY OF ROGER MC CARTHY KD6CC

And for our last item of the year we have a tribute. A special remembrance of one ham for another. It was our Support Fund Administrator Andy Jarema, N6TCQ, who brought this very special remembrance to our attention. We feel it is fitting that he share it with you as well.

--

Normally when you hear my voice its to ask for donations. Not this time. This time I want to share something with you. Actually, its the note that accompanied a donation that we received last June. It was only a few lines but it really tugged at our hearts. See what it does to yours.

The note came from Rob Sweet, KG6DKW, not far from my home in Arcadia California. Here’s what it said:

“Thank you for providing Amateur Radio Newsline. Enclosed you will find a donation in the amount of $50. I would like to make this donation in memory of Silent Key KD6CC, Roger McCarthy, who was killed in a motorcycle accident on May 31st 2002. I never met Roger in real-life, but enjoyed talking with him on the 2 meter band, and exchanging pictures with him on slow-scan TV.”

How do you respond to a note like that? After you wipe away the tears, what do you say?

We talked about it for several months and finally realized that what you do is to help keep Roger McCarthy’s ham radio spirit alive. That’s what Rob Sweet, KG6DKW, wants to do.

So Roger -- this one is for you. This week we dedicate the final Amateur Radio Newsline report of 2002 to the spirit of the ham radio fellowship that you created while you were here among us.

Like Rob, we never met KD6CC, but we wish we had. He sure sound like the kind of ham radio neighbor any of us would be proud to have living next door. May he rest in peace on the other side of the great Ethereal Abyss and may the light of Amateur Radio friendship that he kindled -- live on in 2003 -- and forever.

In Arcadia California, I’m Andy Jarema, N6TCQ.

--

Thank you Andy.

**

Well is that so? Add yourself a bit of extra earthing and bond it to the PME - I think NOT!

Both Peter Chadwick and I, who've had previous discussions and agreement on this would profoundly disagree with you!

PME, where the neutral has a disconnection somewhere outside of your property has likelihood to pass huge amounts of current, and hence a rise in potential down and to any local earth you might provide or have in your home. It is a cheap but dangerous way to supposedly provide an electrical earth.

The answer is to provide yourself with some good quality ELCB's (30ma if possible) at your shack and home. Provide yourself with a good quality earthing system which is tested to current standards and when this is done disconnect the crappy PME system.

And yes I have seen the effects of a disconnected neutral with PME, which has resulted in persons receiving shocks as well as interference to electrical equipment

From someone with Experience! Who has his PME disconnected and that's the way it's staying!

Well I note you haven't put your name to this claim bit never mind, lets
look at it.

>
> PME, where the neutral has a disconnection somewhere outside of your

>

The rise is potential is dependant on the resistance of the bonding lead.
The local electricity company recommend 10mm2 as being adequate for the
job. I assume they would know- the engineer I spoke to knew all about the
problem once I mentioned what I was concerned over.

> The answer is to provide yourself with some good quality ELCB's (30ma if
> possible) at your shack and home. Provide yourself with a good quality

>

The local electricty company advised against this method - especially in
situtions where there was a real risk of the neutral disconnection, eg in an
area supplied by overhead wires. (It is extremely rare with buried supplies
they tell me.) In fact, they advised they would disconnect my supply if I
used it this method.

>
> From someone with Experience! Who has his PME disconnected and that's
> the way it's staying!
>

OK, but if you local supply company don't like it you may well get
disconnected.

I heard that Mitnick does NOT have his license back. What has
happened is that a judge ruled he COULD GET his license back.
It has not happened yet. And I don't think it will for a few more
weeks at the soonest.

Mike

Bob M,

thanks for the explicit instructions.
My radio already shows the T in the display, and does NOT show the "CT".
Therefore I believe that I have programmed it properly. It also shows 447.620
with a minus (-) sign just after it, and when I press the xmit switch, the
number changes to 442.620
I think I've done it right. Perhaps the audio doesn't work in the 440 band? I
am totally stumped by this.
Again, many thanks for your help.

At my last QTH I did exactly as you describe and it worked well for many years. I also disconnected the earth pin on every mains lead for my rig and linked all the chassis together with coax braid.
I'm not sure of the legalities of this, but what nobody knows, nobody worries about. Good luck.

Message-ID: <80dlua.7of.ln@p400bob.lse.com.au>
Source record: 70515

Hi

Does someone have a TS711/811 manual they can scan me the relevent bits on rig tuning out of?

I need to know if there is anything "special" that needs doing beyond just peaking where logic would say so.. (I found for instance that peaking the coils around the first IF stuffed up FM reception by narrowing the bandwidth too much. I do have the gear to sweep but I'd like to know what the book says.)

Sure appears like you've got it programmed correctly. I think you need to find another ham in your area who has a couple of radios that are working properly, and then you should test with him "off-line", so to speak. Pick a simplex frequency, make sure you can talk to and receive him with and without PL, then do it with a + or - offset. Also try the same thing on 2 meters. If you press the side button labeled MON, it should open the squelch on the active band and you should at least hear noise if there's no signal present. There's not too much that's separate for the two bands in that radio.

Good luck, however.

The bathroom stall is down the hallway and your language (colloquial English at best) is reprehensible. There are ladies and other fine people in these groups and many speak Italian and Polish and many fine foreign languages that you seem to disdain. I'm not going to force any metaphors on you but...

WILL YOU PEOPLE SHUT UP?

I'VE THOROUGHLY HAD IT WITH THE ANTI-FOREIGN, ANTI-GAY AND ANTI-SENSE YAHOOS IN THE PEANUT GALLERY!

Buffalo Bob brought a paddle in case you won't behave, I hope.

This crap won't even fly on the Truckin' Bozo radio show.

This group is about antique radios and phonographs, and a bit of mostly related off topic posting. Don't go cross-posting it unless it relates Completely with the topic of this group!!!!!!!!!!!!

The next vegetable that pops up should be salted and served.

IOTD (Idiot of the Day) goes to:

Esp. the untimely and uncalled for use of the "F" word. We don't even hear banter like this in our local drinking holes. SHUT UP! and stay AWAY from our group if that's all you're good for. Get another hobby, but go away!

Just for the sake of the argument, it's by George Carlin.
The Bad American thing.
And heh, I have a copy of Toh Lehrer's Lobachevsky song here.

Jeff

That's not by George Carlin. Here's a link to his web site where he denies authorship.

<http://www.georgecarlin.com/georgecarlin/home/bogus.html>

It's also been attributed to Ted Nugent - he's also denied authoring it.

Thanks. It was attributed to Ted when I first heard of it.
It sounded so much like him, I just accepted it as fact.

Hello all,

I've found a cool thread while reading the
forums on trunkedradio.net with links to lots of
live police and EMS radio scanner web-feeds
from the US and worldwide. I've been listening
and well with all that's going on these days
it's good to hear all those people out there
protecting our safety so I wanted to say
thanks by sharing the feeling.

Here it is, enjoy!

http://www.trunkedradio.net/groups/showthread.php?s=8943b67bb18c75de5748f971cf539ff0&threadid=2279

forum thread link

Thanks to each and every one of them out there
in the cold, may we all have a safe and happy
new year!

Sam.

You Gringos make us laugh. Why? Because you will hire a Mexican to wash your car but you don't want him livng next to you.
You Gringos also drool when you see a beautiful Latina woman in your neighborhood and some of you even say, "Those young Mexican women are good looking when they are young but they grow up to be fat.".
You Gringos said the same thing about Italian women, too.
Most of you middle aged Gringos are fat and you have bellies that hang down over your belts so far that you cannot see your zippers.
Still want to make fun of the beaufitul Latinas you would like to get your dirty hands on?
You Gringos should go on a diet...no beautiful woman wants a fat old man with breasts bigger than hers.

Hello Martin are you in the UK or some other part of the world. There are 3 items of elevated earthing that need to be addressed. Any mains operated RF equipment must have an efective electrical earth, which is not the same as an RF earth. Any RF earth lead, dropping from an elevated shack, could be a significant portion of a wavelength, so you really ought to decide what bands you are expecting to work. It is not difficult to solve once you know the pitfalls.
If you are in the UK have a look at your electricity meter instalation, and see if there is a label marked PME or Protective Multiple Earthing, if you are in a high rise block you may need to make further inquiries as many were wired in that way.
Regards Ray G0BXG

Just a thought.

Has anyone ever installed a mains isolating transformer or two
and run the shack items off of that ? The idea being that those
shack items can then have their chassis connected to an 'RF'
garden-style earth rather than the household mains earth - there
being no direct connection between the two earths.

Cheers,

Gareth.

This can get very dangerous if it is possible to come into contact with the 'mains' earth in the house, and the 'shack' earth simultaneously. Any difference in potential can be quite uncomfortable, and under certain conditions might be fatal!

If you go down this road, make absolutely sure that nothing that is earthed on the house supply, or any metalwork, pipes etc is anywhere near anything in the shack. Something as innocent as vacuuming out the shack (not that I ever have) could prove nasty if you have one hand on the vacuum cleaner and the other touches your radio gear...

I had my earthing checked out after I got a surprise one day while standing out in the garden and reaching through the kitchen window to turn the wireless up. Funny buzzing sensation... I measured about 95 volts between mains earth and a spike stuck in the lawn! Turns out that all my wiring and earthing is all OK according to qualified people, but personally I'm not convinced. I just treat 'inside' and 'outside' as two very different places. I'm not sure how the 95 volt potential is developed as I'm not on PME here, even though it seems like the kind of thing that happens when PME goes wrong!

Dan.

Yes, a local does that. Only potential (no pun intended) problem is ensuring
you can't readily contact anything grounded to the PME - such as the CH
pipes or any equipment in the shack not connected via the isolating
transformer.

Hi Gareth,

I do this for my battery charger (a laboratory grade linear power supply) and run off batteries. However, I still connect the two grounds together, at the ground rod.

I am not particularly bothered with the prospects of lightning, not in the Pacific Northwest (we have the lowest incidence of lightning strike in the 48 states). However, I do still maintain lightning safe practices like a one point entry window for all RF and electronics which is tied to that same ground rod (less than 10' away).

Having an isolation transformer can be turned into an illusion of isolation very easily through the casual connection of one piece of equipment that has a ground path (somewhere). Do you have an outboard DSP that uses a "brick" power supply? Ground may be busted DC-wise, and yet it may be a conduit for noise from the Mains. How about a computer connection for packet? Does the computer have a modem attached to a phone line? How about one of those premium SWR meters with backlights and digital displays - again, plugged into some anonymous wall-wart power supply? The opportunity to violate the isolation is exceedingly easy to come by and simple to implement.

Another point, the isolation transformer is good at decoupling of RF and noise, but it is not an RF ground buster. You do not separate the two grounds, except by the DC and low AC path. At HF, it is a must that you have two good grounds otherwise the transformer turns into a very large coupling cap. By the nature of good transformer construction (which includes a Faraday shield), both grounds are figuratively strapped together for RF. The greater virtue of an

isolation transformer is it allows you to extend the "balanced"
metaphor where it counts: at the source. It also lets you choose
which ground as being superior for your situation.

Would somebody please explain what a PME is. While you are at it, define ELCB.

I can try, but have no expertise in this field at all! I believe the
following to be true...

Back in the good old days, the supply companies provided 3 conductors: Live,
Neutral and Earth.

For some reason (probably cost?) they did away with the need for a separate
Earth conductor by bonding Neutral and Earth together at the substation. The
buried cable used to bring the supply to homes has 'gaps' in the insulation
along its length, effectively connecting Neutral back to 'mother earth' at
these points. Since there are many of these along the length of the cable,
we get the term 'multiple earthing'. Only when the supply reaches your house
does Neutral get split from Earth again....

PME is a problem for radio amateurs because they may connect additional
metalwork in the ground to their Earth systems. (And because of PME they are
effectively connecting it to Neutral too....) If a fault in the buried cable
develops that breaks the outer Neutral/Earth connection, but leaves the live
intact then all the current supplied after the break will have to find
another way back to the substation through the ground... If your earth
system is connected to the (now disconnected) Neutral conductor then hey
presto a fairly low impedance path is available... Your supply (and all your
neighbours downstream of the fault!) can now complete its circuit through
YOUR earth system. That's a heck of a lot of current (= fires and
explosions!)...

Another risk: Your earth has some resistance.... Voltage=Current x
Resistance.... So there will be a rise in potential around your earth
system. In other words it won't be at 'Earth' anymore... Which means that it
is a problem if you are, and you touch it...

So that's PME! It's late and I rambled... I wonder if *anyone* understands
me?

As for ELCB that's a bit easier. "Earth Leakage Circuit Breaker" - a device
that sits on a supply line and monitors the current in the Live and Neutral
lines. In theory these should be equal because all appliances etc. will form
a circuit between Live and Neutral. If the currents are not equal then some
of the live current is flowing elsewhere (to earth probably, hence an 'earth

leakage') - the ELCB detects this difference and shuts off the supply. Most domestic ones trip at 30mA and reasonably quickly, the idea being that if it is a person that the current is leaking through, they might live. In large installations with lots of PC's and stuff the capacitors connected between the supply and earth in the power supplies can have a cumulative effect, leaking enough current to trip ELCB's - you can get special ones with a higher trip rating for these kinds of situations.

Oops, I rambled again...

HTH (a bit!)

Dan.

Netcop? No, but I won't let some sniveling little lusser forge my ID
without a fight. BTW, your reply looks like a possible threat. Not a
good idea. I'm not some wet behind the ears kid, and I have been in
plenty of bloody fights in my life, and I no longer walk away from the
little bullies who don't think you'll strike back after a sneak attack.
I used to give idiots the benefit of doubt and feel sorry for whining
little idiots. I finally decided its not my fault they are here as the
result of cheap booze and defective condoms. Now go away.

Either you have no guts or you are ashamed of your family name
because you have the need to hide behind an alias.

I am not that sure that you did :-))

You have come up with the clearest explanation of PME v radio earth that I
have ever read.
I have always wondered why a PME supply could fail so.
Now I know.

Many thanks

In year's past there used to be one or two
frequencies on 75 Meters which handed out
awards to various 75 (and 20) Meter operators
and frequencies which stood head-and-shoulders
above the rest. Awards were given for the
widest signal, worst audio, biggest RF suckup,
most likely to blow up another amplifier in 24 hours
ettc etc.... What freq is this held on?
Is this still held on New Year's eve as in Year's
past? What is the Frequency ?

PME = Protective Multiple Earth.

At one time the electricity supply companies used to run 3 cables to each house, L, N & E. About 50 years back (I'm not sure of the exact date) they reduced this to 2 , L & N.

To provide a local 'earth' facility they bond the N conductor to all the pipe work (water and gas etc) at the point where the supply enters the house, in the box that goes from the 1" dia "coaxial style" cable (which is not coax, just has a similar appearance) to the two 'tails' that go to the input of the meter.

There should be a notice on such installations.

ELCB = Earth Leakage Circuit Breaker

A device the detects an imbalance between the currents in the L & N and, if the imbalance exceeds a preset limit, turns off the supply. The limit is typically 30mA in a domestic environment. About 3x the benchmark lethal level.

Thanks for bringing that one up - I wondered when someone would.
Even with the shortest path from a shack to a ground point
outside, you would probably have at least 5m of wire.
At 30MHz, this would be half a wavelength and appear to be
an open-circuit at the shack if it was a perfect RF earth
at the other end. I believe that MFJ make a tunable RF earth
but I have no experience of using such a thing.

I'm in a similar situation. My shack is upstairs in the house.
Currently, my set-up is that I connect the chassis of equipment
to mains earth as an electrical safety but with cable that is
wound through a ferrite ring to reduce the possibility of
RF getting back into the mains. Secondly, all of my antennas
are balanced and fed via baluns. Also, each feeder has a number
of turns in the loft before it drops down so that it acts as
an RF current choke to try and keep RF out of the shack.
I haven't had any problems with RF in the shack or RF
getting into mains wiring.

I have heard of others that take this further and use an
RF earth to connect to the coax screen at the antenna
end, connecting to the balun close to that point, then use
ladder feed from the balun to the antenna. Obviously, this
means that you have a vertical ladder feed from ground level
upwards and this might be considered an eyesore by the XYL.
Plus you have the issues mentioned by others of disconecting
mains earth in PME situations as mentioned in detail by other

posters. For these reasons, and the fact I haven't had a problem with RF in the shack, I didn't do that.

If you are using unbalanced antennas such as a vertical or end-fed, then having a good RF earth close to the antenna is important. However, most sources suggest that a few copper rods is not an effective RF earth (unless you're right by the sea where ground conductivity is very high) and they suggest a lot of buried radials. Some people even bury chicken-wire mesh under the lawn so that they have a large surface area to form an effective ground plane.

Hope that helps,
David.

6310. TS850s mike stepping 5khz?

Newsgroup: rec.radio.amateur.misc
Date: 2002-12-30 11:22:23 UTC
From: Adrian <adshar@ozemail.com.au>
Message-ID: <_%VP9.318$6z3.10840@nnrp1.ozemail.com.au>
Source record: 70452

Anyway to get the mike buttons to tune in 5khz steps on the a/b vfo?Instead
of 10 hz steps like the tuning knob.
Is there a hidden mod or menu program to do this? Ie: follow same function
as Mch rotary control

regards AF

Seems that 1/2WL would make a perfect ground wire. Seems that
an even multiple of 1/4WL is what you are talking about.
5m of wire on 20m would be a worst case ground.

If you want to get RF out of the shack, use a quarter-wave
counterpoise, adjusted in length for maximum effect.

Half a wavelength will merely keep the volts where they are, just
where you *don't* want them.....

We installed a half-dozen halogen "puck" lights under new kitchen cabinets as part of a recent remodeling project. Nice lighting, but these units seem to generate a horrible (S9+) hash on all bands HF through VHF. Has anyone experienced similar problems and, more importantly, come up with a solution (other than shutting the lights off or changing them out for something else)?

Thanks,

Mark -- WA9ETW

Are you sure its the lights themselves or do you have them on a dimmer circuit. Some of the dimmer circuits use an SCR that is pulsed to reduce the voltage. These pulses can be pretty wideband.

1/4WL is good if the other end is open-circuited. 1/2WL is good
if the other end is grounded. If the other end is grounded, the
volts will be close to zero with 1/2WL.

Agreed. One of the few Dealers
of Ham Gear that was run like a
real business with friendly and
knowledgeable salespeople.

Sounds like Universal Radio is going
the way of the old Trevose Hamtronics
and Delaware Amateur Supply. Two other
shyster ham radio stores (thankfully now gone
and for the most part forgotten..) that were
each run like the proveberal "shady used

car lot" and had salespeople with attitudes like
the horse's ass. Oh well. I guess it's
now a resounding "phooey" on Universal
Radio also.

Give me a freekin' break! Universal doesn't have a particular radio to demo and all the sudden they aren't worth patronizing? I've dealt with them several times and have been exceptionally satisfied. This has all the earmarks of some kind of spite inspired hatchet job. I don't hesitate to recommend Universal!

Jacinta, I must beg to differ with you. There are NO self-respecting, unmarried Mexican babes, in shape or out (mostly out...short and squat... in these parts) who wouldn't marry a fat, drunken, slovenly, rich or poor American man IF (like Sid, the New Mexico ham with the Mexican squaw) it meant they could get a Green Card to give themselves and their extended families a legal "GO PAST GO" card to legally cross the border and escape their hopelessly depressing 3rd world poor and corrupt surroundings. It doesn't matter what these babes personally prefer in terms of looks, it's the chance to make the big USA bucks that matters most. They're all gold miners, just like USA women. Good taste is not the issue. Once in a great while I see a nice looking Latina (usually NOT from Mexico or Guatemala, however!). No, I would much prefer a smart, petite and pretty Asian women any time of the day or night, and guess what..the majority of them are smart, petite and pretty, unlike your basic Mexicana/Guatemalan women.

No, try this: Universal doesn't allow a *very* high-end radio to be
tested on site, unlike other high-end suppliers, and there was a touch
of rudeness to it, which gives me pause.

> I've dealt with them
> several times and have been exceptionally satisfied.

I've dealt with them many times and have generally been satisfied,
too. But I have never bought a radio without testing the daylights
out of it at a store, and I've always bought from that store.

> This has all the
> earmarks of some kind of spite inspired hatchet job.

Best check the earmarks again.

> I don't hesitate to
> recommend Universal!

Generally I've had good experiences with them, with the last being
only fair and being disappointed with this one. Be serious -- one
doesn't plunk down this kind of coin based on a picture on a web page.

Sometimes a cab passes by and even if my stereo if off, I can hear the cab CB radio on my speakers. Someone once broadcast from outside a building into the public address system using such interference. Wouldn't that require a lot of power? How did it work?

Actually I don't blame Universal for not setting such an expensive radio on
display to be played with and scratched. Some folks let their kids play with
the radios.

Think U are probably out of luck. If its any sort of decent code
system at all, the code is probably unique to each disk.

It is highly unlikely that the ARCP-2000 is unavailable any more, as
they just updated it last July, and the TS-B2000 would be rather
crippled in a base station configuration without it. The mobile
control head is useable, but not all that convenient.

If its an original disk, you may have some luck by contacting Kenwood
and proving its not a copy. I'd guess you'd have to send the disk to
them. If it is a copy, then you've been ripped off. In the latter
case, you can buy a real copy of the software, from Amateur Electronic
Supply, according to their online catalog, for $82.99. Go here:

http://www.aesham.com/

and search for ARCP 2000.

Hello Group
I'm looking for a schematic of the ICOM OPC-478. Any help would be
appreciated.

Also, I have the Icom IC-2100H and several years ago purchased the
CS-2100 (DOS) Programing Software. ICOM sells only the OPC-478 + the
WS-2100 (Windows) Programing Software. If anyone has a copy of the ICOM
WS-2100 software to sell, I would appreciate knowing about it.

I was given a copy to evaluate of a non-ICOM version. Unfortunately,
the software crashes frequently on WIN98.

Thank you, Happy New Year to all in the group -

Ken, WB4ZOH

It's a much better idea to test the radio before you ever go into a store. Find a ham in your club that owns one and check it out. How can you possibly tell how good it is in the store? Their antenna setups can easily bias the results for example. Then of course the ARRL test reports should be consulted too. The only thing you can really tell in a store is do you actually like the looks and feel of the controls and display.

Nope just requires a few watts. The problem is that the speakers were not designed to be resistant to direct pickup of radio signals. Happens all the time. The frequencies used by CB are particularly likely to be heard on nearby speakers

The problem lays in that few are likely to buy the radio from the store. They will kick the tires, ooh and aah, and then order it on the internet or from a mail order firm. The store I worked in sold several top line radios but they were to locals who wanted to do business locally and have instant access to the repair bench when needed.

We carried some on demo but they were loaners from the manufacturers and we did not have to sink capital into the rig. Collins, Drake, and Icom were always amiable to this arrangement. Other manufacturers would put a radio in our showroom for a week with special pricing in effect. This was usually concurrent to the week before a major area hamfest.

OooooooohKaaaaaaay......Most curious. How about removing each halogen lamp one at a time to see if its all of them or just one.

If it turns out ALL of the lamps are causing the noise, then you may be stuck unless you come up with some sort of filtering.

If you remove the lamps and the noise is still present I might suspect the fixtures and then try to elimimate them one by one.

It is quite strange that halogen bulbs would be causing any type of noise. All of the halogens I have ever seen are merely filament type bulbs incased in a quartz bulb. No triggering circuits or anything like that.

If isolating each fixture and bulb doesn't narrow it down, I would suspect something else on the same circuit. I would cut it off at the circuit breaker and see what loses power, then turn the power back on and start disconnecting everything on that circuit.

Once I was getting a high noise level on an AM radio. Could not figure out what was causing it. I noticed when I turned ON a ceiling fan light in the kitchen the noise when away. When I turned the light off, the noise returned. I cut the circuit breaker to the ceiling fan and light and the noise was still there. What I eventually found out, I had a small photoelectric nightlight on the kitchen counter. The ceiling fan light threw enough light on it to turn it off. The ambient light otherwise kept it in a "semi-on" state and the photocell was pulsing the scr. I solved the problem with a small piece of black electrical tape over the photo sensor. Now the light stays on all the time, but I get no noise.

You might try a small portable receiver that covers the bands that are affected. Bringing it closer to the suspected sources of the noise may

help you locate its source and determine whether in fact it is the halogen lights you suspect.

Good luck.

Gentlemen, gentlemen, with all your horror stories you will frighten Martin
in to giving up amateur radio.
We need to answer his questions, and to do that we need to define the
problems, as I see it they are
1 Is his supply PME, and if so what is to be done about it, and what is to
be done to separate the RF noise from the mains, and the mains earth.
2 The RF earth lead could be a resonant length on some bands giving high or
low impedances and voltages, what can be done about it, or even does he need
an RF earth connection at all. What can he do to ensure that no high voltage
RF conductors can come into contact with anyone.
3 What can he do about lightening protection.
4 What can he do to ensure he does not create TVI or BCI to his neighbours.
All of the forgoing questions can be answered, but Martin deeds to supply a
few more details about
his home and surroundings.
some of the questions are as follows:
Is he in the UK if not where is he.
What kind of electricity supply does he have, overhead or underground
feeder, is it PME,
Is his building a high rise block, if not what type/height is it.
Where are the antenna's going to be mounted, on his building or on separate
self supporting structures or other buildings.
Are the antenna's and feeders going to be coax, balanced, or end, fed. Are
they resonant, broadband, or tunable.
Can he use an RF earth or counterpoise.
Martin wants the safest, cost affective solutions for his installation. All
of the problems and hazards are curable with a little care, and he will
still have a suitable and sensitive installation.
I recommend he obtains a copy of the RSGB book "HF antenna collection" which
has the Peter Chadwick article "the Killing ground" reproduced in it.
Another version is in the RSGB Book "The radio amateur guide to EMC.
This reply is already too long so I will put more answers regarding ELCB's
and RCCD's and PME in another email.

Are these halogen bulbs 120VAC bulbs or is there a transcormer or a
switching power supply somewhere? If they are directly fed by the 120VAC,
change out the switch, you might have a bad contact and it may be arcing.
ALSO .... check your connections, make sure your wirenuts are tight etc
etc... again, you might have some arcing going on.

Correct me if I'm wrong ...Halogen lights, small in size, BRIGHT light, but
they draw more current than a regular ol light bulb. I havent tinkered with
any so I really dont know anything about the current draw difference.

They have yet to "DO" me and they haven't done Mr Chadwick! Nor his wife
when as I remember him telling me she told them where to go when they
did try to provide PME at his home.

The Earth at your premises is YOUR responsibility not the Local supply
companies! And they will either refuse to connect on a new installation
- or disconnect on an old installation if it doesn't meet the required
standard.

From someone with the PME disconnected for ever!

AND Someone who knows!!

10 dB over S9 here in Utah. But I gotta turn it off before I vomit
from listening to YET ANOTHER whacked out bible beater.

I shouldn't worry about it, anyone who can get so worked up and excited
about a NG posting is more likely to have a heart attack or stroke than be
electrocuted.

Calm down, Lan.

...And if you had bothered to notice, there are enough amateur operators over there already..... Some don't use their calls, but it's obvious that they are (especially the ones announcing local meetings with a 2m talk-in freq.).
